Re: Royalty Payments - Docket DMEA-2740
Copper-Zinc Contract IDM.E 522
Coronado Copper and Zinc Company
Cochise County, Arizona

Gentlemen:

Enclosed are four copies of our Report No. 37 comprising pages one through twenty-three with supporting documents for sales and smelter charges. The items covered in this report are as follows:

(1) Copper concentrates produced during the months of February through August, 1957 and resulting sales made in the months of May through December, 1957.

(2) Zinc concentrates produced and sold during the months of April through August, 1957.

(3) Adjustment for overpayment made on report nos. 33 through 36.

(4) Adjustment for overpayment made on report nos. 31 and 32.

The production and sales included in this report cover all DMEA ore mined to date, as the mine was shut down in August 1957 and has not yet resumed operations.

We also enclose our check in the amount of $3,631.42.

Yours very truly,

CORONADO COPPER AND ZINC COMPANY

Royalty Payment - Docket DMEA-2740
Copper-Zinc Contract IDM.E 522
Coronado Copper and Zinc Company

Statement of DMEA royalty repayment on loan covering DMEA copper and zinc concentrates produced from the 400 level project of Johnson Camp mine, said concentrates being a portion of Coronado's total production and marketed copper concentrates for the months of February through August, 1957 and marketed zinc concentrates for the months of April through August, 1957. The value of DMEA concentrates are based upon gross revenue realized from the total sales.

Copper Concentrates

Calculated net proceeds from sale of copper derived from milling of 6,310.50 dry tons of DMEA-400 project ore - per analysis shown on pages 2 through 15.		
Net proceeds apportioned to 507.71 dry tons of DMEA copper concentrates per summary shown on page 16.		$65,029.09

Zinc Concentrates

Calculated net proceeds from sale of zinc concentrates derived from milling 4,782.28 dry tons of DMEA-400 level project ore - per analysis shown on pages 6 through 15.		
Net proceeds apportioned to 556.21 dry tons of DMEA zinc concentrates per summary shown on page 20.		22,606.66
		$87,635.75
Royalty due - 5% of $87,635.75		$4,381.79
Less:		
Adjustment of amount due - report nos. 33 through 36, per summary shown on page 21	$315.24	
Adjustment for amount erroneously paid on report nos. 31 and 32 by Coronado Copper and Zinc Company - requested in DMEA letter of February 19, 1957	435.13	750.37
Balance due		$3,631.42

Report No. 35 May 7, 1957

Royalty Payment - Docket DMEA-2740
Copper-Zinc Contract IDM. E 522
Coronado Copper and Zinc Company

Statement of DMEA royalty repayment on loan covering DMEA copper and zinc concentrates produced from the 400 level project of Johnson Camp mine, said concentrates being a portion of Coronado's total production and marketed copper concentrates for the month of December, 1956 and marketed zinc concentrates for the month of February, 1957. The value of DMEA concentrates are based upon gross revenue realized from the total sales.

Month of December - 1956

Calculated net proceeds from sale of copper derived from milling of 818.42 dry tons of DMEA - 400 project ore - per analysis shown on Schedules I and IA attached.

Net proceeds (before deduction of other expense) apportioned to 53.85 dry tons of DMEA copper concentrates per Schedule I-B attached $ 6,408.46

Month of February - 1957

Calculated net proceeds from sale of zinc concentrates derived from milling 672.80 dry tons of DMEA 400 level project ore - per analysis shown on Schedules II and IIA.

Net smelter proceeds (before deduction of other expense) apportioned to 68.96 dry tons of DMEA zinc concentrates per Schedule IIB 5,095.41

$11,503.87

Royalty repayment $11,503.87 @ 5% $ 575.19

DEPARTMENT OF THE INTERIOR
APR 8 - 1957
REGION III
DENVER, COLORADO

Report No. 34

Royalty Payment - Docket DMEA-2740
Copper-Zinc Contract IDM. E 522
Coronado Copper and Zinc Company

Statement of DMEA royalty repayment on loan covering DMEA copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp mine, said concentrates being a portion of Coronado's total production and marketed copper concentrates for the month of November, 1956 and marketed zinc concentrates for the month of January, 1957. The value of DMEA concentrates are based upon gross revenue realized from total sales.

Month of November - 1956

Calculated net proceeds from sale of copper derived from milling of 800.79 dry tons of DMEA - 400 project ore - per analysis shown in Schedules I and I-A attached.

Net proceeds (before deduction of other expense) apportioned to 52.69 dry tons of DMEA copper concentrates per Schedule 1-B attached $10,858.83

Month of January - 1957

Calculated net proceeds from sale of zinc concentrates derived from milling 505.34 dry tons of DMEA 400 level project ore. Per analysis shown on Schedules II and IIA.)

Net smelter proceeds (before deduction of other expense) apportioned to 45.43 dry tons of DMEA zinc concentrates per Schedule III. 2,940.23

$13,799.06

Royalty repayment $13,779.06 @ 5% $ 689.95

RE: CONTRACT NOS. 5401 and 5630

Gentlemen:

This is to inform you that negotiations between the Oil, Chemical, and Atomic Workers International Union and our smelter, National Zinc Company, Inc. Bartlesville, Oklahoma, relative to wage increase, have been going on for several weeks.

In the event an increase is granted, it will be made retroactive to January 1, 1957. Consequently the smelting charges on your concentrates under captioned contracts, will be subject to increase and adjustment retroactive to the same date.

Very truly yours,

INTERNATIONAL MINERALS AND METALS CORPORATION

Report No. 33

Royalty Payment - Docket DMEA-2740
Copper-Zinc Contract Idm. E 522
Coronado Copper and Zinc Company

Statement of DMEA royalty repayment on loan covering DMEA copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp mine, said concentrates being a portion of Coronado's total production and marketed copper concentrates for the month of October, 1956 and marketed zinc concentrates for the month of December, 1956. The value of DMEA concentrates are based upon gross revenue realized from total sales.

Month of October - 1956

Calculated net proceeds from sale of copper derived from milling of 723.57 dry tons of DMEA - 400 level project - per analysis shown in Schedules I and I-A attached.

Net proceeds (before deduction of other expense) apportioned to 56.58 dry tons of DMEA copper concentrates per Schedules I-B attached $11,426.33

Month of December - 1956

Calculated net proceeds from sale of zinc concentrates derived from milling 818.42 dry tons of DMEA 400 level project. (Per analysis shown on Schedules II and IIA.

Net smelter proceeds (before deduction of other expense) apportioned to 79.22 dry tons of DMEA zinc concentrates per Schedule III. 4,627.34

$16,053.67

Royalty repayment @ 5% $ 802.68

Report No. 3

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrates being a portion of Coronado's total production and marketed concentrates for May. The values of D.M.E.A. concentrates are based upon gross revenue realized from total sales to the smelters in May.

MONTH OF MAY 1956

Calculated net proceeds from sales of Concentrates derived from milling of 930.34 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expense) apportioned to 50.87 dry tons of D.M.E.A. copper concentrates per Schedule II attached.	$ 10,291.15
Net smelter proceeds (before deductions of other expense) apportioned to 74.37 dry tons of D.M.E.A. zinc concentrates per Schedule III attached.	5,011.05
	$ 15,302.20
Royalty repayment @ 5%	$ 765.11

Schedule #1.
Schedule #I

MONTH MAY 1956

Mill Recovery on 930.34 Tons of DMEA Muck

	TONS	%WT.	ASSAY CU.	ASSAY ZN.	LBS OF METAL CU.	LBS OF METAL ZN.	DISTRIBUTION CU.	DISTRIBUTION ZN.

Re: Royalty Payments - Docket
D.M.E.A. 2740 (Copper-zinc)
Contract Idm E 522
Coronado Copper & Zinc Co.
Cochise County, Arizona

Gentlemen:

Enclosed is our Report No. 32 on the above referred contract on copper sales for the period of June thru September 1956 and zinc concentrates sales for the period June thru November 1956.

Also enclosed is our check in the amount of $3,371.96.

Settlements for October 1956 copper concentrates shipments are not due until the end of January 1957.

Very truly yours,

James Reid
CORONADO COPPER AND ZINC COMPANY

JR:mh
encls.
cc: G.D.D.ub

J.Reid

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp mine, said concentrates being a portion of Coronado's total production and marketed copper concentrates for the months of June, July, August and September, 1956 and marketed zinc concentrates for the period of June thru November, 1956. The values of D.M.E.A. concentrates are based upon gross revenue realized from total sales to the smelters.

MONTHS OF JUNE THRU SEPTEMBER 1956

Calculated net proceeds from sale of copper concentrates derived from milling of 3,490.40 dry tons of D.M.E.A. 400 level project (per analysis shown in Schedule I):

Net smelter proceeds (before deduction of other expense) apportioned to 250.85 dry tons of D.M.E.A. copper concentrates per Schedule II attached.	$ 41,193.62

MONTHS OF JUNE THRU NOVEMBER 1956

Calculated net proceeds from sale of zinc concentrates derived from milling 5,014.76 dry tons of D.M.E.A. 400 level project (per analysis shown in Schedule I):

Net smelter proceeds (before deduction of other expense) apportioned to 415.60 dry tons of D.M.E.A. zinc concentrates per Schedule III.	26,245.56
	$ 67,439.18

Royalty repayment @ 5%	$ 3,371.96

Schedule I

Month of June 1956

Mill Recovery on 1157.52 Tons of DMEA Muck.

	Tons	%WT	Assay CU.	Assay ZN.	LBS. Of Metal CU.	LBS. Of Metal ZN.	Distribution CU.	Distribution ZN.
Ore Milled	1157.52	100.00	2.15	4.96	49773.36	114825.98	100.00	100.00
CU. Conc.	72.22	6.24	28.630	10.216	41351.71	14755.14	83.08	12.85
ZN. Conc.	79.42	6.86	2.244	54.150	3563.77	86004.66	7.16	74.90
Tails	1005.88	86.90	0.241	0.703	4857.88	14066.18	9.76	12.25

In this table the average recovery is assumed to be the recovery for the month of June. Also the copper assay of the copper concentrate, and the zinc concentrate are the same as for the month of June.

RECEIVED JAN 28 1957 D.M.E.A.

Date: July 9, 1956

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Royalty payments, Docket DMEA 2746 (Copper-Zinc), Contract Idm-E522, Coronado Copper & Zinc Company (Republic Copper & Zinc mine), Cochise County, Arizona

Period: June, 1956

During the above month the following royalty payments were received for ore or concentrates shipped from the subject property:

Date	Lot No.	Dry Tons	Royalty Due	Royalty Paid	Bonus Roy. Due	Bonus Roy. Pd.
March 1956 - 29						
	Copper	44.66	$513.25)	$715.79		
	Zinc	58.52	202.54)			
April 1956 - 30						
	Copper	37.83	$412.33)	$561.64		
	Zinc	44.04	149.31)			
Totals:		185.05	$1,277.43	$1,277.43		

Past Due Royalties Collected	None
Total Dry Tons (Ore or Cons.) Shipped to Date	85,769.66
Expiration Date of Royalty Repayment	May 18, 1963
Amount of Government Participation	$43,522.50
Total Royalty Payments to Date	16,814.43
Percent of Loan Repayment	38.63%

Report No. 29

CORONADO COPPER AND ZINC COMPANY

RECEIVED
JUL 12 1956

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrates being a portion of Coronado's total production and marketed concentrates for March. The values of D.M.E.A. concentrates are based upon gross revenue realized from total sales to the smelters in March.

MONTH OF MARCH 1956

Calculated net proceeds from sale of concentrates derived from milling of 642.14 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule 1):	
Net smelter proceeds (before deduction of other expense) apportioned to 44.66 dry tons of D.M.E.A. copper concentrates per Schedule II attached.	$10,264.92
Net smelter proceeds (before deduction of other expense) apportioned to 58.52 dry tons of D.M.E.A. zinc concentrates per Schedule III attached.	4,050.87
	$14,315.79
Royalty repayment @ 5%	$ 715.79

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates - April 1956

Calculated net proceeds from sale of 37.83 S.D. tons of copper concentrates derived from 556.83 S.D. tons of D.M.E.A. ore mined in April 1956 and processed with 5846.17 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable on the total of 497.131 S.D. tons of copper concentrates delivered to the smelter in April 1956.

Quantity 41.62 wet tons Moisture 9.10% 37.83 dry tons

	Copper	Zinc	Silver
Assay	27.82%	16.449%	4.58 oz per ton
Content	21,045.62 lbs.	12,443.37 lbs.	173.26 ozs.

Metals paid for:

Copper content	21,046 lbs.	
Less 20 lbs. per T.	756 lbs.	20,290 lbs.
Silver content	173.26 ozs.	
Less 5%	8.66 ozs.	164.60 ozs.

Payments:

Report No. 28

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrates being a portion of Coronado's total production and marketed concentrates for February. The values of D.M.E.A. concentrates are based upon gross revenue realized from total sales to the smelters in February.

Month of February 1956

Calculated net proceeds from sale of concentrates derived from milling of 817.59 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expense) apportioned to 71.11 dry tons of D.M.E.A. copper concentrates per Schedule II attached.	$ 15,135.11
Net smelter proceeds (before deduction of other expense) apportioned to 67.67 dry tons of D.M.E.A. zinc concentrates per Schedule III attached.	4,526.82
	$ 19,661.93
Royalty repayment @ 5%	$ 983.10

CORRECTED REPORT

Report No. 24

RECEIVED
JAN 12 1956

CORONADO COPPER & ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp mine, said concentrates being a portion of Coronado's total production and marketed concentrates for October. The values of D.M.E.A. concentrates are based upon gross revenue realized from total sales of the smelters in October.

MONTH OF OCTOBER 1955

Calculated net proceeds from sale of concentrates derived from milling of 872.47 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expense) apportioned to 46.48 dry tons of D.M.E.A. copper concentrates per Schedule II attached.	$10,283.09
Net smelter proceeds (before deduction of other expense) apportioned to 70.93 dry tons of D.M.E.A. zinc concentrates per Schedule III attached.	4,604.54
	$14,887.63

Report No. 21

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrates being a portion of Coronado's total production and marketed concentrates for July. The values of D.M.E.A. concentrates are based upon gross revenue realized from total sales to the smelters in July.

Month of July 1955

Calculated net proceeds from sale of concentrates derived from milling of 1,406,14 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expense apportioned to 107.57 dry tons of D.M.E.A. copper concentrate per Schedule II attached	$20,478.98
Net smelter proceeds (before deduction of other expense apportioned to 127.91 dry tons of D.M.E.A. zinc concentrate per Schedule III attached.	7,715.19
	$28,194.17
Royalty repayment @ 5%	$ 1,409.71

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates July 1955.

Calculated net proceeds from sale of 107.57 S.D. tons of copper concentrates derived from 1,406.14 S.D. tons of D.M.E.A. ore mined in July 1955 and processed with 4,613.12 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable on the total of 402.0095 S.D. tons of copper concentrates delivered to the smelter in August 1955. (1)

Quantity 118.34 wet tons, moisture 9.1% 107.57 dry tons

	Copper	Zinc	Silver
Assay	29.79%	8.737%	4.5 oz. P.T.
Content	64,088.37 lbs.	18,796.77 lbs.	484.07 ozs.

Metals paid for:

Copper content	64,088 lbs.		
Less 20 lbs. per ton	2,151 lbs.	61,937	
Silver content	484.07		
Less 5%	24.20	459.87	

Payment:

Copper metal 61,937 lbs.	@ 38.15¢	$23,628.97		
Less: Bullion freight tax	.035¢			
Contract price deduction	3.180¢			
Cathode deduction	.125¢			
61,937 lbs.	3.340¢	2,068.70	$21,560.27	
Silver metal 459.87 ozs.	@ 90.0¢	413.88		
Less contract price deduction	@ 1.5¢	6.90	406.98	

Amount carried forward to page 2 $21,967.25

Coronado Copper and Zinc Company

Amount brought forward from page 1		$21,967.25
Less smelter charges		
Base charge per ton concentrate	$ 9.16	
Labor adjustment-		
$ 1.87 hourly base per contract		
1.961 June 1955 average hourly rate		
.091 excess @ 6¢ per each one cent	.55	
107.57 tons @	9.71	1,044.50
		$20,922.75
Less other smelter deductions:-		
Railroad freight on 118.34 wet tons	442.59	
Umpire	1.18	443.77
		$20,478.98
Less other expenses:		
Trucking from mill to railroad	100.59	
Representation, assaying, etc.	18.93	119.52
Net proceeds from sale (gross income for percentage depletion)		$20,359.46

Footnote: (1) As result of strike at A.S.&R. Co. during July these figures are based on smelter returns dated August 1955.

OF MINES
Colorado

Report No. 22

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrates produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrates being a portion of Coronado's total production and marketed concentrates for August. The values of D.M.E.A. concentrates are based upon gross revenue realized from total sales to the smelters in

Month of August 1955

Calculated net proceeds from sale of concentrates derived from milling of 955.04 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule 1):	
Net smelter proceeds (before deduction of other expense apportioned to 65.51 dry tons of D.M.E.A. copper concentrate per Schedule 11 attached.	$15,034.76
Net smelter proceeds (before deduction of other expense apportioned to 81.87 dry tons of D.M.E.A. zinc concentrate per Schedule 111 attached.	5,101.54
	$20,136.30
Royalty repayment @ 5%	$ 1,006.82

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrate produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrate being a portion of Coronado's total production and marketed concentrate for June. The values of D.M.E.A. concentrate are based upon gross revenue realized from total sales to the smelters in June.

Month of June 1955

Calculated net proceeds from sale of concentrates derived from milling of 1,487.27 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expense)apportioned to 100.32 dry tons of D.M.E.A. copper concentrate per Schedule II attached.	$17,349.31
Net smelter proceeds (before deduction of other expense apportioned to 135.92 dry tons of D.M.E.A. zinc concentrate per Schedule III attached.	8,210.72
	$25,560.03
Royalty repayment @ 5%	$ 1,278.00

Memorandum

TO: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: Royalty P;ayment - DMEA Docket 2746 (Copper-Zinc), Contract Idm-E522, Coronado Copper & Zinc Company - Arizona

Enclosedd are calculation sheets from Coronado Copper and Zinc Company for ore shipped during the months of November and December, 1954 and February through May, 1955..

Also enclosed is Coronado Copper and Zinc Company check No. 4317 in the amount of $3,075.51 in payment of royalty due on the above shipments of ore.

Re: Docket No. DMEA 2746
Contract IDM-E 522
Royalty Re-Payments
November 1954 through May 1955

Dear Mr. King:

There are sent you herewith Coronado Copper & Zinc Company's reports of production and net receipts in support of our statement of percentage royalty accrued to DMEA under the above contract upon production of copper and zinc ores from the mining locations based upon gross revenue realized from sales of said product during the period November 1st, 1954, through May 31st, 1955.

A report in quadruplicate is enclosed for each of the months in which DMEA ore was mined, reflecting the percentage royalty calculated thereon as follows:

Report No. 14	for November 1954	$ 6.05
Report No. 15	for December 1954	76.00
	for January 1955	none
Report No. 16	for February 1955	500.30
Report No. 17	for March 1955	552.72
Report No. 18	for April 1955	879.89
Report No. 19	for May 1955	1,066.94
		$3,081.90
Less credit per advice by your letter 4/29/55		6.39
		$3,075.51

Also, we are pleased to enclose Coronado Copper & Zinc Company's check No. 4317 payable to your order in the amount of $3,075.51.

Conforming with past procedure, the enclosed reports reflect pro-rata of smelter values to the specified tons of DMEA copper concentrate marketed as determined from the smelter settlements covering the total tons of copper concentrate delivered to the smelter each month. The pro-rated receipts for DMEA copper concentrate each month have been determined upon the basis as suggested by our Mr. Fred E. Gray in his letter to you dated October 29, 1953, to which you indicated approval in your letter of November 4, 1953.

Very truly yours,

C. W. Six, Treasurer

Report No. 19

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrate produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrate being a portion of Coronado's total production and marketed concentrate for May. The values of D.M.E.A concentrate are based upon gross revenue realized from total sales to the smelters in May.

Month of May 1955

Calculated net proceeds from sale of concentrates derived from milling 1,253.93 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expense) apportioned to 86.02 dry tons of D.M.E.A. copper concentrate per Schedule II attached.	$15,006.77
Net smelter proceeds (before deduction of other expense) apportioned to 110.17 dry tons of D.M.E.A. zinc concentrate per Schedule III attached.	6,331.93
	$21,338.70
Royalty repayment @ 5%	$ 1,066.94

Schedule II

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates May, 1955

Calculated net proceeds from sale of 86.02 S.D. tons of copper concentrates derived from 1,253.93 S.D. tons of D.M.E.A. ore mined in May, 1955 and processed with 5,007.33 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total of 495.9620 S.D. tons of copper concentrates delivered to the smelter in May, 1955.

Quantity 94.63 wet tons, Moisture 9.1% 86.02 dry tons.

Re: Docket No. DMEA 2746
Contract IDM-E 522
Royalty Re-Payments
November 1954 through May 1955

Dear Mr. King:

There are sent you herewith Coronado Copper & Zinc Company's reports of production and net receipts in support of our statement of percentage royalty accrued to DMEA under the above contract upon production of copper and zinc ores from the mining locations based upon gross revenue realized from sales of said product during the period November 1st, 1954, through May 31st, 1955.

A report in quadruplicate is enclosed for each of the months in which DMEA ore was mined, reflecting the percentage royalty calculated thereon as follows:

Report No. 14	for November	1954	$ 6.05
Report No. 15	for December	1954	76.00
	for January	1955	none
Report No. 16	for February	1955	500.30
Report No. 17	for March	1955	552.72
Report No. 18	for April	1955	879.89
Report No. 19	for May	1955	1,066.94
			$3,081.90
Less credit per advice by your letter 4/29/55			6.39
			$3,075.51

Also, we are pleased to enclose Coronado Copper & Zinc Company's check No. 4317 payable to your order in the amount of $3,075.51.

Conforming with past procedure, the enclosed reports reflect pro-rata of smelter values to the specified tons of DMEA copper concentrate marketed as determined from the smelter settlements covering the total tons of copper concentrate delivered to the smelter each month. The pro-rated receipts for DMEA copper concentrate each month have been determined upon the basis as suggested by our Mr. Fred E. Gray in his letter to you dated October 29, 1953, to which you indicated approval in your letter of November 4, 1953.

Very truly yours,

C. W. Six, Treasurer

Report No. 17

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrate produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrate being a portion of Coronado's total production and marketed concentrate for March. The values of D.M.E.A. concentrate are based upon gross revenue realized from total sales to the smelters in March.

Month of March 1955

Calculated net proceeds from sale of concentrates derived from milling of 547.79 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule 1):	
Net smelter proceeds (before deduction of other expense) apportioned to 48.06 dry tons of D.M.E.A. copper concentrate per Schedule II attached.	$ 7,803.42
Net smelter proceeds (before deduction of other expense) apportioned to 57.47 dry tons of D.M.E.A. zinc concentrate per Schedule III attached.	3,250.96
	$11,054.38
Royalty repayment @ 5%	$ 552.72

Schedule 11

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates March, 1955

Calculated net proceeds from sale of 48.06 S.D. tons of copper concentrates derived from 547.79 S.D. tons of D.M.E.A. ore mined in March 1955 and processed with 5692.86 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total 479,342 S.D. tons of copper concentrates delivered to the smelter in March 1955.

Quantity 53.05 wet tons, moisture 9.4 % 48.06 dry tons

Re: Docket No. DMEA 2746
Contract IDM-E 522
Royalty Re-Payments
November 1954 through May 1955

Dear Mr. King:

There are sent you herewith Coronado Copper & Zinc Company's reports of production and net receipts in support of our statement of percentage royalty accrued to DMEA under the above contract upon production of copper and zinc ores from the mining locations based upon gross revenue realized from sales of said product during the period November 1st, 1954, through May 31st, 1955.

A report in quadruplicate is enclosed for each of the months in which DMEA ore was mined, reflecting the percentage royalty calculated thereon as follows:

Report No. 14	for November	1954	$ 6.05
Report No. 15	for December	1954	76.00
	for January	1955	none
Report No. 16	for February	1955	500.30
Report No. 17	for March	1955	552.72
Report No. 18	for April	1955	879.89
Report No. 19	for May	1955	1,066.94
			$3,081.90
Less credit per advice by your letter 4/29/55			6.39
			$3,075.51

Also, we are pleased to enclose Coronado Copper & Zinc Company's check No. 4317 payable to your order in the amount of $3,075.51.

Conforming with past procedure, the enclosed reports reflect pro-rata of smelter values to the specified tons of DMEA copper concentrate marketed as determined from the smelter settlements covering the total tons of copper concentrate delivered to the smelter each month. The pro-rated receipts for DMEA copper concentrate each month have been determined upon the basis as suggested by our Mr. Fred E. Gray in his letter to you dated October 29, 1953, to which you indicated approval in your letter of November 4, 1953.

Report No. 16

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrate produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrate being a portion of Coronado's total production and marketed concentrate for February. The values of D.M.E.A. concentrate are based upon gross revenue realized from total sales to the smelters in February.

Month of February 1955

Calculated net proceeds from sale of concentrates derived from milling of 503.55 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule 1):	
Net smelter proceeds (before deduction of other expense) apportioned to 48.86 dry tons of D.M.E.A. copper concentrate per Schedule II attached.	$7,432.29
Net smelter proceeds (before deduction of other expense) apportioned to 44.87 dry tons of D.M.E.A. zinc concentrate per Schedule III attached.	2,573.63
	$10,005.92
Royalty repayment @ 5%	$ 500.30

Schedule 11

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates February, 1955

Calculated net proceeds from sale of 48.86 S.D. tons of copper concentrates derived from 503.55 S.D. tons of D.M.E.A. ore mined in February 1955 and processed with 5,079.94 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total 505.685 S.D. tons of copper concentrates delivered to the smelter in February 1955.

Quantity 54.29 wet tons, moisture 10% 48.86 dry tons.

	Copper	Zinc	Silver

Re: Docket No. DMEA 2746
Contract IDM-E 522
Royalty Re-Payments
November 1954 through May 1955

Dear Mr. King:

There are sent you herewith Coronado Copper & Zinc Company's reports of production and net receipts in support of our statement of percentage royalty accrued to DMEA under the above contract upon production of copper and zinc ores from the mining locations based upon gross revenue realized from sales of said product during the period November 1st, 1954, through May 31st, 1955.

A report in quadruplicate is enclosed for each of the months in which DMEA ore was mined, reflecting the percentage royalty calculated thereon as follows:

Report No. 14	for November 1954	$ 6.05
Report No. 15	for December 1954	76.00
	for January 1955	none
Report No. 16	for February 1955	500.30
Report No. 17	for March 1955	552.72
Report No. 18	for April 1955	879.89
Report No. 19	for May 1955	1,066.94
		$3,081.90
Less credit per advice by your letter 4/29/55		6.39
		$3,075.51

Also, we are pleased to enclose Coronado Copper & Zinc Company's check No. 4317 payable to your order in the amount of $3,075.51.

Conforming with past procedure, the enclosed reports reflect pro-rata of smelter values to the specified tons of DMEA copper concentrate marketed as determined from the smelter settlements covering the total tons of copper concentrate delivered to the smelter each month. The pro-rated receipts for DMEA copper concentrate each month have been determined upon the basis as suggested by our Mr. Fred E. Gray in his letter to you dated October 29, 1953, to which you indicated approval in your letter of November 4, 1953.

Very truly yours,

C. W. Six, Treasurer
CORONADO COPPER & ZINC COMPANY

Report No. 15

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrate produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrate being a portion of Coronado's total production and marketed concentrate for December. The values of D.M.E.A. concentrate are based upon gross revenue realized from total sales to the smelters in December

Month of December 1954

Calculated net proceeds from sale of concentrates derived from milling of 150.37 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule 1):	
Net smelter proceeds (before deduction of other expense) apportioned to 6.20 dry tons of D.M.E.A. copper concentrate per Schedule 11 attached.	$ 855.00
Net smelter proceeds (before deduction of other expense) apportioned to 13.61 dry tons of D.M.E.A. zinc concentrate per Schedule 111 attached.	665.04
	$1520.04
Royalty repayment @ 5%	$ 76.00

Schedule 11

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates December, 1954

Calculated net proceeds from sale of 6.20 S.D. tons of copper concentrates derived from 150.37 S.D. tons of D.M.E.A. ore mined in December 1954 and processed with 5,928.51 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total 407.054 S.D. tons of copper concentrates delivered to the smelter in December 1954.

Quantity 6.84 wet tons, moisture 9.32% 6.20 dry tons

AUG 15 1955

BUREAU OF MINES
Denver, Colorado

CORONADO COPPER & ZINC COMPANY
1206 Pacific Mutual Building
Los Angeles 14, California

August 9, 1955

Mr. W. H. King
Executive Officer
DMEA Field Team, Region IV
U.S. Department of The Interior
224 New Customhouse
Denver 2, Colorado

Re: Docket No. DMEA 2746
Contract IDM-E 522
Royalty Re-Payments
November 1954 through May 1955

Dear Mr. King:

There are sent you herewith Coronado Copper & Zinc Company's reports of production and net receipts in support of our statement of percentage royalty accrued to DMEA under the above contract upon production of copper and zinc ores from the mining locations based upon gross revenue realized from sales of said product during the period November 1st, 1954, through May 31st, 1955.

A report in quadruplicate is enclosed for each of the months in which DMEA ore was mined, reflecting the percentage royalty calculated thereon as follows:

Report No. 14	for November 1954	$ 6.05
Report No. 15	for December 1954	76.00
	for January 1955	none
Report No. 16	for February 1955	500.30
Report No. 17	for March 1955	552.72
Report No. 18	for April 1955	879.89
Report No. 19	for May 1955	1,066.94
		$3,081.90
Less credit per advice by your letter 4/29/55		6.39
		$3,075.51

Also, we are pleased to enclose Coronado Copper & Zinc Company's check No. 4317 payable to your order in the amount of $3,075.51.

Conforming with past procedure, the enclosed reports reflect pro-rata of smelter values to the specified tons of DMEA copper concentrate marketed as determined from the smelter settlements covering the total tons of copper concentrate delivered to the smelter each month. The pro-rated receipts for DMEA copper concentrate each month have been determined upon the basis as suggested by our Mr. Fred E. Gray in his letter to you dated October 29, 1953, to which you indicated approval in your letter of November 4, 1953.

Very truly yours,

C. W. Six, Treasurer

Report No. 14

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrate produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrate being a portion of Coronado's total production and marketed concentrate for November. The values of D.M.E.A. concentrate are based upon gross revenue realized from total sales to the smelters in November.

Month of November 1954

Calculated net proceeds from sale of concentrates derived from milling of 11.17 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule 1):	
Net smelter proceeds (before deduction of other expense) apportioned to .50 dry tons of D.M.E.A. copper concentrate per Schedule 11 attached.	$ 68.47
Net smelter proceeds (before deduction of other expense) apportioned to 1.06 dry tons of D.M.E.A. zinc concentrate per Schedule 111 attached.	52.56
	$ 121.03
Royalty repayment @ 5%	$ 6.05

Schedule 11

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates November, 1954

Calculated net proceeds from sale of .50 S. D. tons of copper concentrates derived from 11.17 S. D. tons of D.M.E.A. ore mined in November 1954 and processed with 5,298.41 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total 442,886 S.D. tons of copper concentrates delivered to the smelter in November 1954.

Quantity .55 wet tons, moisture 9.3% .50 dry tons.

FIRST ROYALTY AUDIT CERTIFICATE

I have examined the records and sales documents pertaining to the sale of Silver, Copper, and Zinc Concentrates for the period October 1, 1953 through October 31, 1954, by

Coronado Copper and Zinc Company
1206 Pacific Mutual Building
Los Angeles, California.

produced from the Republic Mine located at Johnson Camp, Cochise County, Arizona, under the terms of Contract Idm-8522, Docket No. DMEA 2746.

My examination was made in accordance with generally accepted standards applicable in the circumstances.

The Audit established the total net sales of Silver, Copper and Zinc Concentrates for this period to be $43,773.80. Royalty due the United States Government at the contract rate of 5% is $2,188.70. The royalty paid and balance due are as follows:

Total Royalty Paid	$2,195.09
Total Royalties Due	2,188.70
Royalty Paid In Excess of Royalty Due - - -	$6.39

Donald T. Finch

Donald T. Finch
DMEA Auditor.

April 15, 1955

FIRST ROYALTY AUDIT REPORT

I INTRODUCTION

On March 23 to April 7, 1955, an audit of royalty payments received covering the period October 1, 1953 through October 31, 1954, was made of the production records and ore sales accounts pertaining to Contract Idm-E522, Docket No. DMEA 2746 with the

Coronado Copper and Zinc Company
1206 Pacific Mutual Building
Los Angeles, California.

covering a project of exploration for Copper - Zinc located at the Republic Mine, Johnson Camp, Cochise County, Arizona.

The formal production records and ore sales accounts pertaining to this contract are located at the Company's office in Los Angeles, Cal.

II GENERAL INFORMATION

At the time of this audit of royalty payments, the Exploration Contract had not been completed and the D.M.E.A. had not issued a Certificate of Discovery. The total costs of operations accepted by the Certifying Officer, D.M.E.A. Field Team, Region III, as of March 23, 1955, amounted to $79,497.00, with Government participation of $39,748.50.

The Exploration Contract (short form) authorizes total costs of $99,050.00 with Government participation of 50%, or $49,525.00.

During the period October 1, 1953 to October 31, 1954 there were 83,434 tons of ore produced from the Republic Mine. Of this amount 3,812 tons, or 4.57%, of total production were subject to D.M.E.A. royalty.

All ore produced from the Republic Mine is concentrated in the Company's plant at Johnson Camp, Arizona. Copper concentrates and zinc concentrates are produced from the ores. The copper concentrates are sold to the American Smelting and Refining Company's smelter located at El Paso, Texas. The zinc concentrates are sold to International Minerals and Metals Corporation's smelter located at Bartlesville, Oklahoma. Both concentrates contain Silver, Copper and Zinc. All sales of concentrates were made under written contracts with the respective smelters. Copies of these smelter contracts were examined during the Audit, and are available in the Audit working papers.

In a letter dated October 29, 1953 the Operator notified the Executive Officer of the D.M.E.A. Field Team, Region IV (now Region III) to the effect that because of the Operator's methods of operations and the relatively small amount of production applicable to D.M.E.A. royalty, it would

be impractical to treat such ore separately from other Republic Mine ore. This letter also outlined in general the manner in which D.M.E.A. production would be determined by the application of engineering formulae. The proposed method was reported as being the same method the Operator used in determining the distribution of its other production to other parts of the mine.

The Supervising Engineer in a report dated January 8, 1954 stated:

> "The method used by the Operator to account for the ore mined from various places in the mine, including the D.M.E.A. project, was checked and is reasonable."

The Operator's method of determining D.M.E.A. project production and the computation of D.M.E.A. royalties was reviewed in detail during the Audit with the Executive Officer, D.M.E.A. Field Team, Region III. These methods which will be discussed in detail later in this report are approved by the Executive Officer. The Auditor concurs in this approval, in respect to the soundness from an accounting standpoint of the methods of allocation used.

The production areas subject to D.M.E.A. royalty are described in Annex I to the Exploration Contract.

The Operator had, at the time of the Audit, submitted thirteen monthly reports of D.M.E.A. project production and royalty. These reports consisted of the following:

1. Monthly statement of calculated net proceeds from sale of concentrates derived from milling of ore produced from area subject to D.M.E.A. project.

2. Schedule I: In 3 parts

   (A) Itemized "Breakdown of Mine Ore". This data is signed by a mining engineer in the employ of the Operator. It consists of a completely itemized schedule of all Republic Mine production for the month. It shows the total mine cars, tons of ore, grab sample assays and corrected assays for each location in the mine, and the total average mine assays for the month, of copper and zinc contents. D.M.E.A. project production and mine assays are segregated in this schedule.

   (B) Statement of the following data:
   1. Opening and closing mill bin inventories
   2. Mill heads in tons with assays for copper and zinc
   3. Total mine production in tons
   4. Computation of car/ton factor
   5. Computation of copper assay correction factor
   6. Computation of zinc assay correction factor
   7. Itemized summary of D.M.E.A. project production

(C) Mill Recovery Statement D.M.E.A. Muck. This statement is signed by the Mill Manager and shows
1. Tons of Ore Milled
2. Per Cent of Ore Resulting in Concentrates
3. Assays of Ore, Copper Concentrates, and Zinc Concentrates
4. Pounds of Metal each type of Concentrate
5. Mill Recovery Percentages

3. Schedule II, Detailed, computed statement for sale of copper concentrates including itemized smelter charges and deductions.

4. Schedule III, Detailed, computed statement for sale of zinc concentrates including itemized smelter charges and deductions.

5. Photographic copies of all smelter settlement sheets. A. S. & R. Company, smelter, El Paso, Texas.

6. Photographic copies of all smelter settlement sheets. International M. & M. Corporation, smelter, Bartlesville, Oklahoma.

7. Transmittal letter signed by Treasurer of the Operator, authenticating the data submitted.

All of the foregoing data is available in the files of the Executive Officer, D.M.E.A. Field Team, Region III.

Periodic monthly inspections have been made of the project by U.S.B.M. Engineers, and written interim reports on production of ore from the D.M.E.A. project have been submitted to the Executive Officer, D.M.E.A. Field Team, Region III. Copies of these interim reports are available in the Executive Officer's files.

III SCOPE OF AUDIT AND FINDINGS

The audit was limited to determining the accuracy and propriety of royalty payments received by the Finance Officer, which were applicable to production and sales of concentrates during the period October 1, 1953 through October 31, 1954, and a determination that the Operator was properly accounting for production resulting from operations subject to the Exploration Contract.

The extent of the Audit and the findings follow: -

A. Conference with the Examining Engineer, U. S. B. M.

In lieu of a conference with the Examining Engineer, copies of interim royalty reports on file with the Executive Officer, D.M.E.A. Field Team, Region III, were examined and the entire problem was reviewed with the Executive Officer.

Mr. William R. Hardwick, U. S. B. M. Engineer made an on-site examination on January 18, 1955, and submitted a written report on this examination dated January 25, 1955. In this report Mr. Hardwick submits a table of production subject to royalty for the period October, 1953 through December, 1954. This table shows tons of ore produced, tons of copper concentrates and tons of zinc concentrates derived from milling D.M.E.A. project ores. A complete reconciliation of this data with material submitted by Operator was effected during the audit. Mr. Hardwick also states in this report that: -

> "On several regular inspection visits to the mine the stopes and working places from which this ore was produced were examined. The amount of ore reported by the Operator is believed to be correct."

As previously stated in this report, the Executive Officer, D.M.E.A. Field Team, approves, in principle, the Operator's method of determining the sales value of D.M.E.A. project production subject to royalty.

B. Audit of Operator's Monthly Reports

During the Audit itemized statements of all computations were prepared from the schedules and data submitted by the Operator each month. A condensed summary of these computations follows:

SUMMARIZED COMPUTATIONS OF ROYALTIES DUE
OCTOBER 1, 1953 THROUGH SEPTEMBER 30, 1954

	ORE	COPPER CONCENTRATES	ZINC CONCENTRATES
Total tons of ore produced at Republic Mine during period	83,433.52		
Total Mine Cars of Ore	89,761		
Car Ton Factor (Average)	.929507470		
Total Cars Produced from Area Subj. to DMEA Royalties	4,101		
Total Tons of Ore Produced Subject to DMEA Royalties	3,812		
Total Pounds DMEA Ore	7,624,000		

*Mill Head Assays
*Weighted Average Grab Sample Assays
*Weighted Average DMEA Grab Sample Assays

* SEE COMMENTS

	ORE		COPPER CONCENTRATES		ZINC CONCENTRATES	
DMEA Ore

Sub-Total		$27,845.68		$15,690.95
Add: Excess Computed Smelter Chgs. Not Reflected on Smelter Settlement Sheets (See Comments)		* 237.17		-
Net Smelter Value Subject To DMEA Royalty		$28,082.85		$15,690.95

SUMMARY

Net Smelter Value		
Copper Concentrates	$28,082.85	
Zinc Concentrates	15,690.95	
Total Net Smelter Value		$43,773.80
Royalties Received Per Finance Officer's Records	$ 2,195.09	
Royalties Due (5% of Smelter Value)	2,188.70	
Overpayment of Royalties by Operator		$6.39

In connection with the foregoing condensed summary, it should be noted that it is a composite of thirteen different reports, and no notation has been made of minor mathematical variations in composite data which are due to decimal or mill adjustments. All monetary values are, however, exact.

Complete detailed computations and schedules compiled during the audit are available in the file of the audit working papers.

Discussion of the foregoing data and the degree of confirmation follows:

Total Tons of Ore Produced: 83,433.52

Total Mine Cars of Ore: 89,761

These totals were compiled during the audit from the Operator's monthly Schedule I, "Breakdown of Mine Ore." Monthly totals were adjusted by the Operator for variations in opening and closing Mill Bin Inventories.

Car Ton Factor (Average .929507470)

The Operator keeps track of all mine cars produced segregated by production location in the mine. Total tons produced in any given month are determined at the mill. Total Tons divided by Total Mine Cars applicable to the month under consideration results in a car/ton factor to use in determining the number of tons of ore produced from any specific location in the mine. All car/ton factors for the period October 1, 1953 to October 31, 1954 were recomputed during the audit. The average car/ton factor above was derived by dividing total tons produced during the period by total cars produced.

Total Cars Produced from Mine Area Subject to DMEA Royalty: 4,101

This total was compiled during the Audit from the Operator's monthly Schedule I, "Breakdown of Mine Ore."

Total Tons of Ore Produced, Subject to DMEA Royalty: 3,812

This total was determined by applying the foregoing car/ton factor to the total DMEA cars produced. Each monthly computation of DMEA tons for the period under review was recomputed, and the monthly totals were added and reconciled with the above total of 3,812 tons. A minor variation due to decimal lag has been disregarded in this report.

Total Pounds DMEA Ore: 7,624,000

The above DMEA tons of ore have been converted to pounds in this report for ease in applying applicable assay percentages.

Mill Head Assays, Weighted Average Grab Sample Assays, Weighted Average DMEA Grab Sample Assays

The Operator takes car samples as the ore is hoisted. From this data monthly average mine assays for each production area of the mine and for the entire mine are determined. These assays are reflected by the Operator on the Schedule I, "Breakdown of Mine Ore." Mill head assays for the month are reported by the Operator on the second part of the Schedule I of the monthly report.

From the foregoing data, assay correction factors are determined for both copper and zinc. These assay correction factors are derived by dividing the monthly mill head assays by the average monthly mine assay.

During the audit all of the foregoing computations for the period October 1, 1953 to October 31, 1954 were recomputed.

Average Grade Corrected Assays DMEA Ore

During the audit all corrected DMEA assays for each month under review were recomputed by applying the applicable assay correction factor. For purposes of the composite summary in this report, the corrected average assays were computed by dividing the thirteen months' totals of metals by the total tons of ore. These computations show corrected weighted average assays DMEA Ore as follows:

Copper 1.75254 Zinc 6.42992

Metal Content in Pounds, DMEA Ore:

Copper 133,613.67 Zinc 490,217.08

The above totals are a composite compiled during the audit from the Operator's monthly reports. Monthly data is shown in the Operator's reports on the second part of Schedule I and carried forward to the third part of this schedule, "Mill Recovery Statement." Monthly data is obtained by applying corrected DMEA assays to the monthly DMEA ore production expressed in pounds. All monthly computations of this nature, for the period October 1, 1953 to October 31, 1954, were recomputed.

Per Cent of Ore Resulting in Concentrates

The per cent of ore resulting in concentrates is reported in the Operator's "Mill Recovery Statement" submitted with each monthly report. It is based on the mill operating averages for each month. The percentages shown in the composite summary of this report were derived during the audit by dividing the thirteen months' total DMEA tons of concentrates by the total DMEA tons of ore. These percentages which are weighted averages are 5.3549% for copper concentrates and 9.6645% for zinc concentrates.

Weight of Concentrates Produced:

Copper	204.13 Tons or 408,260 lbs.
Zinc	368.41 Tons or 736,820 lbs.

The above data is a composite total, compiled during the audit from the Operator's monthly reports. Data shown on the Operator's monthly reports is obtained by applying the applicable mill percentage of ore resulting in concentrates. During the audit all computations for the period October 1, 1953 to October 31, 1954 were recomputed.

Assays, DMEA Concentrates (Average)

	Copper Concentrates	Zinc Concentrates
Copper	29.022	1.216
Zinc	13.812	55.134

The monthly assays for concentrates are reported by the Operator on the "Mill Recovery Statement" which is the third part of Schedule No. 1 of the monthly report. The above data is a composite of the thirteen months involved. It was derived during the audit by dividing the total weight of applicable concentrate into the applicable total weight of metal recovered. During the audit the monthly assay data for each month was used as a cross check of reported mill recovery percentages.

Mill Recovery Percentages (Average)

	Copper Concentrates	Zinc Concentrates
Copper	88.677	6.707
Zinc	11.503	82.870

The monthly mill recovery percentages are reported by the Operator on the "Mill Recovery Statement" which is the third part of Schedule No. 1 of the monthly report. The above data is a composite of the thirteen months involved. It was derived during the audit by dividing the total weight of metal in the applicable concentrate by the total metal content of the ore. During the audit all mathematical computations for each month were recomputed.

Metal Content of DMEA Concentrates: Pounds

	Copper Concentrates	Zinc Concentrates
Copper	118,484.49	8,961.08
Zinc	56,388.32	406,242.35

Metal contents of concentrates are derived for each month by applying the appropriate mill recovery percentages to the metal content of DMEA ore. A cross check of quantities of metal for each type of concentrate is

provided by applying the proper assay of concentrates. During the audit all computations for metal content of concentrates were recomputed for the period October 1, 1953 to October 31, 1954. The foregoing composite data are a summation of monthly quantities. These quantities represent the gross quantities of metal purchased by the smelters.

Metals Paid For:

	Copper Concentrate	Zinc Concentrate
Copper	114,403 lbs.	5,823 lbs.
Zinc	None	345,300 lbs.
Silver	752.75 ozs.	357.52 ozs.

Net metals paid for are shown by the Operator on Schedules II and III of the monthly report. The net quantities are arrived at by applying the provisions of the applicable smelter contract. In the case of copper concentrates, gross copper metal quantities are adjusted by 20 lbs. per ton of concentrate. No payment is made by the smelter for zinc. Gross quantities of silver are adjusted by 5%. In the case of zinc concentrates, gross quantities of copper metal are adjusted by 35%, gross quantities of zinc by 15%, and gross quantities of silver by 20%.

Gross quantities of silver for both types of concentrates were computed on the basis of average number of ounces per ton of concentrates sold during the month as shown by the copies of settlement sheets issued by each smelter. During the audit the average monthly content of silver per ton of concentrate for each type of concentrate was computed for each month under review. The average of ounces of silver per ton shown in this report summary for each type of concentrate is a composite average derived by dividing total ounces of silver for the period by total tons of the applicable concentrate.

Also during the audit all monthly computations shown on the Operator's schedules for net metals were recomputed for each month October, 1953 through October, 1954, and all adjustments were confirmed as being in accordance with the applicable smelter contract.

Average Prices

Prices paid by the smelters were in accordance with contract agreements. They were based on the monthly average as published in the Engineering and Mining Journal. During the audit all average monthly prices were confirmed for each month October, 1953 through October, 1954 by reference to the weekly E. & M. J. prices and the computation of the monthly averages.

The prices shown on the summary statement in this report are a weighted average for the period under review.

Payments

Gross Payments

Net Payments before Smelter Charges and Deductions

Gross payment amounts for each month were determined by multiplying

net metal units by the average monthly unit price. All extensions of this nature for the period October 1, 1953 to October 31, 1954 were recomputed during the Audit.

The monthly gross payment amounts were adjusted by the following items as provided by the various smelter contracts:

(A) Copper Concentrates

Copper Metal

Bullion Freight Tax per lb. of copper .035¢;
Contract Price adjustment ranged from 3.080¢ to 3.180¢ per lb. of copper;
Cathode adjustment .125¢ per lb. of copper.

(B) Zinc Concentrates

Copper Metal

Contract price adjustment per lb. of copper ranged from 6¢ to 7.41¢.
Cathode adjustment .15¢ per lb. of copper.

Zinc Metal

Contract price adjustment E. St. Louis Freight at .35535¢ per lb. of zinc.

During the audit all computations involved in determining the net payments for metals before smelter charges and deductions were recomputed for the period under review. All price adjustments were compared with the applicable smelter contract.

Smelter Charges

All smelter charges shown on the Operator's monthly reports were determined during the audit to be in accordance with the smelter contracts. These charges were also compared with copies of smelter settlement sheets. Later in this report comment is made concerning sundry overcharges which were disallowed by the audit. All mathematical computations involved in the monthly smelter charges for the period October 1, 1953 to October 31, 1954 were recomputed during the audit. The smelter charges consisted of the following components:

Copper Concentrates

Base charge per ton of concentrate ranged from $8.88 to $9.16. Labor adjustment per ton of concentrate (sliding scale) ranged from 2¢ to 56¢ addition per ton. Adjustment per ton of concentrate for excessive per cent of zinc content ranged from 52¢ to $2.8038 addition per ton. Note: Operator reported zinc adjustment on basis of contract provision and DMEA zinc assay for copper concentrates. This resulted in an overcharge. See full discussion of the disallowances in this report.

Zinc Concentrates

Base charge per ton of concentrates $54.13. Deduction adjustment for price variations in zinc ranged from $12.00 to $15.1875 per ton. Labor adjustment per ton of concentrate (sliding scale) ranged from $3.026 to $3.902 addition per ton.

The amounts per ton for smelter charges shown on the summary in this report are weighted averages based on the Operator's monthly reports. These averages do not reflect correction for overcharges disallowed in this report.

Smelter Deductions

All computations for smelter deductions during the period October 1, 1953 to October 31, 1954 were recomputed during the audit. Also, the reasonableness and rates per ton for freight were confirmed by comparison with copies of settlement sheets submitted with each monthly report.

These deductions consisted of the following items:

Copper Concentrates

Freight and tax per wet ton of concentrates $3.5535. Switching and tax (Pro rata for month) ranged from $1.30 to $8.24. Umpire fees (Pro rata for month) ranged from 13¢ to $1.46.

Zinc Concentrates

Freight and tax per wet ton of concentrate ranged from $11.30 to $11.57. Umpire fees (Pro rata for month) ranged from zero to $1.70.

Excessive Smelter Charges

Copper Concentrates

The smelter contracts for purchase of copper concentrate prescribe additional charges for zinc in excess of 10%. In submitting the monthly reports the Operator based its computations on this provision and the assay of DMEA Concentrate. Reference to copies of settlement sheets disclosed that the Operator's method of computation resulted in excessive computed smelter charges. Adjustment in this report is based on monthly average zinc charge per ton of concentrate sold, as computed during the audit from copies of A. S. & R. Co. smelter settlement sheets. A monthly tabulation of excess smelter charges by months is as follows:

October, 1953	$12.08	
November	14.67	
December	8.36	
January, 1954	-	
February	12.87	
March	34.92	
April	15.78	
May	49.75	
June	18.07	
July	21.39	
August	8.71	
September	14.48	
October	26.09	
TOTAL:		$237.17

Other Errors Corrected in Report Summary

The following errors were noted during the audit and have been corrected in the summary statement of this report.

	Net Smelter Return	
	Under Stated	Over Stated
March: 1954 Zinc Concentrates		
Overstatement of Silver 7.51 ozs. at 90¢		$ 6.76
April: Zinc Concentrates		
Error in Labor Adjustment. Umpire fees of 96¢ subtracted instead of added;	$ 0.57	
Gross overstatement		1.92
May: Zinc Concentrates		
Overcharge Freight	3.01	
July: Copper Concentrates		
Understatement of 1,096 lbs. of Copper at 26.36¢	288.90	
Zinc Concentrates		
Undercharge Freight		255.27
August: Copper Concentrates		
Error in Extension Silver Overstatement		393.47
TOTALS:	$292.48	$657.42

Royalties

Total Royalties Due at 5% of Net Smelter Value of $43,773.80 amount to			$2,188.70
Total Royalties Received			2,195.09
Overpayment			($6.39)

Represented by:

Gross overstatement Net Smelter Value by Operator		$657.42	
Less: Excessive Smelter Charges	$237.17		
Other Errors listed above which understated net smelter value	292.48	529.65	
Net Overstatement Net Smelter Value		$127.77	
5% of Net Overstatement Net Smelter Value Resulted in Royalty Overpayment as above.			$6.39

C. Audit of Operator's Records

In view of the very complete documentation submitted by the Operator in its monthly reports and also the on-site examination by the Examining Engineer, which included an examination of mill production records, further examination of the Operator's records was considered unnecessary.

D. Other Comments

In reviewing the Examining Engineer's report it was noted that DMEA production for November and December, 1954 totaled 161.54 tons of ore, from which 6.7 tons of copper concentrates and 14.67 tons of zinc concentrates were derived. Royalty reports and payments on this production had not been received at the time of the audit. This situation was, therefore, discussed with the Executive Officer of the DMEA Field Team, Region III.

Based on the amount of work involved for the Operator in the preparation of the monthly royalty reports, both the Executive Officer and the Auditor consider that this Operator's royalty account is in a reasonably current condition.

IV CONCLUSIONS

The audit has confirmed the accuracy and propriety of the royalty payments received by the Finance Officer, which are applicable to sales of concentrates during the period October 1, 1953 through October 31, 1954, with the exception of the errors and resulting net overpayment described in the previous section of this report. It has also determined that the Operator is properly accounting for production resulting from operations subject to the DMEA Exploration Contract during the period under review.

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: Settlement Sheets - Coronado Copper & Zinc Company, Docket DMEA 2746, Contract Idm-E522 - Arizona

Enclosed are calculation sheets for DMEA royalty from Coronado Copper & Zinc Company for the period October 1953 through October, 1954. The monthly reports for the months of October, November and December, 1953, and January and February, 1954, constitute revised reports replacing those previously forwarded to your office.

Check in the amount of $1,351.41 for balance due on royalty on the above shipments was forwarded to you on January 28, 1955.

W. M. TRAVER,

W. M. Traver

Re: Docket No. DMEA 2746
Contract IDM-E 522
Royalty Re-Payments
October 1953 to October 1954

Dear Mr. King:

Supplementing my letter to you dated January 5th, I am pleased to send you herewith a complete report of production and net receipts showing royalty calculations thereon for each of the months October 1953 through October 1954 both inclusive. The monthly reports for the months of October, November and December, 1953 and January and February, 1954 constitute revised reports replacing those previously forwarded to you with remittances.

This third revision of the first five monthly reports together with our report for each subsequent month through October 1954, all being furnished herewith in quadruplicate, reflect computation of the royalty payment upon the value per ton of concentrate marketed, rather than upon the value per ton of DMEA ore mined, and based upon the net smelter returns for concentrate delivered after deduction for all smelter payments covering freight etc., but before deduction of marketing expenses actually paid by Coronado, such as hauling, representation etc.

Also I wish to state that the enclosed reports reflect pro-rata of smelter values to the specified tons of DMEA copper concentrate marketed as determined from the smelter settlements covering the total tons of copper concentrate delivered to the smelter each month. The pro-rated receipts for DMEA copper concentrate each month have been determined upon the basis as suggested by our Mr. Fred E. Gray in his letter to you dated October 29, 1953, to which you indicated approval in your letter of November 4, 1953.

Conforming with your request by letter dated December 31, 1954, we have assembled duplicate copies of all smelter liquidation sheets or photostat copies thereof and attached same to each of the monthly reports for your verification of the values, weights, assays, etc. used as a basis in arriving at the figures set forth in each report.

There is also sent you herewith Coronado Copper and Zinc Company's check No.3636 payable to the Treasurer of The United States in the amount of $1,351.41 covering settlement in full of the amounts due as shown on each of the enclosed thirteen monthly reports, summarized as follows:

Report No. 1	for October 1953		$ 228.64
2	November 1953		112.59
3	December 1953		68.71
4	January 1954		189.05
5	February 1954		132.87
6	March 1954		215.17
7	April 1954		81.18
8	May 1954		191.28
9	June 1954		88.24
10	July 1954		131.96
11	August 1954		160.04
12	September 1954		210.23
13	October 1954		365.13
total			2,195.09

Less payments made on previous reports:

Report No. 1	for October 1953	$254.95	
2	November 1953	127.97	
3	December 1953	100.28	
4	January 1954	210.73	
5	February 1954	149.75	843.68
Net payment by enclosed check No. 3636			$1,351.41

Very truly yours,

C. W. Six, Treasurer
CORONADO COPPER & ZINC COMPANY

Report No. 13

CORONADO COPPER AND ZINC COMPANY

Statement of D.M.E.A. royalty repayment on loan covering D.M.E.A. copper and zinc concentrate produced from the 400 level project of Coronado's Johnson Camp Mine, said concentrate being a portion of Coronado's total production and marketed concentrate for October. The values of D.M.E.A. concentrate are based upon gross revenue realized from total sales to the smelters in October.

Month of October 1954

Calculated net proceeds from sale of concentrates derived from milling of 533.62 dry tons of ore mined from D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expense) apportioned to 33.35 dry tons of D.M.E.A. copper concentrate per Schedule II attached.	$4,461.84
Net smelter proceeds (before deduction of other expense) apportioned to 53.85 dry tons of D.M.E.A. zinc concentrate per Schedule III attached.	2,840.84
	$7,302.68
Royalty repayment @ 5%	$ 365.13

Schedule II

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates October, 1954

Calculated net proceeds from sale of 33.35 S.D. tons of copper concentrates derived from 533.62 S.D. tons of D.M.E.A. ore mined in October 1954 and processed with 5,202.00 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total 395.948 S.D. tons of copper concentrates delivered to the smelter in October 1954.

Quantity 36.60 wet tons, moisture 8.89% 33.35 dry tons.

	Copper	Zinc	Silver
Assay	28.53%	12.677%	3.97 oz p.T.
Contents	19,026.75 lbs	8,455.74 lbs.	132.40 ozs

Metals paid for:

CORONADO COPPER AND ZINC COMPANY

Zinc Concentrates August, 1954

Calculated net proceeds from sale of 21.89 S.D. tons of zinc concentrates derived from 263.87 S.D. tons of D.M.E.A. ore mined in August 1954 and processed with 6,311.43 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total of 609.752 S.D. tons of zinc concentrate delivered to the smelter in August 1954.

Quantity 23.80 wet tons, moisture 8.03% 21.89 dry tons.

	Zinc	Copper	Silver
Assay	55.13%	1.265%	1.09 oz. p.T.

CORONADO COPPER AND ZINC COMPANY

Zinc Concentrates - April 1954

Calculated net proceeds from sale of 15.97 S.D. tons of zinc concentrate derived from 174.04 S.D. tons of D.M.E.A. ore mined in April 1954 and processed with 6,544.49 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total of 742.29 S.D. tons of zinc concentrate delivered to the smelter in April 1954.

Quantity 17.34 wet tons, moisture 7.9%. 15,97 dry tons.

	Zinc	Copper	Silver

The values of D.M.E.A. concentrate are based upon gross revenue realized from total sales to the smelters in February.

Month of February 1954

Calculated net proceeds from sale of concentrates derived from milling of 194.57 dry tons of ore mined from the D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expenses) apportioned to 13.84 dry tons of D.M.E.A. copper concentrate per Schedule II attached	$1,886.43
Net smelter proceeds (before deduction of Other expenses) apportioned to 22.64 dry tons of D.M.E.A. zinc concentrate per Schedule III attached	770.90
	$2,657.33
Royalty repayment @ 5%	$ 132.87

Schedule II
Revised 8/6/54

CORONADO COPPER AND ZINC COMPANY

Copper Concentrate-February 1954

Calculated net proceeds from sale of 13.84 S.D. tons of copper concentrate derived from 194.57/tons of D.M.E.A. ore mined in February 1954 and processed with 6,222.16 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total of 468.7385 S.D. tons of copper concentrate delivered to the smelter in February 1954.

Quantity 15.33 wet tons moisture 9.7% 13.84 dry tons

	Copper	Zinc	Silver

The values of D.M.E.A. concentrate are based upon gross revenue realized from total sales to the smelters in October.

Month of October 1953

Calculated net proceeds from sale of concentrates derived from milling of 459.33 dry tons of ore mined from the D.M.E.A. 400 level project (per analysis shown in Schedule I):	
Net smelter proceeds (before deduction of other expenses) apportioned to 23.24 dry tons of D.M.E.A. copper concentrate per Schedule II attached	$3,218.20
Net smelter proceeds (before deduction of other expenses) apportioned to 34.94 dry tons of D.M.E.A. zinc concentrate per Schedule III attached	1,354.65
	$4,572.85
Royalty repayment @ 5%	$ 228.64

Schedule II
2nd Revision 8/6/54

CORONADO COPPER AND ZINC COMPANY

Copper Concentrates - October 1953

Calculated net proceeds from sale of 23.24 S.D. tons of copper concentrate derived from 459.33 S.D. tons of D.M.E.A. ore mined in October 1953 and processed with 6,375.29 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total of 463.043 S.D. tons of copper concentrate delivered to the smelter in October 1953.

Quantity 25.44 tons wet moisture 8.66% 23.24 dry tons.

	Copper	Zinc	Silver
Assay	29.33%	11.748%	3.70 oz p.T.
Content	13,632.40 lbs	5,460.63 lbs	85.99 ozs.

Metals paid for:

Copper content	13,632 lbs.	
Less 20 lbs per ton	465 lbs.	13,167 lbs.
Silver content	85.99 ozs.	
Less 5%	4.30 ozs.	81.69 ozs.

Payment:

Copper metal 13.167 lbs.	@ 29.590¢	$ 3,896.12		
Less: Bullion freight tax	.035¢			
Contract price deduction	3.080¢			
Cathode deduction	.125¢			
13,167 lbs. @	3.240¢		426.61	$ 3,469.51
Silver metal 81.69 ozs @	90.0¢		73.52	
Less: Contract price deduction	1.5¢		1.23	72.29

Amount carried forward to page 2 $ 3,541.80

Coronado Copper and Zinc Company -2-

Amount brought forward from page I		$ 3,541.80
Less Smelter charges:		
Base charge per ton concentrate	$ 8.88	
Labor adjustment -		
$1.823 hourly base per contract		
1.894 Sept. 1953 average hourly rate		
.071 excess @ 6¢ per each one cent	.43	
Zinc adjustment -		
10.000% zinc assay base per contract		
11.748% zinc assay of concentrates		
1.748% excess @ 30¢ per each one percent	.52	
23.24 tons @	9.83	228.45
		3,313.35
Less other smelter deductions:		
Railroad freight on 25.44 wet tons	94.64	
Umpire	.51	95.15
		3,218.20
Less other expenses:		
Trucking from mill to railroad	19.08	
Representation, assaying, etc.	5.09	24.17
		$3,194.03

Schedule III
2nd Revision 8/6/54

CORONADO COPPER AND ZINC COMPANY

Zinc Concentrates - October 1953

Calculated net proceeds from sale of 34.94 S.D. tons of zinc concentrate derived from 459.33 S.D. tons of D.M.E.A. ore mined in October 1953 and processed with 6,375.29 tons of other ore mined.

Calculations are based upon moisture content, metal prices, smelter deductions and charges, and expenses as were applicable to the total of 723.7505 S.D. tons of zinc concentrate delivered to the smelter in October 1953.

Quantity 38.09 wet tons moisture 8.277% 34.94 dry tons.

	Zinc	Copper	Silver
Assay	54.09%	1.575%	1.07 oz p.T.
Contents	37,795.19 lbs.	1,100.41 lbs.	37.39 ozs.

Metals paid for:

Zinc content	37,795 lbs.	
Less: 15%	5,669 lbs.	32,126 lbs.
Copper content	1,100 lbs.	
Less: 35%	385 lbs.	715 lbs.
Silver content	37.39 ozs.	
Less: 20%	7.48 ozs.	29.91 ozs.

Payments:

Zinc metal 32,126 lbs.	@ 10.0¢	$3,212.60	
Less freight on zinc to E. St. Louis	@ .35535¢	114.16	$ 3,098.44
Copper metal 715 lbs.	@ 29.598¢	211.63	
Less contract price deduction	@ 6.00¢		
cathode deduction	@ .15¢		
715 lbs.	@ 6.15¢	43.97	167.66
Silver metal 29.91 ozs.	@ .90¢		26.92

Amount carried forward to page 2 $3,293.02

Schedule III
2nd Revision 8/6/54

Coronado Copper and Zinc Company

Amount brought forward from Page I		$3,293.02
Less smelter charges:		
Base charge per ton @ 19.50¢ zinc	$ 54.13	
Less adjustment for decrease to October zinc price of 10.0¢ -- 9/5¢ @ $1.50 per 1¢	14.25	
	39.88	
Labor adjustment -		
$15.400 daily base per contract		
17.032 October 1953 daily average		
1.632 excess @ 20¢ per ten cents	3.264	
34.94 tons @	43.144	1,507.45
		1,785.57
Less other smelter deductions:		
Railroad freight on 38.09 wet tons	430.42	
Umpire	.50	430.92
		1,354.65
Less other expenses:		
Trucking from mill to railroad	28.57	
Representation, assaying, etc.	1.79	30.36
Net proceeds from sale (gross income for percentage depletion)		$1,324.29
