CERTIFIED MAIL

Re: Docket No. DMEA-3835 (Uranium)
Price Exploration Company
Contract No. Idm-E908

Dear Mr. Harshman:

Enclosed herewith for deposit is Check No. 148, in the amount of $1,549.35, drawn by Price Exploration Company on First National Bank, Bartlesville, Oklahoma, together with a copy of a letter dated October 1, 1958, from Gaul, Hendel & Quigley. Also enclosed are two copies of a royalty computation statement and 21 settlement sheets furnished by Price Exploration Company.

Will you please arrange for the requested refund of amount overpaid on this contract, as determined by you.

Sincerely yours,

Jay L. Chambers

Re: Docket No. DMEA-3835 (Uranium)
Price Exploration Company
Contract No. Idm-E908

Dear Mr. Harshman:

Enclosed herewith for deposit is Check No. 383, amount $2,942.80, drawn by W. Don Quigley on First Security Bank of Utah, together with a copy of his letter dated September 24, 1958. Copies of the settlement sheets referred to are being reproduced and will be sent to you shortly.

It would appear that a royalty audit or review should be made as requested in my letter dated September 11, 1958, to Mr. Brading so that any adjustment found to be necessary may be promptly accomplished.

Sincerely yours,

E. B. Talbert
Contract Administration
and Audit Division

September 24, 1958

Mr. C. O. Mitzendorf
Defense Minerals Exploration Adm.
Department of the Interior
Washington 25, D.C.

Dear Mr. Mitzendorf:

Re: Docket No. DMEA-3835
(Uranium) Price Exploration Co.
Contract No. Idm-E908

Your letter of September 12, 1958 reminded us of the Government's claim to royalty or ore mined from the property described in the referenced contract. We still feel that the property from which the ore was mined should not have been included in the contract. This certainly was not made clear to us at the time we, Gaul, Herdel and Quigley, took over the mining operations. However, there seems to have been negligence and misunderstanding by both the Government and Price Exploration Company. The contract should never have been signed as it was written.

However, it appears that we are committed and must comply with the contract. We have not taken care of this matter earlier as we were waiting to hear from Price Exploration Company in regard to the amount paid by them to DMEA, and the total amount of the loan. We did not want to pay over the total amount due.

We still have not heard from Price Exploration Company; but have decided to take care of the matter now, trusting that you will refund to us any overpayment of the loan.

Copies of all our settlement sheets are enclosed herewith. The total gross proceeds received amount to $58,855.98. The royalty of five percent claimed by DMEA against these proceeds amounts to $2,942.80. Accordingly we are enclosing a check for this amount.

Sincerely yours,

OME

Mr. W. H. King
Executive Officer, DMEA
Field Team Region III
224 New Customhouse
Denver 2, Colorado

Dear Mr. King:

Re: Docket DMEA-3835 (Uranium) - Contract Id m - E908-
Price Exploration Co. (North Pumpkin Buttes Property)
Campbell County, Wyoming

Prior to termination of its DMEA Contract, Price Exploration Company received the following amounts for ore:

Liq. No.	Total Settlement	DMEA 5%
27	$ 998.47	$ 49.92
43	1,230.89	61.54
44	1,535.67	76.78
Totals	$ 3,765.03	$ 188.24

Price Exploration Company Check No 189 in the amount of $188.24 is enclosed in payment of the amount above shown.

It is our understanding that Hendel, Gaul and Quigley will account for settlements received for ore from the property subsequent to their purchase of the property from Price Exploration Company and termination of the DMEA Contract.

Yours truly,

PRICE EXPLORATION COMPANY

From: Alternate Acting Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA-3835 (Uranium) Contract Ida-8908
Prime Exploration Company (North Pumpkin Butte)
Campbell County, Wyoming - FINAL PAYMENT

Reference is made to our memorandums of September 5, 1956, and August 31, 1956, whereby we transmitted Forms MF-10A, Operator's Monthly Report and Voucher, for the months of June, 1956, and July, 1956, and requested that you withhold the following amounts from reimbursement to the Operator:

June, 1956 Voucher	$400.00
July, 1956 Voucher	86.25
Total amount withheld	$486.25

The contract has been terminated and the Operator's final report has been received, therefore we recommend that final payment to the Operator be made on the following basis, which is in conformance with the Report of Review of reported project costs by the Contract Administration and Audit Division, dated September 9, 1957.

Basis for Final Payment:

Total accepted cost	$5,364.44
Government participation at 75%	4,038.33
Total prior payments	3,552.08
Balance due the Operator	$ 486.25

Memorandum

To: Executive Officer, DMEA Field Team, Region III

Through: John F. Shaw WSK for JFS
Supervising Mining Engineer

From: Charles R. Garrett, Jr.

Subject: Docket DMEA 3835 (Uranium) Contract IAm-2908
Price Exploration Co. (North Pumpkin Buttes)
Campbell County, Wyo. — Progress report for July 1956

There was no official inspection made of the North Pumpkin Buttes property of the Price Exploration Company exploration project at the end of July 1956. The property was idle since June 25 when stage I work was completed, and no further exploration had been performed up to the end of July.

The company has transmitted their July 1956 progress report which confirms that no exploration work was performed on the property during July.

The company transmitted Forms MF-104 and MF-104A with request for payment of $115.09 for chemical analyses for vanadium, V_2O_5. These chemical analyses should have been part of the June 1956 exploration program. Even though the 104's for the V_2O_5 assays are dated July 1956, it is recommended that the cost of these analyses be considered as part of stage I work performed in June 1956.

It is also recommended that the company be paid 75 percent of $5391.16 ($115.09 + $4128.00 + $1154.16) the cost of stage I or $4,043.37.

Charles R. Garrett Jr.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

JULY DRILLING REPORT

DOCKET DMEA 3835 - CONTRACT Idm-E908

NORTH PUMPKIN BUTTES

No additional drilling has been done on Stage II, which was approved on July 25, 1956. Consequently, the only work that has been done on the project this month is to make the vanadium analysis on the mineralization samples taken during the drilling of Stage I.

Five copies of the vanadium analysis is included with the executed forms MF104 and MF104A.

Sincerely yours,

M. Darwin Quigley

Memorandum

To: T. A. Christesen

From: Executive Officer, DMEA Field Team, Region III

Subject: DMEA Docket 3835 (Uranium) Contract Idm-E908, Price Exploration Company (North Pumpkin Buttes) Campbell County, Wyoming - Operator's Monthly Progress Report for the month of June, 1956

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

Except as otherwise noted, it is deemed that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended on the following basis, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

Disallowances

Non-core drilling:

Disallow the cost of 7 feet of non-core drilling at $0.75 per foot in hole No. R-13, which hole was not completed and therefore is not acceptable to the Government- - - - - - - - - - - - - - -$ 5.25

Incidental allowance:

Disallow, incidental allowance for 7 feet of drilling at $0.21 per foot- - - - - - - - - - - - - - 1.47

Total amount to be disallowed $ 6.72

Withhold an amount of $400.00 pending resumption of work under Stage II, and also pending approval by the Washington Office for assignment of the contract.

Memorandum

To: Executive Officer, DMEA Field Team, Region III

Through: John F. Shaw
Supervising Mining Engineer

From: Chas. R. Garrett, Jr.

Subject: Docket DMEA 3835 (Uranium) Contract Iam-E908, Price Exploration Co. (North Pumpkin Buttes) Campbell County, Wyoming -- Progress report for June 1956

Progress on this DMEA exploration project was inspected on July 10, 1956. Work was started on May 31, 1956 and stage I was completed on June 25, 1956. Drilling on this contract continued uninterrupted for five weeks during which time 130 of the 145 holes authorized in the contract were drilled. The remaining 15 holes were not drilled due to reasons of topography and lack of the productive formation. The 130 holes drilled aggregated a total of 5496 feet or an average of 42 feet per hole. The results of the drilling disclosed mineralization only in Area C in holes C-9, C-15, C-19 and C-21. On the basis of these findings in Area C, a modified stage II consisting of 13 holes was recommended to offset these mineralized holes of stage I. Government approval of this modified and reduced stage II program was granted on July 25, 1956. The work on stage I of this contract was carried on in accordance with terms of the contract and in good workman-like manner.

All conditions of the contract have been met satisfactorily. The areas drilled under stage I were A, B, C, E, F, G, H, U and W; each area was drilled with the number of holes designated by the contract, with the exception of those specified by the operator for the reasons he outlined. The holes were drilled with a Long-year Rotary Air Drill with 4½ inch bits and equipped with a Duclone sample collector. The drill cuttings were sampled at 2½ feet intervals except in mineralized or radioactive zones where the cuttings were sampled at one foot intervals. All samples collected were checked radiometrically and those indicating significant mineralization or radioactivity were analyzed chemically for uranium and vanadium.

The assay certificate is attached to the operator's report. All drill holes were logged geologically and probed radiometrically and the record of the loggings and probings are attached to the operator's report.

Expenditures for drilling and chemical assays covering the June 1956 period have been documented by invoices which are attached to the operator's report.

The project was under the direct full time supervision of C. W. Shannon, geologist, a very capable aide to the consulting geologist, M. Darvin Quigley.

Approval was granted on June 25, 1956 for the operator to increase the depth of the drill holes in order to explore down to and bottom the holes in the first carbonaceous blue gray shale. It was estimated that the holes may vary in depth up to about 70 feet but it was expected that the holes would average about 40 feet in depth. The actual drilling came reasonably close to these expectancies.

The operator submitted a request to commence stage II of the exploration project. Since mineralization was found only in the "C" area, in 4 holes, a reduced program was recommended. This project would provide for 13 offset holes to be drilled around the 4 mineralized holes at 100 feet centers. Approval of certain drilling of stage II under the reduced program was granted to the operator on July 25, 1956.

The operator has claimed reimbursement for 75 percent of $5391.16 or $4043.37.

It is recommended that the operator be paid $4043.37, the Government's share of the July 1956 and stage I expenses.

DRILLING REPORT

DOCKET DMEA 3835 - CONTRACT Idm-E908

NORTH PUMPKIN BUTTES

Drilling commenced on Stage I of the Docket DMEA 3835, Contract Idm-E908 awarded to Price Exploration Company on their North Pumpkin Buttes Property, Campbell County, Wyoming, on May 31, 1956. Drilling continued uninterrupted five days per week until the drilling allowed for Stage I was completed on June 25, 1956. One hundred thirty (130) of the one hundred forty-five (145) holes authorized by the contract, were drilled with a Long-year Rotary Air Drill equipped with a Duclone sample collector. Hole P-9, Utah No. 4., was omitted because its topographic elevation was such as to make the depth to the blue gray shale exceed 100 feet. Also, it was located in the corner of the claim so that any mineralization found would serve to benefit adjacent property rather than ours. Furthermore, no mineralization was found in the Holes P-6, P-7, or P-10 so that the deeper hole required at P-9 was not warranted.

Holes W-8, W-12, W-16, W-17, and W-21 on Utah No. 1 were omitted because they fell in the exposed shale area on the slopes of the stream valley. Hole W-20 indicated that the stratigraphic section below the first seven feet was primarily shale with thin lenses without trace of mineralization.

Holes B-2, B-3, B-4, B-5, B-12, B-22, B-23, and B-20, had been drilled in September 1955 and consequently were excluded from the present contract.

The lithologic descriptive logs of the 130 holes drilled and the record of the mineralization penetrated are attached as Appendix No. 1, to this report. The descriptions show that the holes drilled in areas R, P, and Q, penetrated a

section which had all the prerequisites for mineralization in the Pumpkin Buttes area without having U_3O_8 . The sand was pink to brown in color showing too much oxidation but at any point it could have graded to gray and buff where mineralization is generally found. The presence of the carbonaceous layer on top of the shale would have made an excellent precipitating agent had any uranium bearing solutions passed that way.

Holes in areas W and V penetrated a varied section with an over-predominance of shale. The varied nature was partially indicated by previous drilling, but the holes drilled under the contract firmly established that the sand lenses were discontinuous and interbedded with too much shale to be of primary importance in regard to uranium deposition or concentration.

The holes drilled in Area B indicate that the area outside the ore body, which was drilled out last September, rapidly goes to shale, thus explaining the limited nature of the ore body on Colorado No. 4.

The holes in Area A indicated a thick sand section which was only slightly oxidized and underlain by a black carbonaceous layer above the shale. Apparently, Area A was not favorably located in relation to the circulation of uranium bearing solutions. Otherwise it had all the lithologic pre-requisites.

Area C seems to be located in the zone of interfingering red oxidized and buff to gray unoxidized sandstones. As such, it carries surface mineralization as well as subsurface mineralization as indicated by holes C-9, C-15, C-19 and C-21. These holes suggest a mineralized area extending eastward from the area drilled. A request for more drilling under Stage II will be submitted to determine the extent of this mineralization.

The holes in Area E indicated that the blue gray shale lies at a depth of 50' to 65' depending on the topography. The section above it is varied with the sands changing in grain size, color, and amounts of interbedded shale, and

the whole section changing rapidly to shale to the south and west. No evidence of mineralization was found to encourage further drilling in Area E.

The copies of the chemical assays on the samples from the four holes which found mineralization are attached as Appendix II. Commercial ore grade was assayed from a 2-foot interval in Hole No. C-9. This hole is the most north-easterly hole drilled in the area. With the western boundary defined, it suggests that only the margin was discovered and that the main area of mineralization lies to the east. north. Thus there is ample reason to request Stage II drilling to proceed eastward from the present mineralized holes.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.
