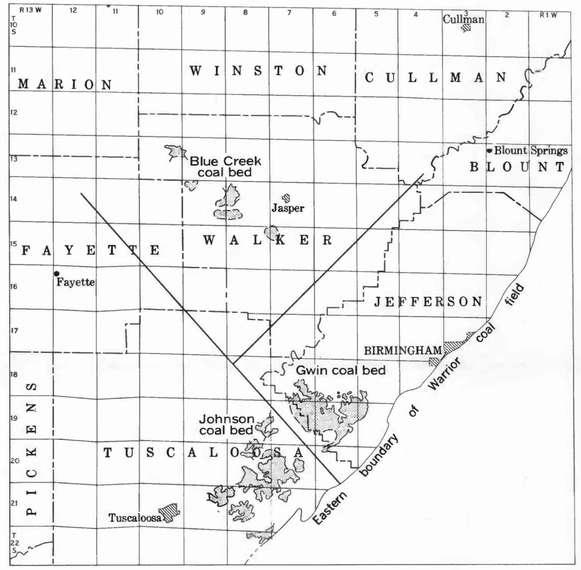
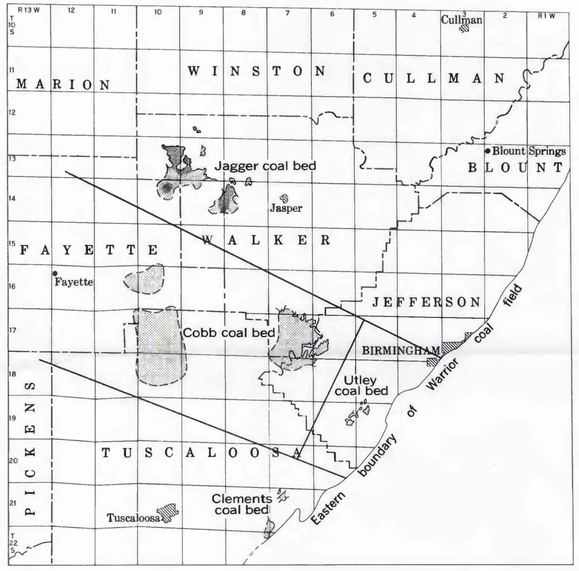
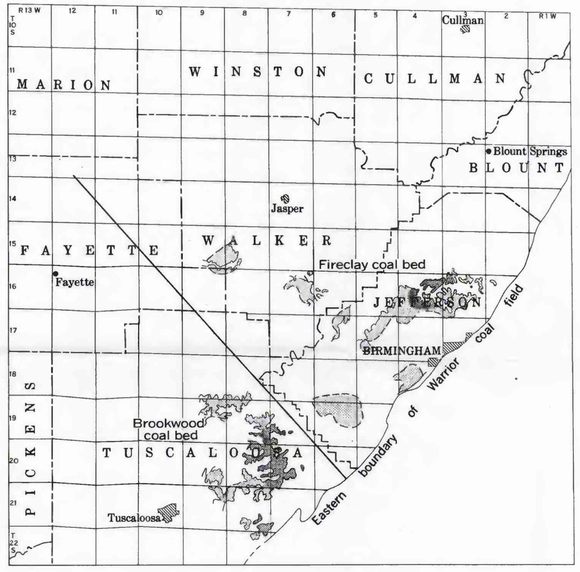
PRATT COAL BED



BLUE CREEK, GWIN, AND JOHNSON COAL BEDS



JAGGER, COBB, UTLEY, AND CLEMENTS COAL BEDS



FIRECLAY AND BROOKWOOD COAL BEDS

N

EXPLANATION

Coal reserves under less than 1,000 feet of overburden

Coal reserves under 1,000 to 2,000 feet of overburden

Coal reserves under 2,000 to 3,000 feet of overburden

Coal mined out in whole or in part
Shown only where approximate area of mining is known

Outcrop of coal bed

Underground boundary of area considered to contain coal reserves. Outside this boundary either the coal is less than 14 inches thick, is unminable, is too impure, or data are insufficient to estimate reserves

1000
Thickness of overburden, in feet

Reserve block boundary
