
EXPLANATION

-50 **Water-level contour**—Shows altitude at which water level would have stood in tightly cased well. Contour interval 50 feet. Datum is sea level

Boundary of study area

Well used for control—Can represent more than one well

Note: In areas where data are sparse or nonexistent, locations of some contours are based on control points (not shown) outside the study area.

Figure 4. Map showing approximate water-level altitudes in the Evangeline aquifer, Fort Bend County and adjacent areas, Texas, January–February 2000.

Base from U.S. Geological Survey digital data, 1:100,000
