Re: DMEA-3355 (Uranium)
Neptune Uranium Corp.
Shamrock Group
Montrose County, Colorado
Contract Idm-E703

Attention: Mr. F. M. Murphy, Acting Chief
Division of Minerals

Gentlemen:

This is in reply to your letter of October 11, 1963. The mining claims referred to were quit claimed by us to Donald K. and Keith M. Andrews of Nucla, Colorado on August 16, 1963 and the deed was recorded in the county court house at Montrose, Colorado on August 21, 1963.

The lease on these mining claims which was held by Neptune Uranium Corporation expired February 1, 1959 and was not renewed. To the best of our knowledge there has been no activity on these claims except assessment work since that time.

Your MME form 63 has been forwarded to Donald K. Andrews of Nucla, Colorado with the request that he complete it and return it to you.

Very truly yours,

MICRO COPPER CORPORATION

Ellis R. Cook, Jr.

RE: SHAMROCK GROUP
DMEA *3355 Uranium

Dear Mr. Murphy:

I ambreturning to you two copies of your letter of September 4th relating to ouf past operations on the Shamrock Group.

Micro Copper Company, Moab Utah now own or control the claims we has under lease until 1959. We have nothing whatsoever to do with them at this time.

Neptune Uranium has one valid claim OUTLET which covers ground the former owners moved corners on after our lease from Andrews of Nucla was entered into by us. We have not made production during the last 3 years anywhere.

Yours truly,

Lowell A. Griffith

RE: SHAMROCK GROUP
DMEA 3355

Dear Mr. Griswold:

Our Neptune Uranium Corporation operated this group under lease without profit. On expiration of the lease several changes were requested by us such as royalty reduction on various grades of ore but we were refused.

Micro-Copper of Moab Utah, Ellis Cook secretary cancelled us out completely in 1959 or 1960 and refused negotiations since. The property has been idle since.

Our company hold title to locations covering up the open parcels of this group. With the rejection of our 2nd DMEA drilling loan on this ground we were unable to reach sufficient ore bodies to operate. The ore in this region seems small but of good grade. Being costly to mine.

Very truly

Lowell A. Griffith

1/ Mill 11 is Union Carbide Nuclear at Uravan, Colorado
Mill 15 is Vanadium Corporation of America at Naturita, Colorado

2/ Liquidation No. 0108 is entered in AEC production records as 20.62 tons. This figure is derived from a summary of ore receipts furnished the AEC by the mill. The settlement sheet furnished with DMEA royalty payments shows only 13.8595 tons; however, the load detail accompanying this settlement sheet indicates that 13.8595 tons was only a part of the ore received in November 1957, and that the total shipments for the month came to 20.62 tons, the figure reported to the AEC by the mill. The discrepancy will be investigated.

3/ Liquidation No. 0116 covers a lot of 14.991 tons (liq. No. 1255) reported to DMEA in December 1957, and a lot of 29.2125 tons reported in January 1958.

			6,035.24
			18,525.12

% of Revised Reserves Mined 11.36

1/ Additional reserves based on operator's estimates. DMEA field examiners who made examination on operator's later application under Docket DMEA 4144 consider that a conservative estimate of additional reserves would be 500 tons rather than 4,000 tons.

Production Remarks: Ore shipped to date has come from deposits found before the DMEA project was carried out.

Note: On Uranium projects check with AEC to assure that our records are in agreement with theirs.

2/ Figures for period 9/9/54 through 6/30/55 based on settlement sheets furnished by operator and checked against AEC production records. There is an indicated discrepancy of 8.83 tons (see table 1).

Figures for period 7/1/55 through 6/30/56 based on AEC production records only.

Other Remarks: The estimate of an additional 4,000 tons reserve reported by the operator was based on a drill hole spacing of 50 feet, and on ore thicknesses estimated from the rotary non-core drilling results. It was assumed that mineralization was continuous from hole to hole. Erratic geographic and stratigraphic distribution and small size of individual ore bodies exposed on the property leads to conclusion that mineralization on which the operator based the reserves will prove to be similar to those previously mined, and a conservative estimate of additional reserves will not exceed 500 tons.

The project is active at the present time with continued small production after a recess from February to May 1956. Part of the area is presently tied up in litigation with the owners of the adjoining Eclipse claim. A portion of the area in which Government assisted exploration was done is involved.

Signed R. Houseknecht for (Engineer)
M. H. Salsbury

VCA denotes Vanadium Corporation of America mill at Naturita, Colorado
Climax denotes Climax Uranium Company mill at Grand Junction, Colorado

2/ Mill payment and DMEA royalty on Lot 5842 cover that portion of this shipment made after September 9, 1954, the date of DMEA contract Idm-E703.

RECEIVED
OCT - 9 1956

3/ Only a portion of Lot 1634 was entitled to AEC bonus because maximum amount of U_3O_8 for which bonus is paid was exceeded by this shipment.

4/ AEC production records show a shipment of 27.55 tons of ore from the Shamrock 3 claim made in November 1954 to the Vanadium Corporation of America mill. No liquidation number is shown. There is no corresponding shipment in the settlement sheets furnished by the operator. The operator furnished a settlement sheet for Lot 9A, VCA lots 44446 and 44320, covering deliveries from the Piper No. 1 claim on October 29 and November 15, 1956, totaling 18.72 tons. The AEC records do not show a shipment corresponding to this tonnage. The difference between the operator's lot 9A and the AEC record is 8.83 tons of ore containing 45.77 pounds U_3O_8 and 535.00 pounds V_2O_5. These amounts are identical with an entry in the AEC records credited in December 1954 to the Piper No. 1 claim which was later cancelled. Presumably it was credited instead to Shamrock No. 3 claim as part of the 27.55 tons shown. The 8.83 tons may have been a shipment made prior to the effective date of contract Idm-E703 (September 9, 1954).

ORE SHIPMENTS BY NEPTUNE URANIUM CORPORATION MADE BETWEEN JULY 1, 1955 AND JUNE 30, 1956 ACCORDING TO A.E.C. PRODUCTION RECORDS

I certify that I am the lawful owner or authorized Representative of the Lawful Owner, of the ore described in this settlement sheet and have legal right to deliver the same to the Vanadium Corporation of America. I certify that I hold A.E.C. Source Material License numbered above. I hereby transfer to the Vanadium Corporation of America, effective as of the date of delivery of the ore, all my right, title and interest in and to said ore. I agree to save Vanadium Corporation of America harmless in the event my right to convey title is contested for any reason. I will accept the amount as shown above as "Total Gross Value" in full settlement.

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: Royalty Payment - DMEA Docket 3355, (Uranium) Contract Idn-E703, Neptune Uranium Corporation (Formerly Lowell A. Griffith Associates) - Colorado SUSPENSE ACCOUNT

Enclosed are settlement sheets covering ore shipped by Griffith Uranium Co. under Liquidation Numbers 5842, 5852, VCA 43907, 5914, 5919, VCA 44446 & 44320, 5930, 5959, 5960, 5981, 5980, 6001, 6000, 6025, 6026, 6039, 6040, 1634, 6062 and 6079.

Check in the amount of $683.93 in payment of royalty due on these shipments was forwarded to your office on May 31, 1955 to be placed in the Suspense Account and should now be credited to Royalty Repayments.

Check covered all royalties due except $5.97 on Liquidation No. 6062 and the full amount of royalty due ($15.27) on Liquidation No. 6079. It also includes all of the A.E.C. Bonus royalty payment.

The amount of $21.24 has been requested from the operator to make the account current.

Subject: Application for Bonus Payment - D.O.F. 06-3-32

Gentlemen:

This office is in receipt of three applications for bonus payment, two of which were dated March 28, 1955 and the other dated April 13, 1955. These applications were in the amounts of $329.73, $1,478.14, and $782.42. We are returning these applications to you for the reason that there are only 86.48 pounds U308 remaining eligible for bonus payment. This matter was explained to Mr. W. E. Griffith in a telephone conversation on April 14.

A schedule is attached listing the chronological sequence of dates for a portion of the shipments during the period of January 15 through January 31, 1955. These shipments listed are more than sufficient to use up all remaining bonus. Since shipments were made by both the Griffith Uranium Company and Mal Pais Mining Company on January 24, 1955, the date the bonus plays out, it is necessary that we prorate on a percentage basis the number of pounds U308 entitled to each company. It is believed that the schedule is self-explanatory.

There is also prepared and enclosed an application for bonus payment, covering the portion of the remaining balance due your company. This application requires only the signature, date, and title of the individual signing. When this application has been completed please return it to this office where it will be placed in [illegible] for payment.

Very truly yours,

Frank W. Baldwin

Frank W. Baldwin, Acting Chief

Re: Royalty payments, DMEA Docket 3355 (Uranium) Contract Idm-E703, Neptune Uranium Corporation (Formerly Lowell A. Griffith Associates) Montrose County, Colorado

Dear Mr. Griffith:

Under separate cover we are returning your complete royalty file which was loaned to this office for duplication.

We have calculated royalties due under Contract Idm-E703 and are enclosing a copy of our calculation sheet.

According to load detail accompanying Lot No. 5 (Liquidation No. 5042 - Sept 21, 1954) part of shipment was made prior to the date of Contract Idm-E703 (Sept 9, 1954) and part after this date. We have therefore calculated DMEA royalty on the applicable portion of this shipment and are furnishing you herewith a copy of our calculations.

The end of A.E.C. Bonus Payments is established by letter to you from the Atomic Energy Commission dated April 15, 1955.

A recapitulation of this royalty account as evidenced by settlement sheets furnished by you is as follows:

Royalty due to date - - - - - - - - - - - - -	$619.04
A.E.C. Production Bonus royalty due - - - - -	220.03
Total Royalty - - - - - - - - - - - - -	$839.07
Less royalty payment by mill (Liq. No. 6095)	$ 63.69
Less royalty payment by mill (Liq. No. 6114)	71.01
Less payment by Lowell A. Griffith Associates	683.93
Total Royalty payment to date - - - -	$818.63
Additional Royalty Payment due	$21.24

RECEIVED
JUL 11 1955

Please send a check in the amount of $21.24 to the Executive Officer, DMEA Region XII, Room 224 New Customhouse, Denver 2, Colorado in order that this account may be brought current. All royalty payment checks are to be made payable to the Defense Minerals Exploration Administration.

Very truly yours,

W. M. TRAVER,

W. M. Traver

Central City, Colorado

Dear Sir:

Upon examination of the above Payee's Reference a difference was found which made it necessary to suspend your account accordingly:

Amount Claimed	$ 350.00
Difference	$ 215.70
Amount Approved	$ 134.30

The reason for the difference was due to:

99 feet @ $1.30 per ft. disallowed in accordance with MRA Auditors final report of March 1955	215.70

Any reclaim for deductions made above must be supported by the ORIGINAL of this form.

Very sincerely yours,

N. E. Stokes

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: DMEA Docket 3355 (Uranium), Contract Idm-E703, Lowell A. Griffith Associates, Shamrock group, Montrose County, Colorado - Operator's Monthly Report for the month of December, 1954 - FINAL PAYMENT

Enclosed are the original and four copies of Form MF-104 and MF-104A, Narrative Report, and Engineer's Report for the above period.

Work has been completed as authorized by the contract, and the operator has complied with all requirements; therefore, we recommend that final payment be made on the following basis, which is in conformance with the Report of Review by the Contract Administration and Audit Division, dated April 5, 1955.

Basis for Final Payment

Total accepted cost.....	$16,305.00
Government participation at 75%.....	12,228.75
Total prior payments.....	12,128.02
Balance due the Operator	$ 100.73

Memorandum

To: Executive Officer, DMEA Field Team, Region III

Through: John F. Shaw
Project Supervisor

From: M. H. Salsbury

Subject: DMEA 3355, Contract Idm-M703, (Uranium), Lowell A. Griffith Associates (Shamrock group), Montrose County, Colorado - Supplemental Progress Report for December 1954

Drilling under the subject contract was actually completed in November 1954, and the claim made in December 1954 was for chemical analysis of 50 samples in the amount of $250.00, which was approved for payment in a memorandum to the Executive Officer, Field Team, Region III, dated December 27, 1954.

However, an audit of the hole logs and other data submitted by the operator in the final report, and comparison with data submitted with the three monthly narrative reports, reveals differences between footages claimed in a number of drill holes and the logs of these holes. In addition, one hole has been claimed and approved for payment twice.

The amount of the December claim approved for payment, $187.50, or 75 percent of $250.00, has been withheld pending final audit and more than covers the overpayment which has been made for drilling.

Following is an analysis of the drilling footages reported:

Progress in each month	Drilling footage claimed feet
September 1954	2,189
October 1954	6,393
November 1954	3,985
Total footage claimed	12,567

Deductions made in November progress report:

Hole No.	Coordinates E	Coordinates N	Depth in feet by log	Depth in feet claimed	Month claimed	Difference claimed over log + claimed under log -
M-161	8500	8100	58	53	October	-5
M-77	8500	9600	69	67	October	-2
M-61	9700	9600	60	75	October	+15
M-45	9800	9700	120	120	October	+120 (unauthorized)
Total deducted from footage claimed in November 1954						128

Footages for which payment has been approved and made:

September 1954 (as claimed)	2,189 feet
October 1954 (as claimed)	6,393
November 1954 (November claim less deduction for audit differences in October) 3,985 less 128 feet	3,857
Total footage approved and payment made on	12,439 feet

Following are additional deductions to be made in line with the audit of March 22, 1955:

Hole coordinates E	Hole coordinates N	Depth in feet by log	Depth in feet claimed	Month claimed	Difference in feet (claimed over log)
9200	10200	60	70	September	10
9400	9300	60	65	October	65 (this hole was claimed previously in September as 60' deep)
9400	10000	100	108	September	8
9500	9500	58	59	September	1
9500	10200	63	68	September	5
Total footage to be deducted as a result of March 1955 audit differences					89 feet

Summary:

Amount of claims for which operator is entitled to payment as of March 21, 1955:

Rotary drilling 12,350 feet at $1.30 per foot	$16,055.00
Chemical analysis of 50 samples at $5.00 each (December 1954 claim)	250.00
Total claims	$16,305.00

Government participation at 75 percent		$12,228.75
Payments made:		
September 1954	$2,134.27	
October 1954	6,233.17	
November 1954	3,760.58	
Total of payments made as of March 22, 1955		12,128.02
Balance due operator as of March 22, 1955		$ 100.73

Note: Final payment of $100.73 should be made in lieu of $187.50 withheld from December 1954 claim.

To: Executive Officer, Field Team, Region IV

From: Chief, Mineral Resources Branch, Mining Division, Region IV

Subject: DMEA 3355, Contract Idm-E703 (Uranium), Lowell A. Griffith Associates (Shamrock group) Montrose County, Colo. Progress report for December 1954

Enclosed are the original and four copies of the subject progress report, the fourth and final one--forms MF-104 and MF-104A only, and the original and six copies of this memorandum covering checking of the reporting forms.

The report consists only of the MF-104 and MF-104A forms and constitutes the claim with explanation typed on the MF-104 form for the analyzing of 50 samples at the unit cost of $5.00 or a total of $250.00 as allowed by the contract. The claim is supported by a receipted invoice from the Minerals Assay Laboratory and the analyses, incorporated in the final report, are acceptable. Additional analyses are not considered necessary.

Payment is approved and certified on the MF-104 forms of $187.50 or 75 percent of the total, $250.00 claimed by the contractor.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Memorandum

To: Executive Officer, DMEA Field Team, Region IV

From: Chief, Mineral Resources Branch, Mining Division, Region IV

Subject: DMEA 3355, Contract Idm-E703 (Uranium), Lowell A. Griffith Associates (Shamrock group) Montrose County, Colorado--Progress report for November 1954

Enclosed are the original and four copies of the subject progress report, the third one--forms MF-104 and MF-104A, with narrative, progress map, tabulation of estimated drilling depths, statistical summary, drill hole logs, and the original and six copies of M. H. Salsbury's memorandum covering his inspection of the rotary drilling progress and checking the reporting forms. The contract is unit cost on short form MF-200A and documentation is not required.

Salsbury inspected the project progress for November on December 8, 1954, and confirmed the rotary drilling claimed by the contractor for the period of 3,985 feet in 47 holes, of which 44 holes were barren, two intersected high-grade ore, and one intersected mineralization. This was as reported in the narrative and shown on the reporting forms. Work performance was in accordance with the terms of the contract.

A check was made of project drilling to date, disclosing discrepancies in footages and non-authorization of one hole location making the basis for the disallowances for 128 feet of drilling at $1.30 a foot, or $166.40. Seven hole locations were inaccessible and were not undertaken. The amount disallowed subtracted from the November claim of $5,180.50 leaves $5,014.10 approved for payment as explained in the engineer's covering memorandum.

Payment is recommended and certified on the MF-104 forms of $3,760.58, or 75 percent of the $5,014.10 approved.

UNITED STATES
DEPARTMENT OF THE INTERIOR
BUREAU OF MINES

Region IV

Building 20, Room 137
Denver Federal Center
Denver 2, Colorado
December 14, 1954

Memorandum

To: Chief, Mineral Resources Branch, Mining Division, Region IV

From: M. H. Salsbury

Subject: DMEA 3355, Contract Idm-M703 (Uranium), Lowell A. Griffith Associates (Shamrock group) Montrose County, Colorado—Progress report for November 1954

Operations under the subject contract were inspected on December 8, 1954, in company with the operator's engineer.

The operator claims payment for 3,985 feet of rotary dry-drilling in 47 holes at $1.30 per foot or $5,180.50 for November 1954. Of these, 44 holes were reported to be barren, two in high-grade ore, and one mineralized.

The general area drilled in November was visited by the inspecting engineer and one of the ore holes, No. H-119, at coordinates 8,700 E. and 8,600 N. was reprobed. This hole showed a count on a Babbel instrument of 60 to 70 points on the third scale, equivalent after correction, to approximately 1.13 percent U_3O_8. The depth was from 52.5 to 53.5 feet. The Geological Survey reported probing results on this hole of 1.40 percent U_3O_8 from 53.6 to 54.2 feet.

Hole No. H-104 at coordinates 8,700 E., 8,900 N. was reprobed during the October inspection.

The operator submitted in quintuplicate, forms MF-104 and MF-104A, a narrative report, with map and drill logs. All are satisfactory and monthly totals are correct. An audit of the entire project was made, checking hole depths in the drill logs against the depths given in the list of footages claimed, and checking actual hole locations against locations authorized under the contract. All holes were drilled at authorized locations except hole No. H-45, 120 feet deep, at coordinates E. 9,800, N. 9,700, claimed in October, 1954. This hole was originally proposed by the operator but was deleted in the contract. Seven holes were omitted because of inaccessibility. Other minor differences were found as listed below:

Authorized drilling--171 holes	13,508 feet
Holes drilled and claimed --164 holes	12,567 feet
Audit differences (see below)	- 128 feet
Footages for which payment can be made under the contract--163 holes	12,439 feet

HOLE No.	COORDINATES N.	E.	DEPTH feet (Actual by log)	DEPTH feet (Claimed)	DIFFERENCE feet (Over +, under-)
N-161	8500	8100	58	53	- 5
N- 77	8500	9600	69	67	- 2
N- 61	9700	9600	60	75	+ 15
N- 45	9600	9700	120	120	+120 (unauthorized)
Total deduction for footage claimed in excess of drill log records, and for unauthorized hole No. N-45					128

The project has now been completed with the exception of analyzing cutting samples taken from mineralized sections of the holes. The operator is preparing these samples for analysis, results of which will be submitted and a final claim for payment made.

Robert Boardman, the Geological Survey project chief at Uravan, Colorado, has stated that the cutting samples taken during the project are of no further interest to them, and, as they are not wanted by the Bureau of Mines, permission was given the operator to dispose of all but the mineralized portions, splits of which are to be delivered to the Geological Survey office in Uravan, Colorado, to be picked up later by the Bureau of Mines.

The Geological Survey has probed, or intends to probe, most of the holes drilled under this contract and the operator will furnish all information received from them in the final report.

Payment of $3,760.58, is recommended, or 75 percent of the amount claimed in November, 1954, $5,180.50, less $166.40, previously claimed for 128 feet of drilling which is recommended for disallowance, as a result of an audit of drilling reports.

Signature W H King Title Executive Officer Date DEC 17 1954

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Date Dec. 2, 1954 Operator Lowell A. Griffith Associates.

Per Paul H Keating Title Attorney-in-fact.
Paul H. Keating

REMARKS: The drilling of some holes was not even attempted, due to impossible access within reasonable expense. A total of 164 holes has been completed.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

NARRATIVE REPORT FOR NOVEMBER 1954

Docket $3355; Contract Idm-E703

Lowell A. Griffith Associates
Carpenter Flats, Montrose Co.
Colorado.

(URANIUM)

The drilling portion of this contract was completed November 20, 1954.

Drilling for November (only) included 47 holes completed. Forty-four were blank; two showed high-grade ore, and one showed definite mineralization. The gate-fold map bound herewith marks these three holes in color along the 8700 co-ordinate East, and between 8600 North and 9000 North.

The logs of all holes, and the probe data of the mineralized holes are enclosed in the pocket in the back cover of this binding.

The total footage drilled was 3985 ft. The average depth of hole was very close to 85 ft.

The Voucher and Progress report forms MF-104 and MF-104A for November are attached.

Under a separate binding, there will be submitted to your office, within a very few days, a complete summary of this entire operation. With that report will be included Barnaby-counter data and chemical analyses, and split samples of the drill hole cuttings.

Very truly yours

Paul H. Keating

Subject: DMEA 3355, Contract Idm-E703 (Uranium), Lowell A. Griffith Associates (Shamrock group), Montrose County, Colorado--Progress report for October 1954

Enclosed are the original and four copies of the subject progress report, the second one--forms MF-104 and MF-104A, with narrative, progress map, tabulation of estimated drilling depths, statistical summary, drill hole logs, and the original and six copies of M. H. Salsbury's memorandum covering his inspection of the rotary drilling progress and checking the reporting forms. The contract is unit cost on short form MF-200A and documentation is not required.

Salsbury on an inspection made November 4, 1954, confirmed the rotary drilling progress of 6,393 feet in 87 holes, making a cumulative total to date of 8,582 feet in 117 holes. The advance is correctly reported in the operator's narrative, shown on the progress map and entered on the MF-104A forms. Other entries and extensions on the reporting forms are correct and work was performed in accordance with the terms of the contract. The inspecting engineer adequately describes the month's operations. Ore has been encountered in sufficient holes to assume a Certification of Discovery or Development and when analyses are received, a reserve estimate should be forthcoming from the operator.

Payment is approved and certified on the MF-104 form of $6,233.17 or 75 percent of this total $8,310.90 claimed by the contractor.

November 12, 1954

Memorandum

To: Chief, Mineral Resources Branch, Mining Division, Region IV

From: M. H. Salsbury

Subject: DMEA 3355, Contract Idm-E703 (Uranium), Lowell A. Griffith Associates (Shamrock group), Montrose County, Colorado -- Progress report for October 1954

Operations under the subject contract were inspected on November 4, 1954, in company with the operator's engineer.

The operator claims payment for 6,393 feet of Porta drilling in 87 holes at $1.30 per foot, or $8,310.90.

Locations of certain of the drill holes were visited by the inspecting engineer, including the current drill site.

The sampling techniques had been changed to take representative samples of each 5-foot interval drilled, cutting them down to about 10 pounds each. These are placed in paper sacks and stored for inspection by Government representatives, if required. The procedure is satisfactory. The considerable total bulk of the samples creates a storage problem. When they have been inspected by DMEA representatives, it is recommended that the operator be permitted to discard all but those showing significant radiometric count.

The operator reports 62 barren holes, 16 with a trace of mineralization, 2 with ore grade material and 7 high-grade holes.

Drill logs of the 87 holes drilled were furnished by the operator together with probing data on the 25 holes which exhibited any radioactivity whatever. Location of all holes is shown on a map accompanying the narrative report. With the exception of 1 hole on the Piper No. 1 claim, and 3 holes on Shamrock No. 2, all mineralized holes reported to date are on Piper Nos. 2 and 3. They are grouped to indicate an ore body, and a reserve can probably be estimated by evaluating the results. The depth to mineralized strata in different holes indicates that mineralization changes suddenly from one horizon to another, which may complicate later mining operations.

DMEA 3355, M703
11/12/54

The following holes were reprobed in the presence of the DMEA inspector:

Hole No.	Coordinates N.	Coordinates E.	Depth Measured by inspector	Depth Reported by operator	Radio-metric equivalent percent U_3O_8	Location of radioactivity feet
M-156	8,200	8,100	88	90	>.20 maximum count .80	57.8-59.5
M-159	8,100	8,300	50	54	>.20	20.0-20.7
M-153	8,200	8,400	58	60	>.20	49.5-50.5
*M-104	8,900	8,700	91.7		>.35 maximum count .35	70.4-70.8

*M-104 was drilled on date of inspection and is not included in list of holes with October report

It will be noted that the reported depth in several instances is a few feet more than the depth measured by the DMEA inspector. This can be accounted for by some caving in the holes which are not cased at any point.

The Geological survey probed a few of the holes in October and were scheduled to continue sometime in November.

No chemical analyses have been made to date.

The operator submits for October 1954, a satisfactory narrative report with map, including drill logs and forms MF-104 and MF-104A in quintuplicate. Monthly and cumulative totals are correct. All work was done in accordance with the terms of the contract and is within allowable maximums.

Payment of $6,233.17 or 75 percent of the amount claimed in October 1954, $8,310.90 is recommended.

L. D. Everett, for
M. H. Salsbury,
Mining Engineer

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature W. H. KING Title Executive Officer Date NOV 18 1954

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MINING ENGINEER

Report

The exploration contract on this area will be completed on or about November 15-20th, 1954. The preceding summary indicates sufficient showings of ore in the drill holes to assure re-payment of the DMEA assistance. The attached maps and logs and tabulations include complete details of October operations.

The map, with colored legend, concerns October operations only. On the final report (for November 1954), the completed colored map of the entire program will be submitted.

The original logs of the holes drilled have been arranged in sequence upon 18"x24" sheets, and photographed. They read from left-to-right, and from the most southerly hole drilled to the most northerly hole. The co-ordinates of each hole are on each log, in terms of East, and North. A brief inspection of these 18"x24" prints will quickly show the pattern of their arrangement. This presentation makes available the logs of all holes to all agencies interested, for further study.

(There are technical problems concerning these logs which will be discussed a page or two below).

The "tabulations" attached show the actual depth immediately opposite the estimated depth on the original application-report. On the holes drilled the total estimated depth was 6388 ft.; the actual total is 6393 ft. (This is for October operations only). The driller was instructed to drill to the red-clay bottom, without estimate of depth.

PAUL H. KEATING
MINING ENGINEER

LOGS AND SAMPLING

The contract calls for samples in "waste" rock, at every 5 ft., and in "ore", or "mineralization" at every 1 ft. interval. It also required a "Duclone" sampler, manufactured by the Dust Control Corporation, of Mineola, Long Island, New York, (The company advertises in the technical journals as "DUCON", although on their gadget is plainly written "DUCLONE").

It has been the letter and spirit of the principals of this Contract Idm-E703: "We comply, and get the DMEA assistance; or we do not comply, and don't get it". It is as simple as that! So --- :

We hired a contractor to drill the program, but demanded that he install a "Duclone" sampler. This he did, from the S&M Supply Co., of Grand Junction, which is the local agent for that piece of equipment. We agreed to pay half the total cost of about $360, (or about $180 each).

This required "gadget" reduced the dust-problem for the workmen on the drilling machine, BUT IT COMPLETELY FRUSTRATED THE PURPOSE OF THE DRILLING PROGRAM!

Carnotite occurs in "lenses", of highly variable thickness. It "feathers out" within short distances of a yard, or a foot. A 3" streak of valuable ore is completely missed by the driller because the cuttings are accumulated into the Duclone tank along with the waste rock lying immediately above

PAUL H. KEATING
MINING ENGINEER

a thin streak of ore.

The streak itself may not be thick enough to mine, but it is an important indicator, and would qualify that particular hole for "development" drilling, or encircling by a ring of holes on shorter centers.

Meanwhile, these thin streaks of mineralization are highly diluted for assaying, and, I believe, are sometimes missed entirely.

The original attempt to keep the probe of a Babel counter in contact with the dust stream at all times met with many practical difficulties. Hence, the assays or "probe data" attached (in the flap container), were obtained by the Babel probe after the holes were drilled. The readings given on the "Probe Data" forms herewith are the actual scale readings; the percentage is the radiometric value given by direct comparison with standards of known value. The manufacturer of the Babel counter has advised us that in a 4¼" hole probing, the "distance factor" should increase the readings up to .03% U_3O_8. The chemical assays of the cuttings selected have not yet been returned, but are en proces.

There is a large number of samples on hand. The total cuttings production from 14,000-plus ft. of 4¼" drilling amounts to several tons --- approximately 140 tons altogether. On total-waste and split-samples of

each 5-ft. interval requires nearly three thousand sample containers, upon each of which must appear the co-ordinates of the hole, and the interval from which the contained sample was a statistical average. Add to this the 1-ft. intervals at which samples are taken in mineralized zones, (which on this contract occurs in about 30% of the holes drilled). The total adds up to more than ten thousand entries on the sample containers; 750 pounds of cuttings in about 3000 containers per set. Most of these samples are waste rock, and are "statistical" only over 5 ft. intervals. Small "key beds" of blue mudstone, copper stain, etc. are lost for subsequent study and interpretation.

The mechanical chore of splitting 140 tons of cuttings, and recording the required data requires a great many man-hours of time, on the part of expensive personnel with engineering training, whose voluntary "responsibility to accuracy" is paramount. However,

This chore is being done as rapidly as possible, and the containers-enclosing-samples will be taken, assays made, and the totals reported along with the samples upon the termination of this contract. (May I suggest that a storage problem might be involved upon delivery of the samples).

PAUL H. KEATING
MINING ENGINEER

On the reverse side of Form MF-104, Rev. April1952), there is invited a description and expression of the contractees, under "c" of the first paragraph of that form.

It is the spirit and intent of this Contractee to comply with the terms of the contract. HENCE:

The foregoing narrative report is not offerred as objections in certain areas of effort. It is simple reporting of the problems and "difficulties" requested in such a narrative report.

Very truly yours,

LOWELL A. GRIFFITH ASSOCIATES

TOTAL: 16,000 ft.

The above co-ordinates refer to a certain "Triangulation Point", established by the U.S.G.S., about 500' northerly from the East ¼ Cor. of Sec. 15, Twp. 48N, R. 18W, N.M.P.M., in western Montrose Co., Colorado. This "point" is a capped and labeled iron pipe, set in sandstone at the high point of a ridge in the area concerned. It is marked on the maps accompanying this report.

This Triangulation Point has been arbitrarily chosen as a reference point in this survey and report. Its assumed co-ordinates are 10,000' North, and 10,000' East.

It is uniformly indicated on the attached folio of maps by an equilateral triangle "△".

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region IV

Subject: DMEA Docket 3355 (Uranium), Contract Idm-E703, Lowell A. Griffith Associates, Montrose County, Colorado. Operator's Monthly Progress Report for the month of September 1954.

Enclosed are the original and four copies of Form MF-104 and MF-104A, Narrative Report, and Engineer's Report for the above period.

Work has been completed as authorized by the contract. No documentation is required for work performed under contracts prepared on Form MF-200A, therefore we recommend that payment be made for 75 per cent of the amount reported by the Operator on Form MF-104, contingent on your verification of arithmetical accuracy within the report.

Your attention is directed to the Power of Attorney, dated September 19, 1954, designating Paul H. Keating as agent of the partnership to receive and receipt for moneys due the partnership by reason of contract Idm-E703.

Remarks:

Date of operator's report	10-1-54
Date report received in B.O.M. field office	10-4-54
Date report received in Regional office	10-15-54

October 14, 1954

Memorandum

To: Executive Officer, DMEA Field Team, Region IV

From: Chief, Mineral Resources Branch, Mining Division, Region IV

Subject: DMEA 3355, Contract Idm-E703 (Uranium), Lowell A. Griffith Associates (Shamrock group), Montrose County, Colorado--Progress report for September 1954

Enclosed are the original and four copies of the subject progress report, the initial one--forms MF-104 and MF-104A, with narrative, progress map, tabulation of estimated drilling depths, statistical summary, drill hole logs (one copy)--and the original and six copies of M. H. Salsbury's memorandum covering his inspection of the rotary drilling progress and checking the reporting forms. The contract is unit cost on short form MF-200A and documentation is not required.

Salsbury inspected the project October 6, 1954, and verified the 2,189 feet of rotary hole drilling in 30 holes, as reported in the operator's narrative and entered on the MF-104A forms. He describes the period operations satisfactorily in detail as does the operator and found the work being done in conformance with the terms of the contract. Entries and extensions on the reporting forms are correct.

Payment is approved and certified on the MF-104 forms of $2,134.27, or 75 percent of the total $2,845.70 claimed by the contractor.

Memorandum

To: Chief, Mineral Resources Branch, Mining Division, Region IV

From: M. H. Salsbury

Subject: DMEA 3355, Contract Idm-2703 (Uranium), Lowell A. Griffith Associates (Shamrock group), Montrose County, Colorado--Progress report for September 1954

Operations under the subject contract were inspected on October 6, 1954, in company with Lowell A. Griffith, superintendent for the operator.

The operator claims payment for work starting on September 21, 1954, consisting of 2,189 feet of dry rotary drilling in 30 holes at a unit cost of $1.30 per foot.

Locations of holes already drilled and the current drilling sites were visited by the DMEA inspector. The hole locations have been surveyed and plotted on a map, are tabulated in the narrative report, and are satisfactory. Procedure for marking and preserving the hole is satisfactory: The marking stake for each hole is cast into a concrete plug manufactured on the site and the hole is fairly well protected but not sealed. The holes probed in the presence of the inspector were several feet shorter than the reported depth, but this was not surprising in view of the recent heavy rains in the area which must have carried a certain amount of sand and mud into many of them.

The operator has radiometric probing equipment and the results of probing were reported, together with one set of hole logs. Four holes in which some mineralization was reported were reprobed with the inspector present. The radiometric readings and the depths to the mineralized horizon substantiated the reported data. In the hole at co-ordinates 9400E.-9500N., 1 foot of ore from 46.5 to 47.5 feet gave readings equivalent to 0.10 percent U_3O_8. In the hole at co-ordinates 9400E.-9600N., 1 foot from 45 to 46 feet gave readings equivalent to 0.20 percent U_3O_8. Holes at co-ordinates 9500 E.-9300N. and 9600E.-9400N. showed a trace of mineralization. On the day of the inspection, Geological Survey personnel was engaged in probing drill holes with their recording equipment. They expect

eventually to probe all holes which remain open. The results of this work will be furnished the operator who has stated that such data will be included in monthly narrative reports. Chemical assays of drill cuttings corresponding to the horizons which showed mineralization radiometrically have not yet been furnished.

The operator has substituted dry rotary "Porta-type" drilling for the wagon drilling specified in the contract. The inspecting engineer considers this a permissible change as rotary drilling is generally superior to wagon drilling, particularly near the limit of feasible wagon drilling depths.

Sampling techniques being employed by the drill operator were not satisfactory: the machine was equipped with a Duolon apparatus placed some 8 to 10 feet above the collar of the hole, and all of the coarse cuttings were being spilled around the collar of the hole and not lifted and recovered with the fine cuttings going through the Duolon. In addition, a sample was being taken at 5-foot intervals by taking all of the stream of cuttings for a period covering only 3 or 4 inches of drilling. This was not a representative sample of each 5 foot of strata drilled. The operator agreed to change the sampling procedure so as to save all cuttings, coarse and fine, over the interval drilled, and then reducing this sample to convenient size for storing by coning and quartering, or by use of a sample splitter.

Samples taken are being saved and stored under cover. Samples which show significant radiometric count are being divided in three parts--one for the Government, one for the operator, and one for chemical assay.

The operator submits for September 1954 a narrative report including a map showing holes drilled, and forms MF-164 and MF-164A in quintuplicate. Monthly and cumulative totals on the MF-164 and MF-164A forms are correct.

All work was done in accordance with the terms of the contract, unless sampling procedures, which are being corrected, are considered to be in violation.

Payment of $8,134.87, or 75 percent of the amount claimed in September 1954, $8,845.70, is recommended.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

URANIUM

NARRATIVE REPORT TO "DMEA"

For Operations during September 1954,

On Exploration Contract awarded to

Lowell A. Griffith Associates, under

Docket DMEA 3355,
Contract No. Idm-703

From: Paul H. Keating,
Box 163, Golden, Colo.

October 2, 1954.

Sept. 30, 1954.
Docket #3355;
Contract Idm-703

DEFENSE MINERALS EXPLORATION ADMINISTRATION
224 New Customs House, Denver 2, Colorado.

Herewith is a narrative report of the exploration for Uranium-bearing minerals under the above contract and docket number, which contract was awarded Sept. 9, 1954, to Lowell A. Griffith Associates, (a partnership).

Actual exploratory drilling started on the property concerned in the above contract on Sept. 20, 1954. The drillers are "Scott Bros., of Birmingham Alabama".

The drilling equipment itself is a modern Mayhew rotary type drill, putting down a 4¼" hole, equipped with a "Ducone" sample collector.

The specifications of the sample collector required the selection of a rotary-type rig rather than a wagon-drill rig because there is no wagon-drill outfit that has sufficient air-capacity to operate this sampling device. Therefore, on this contract, the same total footage of exploration will be obtained by rotary equipment with a Ducone sampler, instead of by wagon-drill (the air-capacities of which cannot operate a Ducone sampler).

The proposed holes have been laid out on the ground on 100-ft. centers, specified by co-odrinates. Each hole drilled has been capped by a concrete plug about 8" long, and conical in shape. Into each plug has been set a wooden stake, upon which the co-ordinates of that particular hole

DEPARTMENT OF THE INTERIOR
Defense Minerals Administration
RECEIVED
OCT 28 1954

are indelibly marked.

Samples of cuttings have been taken per the contract and letter of transmittal, to wit: At 5 ft. intervals in waste rock, and at 1 ft. intervals, or less, in mineralized zones. Mineralized hole samples are now en proces of chemical analysis, and copies of the results will be submitted in the next monthly report (for October '54). These cuttings have been divided into three units each: One for the chemical assay; one for the DMEA files; and one for the Operator's files.

A complete set of logs is also in preparation and will be submitted with the final (October) report. A resident engineer is on the ground at all times, and the originals of these logs are being made by him, or under his frequent (half-hourly) inspection of the drilling.

Radiometric control of the drilling is being made by a "Babel counter" probing unit. The probe capsule is in contact with a portion of the dust-stream, and the instrument dial is visible to the drillers at all times. Each hole showing any radioactivity is immediately blown clean, at that particular point, and samples taken at very short intervals. While the drill rig is being moved to the next location, the completed hole is immediately probed by this Babel counter, before caving or bridging can take place.

The Atomic Energy Commission has available a "Barnaby counter", which records on tape the radioactivity in a drill hole. As total footage drilled justifies the trip of this equipment from Grand Junction to the property being explored, we shall endeavor to obtain photostat copies of these charts, for inclusion in the October report. This probing service was offered by a Mr. Boardman, an AEC representative stationed at Uravan.

A statistical report is attached hereto, showing the progress and findings to and including September 30, 1954, on this exploration contract.

Also attached hereto is a "Power of Attorney" form specifying the undersigned as the Principal in financial matters pertaining to this contract.

Very truly yours,

Paul H. Keating

STATISTICAL SUMMARY
(For Sept. 1954).

Holes drilled	30
Average depth	73 ft.
Total footage	2189 ft.

Mineralized holes, per attached gate-fold map:

Co-ordinates	
9400E - 9500N	.10% U_3O_8 (radiometric)
9400E - 9600N	.20% U_3O_8 (")
9500E - 9300N	Trace
9600E - 9400N	Trace

COLOR LEGEND:

On the attached gate-fold map the following color-legend is used:

●	Blank hole	
◎	(Green)	Trace of mineralization
o	(Yellow)	Possible ore (to .10% U_3O_8)
o	(Red)	Ore. (Cuttings over .10%).
