1951

July 3, 1951

To: Landon F. Strobel, Executive Secretary

Through: Director, Supply Division

From: Tungsten Branch

Subject: DMA-155 Tungsten
Bull Canyon Project, Mohave County, Arizona

Field examination discloses there are no ore reserves on the property and it is therefore not eligible for production loan. Applicant stated he is unable and unwilling to participate in an exploration program. The application is denied.

George B. Kolderer
Chief, Tungsten Branch

Mr. Dalton Robinett
Box 501
Kingman, Arizona

In reply please refer to
DMA-155 Tungsten

Dear Mr. Robinett:

Your application for a production loan in the amount of $100,000.00 has been considered. The project cannot be approved for the reason that our engineering reports show no ore reserves. A project of this sort might be considered for an exploration loan in which the Government participates to the extent of 75% and the applicant to the extent of 25%, but since you have stated you are unwilling to participate in an exploration project, there is nothing to do but deny your application

We regret the delay in replying to this request.

Very truly yours,

Tom Lyon

Mr. Dalton Robinette
Box 501
Kingman, Arizona

My dear Mr. Robinette:

In regard to your application to the Defense Minerals Administration for assistance under the Defense Production Act of 1950 (DMA Docket 155), we will have a mining engineer from the Bureau of Mines (Mr. Grant R. Ruhly), and a geologist from the Geological Survey (Mr. Calvin Bromfield) in Kingman next Monday, May 7, 1951. These men will be at the Wal-a-pie Court Monday night.

Messrs. Ruhly and Bromfield expect to examine your tungsten deposits Tuesday. Please contact them at the Wal-a-pie Court.

Sincerely yours,

Walter R. Storms, Chief
Arizona-New Mexico Branch

Memorandum

To: W. R. Storms

Charles Anderson

From: DMA Field Team, Region IV

Subject: DMA 155, Bull Canyon group of claims, Dalton Robinette, Kingman, Arizona

Herewith is the brochure of the above docket. The information in Washington is insufficient to determine the feasibility of the application and therefore it is required that you make an investigation and report to determine the probable reserves, whether the work for which the applicant has requested a loan is exploration and, if so, whether he is willing and financially able to enter into a contract on the matching basis.

This report is being sent to Mr. Storms.

DIRECTOR'S OFFICE REGION IV APR 23 1951

April 11, 1951

Mr. J. H. East, Jr., Executive Officer
DMA Field Team Region IV
244 New Customhouse Building
Denver 2, Colorado

In reply please refer to
DMA - 155

Through: Coordinating Committee
Director of Supply Division

Dear Mr. East:

We are enclosing application of Dalton Robinette, Box 501, Kingman, Arizona for a loan of $100,000 to equip and operate a tungsten property in Arizona.

The Geological Survey has the following general information on the properties:

Bull Canyon group of claims

Scheelite and wolframite occurs in narrow quartz veins in granite.

Worked intermittently 1937-1944 with estimated output of 3,000 units of WO_3, mostly from Iguana No. 2 claim.

Claims were held in 1943, two-thirds by Boriana Mining Company and one-third by Dalton Robinette. Apparently same interest prevails in 1950.

Reserves estimated May 1943 at 4,500 tons measured and indicated ore containing 4,500 units, probably in part inferred.

Tungstenite claims

Located in 1947. No other information is at hand.

The reserves are apparently insufficient to warrant a loan of $100,000.

Please make a field examination of the property and let us have your conclusions. It may be that the property should be considered for an exploration loan as data on the deposit is rather scanty.

George B. Holderer, Acting
Chief, Tungsten Branch

Dear Mr. Robinett:

We have requested our field representatives to make an examination of your tungsten property relative to your application for a loan. It will be helpful if you will inform Mr. J. H. East, Jr., Executive Officer, DMA Field Team Region IV, 224 New Customhouse Building, Denver 2, Colorado, where you may be contacted by the examining engineer.

Very truly yours,

Tom Ison

Gentlemen:

This will acknowledge receipt of your postcard dated December 15, 1950, requesting information regarding Government mining loans under the Defense Production Act of 1950.

The formal application forms have not as yet issued from Washington; however, we are enclosing a form which is being used in this region, and which indicates the type of information that probably will be required with applications for mining loans. When this information is assembled, it may be sent to this office, or it may be forwarded to the Defense Minerals Administration, Interior Building, Washington, D. C.

Sincerely yours,

J. H. East, Jr.
Regional Director
