

EXPLANATION

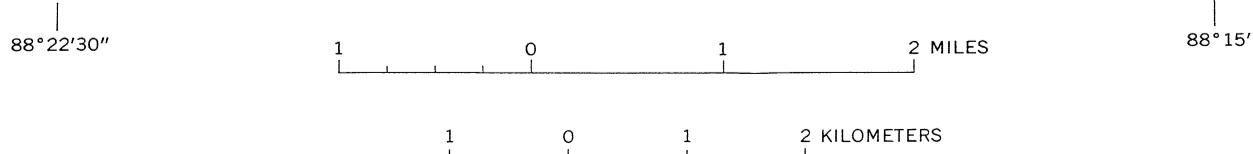

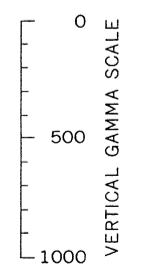

74 
Total-intensity aeromagnetic profile
Tick marks show intersection with section lines and edges of quadrangle. Profiles not adjusted to common magnetic datum. Flight traverse numbers shown at ends of profiles and on index map

-  <100
-  100-300
-  300-1000
-  >1000

Crests of aeromagnetic anomalies shown on index map
Values in gammas of total intensity

LOCATION OF FLIGHT TRAVERSES AND CRESTS OF AEROMAGNETIC ANOMALIES

Aeromagnetic data from survey made by the U.S. Geological Survey in 1949. Survey supervised by J. R. Balsley; compilation directed by Jean Blanchett
