

EXPLANATION

Reserves of iron in ore  
Circles are drawn on scale shown in diagram, in which the unit circle represents the world's output of pig iron in 1913 (about 80,000,000 metric tons). Solid color, known reserve; shaded, probable reserve; open circle, possible reserve. Outlines of districts are shown where known

× Reserve less than 5 per cent of world's output in 1913

SCALE OF CIRCLES

PRINCIPAL RESERVES.			
[Metallic iron, in millions of metric tons.]			
	Known	Probable	Possible
Kerch .....	40	100	80.
Daschkiessan .....	6.2	.....	18.6
