
STRUCTURAL CONTOUR MAP OF THE McKITTRICK OIL FIELD, CALIFORNIA

1 ½ ¼ 0 1 Mile

Contour interval 100 feet
Datum is mean sea level.
1909

Distance above sea level of top of oil zone B. (See explanation in text.) Broken lines are hypothetical

Distance above sea level of bottom of oil zone B in the area where the strata including zone B are overturned: the top of the oil zone, as penetrated by the wells in this area, is in reality the bottom of the zone

Locations and wells of doubtful status

Rig up

Drilling

Active well

Abandoned and inactive well

Well gone to water

Status of wells is a variable factor, hence symbols used may require correction

Land lines are approximate

Map corrected to August, 1909

Compiled from original notes and from records of the Associated and Kern Trading and Oil companies

NOTE:
The south line of the Reward, Giant and Jewett leases in secs. 12 and 13 T.30 S., R.21 E. and the south line of the Mc. Kittrick Oil and Sans Souci leases in sec. 18 T.30 S., R.22 E. are in the same projection, but are not so noted on this map owing to irregular surveys. Wells on either side of township line in this vicinity are therefore not in proper position relative to each other.
