

PRINCIPAL RESERVES.  
[Metallic iron, in millions of metric tons.]

	Known	Probable	Possible
England:			
Northumberland and Durham.....	10.5	19.5	60
Cumberland and Lancaster .....	17.5	25	50
Cleveland .....	57	57	120
York and Derby.....	...	...	60
Lincoln .....	67	75	135
Leicester .....	18.6	11.4	...
Stafford, Salop, Warwick, and Worcester.	200	400	800
Rutland and Oxford .....	35	21.5	75
Northampton .....	32	32	96
Wilts and Kent .....	...	46	2
Scotland:			
Inverness .....	2.5	3	...
Glasgow and Edinburgh .....	2.5	24.5	128
Wales:			
South Wales .....	...	...	450

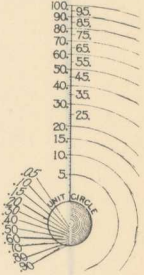

EXPLANATION

Reserves of iron in ore  
Circles are drawn on scale shown in diagram, in which the unit circle represents the world's output of pig iron in 1913 (about 80,000,000 metric tons). Solid color, known reserve; shaded, probable reserve; open circle, possible reserve.

Reserve less than 5 per cent of world's output in 1913
