Re: Zinc Concentrate Shipment
Lot J-38 R.R. Car L&A 9147

Dear Fet,

In reply to your telephone call yesterday morning concerning Zinc Concentrate Shipment Lot J-38 from Johnson Camp Mill, our plant records are as follows-

J-38	
Wet tons loaded to R.R. Car L & A 9147	64.50
Moisture Content 7.0%	4.415
Dry tons	59.985

Assaying:- Zinc 54.98%
Copper 2.41%
Silver 1.10 ozs./ton
Cadmium not determined

Based on July Average at Smelter

59.985T @ 54.98% = 65,960 lb Zn @ 85% = 56,066 lb @ 12.655¢ = $7,095.15

59.985T @ 2.41% − 0.75% = 1.66% → 1,992 lb Cu @ 70% = 1394 lb @ 22.4¢ = 315.04

59.985T @ 1.10 oz − 1.00 oz = .10 oz Ag @ 90¢ = 9.72

59.985T × $50.7808 = 00/¢ 7,419.91

JUNE-JULY OPERATIONS

I JUNE DATA

A financial statement for June is attached.

II McFARLAND AND HULLINGER LEASE

A. Mining

The mining operation continued in a routine manner. The work force was increased by three men to a total of 40 to permit starting a raise in oxide ore.

B. Milling

Metallurgical results were good. Both grades and recoveries approached or equaled previous highs. Ore grade was relatively unchanged. The work force remained constant at 17 men.

III STRONG AND HARRIS SILICA FLUX LEASE

During the month of July 50 cars were shipped to the smelter, and 40 cars will be shipped in August. Both quantities represent quotas imposed on Strong and Harris primarily because of the smelter's two-week vacation shutdown during July. Strong and Harris indicate that they expect to be permitted to ship a higher volume in the future, with 76 cars to be shipped in September.

JANUARY-FEBRUARY OPERATIONS

I JANUARY DATA

A financial statement for January is attached.

II McFARLAND AND HULLINGER LEASE

A. Mining

The bonus plan which was started in January has resulted in record shipments of ore. With an average of 36 men employed, 90 cars of ore were shipped to the Sabuarita mill.

The mining operation continues in a routine manner. To date, the ore blocks that Coronado had indicated have proven to be conservatively estimated. No development work has been required since McFarland and Hullinger took over but they plan to drive at least two short drifts to explore relatively narrow ore possibilities which were intersected by Coronado drill holes.

DECEMBER-JANUARY OPERATIONS

OME
DEPARTMENT OF THE INTERIOR
APR 13 1960
REGION III
DENVER, COLORADO

I. DECEMBER DATA

A financial statement for December is attached.

II. McFARLAND AND HULLINGER LEASE

A. Mining

Shipments of crude ore to the mill at Sahuarita totaled 84 cars, the highest month to date. A total of 37 men were employed. A bonus plan based on five tons per man shift, including tramming and hoisting, was placed in effect January 1 and probably accounted for the increased production as compared to previous months when shipments have ranged from 60 to 72 cars.

B. Milling

	January 1960				
	Dry	Assay %		Recovery %	
Product	Tons	Cu	Zn	Cu	Zn
Cu Conc.	372.84	25.60	14.81	80.56	17.15
Zn Conc.	455.16	2.99	52.63	11.49	74.38
Tailing	3883.73	0.24	0.70	7.95	8.47
Mill Feed	4711.73	2.51	6.84	100.00	100.00

Metallurgical results were slightly under previous months in both grade of concentrates and recovery. The mill has experienced trouble in maintaining uniform results and the mill superintendent blames at least part of this on variation in the mineralogical composition of the ore on a day to day basis.
