Gentlemen:

After the completion of the approved exploration work under the contract identified above, we asked to be informed about changes in the status of the property and production from it during the period of royalty obligation.

To assist you to furnish this information and to assure the accuracy of our records, please answer the questions on the back of this letter and return two copies to this office with copies of any pertinent documents.

Sincerely yours,

Harold Kirkemo

Harold Kirkemo, Chief
Office of Minerals Exploration

P.S. This has reference to similar requests sent to you on September 8, 1973, and December 2, 1974, which were not completed and returned. May we please hear from you. Enclosed is a self-addressed envelope to expedite this matter. Thank you.

Form MME 63
(May 1970)

REQUEST FOR INFORMATION ON CERTIFIED PROJECT OR PROJECT UNDER ROYALTY AGREEMENT

1. Since September 27, 1972, has there been a change in ownership, lease, or sublease? *If yes, please state details of the transaction below and provide a true or signed copy of the pertinent documents, unless they have been provided before.* Yes ☐ No ☐

2. Since September 27, 1972, has there been any production from the land subject to the contract? Yes ☐ No ☐

A. If so and it was shipped, give quantity, value, and name and address of purchaser.

Purchaser *(name and address)*	Quantity	Value

B. If stockpiled awaiting sale, state quantity, grade, and location.

Type	Quantity *(tons)*	Estimated Grade	Location

Dear Mr. Fraser:

Your attention is called to our letter of November 29, 1971, which acknowledged receipt of our MME Form 63 letter inquiry which you completed and returned on November 22, 1971. However, your attention was directed to an Item 1 statement, "Please see attached map." The map was not received with the Form 63 and you were requested to send two copies.

Under Item 1 of the inquiry, referring to "A Special Agreement Concerning Land" in Annex I of the contract, you indicated that land situated within 600 feet of the boundaries of the land described in the subject contract had been acquired. We therefore need the map to complete our review and trust it will be forwarded without further delay.

Sincerely yours,

Harold Kirkemo

Docket No. OME-6630 (Silver)
Roy Pray & Associates
Palmetto Property
Hinsdale County, Colo.
Contract 2247
Amended Application

Dear Mr. Hasler:

Submitted herewith is the Final Report on subject contract. To eliminate repetition as much as possible data previously submitted in Annex A, Engineering and Geological Report, April 15, 1967, has been omitted. These chapters, such as Location and Accessibility, Physical Features and Climate, Labor and Living Conditions, History, Regional Geology, etc., are discussed in the original report.

This report is confined to work accomplished under the subject contract, with a general summary, ore reserve calculations, and accompanying maps. The maps include underground geology maps, an assay map, and a plan and longitudinal map showing ore blocks.

Mr. Roy Pray and Associates, Mr. Ralph Horton, property owner, and Glen Explorations, Inc. are sincerely appreciative of the Office of Minerals Exploration's participation in this project.

Yours very truly,

Norman Ebbley

SUMMARY

During the summer and fall of 1966 Roy Pray & Associates, under a lease and option on the Palmetto property, completed a program of surface bulldozing and sampling of the Palmetto vein, located in the basin northeast of Engineer Mountain, in Hinsdale County, Colorado. The old Palmetto shaft, reported to be from 350 to 400 feet in depth and not worked since the year 1882, was dewatered down to the 200-foot level and the vein on this level was sampled.

While the above work was being accomplished a 250-foot crosscut tunnel was driven to intersect the vein about 90 feet below the outcrop and 1650 feet southwesterly of the Palmetto shaft.

In April 1967 Roy Pray & Associates filed an application for financial assistance with the Office of Minerals Exploration to drive a 1400-foot drift on the vein from the Pray crosscut, and to complete a proposed diamond drilling program from the surface to explore the vein at depth. The drifting phase of the program was approved by the OME and was completed at the end of August 1970. The diamond drilling phase of the program has been held in abeyance until the drifting work was finished and it is now contemplated to re-apply for financial assistance with the OME to carry out the diamond drilling program.

The work completed to date has shown that the Palmetto vein is a narrow but continuous quartz-sulphide structure, also containing values in silver and gold. Ore reserves are estimated at 38,950 tons of "Probable" ore and 217,450 tons of "Inferred" ore.

Although the work accomplished to date has indicated a narrow ore shoot over 700 feet in length a diamond drilling program will be required designed to extend the ore body both laterally and to depth. If this program proves successful much of the Inferred ore should change to the category of Probable ore, with sufficient tonnages and grade to justify a mining and milling operation.

RECOMMENDATION

It is recommended that consideration be given to further exploratory work on the Palmetto vein by a surface diamond drilling program to test the structure at depth. This drilling program should also explore the area indicated as Block B, and directly below, with the view in mind of possibly extending the Ruby Queen drift southwest under this favorable area.

NORMAN E. EBBLEY
MINING ENGINEER AND GEOLOGIST
PHONE 242-4579 - P. O. BOX 883
GRAND JUNCTION, COLORADO
81501

Description of the Palmetto Vein

The drift on the Palmetto vein has shown that the structure is a narrow but continuous quartz vein containing sphalerite and galena with minor amounts of pyrite and chalcopyrite, with additional values in silver and gold. An effort to illustrate the vein by detailed geological mapping proved rather unsuccessful as the sulphide-quartz zone within the vein is very narrow and not consistant, and mineralization occurs disseminated on both sides.

Generally the sulphide-quartz zone is less than two feet in width and may not average more than one and one-half feet wide. In sampling an effort was made to include the disseminated mineralization so that a mining width would be considered.

In many areas the vein proper has assay walls, especially on the hanging wall side, grading into the altered andesite wall. Assay results in many cases proved to be surprising as zones considered low grade turned out to be better grade and conversely where silver and gold values were concerned.

The underground geology is shown on the seven ($8\frac{1}{2}$"x 11") maps with emphasis upon structural aspects. A major mineralized fault-vein striking South 25° West intersects the Palmetto vein at a point 1,015 feet from the crosscut and continues along the vein a distance of 240 feet to the present face. The fault is evidently pre-mineral and has changed the Palmetto vein dip from east to west. Heavy clay gouge within the structure has caused excessive caving and would make mining in this area difficult. This fault-vein may be represented on the surface near the south end of the Miner's Bank claim by a nearly parallel structure containing fair values in silver and copper. This supposition is strengthened by the increased silver and copper values occurring in the fault near the present face.

Sampling

The Palmetto vein, from the Pray crosscut southwest to the end of the drift, was sampled each round by cutting a 10 to 12-pound sample of the vein material breast high at the face. Sample distances along the vein varied according to the footage broken each round, but averaged approximately 5.5 feet over the entire drift length. The samples were usually taken by Roy Pray, but in some instances during the 1970 period they were cut by the miners driving the drift. All sample locations as well as assay results are shown on the Palmetto Mine Assay Map, Exhibit A.

Surface sampling of outcrops and dumps was done in 1966, some by Ralph Horton, property owner, and others by Roy Pray. As the outcrops, bulldozer cuts, and old dumps sampled are

NORMAN E. EBBLEY
MINING ENGINEER AND GEOLOGIST
PHONE 242-4579 - P. O. BOX 883
GRAND JUNCTION, COLORADO
81501

scattered at random along the vein and the samples taken in most cases lack vein width information, there is not sufficient data to estimate average width and grade of the vein along the surface. However, all samples taken from surface vein exposures (bulldozer cuts) and old dumps averaged 0.16 ounces of gold and 23.8 ounces of silver per ton, as well as fair values in lead and zinc. These assays are shown on the longitudinal section, Exhibit B.

Note: Because of the inconsistency and paucity of surface sampling it was not deemed advisable to consider these values in tonnage and grade estimates of ore reserves.

Surveys *

A transit survey was completed of the Pray crosscut and the drift on the vein to the present face, and a total of sixteen numbered permanent survey points were placed in the back of the tunnel. The transit survey was started at two permanent surface points (A and B, using a corrected magnetic bearing) near the portal, and was tied in to the old Palmetto shaft where the coordinate system was established at 10,000 North and 10,000 East, using an elevation of 12,194 feet above sea level for the collar of the shaft. The transit survey was continued from permanent points A and B to the outcrop above the crosscut and along the line of surface pits and shafts to the southwest, establishing the surface contour above the tunnel line.

To the northeast from the outcrop above the crosscut a brunton and chain survey was made along the surface to the Ruby Queen tunnel portal. This line is indicated on the longitudinal section map, Exhibit B, as a dotted line and is not to be considered as accurate.

Calculations of Average Grade

At the end of the 1969 period weighted average grade calculations were made for six zones of higher grade ore along the Palmetto drift. These calculations are shown on pages 4 through 8.

From a practical mining standpoint most of the intervening lower grade zones would probably be mined along with the better grade ore, although pillars of lower grade material would be left where feasible. For this reason it was deemed advisable to calculate average grade for the intervening zones, page 9, and arrive at a weighted average for the entire length of what could

(Continued on page 12)

be considered as the ore shoot. These combined calculations are shown on page 10.

Drifting completed during 1970 failed to add length to the ore shoot, although two relatively short zones are near ore grade as shown on page 11. Values are mainly in silver and copper with low lead and zinc.

There is no particular point or advantage of a dissertation on the economics of a mining and milling operation on the grade of ore indicated due to the lack of sufficient blocked out ore to justify a mining and milling operation. Even though the work to date has indicated the presence of a narrow but continuous vein of ore grade, all engineers and geologists who have examined the property agree that a diamond drilling program at depth is warranted and necessary if tonnages of ore sufficient to justify a small mill are to be blocked out.

Ore Reserves (Refer to Exhibit B)

Block A: Classed as "Probable" ore.

Average height to surface	120 feet
Average length	715 feet
Average width (increased from 2.72' av. sampled)	3 feet

(Refer to page 10 for av. grade) 21,450 tons

Block B: Classed as "Inferred" ore. Excellent possibilities of at least same grade or better than Block A, as shown by surface sampling.

Average height to surface	116 feet
Average length	1,300 feet
Average width	3 feet

37,700 tons

Block C: Classed as "Inferred" ore. Substantiated by sill of Palmetto drift, Ruby Queen drift and shaft, and Palmetto shaft. Speculative.

Average height	200 feet
Average length	2,200 feet
Average width	3 feet

179,750 tons

Ore Reserves (Continued)

Block D: Classed as "Probable" ore.
Refer to pages 15 and 16.

17,500 tons

	D	17,500	
		38,950	217,450

Summary of Work Performed

As discussed in detail in the Narrative sections of the Monthly Reports the project was plagued continually with labor shortages and adverse weather conditions which resulted in exceptionally short seasons. In 1967, after rehabilitating the Pray crosscut, the operating period was from October 15th to the end of November, when snow conditions forced a shutdown for the winter. In 1968 work was finally started in late June and was stopped by weather the first part of October. In 1969 drifting work could not begin before the middle of June and was stopped the first part of October. Because of wet and muddy road conditions drifting work was delayed until the 20th of June in 1970 and was terminated the last of August. The first heavy snow fall of the year occurred on the weekend of September 5th.

Recapitulating the above history of the operation points out the fact that due to weather conditions only slightly over ten months were actually worked in a four year period, or approximately two and one-half months per season.

The chart on the following page is a Summary of the Work Performed, with Unit Costs for the project.

Summary of Work Performed

Year	Mobilization	Office Expense	Drifting Footage	Footage Cost	Timber Feet	Timber Cost	No. of Samples	Analytical Cost	Total Cost
1967	$975.00	$116.64	193	$8,192.85	-	-	38	$164.50	$9,448.99
1968	-	100.00	362	15,366.90	6	$96.00	53	869.00	16,431.90

Memorandum

To: Chief, Office of Minerals Exploration

From: Field Officer, Region III

Subject: OME-6630 (Silver)
Roy Pray and Associates
Palmetto Property
Hinsdale County, Colorado
Contract 2247

Transmitted herewith is the original and two copies of the Operator's Monthly Voucher and Progress reports on the subject property for the month of August, 1970. I am recommending payment in the amount claimed.

The total linear distance driven along the Palmetto vein is 1,255 feet, however, the Operator utilized an additional 32 feet of drifting in exploring footwall and hanging wall splits of the Palmetto vein system as described in the accompanying narrative. This footage is a legitimate claim and should be paid.

Exploration work along the Palmetto vein between 970' to the face at 1,225 feet, disclosed that the vein has been faulted and subsequently weakened in several places. Mineralized material is successively less with increasing alteration of the country rock in and near the vein. The country rock became increasingly heavy, requiring nearly 60 feet of timbering to prevent the drift from caving in.

Samples taken of the vein for the last 285 feet show an average grade of 0.036 oz. Au, 1.19 oz. Ag, 0.28% Pb and 0.41 Zn. The vein ranges between 1 - 3 feet wide for the most part. Significant copper values were sporadic with some high values at sample numbers 216, 217 and 218. The mapping of the Palmetto drift from 970 feet to the present face at 1,255 feet has just been completed and maps are in preparation by the Operator.

Gross value of the vein sampled between 970 feet and 1,255 feet is $5.48 per ton, as calculated at current prices (9/18/70). This is not ore grade material.

Enclosure

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Field Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Field Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of August, 1970

NARRATIVE REPORT

Labor problems continued to be a problem throughout the month of August. Double shifting, started at the end of July, was on and off until August 21st, when extensive caving of the drift shut down all advance. Total footage for the period to that date amounted to 147 feet. From August 21st to August 29th, the termination date of the Amended Contract, work envolved mucking out the caved material and timbering so that the mining equipment could be removed from the heading. The newly caved area required 37 feet of timbering. Heavy rains throughout the month washed out the upper road several times resulting in considerable loss of time.

Submitted at the end of the contract is additional footage totalling 32 feet of drifting as a result of exploration of several hanging wall and foot wall splits of the Palmetto vein. These exploration side drifts are as follows:

At Station P-7: Two rounds were driven westerly on a split intersecting a fault. 576 extra cubic feet of rock was mined amounting to 48 cars, representing an advance of 12 feet of 7'x6' drift.

At Station P-8 plus 18 feet: Two rounds were driven easterly on a split. 480 extra cubic feet of rock was mined amounting to 40 cars, representing an advance of 10 feet of 7'x6' drift.

At Station P-14: Two rounds were driven easterly on a split. 480 extra cubic feet of rock was mined amounting to 40 cars, representing an advance of 10 feet of 7'x6' drift.

Mr. William Hasler, of the Office of Minerals Exploration, examined the mine on September 5th, accompanied by Roy Pray and Norman Ebbley. The final report with tonnage and grade calculations, geology and sampling maps, and longitudinal sections should be completed and submitted within a week or ten days.

Amended Application

Dear Mr. Hasler:

The monthly progress report for July, 1970, is submitted herewith. This includes the original plus four copies of the following:

1. Narrative Report.

2. MME Form 60, Operator's Monthly Voucher.

3. MME Form 61, Operator's Progress Report.

4. Assay returns, Sample Nos. 172 through 186.

5. Arrangements have been made to bring the transit survey up to the present face. As soon as this has been completed maps will be prepared showing the geology of the drift completed during June and July of this year.

6. Calculations for weighted averages of samples assayed this year will also be submitted at the same time.

Yours very truly,

ROY PRAY & ASSOCIATES

August 1, 1970

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of July, 1970

NARRATIVE REPORT

Upon the advice of Norman Ebbley drifting work was temporarily recessed on July 20th as the condition of the back was unsafe due to a major gauge seam that had cut across the drift from the footwall to the hanging wall side. A total of four timber sets were installed and this work took three full shifts to complete. Cribbing was not carried from the timber sets to the back, a distance of from two to five feet, as the rock had dried up considerably and now appears safe. The miners have been instructed to carefully watch this section and make whatever repairs that may become necessary.

Compressor breakdowns caused an additional loss of six days total during the period. Even with the unavoidable loss of a total of nine shifts 93 feet of advance was made during July.

On July 31st two long holes were drilled, one hole 30 feet into the footwall and one hole 28 feet into the hanging wall. The footwall hole was drilled at point 1045 feet and penetrated only andesite with a few minor talc seams. The handing wall hole was drilled at point 1037 feet and encountered five mineralized (?) streaks - none over two inches in width. Analyses of these zones will be made as soon as possible.

An endeavor was made throughout the period to locate additional miners so that two shifts could be maintained. This effort was unsuccessful until the last of the month, when double shifting was started on July 30th.

The heading at the end of the period had dried up appreciably and appeared to be better mineralized than it had been for the past 20-30 feet.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of June, 1970

NARRATIVE REPORT

The early part of the month was spent cleaning up snow drifts and getting the equipment ready to operate.

The old compressor was replaced by a new one which after the final adjustments weremade to the high altitude, is now performing very well.

The roads are still wet and the mud is deep, which necessitates hauling fuel and various items by foot the last two hundred yards, but the situation will clear up in the next two weeks.

We should make good progress in July and will do our utmost to finish it by the last of August.

Yours very truly,

Roy Pray & Associates

Contract 2247

Transmitted herewith is an original and two copies of the Operator's monthly vouchers and accompanying narrative assay data and maps for the month of October 1969.

The Operator requested in his narrative report, that the project work be recessed from October 8, 1969 until July 1, 1970 because of inclement weather conditions at elevations above 12,000 feet above sea level. I recommend the request be granted, and that $200.00 be withheld pending commencement of exploration work in the Spring of 1970.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

ROY PRAY & ASSOCIATES

Lake City, Colorado

November 12, 1969

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of October, 1969

NARRATIVE REPORT

Heavy snows during the first part of October forced the operation to shut down for the winter on October 8th. It required two weeks of continual snow plowing to enable the operator to bring down to Lake City the rental compressor he was using.

Mr. William Hasler, of the Denver Office of Minerals Exploration was on the property at the time operations ended for the year. The vein in the face had increased to 32 inches in width, and appeared stronger than it had been for the last 25 feet. Because of the heavy snows only seven feet of advance was made during the period.

Unfortunately, the proposed long-holes as shown on geological Sheet No. 5 were not drilled. This work should be done as early as possible next spring, prior to advancing the drift. The transit survey is to point 780 feet from the crosscut, and a Brunton and chain survey was completed from that point to the face. Please refer to Narrative Report for September, 1969.

The accompanying sheet of weighted averages shows calculations for the last 10 samples, as well as the weighted averages for the entire vein from the crosscut to the face--a distance of 970 feet. However, it should be pointed out that in most continuous veins of this type there usually will be intermittant higher grade ore shoots with lower grade zones in between. From the crosscut to the present face there appears to be about nine separate ore shoots of much higher grade values than the intervening zones. These ore shoots, ranging from 20 feet to 140 feet in length, total a combined length of approximately 500 feet. These zones would be the areas where stopes would be started, and would be considerably higher in grade than the weighted average for the entire vein length as calculated on the accompanying sheet.

It is respectfully requested that the operator be granted a recess until July 1, 1970, although it is anticipated that, with an early spring, work could be resumed before that date.

Yours very truly,

ROY PRAY & ASSOCIATES

Amended Application

Dear Mr. Hasler:

The monthly progress report for September, 1969, is submitted herewith. This includes the original plus four copies of the following:

1. Narrative Report.

2. MME Form 60, Operator's Monthly Voucher.

3. MME Form 61, Operator's Progress Report.

4. Assay returns, Sample Nos 137 through 161.

5. Maps, Sheets No. 4 and 5 (8½" x 11"), showing geology up to point 963 feet from the crosscut which was the face on August 29, 1969.

6. Chart showing calculations of weighted averages for the last twenty-five samples, from point 780.5 feet from the crosscut to point 913 feet from the crosscut. The chart also shows the weighted averages for the entire drift from crosscut to point 913 feet from the crosscut.

Yours very truly,

ROY PRAY & ASSOCIATES

Lake City, Colorado

October 2, 1969

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of September, 1969

NARRATIVE REPORT

A total of 136 feet of advance was made during the month of September 1969. Four shifts were lost during the period due to compressor trouble. The crew worked six days a week all month.

The first snow of the season occurred on September 23rd, but the four to five inches only stayed on the ground about two days. Since the crew is living at the mine, sufficient equipment and supplies have now been stored at the property so that the work can continue uninterrupted in the event of early snows.

Brunton and chain surveys have been made from point 780 feet from the crosscut to the present face. These surveys are undoubtedly inaccurate due to the close proximity of iron pipe, rails, etc. This condition is somewhat compensated by taking back-site angles and fore-site angles from each turning point and calculating differences in bearings. At the end of the season the transit survey will be continued from point 780 feet to the end of the drift. The large sample map will be brought up-to-date at that time.

Long hole drill steel and bits have been obtained and plans are to drill both walls to make sure the vein being drifted on is the main vein and not a split or parallel vein. Suggested locations for the long holes are indicated on Sheet No. 5.

It should be pointed out that the mount of money allocated for assaying is about used up. The Contract stipulates $1695 and the sum used through September, 1969 amounts to $1662.50, leaving a balance of only $32.50. The original application estimated samples at 10 foot intervals, averaging four determinations at $3.00 each, or a total of $1680. The Contract received from the OME specified that samples be cut at intervals of not more than five feet, or 300 samples; and the alloted sum was $1695. If determinations were made for gold, silver,

lead, zinc and copper for each sample at five foot intervals, the estimated cost would be $3300. If copper determinations were completely eliminated, the cost would be $2550. The discrepancy is evidently between the original 10 foot intervals and the OME specifications of five foot intervals, using approximately the same overall costs.

It is requested that funds be transferred from some other category in the Contract to cover additional assaying costs. It is noted that the allocation for ground support is $2240 and to date only $96 of this amount has been used. As the ground so far encountered stands well without timber, perhaps some of this amount can be transferred to assaying costs.

It is also respectfully requested for an extension of time from the November 8, 1969 deadline, so that the project can be continued. With any reasonable break in the weather work might be continued through the month of December, in which event the project could possibly be completed.

Yours very truly,

ROY PRAY & ASSOCIATES

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work perfonned under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

Memorandum

To: Chief, Office of Minerals Exploration

From: Field Officer, Region III

Subject: OME-6630 (Silver)
Roy Pray and Associates
Palmetto Property
Hinsdale County, Colorado
Contract 2247

An interim inspection of the subject property was made August 28, in company with the Operator, Mr. Roy Pray.

The Palmetto vein had been drifted on for a total of 814 feet from the Pray crosscut. Assay results obtained to 706 feet were available for inspection and the Palmetto vein is shown to have an average width of 3.13 feet for a total of 706'. Gross value of this ore at current prices namely Au @ $35.00 per oz., Ag at 1.625 per oz. Pb at .1530 per lb., Zn at .1450 per lb., and Cu at .4625 per lb., amounts to $43.76 per ton.

The vein at 814 feet was wider than 3 feet and showed good mineralized material in it. The Operator indicated he was going to complete an additional shift per week in an attempt to complete as much of the 1,400 feet of drifting allowed under the contract as possible before winter storms close them out.

Memorandum

To: Chief, Office of Minerals Exploration

From: Field Officer, Region III

Subject: OME-6630 (Silver)
Roy Pray and Associates
Palmetto Property
Hinsdale County, Colorado
Contract 2247

An interim examination was made at the Palmetto mine on August 28, 1969 in company with Mr. Roy Pray, Operator. The Palmetto vein was examined between 555 feet from the Pray crosscut to 814 feet, as there had been no inspections made on the property since the operation was closed down during October 1968, because of winter snows.

The Palmetto vein maintained an average width, for the entire 731 feet of 3.13 feet and as sampled, averaged the following: 0.08 oz. Au, 5.41 oz. Ag, 3.09% Pb, 6.72% Zn, and 0.35% Cu at current prices (9/12/69) this ore would gross $45.52 per ton. The vein between 731 and 814 feet appears strong but has an average width of 2.0 feet. Sampling showed the vein to contain somewhat smaller values and would gross only $36.41 per ton. The most recent geologic mapping as of 8/31/69 showed the Palmetto vein widening to as much as four feet and averaged about three feet for the last 23 feet, or from 804 - 827 feet. Sample data for the last 40 feet had not been received as of September 12, 1969.

The Operator feels he can drive the required 573 feet before winter snows close down the operations for the winter.

Dear Mr. Hasler:

The monthly progress report for August, 1969, is submitted herewith. This includes the original plus four copies of the following:

1. Narrative Report.

2. MME Form 60, Operator's Monthly Voucher.

3. MME Form 61, Operator's Progress Report.

4. Assay returns, sample No. 120 through 136. Sample No. 133 was evidently lost in transit.

5. Map (8½" x 11") showing the geology up to point 827 feet from crosscut which was the face on August 31, 1969.

6. Two prints of a large composite map, which is primarily a sample map showing all the underground workings.

7. Chart showing calculations of weighted averages for the last 17 samples, from point 696.5 feet from the crosscut to point 780.5 feet.

Yours very truly,

ROY PRAY & ASSOCIATES

OME Region III
RECEIVED
SEP 8 - 1969
Denver, Colorado

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of August, 1969

NARRATIVE REPORT

On August 25 the drifting crew started working seven days a week. Two shifts were lost during the month due to unavoidable personnel problems.

The 15" metal ventilation pipe has now been installed from the portal for a distance of 1000 feet. Four hundred feet of additional metal vent pipe is on hand at the mine. The back of the drift in one place that seemed "drummy" has been barred down and now appears safe. A close watch will be kept to determine if timber will be required at this point.

A footage correction has been made this month as a result of the transit survey. An error of 14.5 feet has now been corrected and the total footage reported at the end of August of 827 feet from the crosscut to the face is correct. Because of footage discrepancies it may be desirable to recalculate weighted average widths and values at the end of the year for all samples. However, the differences from the figures reported should be minimal.

The increase in values from a few copper assays indicates the desirability of resuming copper assays along with the lead and zinc assays. Samples No. 137 through No. 148 will be sent in for assay this week.

A large composite map accompanying this report is primarily a sample map. Underground geology is shown on the 8½" x 11" sheets. The last 30 feet of the drift indicates an appreciable increase in vein width.

Yours very truly,

ROY PRAY & ASSOCIATES

Approved by OME Executive Officer or Alternate:

Signature J. William Hasler Title Field Officer Date Aug 13 1969

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

(INSTRUCTIONS ON REVERSE)

ROY PRAY & ASSOCIATES
Lake City, Colorado
August 6, 1969

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of July, 1969

NARRATIVE REPORT

Work progressed satisfactorily during July, with lost time limited to one and one-half days due to a break in the radiator of the compressor. The drift was advanced 109 feet in 21½ shifts; the crew working on a five day per week basis.

At the end of the month 1000 feet of used 15-inch metal vent pipe was delivered to a point four miles below the mine. An effort will be made to install this vent line on weekends so not to interfere with the drifting.

As anticipated, and mentioned in the last report, a lean zone was encountered near the fault from sample No. 107 to No. 111, a distance of from 25 to 30 feet. The fault has now gone into the left rib and the vein, although narrow, has hardened again.

A large composit map is being prepared which will show all the underground workings. This map, showing the structural geology, may indicate the advisability in some areas of long-hole testing of both walls.

Two points in the drift are in need of timber support and this work will be done as soon as possible.

Yours very truly,

ROY PRAY & ASSOCIATES

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Field Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Field Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

ROY PRAY & ASSOCIATES
Lake City, Colorado
July 14, 1969

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of June, 1969

NARRATIVE REPORT

Work was started the last part of May, 1969 ploughing out the road to the mine, overhauling machinery and equipment in preparation to resume drifting. The first round was drilled and blasted June 11th. By the end of June, the heading had been advanced an additional 67 feet. An entirely new crew of miners are on the job this year and so far their work has been a decided improvement over the personnel we had last year. A new ventilation fan and engine has been assembled in Denver and is now at the mine.

The vein has been sampled every round and the samples have been sent in for assay. Samples across the vein are cut samples and are now averaging from 20 to 25 pounds per sample.

An engineer and helper began a transit survey of the underground workings this past weekend. As soon as the survey is completed, and an accurate map prepared, the underground geology will be mapped and kept up-to-date.

Near the present face a transverse fault has cut across the drift at a flat angle and although no displacement of the vein is evident, the fault has apparently been responsible for vein alteration for a distance of 30-40 feet. In this area the vein has softened considerably and may result in lower metal values. The fault has now crossed over to the hanging wall side and should disappear in the wall within a few rounds.

Yours very truly,

ROY PRAY & ASSOCIATES

Subject: Docket No. OME-6630 (Silver)
Roy Pray & Assiciates
Palmetto Property
Hinsdale County, Colorado
Contract 2247
Amended Application

Dear Mr. Hasler:

The project was re-activated the latter part of May this year by ploughing out the road to the mine, repairing equipment, etc. The first round in the drift was blasted on June 11th. This report to the Office of Minerals Exploration was unavoidably delayed as we were in a transition period pending certain discussions with Glen Explorations, Inc., who are now financing the program. Future monthly reports should be mailed to the O.M.E. on schedule.

The monthly progress report for June, 1969, is submitted herewith. This includes the original and four copies of the following:

1. Narrative Report.

2. MME Form 60, Operator's Monthly Voucher.

3. MME Form 61, Operator's Progress Report.

4. No assays accompany this report as the results have not been received from the assay office.

5. As the underground workings are now being surveyed, progress maps will be brought up-to-date and be part of the monthly progress report for the month of July.

Yours very truly,

ROY PRAY & ASSOCIATES

Memorandum

To: Chief, Office of Minerals Exploration

From: Field Officer, Region III

Subject: OME-6630 (Silver)
Roy Pray and Associates
Palmetto Property
Hinsdale County, Colorado
Contract 2247

Transmitted herewith is an original and two copies of the subject Operator's MME Form 60 and 61 (Operator's Monthly Voucher and Operator's Progress Report) for the month of October, 1968, approved for payment.

The Operator signed his name in blue ink in this office after I notified him that only duplicated copies had been transmitted to us from his Consulting Engineer who further prepared the vouchers from Mr. Pray's data.

Transmitted also is a request from the Operator dated October 28, 1968 requesting a recess of the contract from October 31, 1968 until July 1, 1969, due to inclement weather conditions at elevations of 12,000± above sea level. I recommend that an amendment be executed to allow for the requested recess period as the amount of drifting on the Palmetto vein allowed under the contract has not been completed. The 555 feet driven on the Palmetto vein to date has explored the vein quite adequately and the vein, throughout this distance is known to average nearly 3.5 feet in width and to have an average gross value of ore estimated at $40.60 per ton at current metal prices.

The subject contract stipulates that the contract work should commence on or before September 21, 1967, and that exploration work shall be

completed within 8 months from the date of the contract, however Amendment No. 2 extended the time fixed by Article 1(a) of the contract for completion of the work from eight (8) to fourteen (14) months from the date of the contract or until November 8, 1968. I recommend that the time fixed for completion of the work by the contract be extended twenty-six (26) months or until November 8, 1969. The Operator has completed 555 feet of drifting on the Palmetto vein leaving a balance of 845 feet yet to be driven as allowed in the contract. The exploration work on the Palmetto vein to date has been encouraging as stated previously in this memorandum.

Dear Mr. Hasler,

Early snowstorms during the first part of October 1968 finally forced the project to shut down for the winter. Road conditions were fought for the first nine days of the period and during that time it was only possible to drill and blast two rounds for an advance of nine (9) feet.

Wind conditions resulted in deep drifts of snow each morning - some reaching to depths of six feet across the road.

We are therefore requesting an amendment to the contract to allow for a recess from October 31, 1968 to July 1, 1969.

Very truly yours

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

RECEIVED
OCT 23 1968
Denver, Colorado

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of October, 1968

NARRATIVE REPORT

Early snow storms during the first part of October finally forced the project to be shut down for the winter. Road conditions were fought for the first nine days of the period and during that time it was only possible to drill and blast two rounds, for an advance of nine (9) feet. Wind conditions resulted in deep drifts of snow each morning - some reaching to depths of six feet across the road.

The last sample cut across the vein, No. 91, was at point 541 feet. To obtain the final measurement it was necessary to reach the mine on snowshoes the last one and one-half miles.

The unexpected early shut-down resulted in the failure to complete the transit survey of the crosscut and drift as planned. This will be done as soon as possible next spring prior to mapping the geology of the drift that hasn't been mapped to date.

Yours very truly,

ROY PRAY & ASSOCIATES

Memorandum

To: Chief, Office of Minerals Exploration

From: Field Officer, Region III

Subject: OME-6630 (Silver)
Roy Pray and Associates
Palmetto Vein
Hinsdale County, Colorado
Contract 2247

An interim inspection was made on the subject property on September 18, 1968 in company with Mr. Roy Pray.

The Palmetto vein was inspected from the point where I last observed it at a distance of 193 feet from the Pray crosscut. The vein has been sampled after each round throughout the length of the drift for a distance of 477 feet (9-19-68), and has an average width of 3.65 feet, and contains abundant quartz, galena, sphalerite and chalcopyrite. Assay reports for the first 435 feet of vein explored averaged 0.086 oz. Au, 5.77% Ag., 2.78% Pb, 5.77% Zn and 0.34% Cu. The gross value of this vein material at current metal prices if $40.96 per ton.

Two rather prominent faults intersect the footwall of the vein at 363 feet and 443 feet but do not materially effect the vein except for some thinning and some splitting, especially at 443 feet. The vein becomes strong and was 3.0 feet thick at 477 feet, where I last observed it. A sample was taken here but the assay results have not yet been received.

The Operator, in a letter dated July 2, 1968, submitted an amended application requesting that the present contract be amended to include costs to explore the Palmetto vein at depth southwestward from the Pray crosscut by diamond drilling an estimated 4,200 feet in eight holes.

In a memorandum from me dated September 13, 1968 I requested that the Operator's request to recess the exploration work until Spring of next

year be considered and so recommended. I calculated some possible inferred and indicated ore in a block of ground 3.6' X 435' X 200' that would contain approximately 31,320 tons of ore that would average 3.65' thick and gross $40.66 per ton. Since my interim examination on September 19, 1966 I feel now that my figure was quite conservative as I did not include vein material with a 100 feet of back, nor did I include or consider the sampling that was done previously by the Operator from the 200 foot level of the Palmetto shaft--these figures would add considerable more tonnage, and the vein may be considered as containing ore grade material over a strike length of 500 feet at least. If one considers only the amount of vein below the Pray drift which lies at an elevation of approximately 12,400 feet, there is at least another 400 feet of vein material down dip, as the elevation of the 200 foot level of the Palmetto shaft lies 410 feet below the Pray drift. It is reasonable to assume therefore that there may well be a block of ground in excess of 3.0' X 500' X 400', that will contain average assays 0.80 oz. Au, 5.77 oz. Ag., 2.70% Pb, 5.77% Zn and 0.34% Cu per ton. This block of ground would yield some ?? 50,000 tons of vein material that may gross $40.69 per ton and be valued at $2,048,000 at current prices. The calculations are as follows:

$$\frac{3.0' \times 500' \times 400'}{12} = 50{,}000 \text{ tons}$$

$$\underline{\$40.96 \text{ per ton}}$$

$$\$2{,}048{,}000 \text{ gross value}$$

Based on the strength and values found in the Palmetto vein over a strike length of 500 feet it appears to me that we are obliged to seriously consider the operator's request for diamond drilling from a geologic and economic standpoint alone, regardless of whom Mr. Pray's associates are. Certainly $40.96 grade ore can be mined at a profit, especially if enough ore grade material can be discovered to warrant the construction of a mill on the property. The vein will have been explored for approximately 700 feet or for nearly one-half the distance allowed for exploring the Palmetto vein along the strike. The vein can be easily traced on the surface southwestward well beyond Miner's Bank workings and on into the area of the F. X. Aubrey dump from which a 30 pound dump sample was taken that assayed 0.08 oz. Au, 5.7 oz. Ag., 0.8% Pb, 1.82 Zn, and 0.15% Cu.

Because of possible impending inclement weather during the balance of the fall months, and subsequent winter storms, it would not be possible to commence a drilling program on the subject property this late in the year, however, upon termination of the work this fall it is recommended that the drilling program proposed by the Operator in his amended application dated July 2, 1968, be considered. This program should be evaluated, and I believe merits additional funding in

preference to possible other newly suggested and recommended exploration projects, much the same as with OME Docket 6640, McFarland and Hullinger's exploration proposal on the Keystone vein at Crested Butte.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

October 3, 1968

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of September, 1968

NARRATIVE REPORT

Progress during the period of September, 1968 amounted to 94 feet of drift advance.

The new fan assembly installed the first part of September proved unsatisfactory and it was necessary to have another unit assembled in Grand Junction. This unit was placed in operation prior to the end of the first half of the period and the ventilation problem, which has been a constant source of trouble for the past two months, has now been taken care of satisfactorily.

It was anticipated a second shift would be started during the last half of September, but the crew lined up for the job took other work. The lack of manpower in the area is acute, and presently no miners are available to start double shifting.

A total of five rounds were lost out of 24 possible working days, due to fan trouble and breakdowns. Actual advance averaged 4.95 feet per round.

During the period OME representative, Mr. Hasler, visited the property and mapped the geology to point 477 feet in the drift.

At the end of the period an additional 15 samples were sent in for assaying, (Nos. 75 through 90), but the returns have not been received. A surveyor has been contacted to run a transit survey of the crosscut and drift, and it is anticipated this work will be completed during October.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

ROY PRAY & ASSOCIATES
Lake City, Colorado
August 1, 1968

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of July, 1968

NARRATIVE REPORT

Work during the period of July, 1968 progressed satisfactorily in driving the drift southwesterly on the Palmetto vein. Total footage accomplished during July amounted to 146 feet.

During the period the crews were off three days during the Fourth of July holiday period and during this same period it was necessary to repair the mine ventilating fan. The crews did not work any Sundays during the period. Double-shifting was started on July 8th and continued throughout the remainder of the period.

Considerable trouble was experienced during the second week in the period in failing to break full rounds, possibly due to a combination of the use of standard black fuse and excessive water in the heading. Accordingly, on July 16th, the operator started using electric blasting caps, which increased the efficiency of the operation greatly for the remainder of the month. Only one other day was lost during the period, due to compressor repair. During the last half of the period considerable trouble was caused from heavy rains in the general area, which presented a problem in getting supplies to the portal site.

During the last week of the period several prominent mud slips were encountered over a distance of approximately 20 feet, which will necessitate timbering during the first part of August.

Enclosed are four copies of sample analyses covering 19 samples cut during the period. In addition to this, there are 12 more samples which have been sent in for analyses.

Yours very truly,

ROY PRAY & ASSOCIATES

Certification by Government Representative:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating an exploration project in accordance with the terms of Contract No. 2247.

Signature J. William Hooler Title Field Officer Date 9/12/68

Approved by OME Executive Officer or Alternate:

Signature J. William Hooler Title Field Officer Date 9/12/68

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

September 3, 1968

Docket No. 6630
Contract No. 2247
Palmetto Mine
Roy Pray & Associates
Month of August, 1968

NARRATIVE REPORT

Progress during the period of August, 1968 was disappointing. Total footage accomplished during August amounted to 72 feet of drift advance.

The lack of satisfactory progress was due mainly to lost time as a result of the following circumstances:

1. A total of three days was lost because of timbering and cribbing during the first part of the period. A total of 75 tons of muck came into the drift from a slip encountered on the footwall.

2. Lack of manpower forced the operation to go on a one-shift basis after the first week in August.

3. The remaining crew unexpectedly, and without permission, took off five days to go hunting.

4. Constant fan trouble during the entire month resulted in considerable delay. A new fan setup is now being assembled in Grand Junction and should be ready by September 5th. This is a large diesel unit of greater air capacity and should increase the footage appreciably.

In summary, the lack of efficient manpower, common to the Lake City area, was mainly responsible for the low August footage. The operator expects to have additional miners available from another current operation which he anticipates will be shut down the latter part of September.

Arrangements are being made to complete a transit survey from the portal of the crosscut to the drift face within the next week or so. When completed, the remainder of the underground geology will be mapped in detail.

During the period the operator bought outright all the rental units of equipment he was using, consisting of the air compressor, the air trammer and the air receiver. The operator now owns all the equipment on the job.

The cost for assaying for samples 63 through 70 are not included in the Operator's Monthly Voucher submitted for August. Enclosed are four copies of sample analyses covering 19 samples assayed during the period.

Yours very truly,

ROY PRAY & ASSOCIATES

Memorandum

To: Chief, Office of Minerals Exploration

From: Field Officer, Region III

Subject: OME-6630 (Silver) - Interim Inspection Report
Roy Pray and Associates
Palmetto Property
Hinsdale County, Colorado
Contract 2247

As of 12/31/67 the operator had completed rehabilitation of the Pray X-cut and had drifted 193' along Palmetto vein as reported in his December voucher and progress report. A total of 37 channel samples have been cut at 5-foot intervals. The vein as sampled (samples cut across the vein after each round) has an average width of 4.26 ft. that yielded average assays as follows: 0.075 oz. Au, 4.99 oz. Ag, 2.04% Pb, 4.09% Zn, 0.30% Cu, at current prices the ore would have a gross value of $33.45.

The Field Officer, Region III mapped the Palmetto vein with Mr. Normal E. Ebbley, the Operator's consultant in company with Mr. Roy Pray on June 20 and 21, 1968. Figure enclosed. Total footage of drifting along Palmetto vein as of 6/21/68 was 199 feet. The wlrkings were rehabilitated during the week of June 7 through June 18th and the first round was completed June 19, 1968. The vein continues strong throughout its length, and ranges in thickness from 1' to as wide as 7 feet, and may average 4+ feet wide. The vein material is largely quartz, with moderate to abundant lead, zinc and chalcopyrite, occuring in bands and pods as well as in brecciated portions of the vein. The vein is vuggy in numerous areas, and some vein material is within altered andesite.

The operator is sampling the vein after each round and has been instructed to sample vein material separate from wallrock but sample a full face as well. It is recommended that the $200.00 presently being withheld be allowed as the operator has begun exploration work. Amendment No. 2 allows a recess beginning June 1, 1968 and ending not later than August 1, 1968.

pd. 7/24/68

The diamond drilling program suggested by Mr. Luedke could now be instigated and the operator is preparing an amended application proposing the drilling as recommended by Mr. Luedke to explore the Palmetto vein at depth. Extensive snow drifts prevented examination of the Palmetto vein southward at the time of this interim examination. The Operator was advised to take bulk samples when veins look particularly good.

Dear Mr. Ebbley:

Enclosed is a sepia, as well as a print of the map of the Palmetto Vein as we mapped it June 20, 1968.

Mr. Pray should include this with his monthly report and voucher forms for June, but add footage driven as of June 30, 1968. The visit to the property was interesting and most encouraging, certainly the Palmetto vein is a stronger structure than I had anticipated, judging from other veins I have seen in the general area.

Sincerely yours,

J. William Hasler

Signature J. William Hooker Title Field Officer Date 7/12/68

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

Signature J. William Hasler Title Field Officer Date 7/15/68

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

Roy Pray & Associates
Docket No. 6630
Contract No. 2247
July 2, 1968

Dear Sirs:

On June 15th, 1968, we had our roads plowed out to the Palmetto Mine. It took a few days to clean the snow from around the portal and to get the equipment back into operation.

After getting a late start this spring, due to weather, we were able to get forty-one feet of drifting on the vein the latter part of June.

I might mention that Mr. J. William Hasler, the O.M.E. officer of this district and Norman Ebbley who is our engineer made an on the spot inspection and did some mapping and geology work. Mr. Hasler seemed pleased and was encouraged with what he saw.

Our ground is holding well without timber and the vein is very promising. With this exploration we are doing, it certainly looks like we are going to open up a mine.

Work is progressing very favorable now and looks promising that we will meet our deadline by November 8th this year to complete the fourteen hundred feet of drifting.

Very truly yours,

/s/ Roy Pray and Associates

Contract 2247

Dear Mr. Hasler:

Pursuant to your letter of July 2nd, 1968, I am enclosing two sets of two prints of the drift on the Palmetto Vein. Mr. Pray had already sent in his monthly report and voucher prior to receiving your letter.

You will note that no footage had been made from the 1st of July to the 6th due to mechanical breakdowns and the layoff over the 4th and 5th. However, a round was shot on the 6th and progress is back on schedule. Mr. Pray informed me that he is double-shifting starting July 8th.

Accurate measurements were made from the original south rib to a permanent plug at 200 feet. This will enable Mr. Pray to keep more accurate progress records. Samples of the vein (at the face) for each round have been taken and results will be forwarded to your office when the assays are received.

Sincerely yours,

Norman Ebbley

Dear Mr. Hosler,

On June 19th, 1968, we opened the road to the Palmetto Mine to begin operations for the summer. There is considerable snow in the high country due to the late spring. It will take just a few days to clean up around the portal and get our equipment into operation. I hope to get drifting again around the 23rd or 24th of this month.

Very truly yours
Roy Pray (Power of attorney)

Dear Mr. Pray:

This letter is in reply to your letter of January 3, 1968 concerning your request to claim $220.00 for assaying costs incurred to date under the subject contract.

In view of the fact that inclement weather prevented me from making an interim inspection last month, I would advise you to hold the bills in abeyance until after I can make an examination on the property as soon as you resume work this spring if this is satisfactory to you.

Sincerely yours,

J. William Hasler

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS (Cont.)

REMARKS (Cont.)

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

ROY PRAY AND ASSOCIATES
DOCKET NO. 6630
CONTRACT NO. 2247
DECEMBER 5, 1967

DEAR SIRS:

FROM NOV. 1, 1967 TO DEC. 1, 1967 NINETY-ONE FEET OF DRIFTING WAS COMPLETED ON THE PALMETTO VEIN.

SEVERAL DAYS WERE LOST DUE TO THE WIND THAT CLOSED THE ROAD WITH DRIFTS OF SNOW. WE WILL CONTINUE WORKING THE PALMETTO VEIN AS FAR INTO THIS WINTER AS IS POSSIBLE. IN CASE OF A SHUTDOWN DUE TO THE HEAVY SNOWS WHICH WILL PROBABLY OCCUR IN JANUARY AND FEBRUARY, I THINK IT WILL BE VERY POSSIBLE TO CONTINUE THE LATTER PART O MARCH.

DO TO THE COLD WEATHER AND SNOW, ONE SHIFT OF THREE MEN HAVE BEEN WORKING DURING THE TWENTY-FOUR HOUR PERIOD. THIS SPRING WITH OUR VENTILATION INSTALLED WE WILL WORK THREE SHIFTS PER TWENTY-FOUR HOUR PERIOD.

ALL ASSAYS TAKEN FROM NUMBER ONE THROUGH TWENTY-EIGHT ARE FIVE FOOT INTERVALS.

Very truly yours
Roy Pray and associates

Memorandum

To: Chief, Office of Minerals Exploration

From: Field Officer, Region III

Subject: OME-6630 (Silver)
Roy Pray and Associates
Palmetto Mine
Hinsdale County, Colorado
Contract 2247

Enclosed is a copy of an undated letter from Mr. Norman Ebbley, Consulting Mining Geologist for the operator, and an accompanying assay map of the Palmetto vein along with tables showing sample width and assay values. Assay results of samples 1A through 5A taken each 5 feet from the start of the Palmetto drift are also shown. The date shown on the table of assays is December 15, 1967, and the material was received in this office December 18, 1967.

I recommend that the charges claimed for the assays on the November voucher be allowed as shown in my approval of the voucher, but that $200.00 be withheld pending the starting of work in the spring as the property is presently inaccessible due to deep snow and otherwise inclement weather. The Operator was advised to submit a request for an amendment to recess the project until Spring. Should the weather improve an interim inspection will be made.

Requested disallowance on Nov. 16th voucher. H.K. 12/20/67

RE: Palmetto Mine
OME-6630

Gentlemen:

Enclosed are copies of an Assay Map, with attached sheets Nos. 2 and 3, showing the locations, widths and assays of all samples taken to date under subject OME-6630 contract. Weighted averages are calculated for the entire drift length, as well as for one section separately from Sample No. 12 to sample No. 24.

Drift progress since the first of December has been nil due to drifting snow conditions. The road required plowing each day taking from six to eight hours. Snow drifts in places are as high as ten feet.

An endeavor to reach the mine was made the last time on December 13, using snow-cats but even these bogged down and proved useless in the deep soft snow. It was the intention to run a brunton and chain survey and to map the underground geology of the present workings, but this will have to wait until spring.

The mineralized "pay streak" within the vein changes from hanging wall to footwall and back again. The samples were cut across the entire vein structure - from wall to wall. Very likely the pay streak, if sampled separately would average considerably higher than the assays shown, and would probably vary from 12" to 30" wide.

Also enclosed are four true copies of assay results from the last nine samples taken.

Respectfully submitted,

Norman Ebbley

Norman Ebbley
Mining Geologist

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF MINERALS EXPLORATION

Dear Sirs:

During the period from October 12th to November 1st, 102 feet of drifting was completed on the Palmetto vein.

Samples were cut every five feet at an average width of four and one half feet. The sampling was started at thirty feet from beginning of drift. Some time this month I will go back and sample the first thirty feet.

Some time on the drifting was lost due to the instalation of a fan system and rigging an inside water supply.

The drift is being carried approx. 6 feet by seven and one half.

The vein system is looking better and increased values are expected in the next two hundred feet.

Very truly yours
Roy Pray - POWER OF ATTORNEY

Dear Mr. Pray:

The October, 1967 vouchers on the above-stated subject, about which we have all been on the lookout for, arrived today. The envelope was evidently sent out of Lake City, Colorado November 9 in the P.M. and there is no postmark indicating when they arrived in the Denver postoffice. The envelope was correctly addressed except for the the zip code which was addressed to zone 80200 and the correct zip code is 80225.

These vouchers will be reviewed in the near future and forwarded to Washington for processing.

Sincerely yours,

J. William Hasler

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.
