
EXPLANATION

Volcanic, mainly flow rocks

Volcanic, mainly pyroclastic rocks

Clastic rocks, mainly graywacke

Clastic rocks, mainly conglomerate

Fine-grained rocks, mainly argillite

Interbedded argillite and graywacke

Clastic rocks, interbedded with volcanic rock, limestone, and argillite

Limestone

These sections have been compiled using apparent thicknesses of stratigraphic units and structural sections as graphically represented on plate 1, and locally detailed stratigraphic sections, generalized within individual areas, reading clockwise and consecutively around the Freshwater Bay area from East Point

CORRELATED COMPOSITE STRATIGRAPHIC SECTIONS WITHIN THE FRESHWATER BAY AREA, CHICHAGOF ISLAND, ALASKA
