APR 4 1952

Mr. J. H. East, Jr., Executive Officer
DMEA Field Team, Region IV
224 New Customhouse Building
Denver 2, Colorado

Dear Mr. East:

In reviewing your monthly report for the period February 21, 1952, to March 20, 1952, we note several changes that should be made in your records with reference to three of the dockets listed on page 21 of your report.

DMEA-697 - Carl D. Berry (Manganese), Arizona

As you were advised by our letter of March 7, this application was placed in the inactive file at the applicant's request of January 14, 1952.

DMEA-1162 - C. H. Field & Theodore Haynes (Manganese), Utah

This docket was placed in the inactive file on April 1, because of the fact that the applicant failed to reply to our letter of March 3 for information, a copy of which letter was sent you.

DMEA-2045 - Metzer Mines, Inc. (Tungsten), Colo.

This is not a DMEA docket, but a DMPA docket.

Sincerely yours,

O. Mitchendon

Re: Docket No. DMA 697X - Manganese
War Eagle and War Eagle No. 1
Claims
Yuma County, Arizona

Dear Mr. East:

We note in your monthly report for the period January 21, 1952 to February 20, 1952, that you list DMA 697X - Manganese, Carl D. Berry, Arizona, as "Pending Contract - Washington Office".

Our files show that this docket was withdrawn by the applicant, Mr. Berry, by telephone on January 14, 1952. A letter confirming this was sent Mr. Berry on January 16, 1952.

Sincerely yours,

C O Motteudorf

Dear Mr. Berry:

In accordance with your wishes as expressed to this office by telephone on January 14, 1952, and to expedite any future application you may wish to make, we herewith withdraw your present application (DMA 697X), without prejudice.

We wish to thank you for your interest in the Defense Minerals Program, and for your patience and effort in this respect.

Sincerely yours,

C. O. Mittendorf

Chicago, Illinois
[illegible]-[illegible] Tennessee
Cost [illegible] $1,5[illegible]
Government Participation $[illegible],[illegible]5

REGIONAL DIRECTOR'S
OFFICE
REGION IV
OCT 22 1951
BUREAU OF MINES
DENVER, COLORADO

Property: Star Eagle and Star Eagle [illegible]
Harquahala Mining District
Yuma County, Arizona

Conclusions:

Carl D. Perry and Associates propose to explore the Star Eagle and Star Eagle [illegible] manganese claims. This exploration work is to be carried out in four phases. These are:

1. [illegible] 10 surface trenches across the vein. These trenches are to be [illegible]. This will determine the surface extension and value of the ore. The original proposal contemplated the use of a bulldozer to help dig these trenches. Due to the roughness of the terrain, it will be necessary to dig these by hand. This work will be done by contract.

2. If the first phase is successful then the second phase should be started. This second step will consist of drifting to intersect the downward extension of the vein. This would require 75' of drifting in a brecciated zone at a cost of [illegible] per foot. If the vein is intersected and shows a [illegible] of ore which warrants additional exploration, the third part of the program should be begun.

J.H.

Noted

3. This stage of the project consists of drifting 100 feet in each direction in the vein. Drifting in the vein will cost slightly less than the phase 2 adit in the brecciated zone. An estimated cost of $35 per foot would give a total cost of $7,000. This phase of work should not be carried beyond the limits of the ore body. If the ore pinches out or becomes so low in grade as to be unsaleable to the Pesina stockpile exploration work should cease.

4. Step 4 will be drifting 300 feet in the vein and should probably be carried out on the Mar Scale claim. If this drifting should reach the limits of the ore body, exploration should cease immediately. The total cost of this work will be $10,500.

The program as outlined above, if successful, may indicate 500,000 tons of 15 to 25 manganese.

D. . Jennings and Company of Phoenix, Arizona has submitted bids to the applicant for the proposed exploration work. Although a 20 profit is taken by the contractor, the overall cost of $42 a foot in brecciated ground is probably as cheap as the applicant could do it themselves. There could be no question of labor, competency of the applicant, or the availability of equipment.

Recommendation:

The application is approved.

George . Holderer, Chief
Ferro-Alloys Branch
