Memorandum

To : Fiscal Section, Division of Administrative Services
Office of the Secretary, Department of the Interior,
Washington, D. C.

From : Acting Field Officer, OME, Region II

Subject: OME-6092 (Copper)
William R. Noack
Loretto Mine
Inyo County, California
Contract 2122

Enclosed herewith are the original and two copies of the Operator's amended final monthly voucher and progress report.

The operator had neglected to add 35 feet of shaft rehabilitation as authorized by Amendments Nos. 2 and 5.

The voucher has been checked in this office and found to comply with the contract.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel; communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS

Stage III was performed as authorized by Amendments #2 and #5. The maximum allowable cost by report of review dated Aug. 20, 1963, by E. D. Tabbert, O.M.E. auditor, are stated as 35 feet at $75.17 or a total of $2,630.95. Considerable additional costs were incurred in addition to what is reported. However, to simplify the claim, only items which the operator believes are unquestionable are submitted.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Memoranda of Operator

Timber

Timber was stockpiled as evidence of paid statement from Winans Bros. attached to voucher for Stage III. For the 9 five-foot (two sets necessary to brace the floor on the 435' level), the following timber was used:

18 pieces 8" x 8" x 16'	1530 board feet	
13 pieces 8" x 8" x 14'	962 board feet	
5 pieces 6" x 8" x 14'	280 board feet	
72 pieces 2" x 12" x 16'	2304 board feet	
	5076 feet at $85. per M.	$ 431.46
70 lineal feet 4" x 4" guides	93 feet at $140. per M.	13.02
Ladder stock	84 feet at $115. per M.	9.20
		$ 453.68
	4% tax	18.14
		$ 471.82
	Less 2% cash discount	9.42
		$ 462.40

Fuel

Diesel engine fuel to operate the generator is the only fuel charged.
For 4 weeks operation from 1/2/63 to 1/30/63
400 gallons diesel fuel @ 19.9¢ per gal. (invoice attached) $ 79.60

Shaft Hanger Bolts

From hanger bolts purchased and stockpiled from Young Iron Works, the cost per bolt is $1.9781 each. Paid statement attached to voucher for Stage II.
56 bolts @ 1.9781 each $ 110.77

Category (7) Miscellaneous

California State Insurance Policy #236271-62-63 is held for Workmen's Compensation. The rates are as follows for 1963:

1123	Mining Underground	$14.31
1124	Mining Top Men	8.03
5809	Pneumo. Surcharge	1.82

Insurance paid and allotted to Stage II was $370.99 for mining underground and $93.95 for mining top men. Total paid $ 464.94

F.I.C.A. Inusrance allowable (see transcript of payroll) $ 110.69

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS In this final report, the expenses are broken down between Stage I and Stage IV as should have been done on previous reports, and the error not caught until this report.

In the June report, the operator reported a 5' mineralized zone was encountered. This ore apparently lay against the right wall of the shear zone and extended for a total of 25 feet, and varied from 3 to 5 feet in thickness. If the ore were mined clean without waste, it would

(INSTRUCTIONS ON REVERSE)

probably average better than 2%; however, the assays averaged 1.10. The right wall of the shear zone was definitely found which was granite. The mineralized area ended and further exploration at this level would have been necessary to prove the downward extension of the ore found on the 300' level. As the operator did not have the necessary personal capital, the project was closed down.

REMARKS (Cont.)

At the 435' level, the object was to follow one of the enriched cross-fractures in an effort to find where the mineralization originated. Three cross-fractures were found and followed, but in each case the mineralization ended close to the main drift.

The unauthenticated map which the operator located of the 550' level showed a fault with high grade ore which either was misplotted or else did not come up to the 435' level. The map was checked with patent papers and for the drifts and crosscuts, it checks out exactly with the patent survey. Therefore, it was assumed that the mineralization shown on the map was substantially correct.

It is now believed that the most economical way to determine whether or not we have a mine is to continue mucking out the shaft to the 550' level, go in the old workings and sample it. The bottom of the shaft is now 450', which means that we have 100' of mucking and timbering to do. It is too big a project for the writer to do without O.M.E. help. According to your letter of June 19, 1963, the contract as amended by Amendment #5, no more work was authorized below the 435' level.

The operator, at his own expense, by this Amendment has stood the expense of opening and retimbering the shaft

(continued)

REMARKS (Cont.)

from 400' to the present 450' level. As all of the timber and supplies are on hand to go down to the 550' level, if the O.M.E. should reconsider and allow the operator, by an additional amendment, to continue this exploration by the completion of Stage III, which was to open the shaft from the 400' to the 550' level, and on which Stage III the operator has expended a considerable sum of money, this proposed amendment would be appreciated.

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

RECEIVED
AUG 20 1963
OFFICE OF THE SECRETARY
FISCAL SECTION

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Mineral: Copper

NARRATIVE FOR PERIOD ENDING
July 20, 1963

To: Office of Mineral Exploration
U.S. Dept. of the Interior

The early part of July had labor and holiday problems and resumption of work did not take place until the middle of the month. The operator could find no faults or cross-fractures to give any indication of where to look for ore. The only solution seemed to be to follow the right wall which acted as a footwall. Ore was found, but it also was found to pinch out after twenty-five feet. Undoubtedly if the wall were continued to be followed, ore would again be found, because it is on the surface above this point and naturally would be deposited underground in a secondary form. However, the 350 feet of work allowed had been completed and the operator had no personal funds to continue exploration on this level.

It is believed that the next step should be to open up the shaft to the 550-foot level. The cage was removed and a bucket guided by a cross-hatch was assembled and a start of a program of mucking out the shaft to the 550-foot level was prepared.

It is firmly believed that the unsubstantiated reports of a rich 550-foot level are true. Therefore, it is believed that this should be further investigated before any more exploration work is done on the 435-foot level.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

NARRATIVE FOR JUNE 1963

To:
Office of Mineral Exploration
U. S. Dept. of the Interior
555 Battery Street
San Francisco, Calif.

During June 1963, drifting continued to the Northeast in an effort to locate the fault with the high mineralized area shown on an unauthenticated map. This area and the fault were not located. Therefore, the drift was turned to reach the right footwall. A mineralized area was found against this footwall and during the month 20 feet of ore, averaging 1.7% copper, was found. For the completion of the contract, this mineralized zone will be followed. On the 300-foot level, this area above this mineralized zone was not explored.

The entire amount allocated to this contract is not being used due to the abandonment of Stage III, although the operator has spent more money personally on Stage III than the entire government estimate. If this money could be reimbursed to the operator, or if this money could be used for further exploration on the 435-foot level, the operator requests the O.M.E.'s decision as promptly as possible.

REMARKS During May progress was hampered by mechanical troubles. The distance of the mine from Big Pine, then to get parts from Reno, cost the operation over ten days lost time. Drifting continued to the N.E. with several highly mineralized cross-faults being explored but no encouragement was gotten, so the main drift to the N.E. was continued. A transit survey was made and it is believed that we are very close to the N. 20E. fault where we expect to find good mineralization.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS During April drifting continued N.E. in the shear zone against the East wall for a distance of 110'. Copper ore averaging 2.18% was encountered the entire distance. Several cross faults had carried the mineralization to this East wallwith the ore from one round averaging 5.25% copper. The work on this 435' level has explored an area not explored on the 300' level and commercial mineralization has been found. It is hoped that when the 350' of work on this level is completed that Stage III which had been uncompleted, can be continued to explore for ore at a lower depth.

Contract No. O.M.E. 2122

Narrative for April 1963

During April drifting was continued N.E. in the shear zone for 110', being in ore averaging 2.18% copper and small values in gold and silver. Copper sulphide has been found along several faults and the copper oxide minerals spread generally along the wall. This area explored was not explored on the 300' level by the present contract, and the operator at his own expense did make an effort to locate ore in this area but due to shortage of funds was unable to continue on the 300' level. Therefore, the work on the 435' level, as directed by Mr. Fillo, has been very fruitful. The operator believes that finding this ore on the 435' level should justify additional time to the operator and permission to complete Stage III, which was to open up the shaft to the old 550' level. From the tightness of the ground at the 435' level, it is expected that the old workings at 550' should be open.

Very truly yours,

William R. Noack

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Loretto Mine
Inyo County, California
Contract No. O.M.E. 2122

Stage IV, was commenced the last week in February 1963 with installation of the 435-foot station. At 7 feet in from the shaft the shear zone was reached with copper mineralization of 1.5% the first 5 feet. A crosscut was continued for 42 feet. Upon the supervision of the O.M.E. representative, Mr. Fillo, a mineralized fault was followed to the south for 15 feet with a copper average of 2.5%. The mineralized zone ended as the opposite side of the shear zone was encountered.

Drifting Northeast in the shear zone was then continued for 13 feet in barren rock towards the area mineralized on the 300-foot level.

Very truly yours,

William R Noack

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS Stage #2 was commenced the last week in July 1962. The project was to sink the shaft through 80' of loose muck to the 400' level. On Sept. 16, at the 360' level, Mr. Geo. Selfridge & Paul Fillo visited the project. The following day in setting timbers, two sides caved in, and similar slides occurred almost each time we were ready to set timber, with the result that it took until Dec. 14 to complete the project to the 400' level. At 390' we had three solid walls and at 395' a number of old pipes extended into the old station. We have found the floor of the old station caved for an additional 20'.

REGION II

Mr. Paul V. Fillo
Office of Mineral Exploration
Dept. of Interior
San Francisco, California

Dear Paul:

I am submitting the amended return requested by your letter of Feb. 6. I am also returning one of your photostats, having deleted the incorrect ones.

On the Transcript of Payroll there were three typographical errors, so the new one should be acceptable. I understand that the FI CA taxes, as shown on the payroll, is allowable so I have put that in Category 7 along with an adjusted California State Department of Employment figured at 3% tax. I omitted other miscellaneous taxes as well as lots of other expenses. On the transportation, I omitted hauling the men to the job, as I can find nothing in the contract to allow for that.

One reason our labor costs may be high compared to your Mother Lode operations, is that the Union Carbide Nuclear Corporation at Bishop hires all the men they can at $2.875 per hour with allowance of approximately two hours per day travel time, to the job. Therefore, our wage must be comparable or I could not keep men.

I did not realize how insufficient my previous report was until I got your letter. I think that most of the items are explained in my exhibits.

Reference the present status of Stage IV work, we are working on the station and started the crosscut. At six feet from the station, we encountered the shear zone, which on the 300' level was encountered 20 feet in from the shaft. The first five feet in the shear zone assayed 1.5% copper. We have blasted an additional five feet and the ore looks better but we have not assayed it, as we are timbering the station, and preparing to lower the mucking machine.

As looking forward to seeing you at the mine so please let me know when you will be there.

Very truly yours,

William R. Noack

b - Stage II

Timber

Timber was stockpiled as evidence of paid statement from Moses Bros. For the 16 five-foot sets, the following timber was used:

32 pieces 8"x 8"x 16'	2,730 feet		
22 pieces 8"x 8"x 14'	1,643 feet		
8 pieces 6"x 6"x 14'	448 feet		
128 pieces 2"x 12"x 16'	4,096 feet		
6 pieces 8"x 8"x 16'	512 feet		
	9,479 feet	$85. per M.	$ 805.61
160 lineal feet 4"x 4" guides	213 feet	$140. per M.	29.82
250 wedges		five cents ea.	12.50
Ladder stock	192 feet	$115. per M.	22.08
			$ 870.01
		Less 2% cash discount	17.40
			$ 852.61

Fuel

Diesel engine fuel to operate the generator and compressor, when needed, is the only fuel charged. There is no gasoline for transportation of men, or fuel, or supplies nor tire replacements which are considerable due to the rough road, evidenced by paid statements from Jim Nikolsen.

For three months operation period 9/16/62-12/15/62
900 gallons diesel fuel @ .20¢ per gallon $ 180.00
Total amount claimed by contract $ 180.00

Shaft Hanger Bolts

From hanger bolts purchased and stockpiled from Young Iron Works, the per bolt cost is $1.9781 each.

128 bolts @ $1.9781 each $ 253.00
Total amount claimed by contract $ 253.00

Pipe

I certify that I have used 80 feet of each of the following pipes for the 16 sets of Stage II, for which I paid the following prices and have misplaced the invoice:

8" Vent pipe $.60 per foot
2" Air pipe $.40 per foot
1" Water pipe $.20 per foot
Totals $1.20 per foot x 80' $ 96.00

Memoranda of Operator

Stage II Category (2) Personal Services and Technical Services
period 9/16/62-12/15/62

1. Supervision claimed, 3 months, maximum allowance claimed $ 900.00

2. Category (4) Operating Equipment, period 9/16/62-12/15/62

Depreciation claimed	Fair Market Value
Compressor	$ 3,500.00
Mucking Machine	1,500.00
90 K.W. Caterpillar D13000 Diesel Generator	3,750.00
Drilling equipment and steel	1,500.00
Blower and motor	500.00
Hoist, headframe, sheaves, cages, hoisting ropes	12,250.00
	$23,000.00

Depreciation, 1/60 per month for one month, rounded to $ 390.00

3. Category (7) Miscellaneous
California State Insurance policy #236271-62 is held for Workmen's Compensation. The rates are as follows:

1123	Mining underground rate	$17.44
1124	Mining topmen rate	7.01
5809	Pneumo Suchard 1123	3.10

Period covered by policy, which is issued to operator, William R. Noack, as follows:

7/01/2-10/01/2	1123	$522.00	$17.44	$ 91.04
7/01/2-10/01/2	1124	972.00	7.01	68.14
7/01/2-10/01/2	5809	522.00	3.10	16.18
11/01/2-12/15/2	1123	2338.00	17.44	407.74
11/01/2-12/15/2	1124	2116.00	7.01	148.33
11/01/2-12/15/2	5809	2338.00	3.10	72.47
				$ 803.90

$ 803.90

FICA Insurance allowable (see transcript of payroll) $ 139.44

I certify that I have paid Calif. Dept. of Employment in excess of the allowable 3% of the $5,946.00 payroll amount insurance allowable $ 178.44 $ 367.34

Transportation of operating materials & supplies
Gasoline & tire replacements for the hauling of diesel fuel, water, made three times a week for three months on a 60-mile round trip haul is estimated at $.10 per mile for 2,160 miles or a total of $216.00. Actual cost is considerably higher due to bad road. Evidence of cost is shown on Jim Nikohaus bill. $ 216.00

NARRATIVE FOR PERIOD ENDING December 14, 1962
with COMPLETION of STAGE #2

Office of Mineral Exploration
U. S. Dept. of the Interior
555 Battery Street
San Francisco, 11, California

OME 6092 (Copper)
$60,910.00
Loretto Mine
Inyo County, California
Contract NO. OME 2122

Stage #2 was started in July 1962 with the apparent simple operation of removing muck and dropping a shaft in sets of 5 feet. A pile hammer was purchased and spiling made of 2x12x6' was driven on four sides to prevent the muck from sliding into the excavation while the next set was being prepared. This progress, very slow, was continued to the 360-foot level where the ground looked solidly packed. However, serious slides continued to develop, a minor hole in a wall would act like a chute and many tons of loose rock would come through before it could be stopped. At 370-feet, a maze of timbers lay criss-cross for seven or eight feet in thickness. They had to be cut piece by piece which took approximately ten days, as pipes had to be sawed as well as the lumber thoroughly covered by muck.

Bearing sets were installed at 350 feet, 370 feet, 380 feet, and 400 feet. At 390 feet three solid walls had closed in to the proper shaft size. It was plain that the 4th side was the old station as a number of long pipes and timbers projected to that side and into it. At 402 feet, two feet below the lowest set, it appears that the bottom of the station has possibly collapsed, but the operator will submit a report at the end of this month telling of conditions found when we are down further, with an estimate of the time required to complete Stage #3 and Stage #4.

The cost incurred by the operator on Stage #2 is considerably in excess of the estimate. Approximately $2,000.00 more in labor alone was spent. The time spent was between four and four and one-half months, while one ~~and one-half~~ month was allowed in the contract. The operator notes the time allowed for Stage #3 in the contract is one and one-half months. The depth of Stage #3 is 150 feet, or thirty 5-foot sets, and if we were fortunate enough to put in one set per day, in an open shaft, it would take one and one-half months. However, at 402 feet, the shaft is full of muck and it takes two and one-half days to muck out five feet. Unless we find that the shaft is open very shortly, it will probably take at least five months to complete Stage #3; with the contract expiring in three months it is obvious that the operator must request an extension. There is also Stage #4, which consists of 350-feet of drifting which should take three months to complete. Therefore, the operator requests consideration of an extension in time, and if possible the payment to the operator of Stage #3 in units, monthly, rather than waiting for the completion of Stage #3 for the final payments. A formal request will be submitted within a few weeks as soon as we are further down the shaft and we will know whether the shaft will be open or whether the shaft will continue to be blocked.

Very truly yours,

William R Noack

Signature Paul O. Fillo Title Acting Field Officer Date Dec. 27, 1962

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS Stage #2 was commenced the last week in July 1962. The object of this stage was to sink the shaft through 80 feet of muck to the 400' level. On Sept. 16, at the 360' level, Mr. George Selfridge and Paul Fillo visited the project. The following day in setting timbers two sides caved in, and similar slides occurred almost each time we were ready to set timber, with the result that it took until Dec. 14 to complete the project to 400'. At 390' we have 3 solid walls, and at 395' a number of pipes extended out into the old station. It appears the floor of the old station has caved. We are now working on Stage #3.

Title Acting Field Officer

Government Representative

Date OMS Region II Dec. 27, 1962

(INSTRUCTIONS ON REVERSE)

REMARKS (Cont.)

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

OME 6092 (Copper)
$60,910.00
Loretto Mine
Inyo County, California
Contract No. OME 2122

During the month of September work continued downward from the 350-foot level where a bearing set had been installed. Considerable difficulty in blocking loose gravel was encountered in the first set below, the second set went in easily with the walls holding firm, but in mucking out the third set a batch of timbers lying crosswise slowed up the operation. This was gotten through the last week of the month and in mucking for the next set steel cable, pipe, and more timbers are being taken out.

Very truly yours,

W. R. Noack

OME 6092 (Copper)
$60,910.00
Loretto Mine
Inyo County, California
Contract No. OME 2122

With the approval of Amendment #2 to OME Contract # 6092, rehabilitation of the equipment and the purchase of a new and larger diesel electric plant was made in July 1962. A Caterpillar D-13,000 90K.W. plant was substituted in lieu of the 50 K.W. International-G.E. diesel set. This larger plant costing more than the one substituted for was installed at the operator's expense.

Mucking operations were started in the last week in July with men brought down from the operator's other operation in Nevada.

During the month of August, these men continued mucking and timbering but were replaced with local Big Pine men on August 20th.

Considerable difficulty was encountered in the upper part of themuck pile with sliding, but by August 31st a bearing set was installed on the 350-foot level and it is believed that the muck now in is so solidly packed that we will have no further trouble with sliding.

The operator desires instructions as to whether stage #2, should be completed before a Monthly Voucher and Monthly progress report are filed. It is estimated that it will take six more weeks to complete Stage #2.

Very truly yours,

William R. Noack

Contract No. OME 2122

The contract was completed on December 27, 1961, and an additional 210 feet of drifting and crosscutting completed.

The east drift on the right wall of the shear zone was in ore averaging 5 feet against this wall for 100 feet and averaged approximately $2.40 in gold and silver and 2½% in copper. Several winzes were started to find if the ore continued in depth, however two prominent engineers were taken to the property, Mr. Carnozy, general manager of U. S. Milling, and Mr. Ralph Godfrey, consultant for Wah Chang and Banner Copper of Arizona, and both advised me that the cheapest and only practical way to explore in depth would be to muck out the shaft and retimber to the old 550 foot level where according to patent papers over 800 feet of drifting exists.

Mr. Godfrey knew one miner who worked on the Loretto and told him that the 550 foot level was very rich. On this information Mr. Godfrey believes we can assume that the ore goes down in depth and that we have approximately 150,000 tons of probable ore averaging $2.00 in gold and silver and 2½% copper. Mr. Carnozy estimates 168,000 tons of copper with gold and silver totaling $2.40.

Certainly the structural control of this property has not been solved and much more exploration must be done to develop enough ore to attract capital to operate this property. The ground is so shattered it would be difficult to drill and the cleaning out of the next 250 feet of shaft and retimbering would be costly.

If the OME would assist further one way or another, the writer could put up half the cost and continue development of this mine of a strategic mineral, which would then be ready for operation should necessity call for it.

The operator is grateful for assistance both financial and for the engineering assistance and advice of Mr. Glenn Gentry during the period of this contract now completed.

Very truly yours,

William R. Noack

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS

For the final period of the contract, ending Dec. 27, 1961, the drift along the east wall was continued and was largely in ore. Some high grade specimens running up to 26.9% were encountered, although the average for approximately 5 feet against this east wall which at this level acts as a foot wall accumulating descending solutions only averaged about 2½% copper. The operator feels that much more exploration should be done (over)

REMARKS *(Cont.)*

and the opinion of several experienced geologists is that there is possibly a parellel and blind vein which has through several ore shoots mineralized the shear zone in which we have been drifting and crosscutting. There is to the west of this shear zone approximately 100 feet west and parallel to our west wall, a rich streak of primary copper which where exposed averages between eight and twelve inches in thickness. The operator thinks that it would be proper to drive a crosscut to the granite and then either continue the crosscut or put out a ray of holes with a diamond drill in the granite where it could be drilled without constant cementing. I believe it quite possible that the mineralization in the shear zone could come from this source at a greater depth. This small enriched vein is so tight that I believe it obvious that the west to east faults which transverse the shear zone would be a natural route for the mineralization to have taken place.

It takes considerable finance to do this work. If the OME agrees that it would be prudent to explore this property further, the assistance would be very much appreciated.

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS

For month of November 1961, a crosscut was run to the right wall and a body of secondary ore encountered. The ore apparently pitched to the south and appeared better on the floor than above. A small stinger of ore ran alongthis wall to the north and was followed approximately 50 feet where it widened to about four feet. The weather has become very cold; however, no difficulty is anticipated in finishing the contract on time.

OME 6092 (Copper)
$29,600.00
Loretto Mine
Inyo County, Calif.
Contract No. OME 2122

During November, as the west wall continued barren, a crosscut was made to the east or right wall, and from five to eight feet of ore averaging slightly over 3% copper and $3.00 in goldand silver was encountered. This ore is under Adit #2. Drifting on both directions showed a total length of this zone at this 300 foot level was about 30 feet. Drifting was then continued on a North 65° East direction to get under Adit #3.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS

For month of October, 1961, drifting continued generally on a North 65° East course. Several small pockets of ore were gone through and onestringer led due East so the drift was turned and an other ore showed up on the right, a crosscut to the right was started. Operations were slowed at the start of the month due to the replacing of the hoist motor and installing a larger generator.

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

$29,600.00
Loretto Mine
Inyo County, Calif.
Contract No. OME 2122

During October a new hoist motor and a larger generator were acquired, which stopped operation during the first part of the month.

The main drift was continued 40 feet and a small stringer of ore encountered going east, so a crosscut was started and continued 20 feet, however the ore narrowed to a streak.

It is believed the right wall of the fault zone lies about 30 feet ahead of the face of the crosscut.

Very truly yours,

William R. Noack

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

During September, drifting on the main drift continued and it is believed that the main orebody is to the right of the drift.

A careful survey shows an outcrop on the surface paralleling the drift which is on a North 65° East course.

The last week in September the hoist motor burned out and a week was lost in getting back into operation.

In the last one hundred feet of the drift, very little indication of ore has been encountered.

Yours very truly,

William R. Noack

Contract No. 2122

INTERIM INSPECTION

Accompanied by the operator this project was inspected on August 27, 1961.

Progress to date of inspection:

	Allowed	Completed	Remainder
Shaft rehabilitation	300 Ft.	300 Ft.	None
Drifting and Cross cutting	600 Ft.	191 Ft.	409 Ft.
Timbering	100 Ft.	10 Ft.	90 Ft.
Samples	100	23	77

The granite porphyry shows considerable east to west movement along walls of a fissure which has a general east-west strike and dips from 50° to 65° north westerly. This fissure is intersected by numerous north-south and north westerly trending structural fracturing of varying widths and dips varying from 65°± in both easterly and westerly directions.

Significant exposures of low grade oxidized copper ores(malachite, chrysocolla, azurite) occur between the fractures and within the brecciated areas. Sporadic occurrences of malachite were also noted. The project work has been well done and is satisfactory to the Government.

Beginning at approximately 90 ft. ± east of the shaft, the operator, at his expense, has completed 60 feet of cross cutting and drifting

in a general south easterly direction. This cross cut has intersected copper mineralization of the same character and grade as that encountered in the main level, indicating a mineralized width of about 50 feet could be inferred.

The operator expected to resume work in the main drift and to refrain from work not authorized by the contract. Approximately 400 tons of low grade ore, 2.5% ± CU., are stockpiled near the collar of the shaft.

Financial:

Expenditures authorized by Contract	$29,600.00
Expended as of July 31, 1961	15,665.00
Unexpended	$13,935.00

No expenditures will be reported for the month of August, 1961.

Contract Period:

Ending on December 27, 1961
Period expended 11 Months
Unexpended time 4 Months.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

Contract No. OME-2122

The operation during July duplicated the month of June in that four miners were employed six days per week and the contractor was on the job personally.

Mr. Glenn Gentry inspected the operation, mapped the property, and sampled it.

One hundred feet of drifting was accomplished and it was found that values diminished as we progressed.

There were no other unusual incidents to report.

Very truly yours,

William R. Noack

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS

For the month of June drifting continued generally on a North 65° East course which followed close to a fault wall believed to be the foot wall of the vein. About half of the distance driven was on ore, as shown by the five assays taken.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

NARRATIVE FOR JUNE 1961

Office of Mineral Exploration
U.S. Department of the Interior
555 Battery Street
San Francisco, 11, California

OME-6092 (Copper)
$29,600.00
Loretto Mine
Inyo County, California
Contract No. OME-2122

During the month of June 1961, four miners were employed six days per week and the contractor worked personally on the job continually.

Good progress was made, a round a day made, however some were only four feet due to the shattered ground preventing proper loading of the explosives.

Approximately one-half of the drifting covered was in ore and all samplings were made by grabs from mine cars which were stockpiled. These averaged slightly less than 3% in copper. The other half of the muck was thrown in the waste pile and is valueless.

There were no accidents nor other unusual incidents to report.

Very truly yours,

William R. Noack

Mr. Glenn Gentry
U. S. Department of the Interior
Office of Mineral Exploration
420 Custom House
555 Battery Street
San Francisco, 11, California

Dear Glenn:

Am resubmitting Forms 60 and 61.

As of today, we are 60 feet from the station and for 50 feet have gone in and out of the hanging wall. It has usually run about six feet across, averaging 3%, with the dilutions caused by mother nature not going directly North 65 East. For the last ten feet, we have lost the foot wall which apparently takes off at a North 50 East at that point.

We have a big stockpile area on top and have approximately 200 tons of ore that will average 3% on the stockpile.

For your personal information, the temperature above ground runs from 100 to 110 °. The 300-foot level is a comfortable 63°. It is an awfully bad time of the year to visit Big Pine, but we would be awfully glad to see you.

Thanking you for correcting these forms and with best personal regards, I am

Sincerely,

William R. Noack

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

O.M.E.-6092 (Copper)
$29,600.00
Loretto Mine
Inyo County, Calif.
Contract No. OME-2122

Dear Mr. Gentry:

During the month of May 1961, four miners were employed six days per week and the writer was personally on the job continually.

Considerable difficulty was encountered in establishing a station due to the fact that a fault zone stands between the shaft and the vein. All of the fault material had to be spaded out by hand with no blasting.

As soon as the vein was entered, and solid material entered, a turn to North 65° East was made and by the end of May, 20 feet of the drift accomplished. The drift is partly in and out of the footwall and the material assays an average of 3% copper with only a trace of gold and silver.

Very truly yours,

William R. Noack

Dear Glenn:

Am resubmitting Forms 60 and 61.

As of today, we are 80 feet from the station and for 50 feet have gone in and out of the hanging wall. It has usually run about six feet across, averaging 3%, with the dilutions caused by mother nature not going directly North 65 East. For the last ten feet, we have lost the foot wall which apparently takes off at a North 50 East at that point.

We have a big stockpile area on top and have approximately 200 tons of ore that will average 3% on the stockpile.

For your personal information, the temperature above ground runs from 100 to 110 °. The 300-foot level is a comfortable 63°. It is an awfully bad time of the year to visit Big Pine, but we would be awfully glad to see you.

Thanking you for correcting these forms and with best personal regards, I am

Sincerely,

William R. Noack

For the last ten feet, we have lost the foot wall which apparently takes off at a North 50 East at that point.

We have a big stockpile area on top and have approximately 200 tons of ore that will average 3% on the stockpile.

For your personal information, the temperature above ground runs from 100 to 110 °. The 300-foot level is a comfortable 63°. It is an awfully bad time of the year to visit Big Pine, but we would be awfully glad to see you.

Thanking you for correcting these forms and with best personal regards, I am

Sincerely,

William R. Noack

Dear Glenn:

Am resubmitting Forms 60 and 61.

As of today, we are 80 feet from the station and for 50 feet have gone in and out of the hanging wall. It has usually run about six feet across, averaging 3%, with the dilutions caused by mother nature not going directly North 65 East. For the last ten feet, we have lost the foot wall which apparently takes off at a North 50 East at that point.

We have a big stockpile area on top and have approximately 200 tons of ore that will average 3% on the stockpile.

For your personal information, the temperature above ground runs from 100 to 110 °. The 300-foot level is a comfortable 63°. It is an awfully bad time of the year to visit Big Pine, but we would be awfully glad to see you.

Thanking you for correcting these forms and with best personal regards, I am

Signature [illegible] Title Acting Field Officer, OME Date 5/16/61

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

OPERATOR'S MONTHLY NARRATIVE FOR APRIL 1961

per Article 5 (b) (3) of Contract

Five men were employed continually for six days per week during the month of April.

Timbering was completed on the shaft to a depth of 320 feet, with a station cut at 300 feet. It was found that the walls of the shaft were in a fault zone from 280 feet down and that at a depth of 340 feet the walls had collapsed so badly that it would be very costly to re-open the shaft below the 300 foot level. The caved portion from 320 feet down is being filled with muck to prevent a collapse of the 300 foot station.

The monthly progress report and voucher are being submitted this month.

Very truly yours,

William R. Noack

William R. Noack
Loretto Mine
Inyo County, California
Contract No. OME-2122

Operator's Monthly Narrative for December 1960
per Article 5 (b) (3) of contract

Material continued to be assembled during December 1960 and a crew of experienced miners were organized under supervision of Fred Bachich of Big Pine, California. Mr. Bachich is the operator of the neighboring talc mine, approximately two miles south of road of the Loretto property.

Due to Christmas holidays and incliment weather, little progress was made in December but as of the present date, January 11, 1961, rapid progress is being made.

Very truly yours,

William R. Noack
