Memorandum:

SEP 20 1951

To: Director, Production Expansion Division

Through: Director, Supply Division

From: Ferro-Alloys Branch

Subject: DMA-1975 TA-13532 Necessity Certificate for $52,489.71
Black Rock Mining Corporation
P. O. B ox 517
Bishop, California

The subject application for a necessity certificate is recommended for approval by this branch.

The following are our suggested answers to questions 16 17, and 18.

16- Page 3 of the appendix $19,660.30
All of these facilities are necessary in the exploratiom and mining activities of the company, and all are necessitated by the defense effort. They should all be certified.

17-(a) Practically all of the mechanical equipment will be valueless after five years except as junk. Some of the office equipment may have some value.
(b) See foregoing
(c) " "
(d) See foregoing
(e) Depending upon price of tungsten.
(f) Doubtful if applicant would have started operation without some tax relief.
(g) Applicant's answer is correct.

18- Applicant is world's largest processor of tungsten ore. A large part of the tungsten supply for industry and the defense program depends upon the activities of the Wah Chang Corporation

The application should be given every consideration. Attention is called to the telegram from Byron D. Woodside to Black Rock Mining Corporation and the fact the application was filed within the time limit noted.

Memorandum

To: Director, Production Expansion Division

Through: Director, Supply Division

From: Ferro-Alloys Branch

Subject: DMA-1976, TA-13533 Necessity Certificate for $2,321.28
Black Rock Mining Corporation
Post Office Box 517
Bishop, California

The application for a necessity certificate for $2,321.28 to amortize the cost of stripping overburden is denied by this branch. This is not considered a depreciable facility.

Two copies of the application and attachments are enclosed.

Memorandum

To: Production Expansion Division

Through: Director, Supply Division

From: Ferro-Alloys Branch

Subject: DMA-1977, TA-13514 Necessity certificate for $160,000
Black Rock Mining Corporation
P. O. Box 517, Bishop, California

The subject application for a necessity certificate is approved by this branch.

The following are our suggested answers to questions 16, 17, and 18.

16. All of the facilities are necessary for the defense effort, and none of them would have been acquired otherwise.

17. Unless the price of tungsten permits continued operation after five years, facilities will have little more than junk value.

18. Applicant is world's largest processor of tungsten ore. A large part of the tungsten supply for industry and the defense program depends upon the activities of the Wah Chang Corporation. The application should be given every consideration.

Attention is called to the telegram from Byron D. Woodside to Black Rock Corporation and the fact the application was filed within the time limit noted.

We are enclosing the entire docket comprising two copies of DPAF Form 2, two copies of telegrams, and referral sheet RE-2.
