Administrative Audit Difference Statement

Lenhardt Copper Corporation
128 North Church Avenue
Tucson, Arizona

Date: June 25, 1957
Payee's Reference: April 1957

Gentlemen:

Upon examination of the above Payee's Reference a difference was found which made it necessary to suspend your account accordingly:

Amount Claimed $ 6,484.05

Difference $ 115.50

Amount Approved $ 6,369.35

The reason for the difference was due to:

Suspend:
Reported Stage II drilling costs to date, 1015 ft at a total cost of - 10,265.50
Allowable Stage II drilling costs to date, 1035 ft at $10.00 per ft - 10,150.00
Amount to be suspended. 115.50

Reinstate: $750.00 which was withheld from the March 1957 voucher pending determination of the completion date.

Withhold: $750.00 pending resumption of contract work, which has been temporarily suspended.

Any reclaim for deductions made above must be supported by the ORIGINAL of this form.

Very sincerely yours,

N. E. Stokes
Audit Section

4-15-52 D

224 New Customhouse
Denver 2, Colorado

June 24, 1957

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: DMEA Docket-4221, (Copper) Contract Idm-K1027
Lewisohn Copper Corporation (Peach mine) Pima County,
Arizona - Operator's Monthly Progress Report for the
month of April, 1957

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

Except as otherwise indicated below, we consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended on the following basis, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

Amount to be Suspended:

The reported Stage II drilling costs to date exceed the maximum allowable average unit cost, therefore the excess cost is to be suspended as follows, subject to possible reinstatement at a later date to the extent that subsequent Stage II drilling costs may fall below the allowable unit cost.

Reported Stage II drilling costs to date, 1015 feet, at total cost of	$10,265.50
Allowable Stage II drilling costs to date, 1015 feet, at $10.00 per foot	10,150.00
Amount to be suspended	$ 115.50

Amount to be Reinstated:

Reinstate the amount of $750.00 which was withheld from the March, 1957, voucher pending extension of the completion date. The completion date was extended to October 1, 1957, by Amendment No. 2.

Amount to be Withheld:

Withhold an amount of $750.00 pending resumption of contract work, which has been temporarily suspended. If the contract work is not resumed, continue to withhold the amount of $750.00 pending resolution of matters which are prerequisite to closing the account.

Reconciliation with the Amount Reported by the Operator on Form MF-104 for April, 1957

Amount reported on Form MF-104 for April, 1957		$6,484.85
Amount to be suspended		115.50
Total accepted cost for April, 1957		$6,369.35
Government participation at 50 percent		$3,184.68
Amount to be reinstated	$750.00	
Amount to be withheld	750.00	
Net amount to be reinstated or withheld		0.00
Balance due the Operator		$3,184.68

Note: Attached is a copy of a letter from the Operator dated June 20, 1957, which clarifies the documentation of drilling costs.

Remarks:

Date of Report ---------- May 31, 1957

Re: Docket DMEA-4221 (Copper)
Contract Idm E 1027
Lewisohn Copper Corp.
(Peach Mine)
Pima County, Arizona

Dear Mr. King:

This will acknowledge your letter of June 11th requesting six copies of the drilling contract between Lewisohn Copper Corp. and Purcell Mining and Drilling Company, of Tucson. The contract is enclosed and the explanation of the calculation follows.

The hole in question was started March 19th in the hardest and most difficult formation to drill thus far encountered. The drilling contractor spent 14-1/3 days, or 43 shifts, drilling the hole to a depth of 210 feet. Inasmuch as this was due to hard formation and/or trouble in keeping a straight hole, and the shift advance was considerably less than 15 feet, we reimbursed the drilling company at the rate of $100.00 per shift for 43 shifts, according to the terms of the contract. This amount was reduced by the 210 feet at $6.00 per foot which was drilled during this period, and by 48 hours of rig or delay time at $12.50 per hour, which also occurred during this period and which was paid for under heading of "Rig Time."

The contractor's invoice should have been set up as follows:

(See next page)

EXTRA COPY
DMEA
RECEIVED JUL 1 1957

DATE	INITIALS	CODE

43 guaranteed shifts @100.00		$4,300.00	
Less 210' drilling @6.00	$1,260.00		
Less 48 hrs rig time @12.50	600.00	1,860.00	
Net Guaranteed Time			$2,440.00
295' drilling @6.00			$1,770.00
90' reaming @4.00			360.00
2722' casing @0.25			680.50
8' conductor pipe @ 4.00 (left in hole)			32.00
Total,			$5,282.50

We realize now that a letter of explanation should have accompanied the monthly report and are sorry if this confusion has caused you any inconvenience.

Very truly yours,

B. H. Martin

June 7, 1957

Memorandum

To: E. N. Harshman, Acting Executive Officer, DMEA Field Team, Region III

From: Superintendent, Southwest Experiment Station

Subject: April 1957 Progress Report, Project DMEA-4221 (Copper), Contract 14n-21027, Louisiana Copper Corp. (Peach Mine), Pima County, Ariz.

Enclosed in quintuplicate are the following:

(1) Bureau of Mines engineer's report;
(2) Operator's narrative report with assays, drill log, and map.
(3) Forms DF-164 and DF-164A with drill contractor's invoice and assayer's invoices.

Also enclosed are 4 extra copies of our engineer's report.

The operator's April report was received in the Tucson office on June 6, 1957.

As all work is in accordance with terms of the contract, I recommend that the Government's share of the costs be paid with the possible exceptions as noted by T. M. Sample, mining engineer, Bureau of Mines, in his report.

Signed by Walter R. Storms

DATE

June 7, 1967

Memorandum

To: Walter R. Stoms, Superintendent, Southwest Experiment Station

From: T. M. Sample, Mining Engineer, Tucson, Ariz.

Subject: Progress Report for April 1967, Docket [illegible] (Copper), Contract [illegible], Louisiana Copper Cry. (Peach Mine), Pima County, Ariz.

On May 2, 1967, I visited the Peach Mine and checked exploratory progress under subject contract with E. H. Martin, manager. I found that operations had been resumed after completing hole E-4 at 305 feet on April 4, 1967.

The operator reports that hole E-4 developed 100 vertical feet of material averaging 0.80 percent copper. Drill hole data shows that the 140 feet comprises 3 zones that are separated by 2 thick sections of material containing about 0.2 percent copper.

ANALYSIS OF THE OPERATOR'S REPORT

The report was received June 6 after I had verbally requested it on several occasions.

Form NF-104

Drilling - The $4,[illegible].00 is for the authorized 305 feet of diamond drilling in hole E-4. It is supported by the original and certified copies of the Independent Contractor's invoice. The average per foot costs of this hole and all stage 2 drilling, respectively $[illegible] and $[illegible], exceeds the allowable $10.00. On the basis of stage 2 costs to date, the disallowable portion of the $3,[illegible].00 is $[illegible] ([illegible] x $[illegible])

Incidentals - The $1,[illegible].13 is for the 305 feet of drilling at the authorized additional cost of $2.03 per foot.

CC. Reg. Off. (Orig. & 3)
[illegible]
NF

TMSample:fr

Assays - The $147.20 is for the analysis of 92 samples at the authorized cost of $1.60 each. The analyses of these samples and the following 15 check samples are shown on the assayer's certificate and the operator's assay log of the hole.

Check Assays - The $30.00 is for the analysis of the previously mentioned 15 check samples at $2.00 each.

Totals - The monthly total of $6,484.85 is correct before the probable disallowance of $115.80 in contract drilling cost. The other costs, $47,085.75 and $53,878.00, do not reflect the $106.80 disallowance of the February voucher.

As part of the drilling was done after the termination date of the contract, participation in the full amount of approved costs is contingent upon approval of the request for additional working time.

Form MF-104A

The to date unit cost of Stage 2 drilling should be $10.1130. The reported $9.62 is approximately the cost of all drilling. With this exception and the previously indicated differences in total costs, the form is properly completed.

Narrative Report

The narrative report with attached map is considered satisfactory.

RECOMMENDATION

Continue to withhold the $750.00 pending resumption of operations and completion of additional work.

Respectfully submitted,

T. H. Romalo
Mining Engineer
Southwest Experiment Station

LEWISOHN COPPER CORP.

128 NORTH CHURCH
TUCSON, ARIZONA

May 31, 1957

NARRATIVE REPORT FOR APRIL 1957

Docket No. DMEA 4221 (Copper)
Contract No. Idm-E 1027
Lewisohn Copper Corp. (Peach Mine)
Pima County, Arizona

Churn drilling under Contract No. Idm-E 1027 was continued into the month of April with the completion of Hole No. 50 on April 4th by the Purcell Mining and Drilling Company of Tucson, Arizona, using a type 60L Bucyrus-Erie drill. Upon completing this hole, drilling operations were suspended and a 90-day recess requested.

The statistics on this hole are as follows:

DMEA NO.	OUR NO.	GRID LOCATION	DEPTH
12	50	K-4	505 Feet

A total of 92 samples were taken, the sampling and assaying procedure being the same as previously described.

There is attached to this report a photostatic copy of the assay and geologic logs of hole 50, as well as copies of the assay certificates. There is also attached a map showing previous as well as April drilling in both plan and section.

The first 250 feet of Hole 50 were extremely hard drilling and several crevasses were encountered, resulting in loss of sample in some cases. No difficulty was experienced with the hole below 250 feet. This hole developed 160 vertical feet of material averaging 0.80% copper.

LEWISOHN COPPER CORP.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Administrative Audit Difference Statement

Leuschen Copper Corporation
128 E. Church Avenue
Tucson, Arizona

Date: June 3, 1957
Payee's Reference: March 1957

Gentlemen:

Upon examination of the above Payee's Reference a difference was found which made it necessary to suspend your account accordingly:

Amount Claimed $ 6,229.90

Difference $

Amount Approved $ 6,229.90

The reason for the difference was due to:

Withhold: $750.00 pending resolution of matters relative to extension of the contract completion date.

Memorandum

To: T. A. Christensen

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: DMEA Docket-4221, (Copper) Contract Idm-M1027,
Lewisohn Copper Corporation (Peach mine)
Pima County, Arizona - Operator's Monthly Progress
Report for the month of March, 1957

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended for 50 percent of the amount reported on Form MF-104 for March, 1957, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations, except for the following deduction.

<u>Withhold</u> an amount of $750.00 pending resolution of matters relative to extension of the contract completion date, which has been requested by the Operator in conjunction with a request for additional work and funds.

Remarks:

May 21, 1957

Memorandum

To: E. N. Harshman, Acting Executive Officer, DMEA Field Team, Region III

From: Superintendent, Southwest Experiment Station

Subject: March 1957 Progress Report, Docket DMEA-4221 (Copper), Contract Idm-X1027, Lewisohn Copper Corp. (Peach Mine), Pima County, Ariz.

Enclosed in quintuplicate are the following:

1. Bureau of Mines engineer's report;
2. Operator's narrative report with map and drill hole long;
3. Forms MF-104 and MF-104A with drilling contractor's invoice and assayer's certificate.

Also enclosed are 4 extra copies of our engineer's report.

The operator's report was not received in the Tucson office until May 17. Reason for the delay is unknown to the writer.

As all work is in accordance with terms of the contract, I recommend that the Government's share of the costs be paid.

Signed by Walter R. Storms

May 17, 1957

Memorandum

To: Walter R. Storms, Superintendent, Southwest Experiment Station.

From: T. M. Romalo, Mining Engineer, Tucson, Arizona.

Subject: Progress Report for March 1957, Docket BMA-4221 (Copper), Contract BM-51027, Louisiana Copper Corp. (Peach Mine), Pima County, Ariz.

On April 1, 1957, I visited the property of subject exploratory contract and checked progress with B. H. Martin, manager. I found that during March, churn drill hole K-4 was completed to a depth of 510 feet and churn drilling of hole K-4 was in progress at a depth of 340 feet.

According to the Operator's assay log, hole K-4 penetrated a 250-foot section of potential ore averaging 0.63 percent copper at a depth of 185 to 426 feet. The operator's geologic log of the hole shows that essentially all of the 250 feet is in the sulfide zone and that the hole was bottomed probably in granite.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Stage 1

Check Assays - The $80.00 is for the check analyses of 25 samples at the authorized cost of $2.00 per sample. It is supported by certified copies of the sampler's certificate. Of the authorized 60 check assays, 30 have been made to date.

Stage 2

Drilling - The $4,281.00 is for the authorized 510 feet of churn drilling in hole K-4, the first of 3 approved holes of stage 2. It is supported by the original and certified copies of the Independent Contractor's invoice. The average per foot cost of the drilling is $8.39.

CC Emecon, Off. (Orig. & 3)
BMA-4221
MF

TMRomalo:frj

Incidentals - The $1,035.36 is for the 518 feet of drilling at the authorized additional cost of $2.00 per foot.

Assays - The $161.60 is for the analysis of 161 samples at the authorized cost of $1.00 per sample. The analyses are shown on the assayers certificate and the operator's assay log of the hole. The 161 analyses include the original and check assay of sample 1751.

Totals - The monthly total of $6,229.90 is correct. The other totals, $40,243.83 and $47,084.75, include the $108.80 disallowance of the February voucher.

Form NE-124A

The costs to date include the above mentioned disallowance.

The per foot cost of Stage 2 drilling to date is $9.77. The reported $8.80 is the average per foot cost of both Stage 1 and 2 drilling. Otherwise, the report is properly completed.

Narrative Report

The report with attached map is considered satisfactory.

May 15, 1957

NARRATIVE REPORT FOR MARCH 1957

Docket No. DMEA 4221 (Copper)
Contract No. Idm-E 1027
Lewisohn Copper Corp. (Peach Mine)
Pima County, Arizona

Churn drilling under Contract No. Idm-E 1027 was continued through the month of March by the Purcell Mining & Drilling Company of Tucson, Arizona, using a type 60L Bucyrus-Erie drill.

Only one hole was completed in March, due to road and location construction difficulties. The statistics on this hole are as follows:

DMEA NO.	OUR NO.	GRID LOCATION	DEPTH
11	49	E-4	510

This hole is the first hole under Stage II of the DMEA program.

A total of 101 samples were taken - the sampling and assaying procedure being the same as described in previous reports.

There is attached to this report a photostatic copy of the assay and geologic logs of hole 49, as well as copies of the assay certificates. There is also attached a map showing previous as well as March drilling in both plan and section.

Drilling conditions for hole 49 were good and no difficulty was experienced either with hardness or with maintaining straightness. Hole 49 developed 250 vertical feet of material averaging 0.63% copper. Although much higher grades may be obtained by elimination of some low grade zones.

Signature [illegible] Title Acting Executive Officer Date MAY 28 1957

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

DRILL HOLE LOG C-49

D.M.E.A. Hole No. 11
Grid Location: E-4
Collar Elevation: 4395 Feet
Total Depth: 510 Feet

Hole Diameter

Depth (Feet)	Diameter (Inches)
0-215	10
215-430	8
430-510	7

Depth (Feet)		Geology
0-55		Marble and garnetized limestone. Minor vein quartz material. Minor grayish yellow altered clay-like siltstone.
	10-25	Weak chrysocolla, jasperry coprite, chalcopyrite.
	25-55	Moderate chrysocolla, jasperry cuprite, weak magnetite, chalcopyrite, strong jasperry cuprite 30-35.
55-240		Garnetized limestone and altered clay-like siltstone.
	55-100	Light gray altered, clay-like siltstone with black manganese speckles. Minor garnet. Minor gray-green siltstone. Very minor vein quartz epidote. Weak chrysocolla and magnetite.
	100-135	Garnetized limestone. Moderate yellow quartz-calcite material. Moderate limonite. Weak chrysocolla and copper pitch. Weak magnetite, pyrite and chalcopyrite.
	135-175	Gray-green, slightly altered siltstone. Weak chrysocolla; weak magnetite, weak pyrite last 5 feet.
	175-200	Garnetized limestone. Moderate vein quartz material, yellow calcite-clay material; and limonite. Weak chrysocolla, copper pitch. Weak magnetite first 10 feet. Moderate magnetite, weak pyrite and chalcopyrite last 15 feet.

	200-220	Altered gray-green siltstone, possibly some diopside rock. Weak magnetite, pyrite chalcopyrite.
	220-240	Garnetized limestone, minor diopside rock. Moderate quartz vein material. Weak to moderate magnetite, chalcocite, and/or copper pitch. Weak chalcopyrite and pyrite.
240-500		Diopside rock. Dark green. Black siltstone-like 350-370 and 410-435. Some quartz vein, material scattered throughout.
	240-280	Strong magnetite, moderate pyrite. Moderate total chalcopyrite and covellite.
	280-305	Strong to moderate magnetite. Weak total sulfides.
	305-500	Strong magnetite; moderate chalcopyrite, pyrite. Spotty covellite and chalcocite. All weaker 350-365 and last 55 feet.
	500-510	Granite (?) Weak magnetite, sulfides.

Ore zones: 25-55 Oxide; 185-200 Oxide; 220-280 Sulfide; 305-435 (except 350-365) Sulfide.

No heavy Sulfide zone.

FINAL DISTRIBUTION

MADE APR 12 1957

U. S. DEPARTMENT OF THE INTERIOR
BUREAU OF MINES
REGION III

Administrative Audit Difference Statement

Lordsburg Copper Corporation
128 North Church Avenue
Tucson, Arizona

Date: April 11, 1957

Payee's Reference: February 1957

Gentlemen:

Upon examination of the above Payee's Reference a difference was found which made it necessary to suspend your account accordingly:

Amount Claimed	$	5,128.55
Difference	$	108.80
Amount Approved	$	5,019.75

The reason for the difference was due to:

Disallowance:

68 Chemical Assays @ $1.00 each $108.80

668 assays reported to date under Stage I.
Only 600 assays authorized in Contract.

68 excess assays disallowed.

R-III-B & F Form No. 4
4-15-52 D

224 New Customhouse
Denver 2, Colorado

April 9, 1957

Memorandum

To: T. A. Christensen

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: DMEA Docket No. 4221, (Copper) Contract Idm-E1027, Lewisohn Copper Corporation (Peach mine) Pima County, Arizona - Operator's Monthly Progress Report for the month of February, 1957.

Enclosed are the original and four copies each of Form MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

Except as otherwise noted below, we consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended on the following basis, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

Disallowance, Chemical assays:

The Operator has reported a total of 668* chemical assays to date, under Stage I, at $1.60 per sample. The contract authorizes only 600* chemical assays under Stage I, therefore, the cost of the 68 excess assays is to be disallowed.

Disallow 68 assays at $1.60 each——————$108.80

* Exclusive of check assays.

Reconciliation with Amount Reported by the Operator on Form MT-104 for February, 1957

Amount reported on Form MT-104 for February, 1957	$5,428.55
Amount to be disallowed	108.80
Total accepted cost for February, 1957	$5,319.75
Government participation at 50 percent	$2,659.88

In accordance with the provisions of Amendment No. 1, only ten of the twelve authorized and approved holes were drilled under Stage I, as insufficient Stage I footage remains to complete another hole. Proposed Stage I holes 3- and 4- were not drilled.

Remarks

Date of Report	March 15, 1957

DMEA
DEPARTMENT OF THE INTERIOR

MAR 27 1957
REGION III
DENVER, COLORADO

March 22, 1957

Memorandum

To : E. N. Marshman, Acting Executive Officer, DMEA Field Team

From : Superintendent, Southwest Experiment Station

Subject : February 1957 Progress Report, Docket DMEA-4231 (Copper) Contract Idm-61087, Levisohn Copper Corp. (Peach mine), Pima County, Ariz.

Enclosed in quintuplicate are the following:

(1) Bureau of Mines engineer's report;

(2) Operator's narrative report with plan map and sections;

(3) Forms MF-104 and MF-104A with driller's invoice, assays, and logs of holes.

Also enclosed are 4 extra copies of our engineer's report.

As all work is in accordance with terms of the contract, I recommend that the Government's share of the costs be paid.

Signed by Walter R. Storms

March 22, 1957

Memorandum

To : Walter R. Storms, Superintendent, Southwest Experiment Station

From : T. M. Ramalo, Mining Engineer, Tucson, Arizona

Subject : Progress Report for February 1957, Docket BMKA-4231, (Copper), Contract Ldm-21027, Lendlease Copper Corp. (Peach Mine), Pima County, Ariz.

On March 4, 1957, I visited the exploratory project of captioned contract and checked progress with B. H. Martin, Manager. I found that during February, churn drill hole J-3 had been bottomed at a depth of 450 feet and the drilling of churn drill hole K-4 was in progress at a depth of 320 feet.

Potential ore cut by hole J-3 according to the Operator's assay log, averaged 0.72 percent copper for a hole length of 160 feet. It occurs from 165 to 325 feet from the surface.

Four samples were obtained for check analyses by the Bureau's laboratory at Tucson. The Bureau's assays were significantly higher than the operator's for 2 of the samples. Close checks were made on the others. Data on the four samples follows:

Sample No. U.S.B.M.	Sample No. L.C.Corp.	Hole No.	Interval (Feet)	Percent Copper U.S.B.M. Total	Percent Copper U.S.B.M. Hydr. Sol.	Percent Copper L.C.Corp. Total

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-164

Drilling - The $4,374.25 is for the authorized 450 feet of churn drilling. It is supported by the Independent Contractor's detailed invoice that has been certified by the Operator's representative. The average per foot costs for this hole and to date, respectively $9.72 and $9.46, are within the allowable maximum of $10.00

The reported 450 feet of drilling also is supported by separate geologic and assay logs.

Incidental - The $813.50 is for the 450 feet of drilling at the authorized additional cost of $1.83 per foot.

Assays - The $140.00 is for the assay of 80 samples at the authorized cost of $1.40 per sample. The assays are shown on assay reports and a log of the hole.

Totals - The totals, $5,428.25, $35,436.30 and $40,863.55, appear to be correct.

Form MF-164A

The form is properly completed.

Narrative Report

The report is acceptable. The narrative section includes, at my request, an estimate of ore reserves indicated to date - 12 million tons of 0.72 percent copper.

The report also includes the customary plan map and the geologic cross sections which I had requested.

March 15, 1957

NARRATIVE REPORT FOR FEBRUARY, 1957

Docket No. DMEA 4221 (copper)
Contract No. Idm-E 1027
Lewisohn copper Corp. (Peach Mine)
Pima County, Arizona

Churn drilling under Contract No. Idm-E 1027 was continued through the month of February, by the Purcell Mining and Drilling Company of Tucson, Arizona using a type 60 L Bucyrus-Erie drill.

Only one hole was completed in February, since the drill rig was shut down for some time per mechanical overhaul. The statistics on this hole are as follows:

DMEA NO.	OUR NO.	GRID LOCATION	DEPTH
10	48	J-3	450

This hole No. 48, is the last hole under Stage I of the DMEA program, since the total completed footage is now 3460 and another hole could not be completed within the allowable 3600 Feet.

A total of 88 samples were taken - the sampling and assaying procedure being the same as described in the January report.

There is attached to this report a photostatic copy of the assay and geologic logs of Hole No. 48, as well as copies of the assay certificates. There is also attached, a map showing previous as well as February drilling in both plan and section.

Drilling conditions for Hole No. 48 were good and no difficulty was experienced either with hardness or maintaining straightness. Hole No. 48 developed 160 vertical feet of material averaging 0.72% copper.

Total tonnage developed by all drilling to date, is approximately 12 million tons of material averaging 0.70% copper and 0.30 oz. per ton silver and of which, approximately 2,200,000 tons of 0.73% copper have been developed by the 10 holes or 3,460 feet, comprising Stage I of the DMEA program.

Although 12 Million tons of 0.72% copper does not as yet constitute a commercial ore body, all indications are that further drilling on both the Peach and Elgin areas will disclose sufficient additional tonnage to be considered commercial. The stripping ratio is still considered to be approximately 1:1.

There is attached to this report, a series of 8 geologic cross sections and a key map indicating the position of these sections. While far from complete, this series is submitted as representative of the drilled area of the Peach Hill.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

RECEIVED APR 15 1957 D.M.E.A.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

DRILL HOLE LOG C-48

D.M.E.A. Hole No. 10
Grid Location: J-3
Collar Elevation: 4499
Total Depth: 450 Feet

Hole Diameter

Depth (Feet)	Diameter (Inches)
0-208	10
208-370	8
370-450	7

Depth (Feet)		Geology
0-115		Marble, garnetized limestone and siltstone.
		White marble, brown garnet, dark brown to black iron-bearing material; probably hematite-bearing calcite. Gray-green siltstone and garnetized limestone 45-50. Moderate hematite 50-60, 95-100. Gray-green siltstone, minor garnet 70-80 and 105-115. Weak oxides throughout.
115-175		Garnetized limestone.
	115-135	Weak yellow calcite-quartz material, limonite and hematite. Weak oxides, magnetite. Weak pyrite, in part altered to hematite last 5 feet.
	135-165	Weak to moderate yellow calcite-quartz material and limonite. Moderate chrysocolla and copper pitch. Weak magnetite; moderate 140-145. Weak pyrite altering to hematite and covellite last 5 feet.
	165-175	Minor garnet. Mostly limonite-coated white quartz vein material. Strong limonite. Weak oxides and pyrite. Moderate magnetite.
175-335		Diopside rock.
	175-205	Diopside rock with minor garnet, weak to moderate quartz vein material and minor epidote. Weak oxides. Moderate magnetite pyrite, chalcopyrite, covellite.

DRILL HOLE LOG C-48 - Continued

	205=230	Garnet and diopside rock with strong white quartz vein material (Note correlation of low grade with strong quartz). First to Feet: moderate diopside; moderate magnetite, moderate to weak pyrite chalcopyrite, covellite. Last 15 Feet: no diopside, some yellow clagey looking material. Weak magnetite, pyrite, chalcopyrite. Weak oxides throughout.
	230-265	Diopside rock. Moderate limonite 140-155. Moderate to strong magnetite, very strong in last 5 Feet. Moderate to strong pyrite and chalcopyrite, weak covellite.
	265-280	Diopside rock with moderate quartz vein material. Low grade. Weak magnetite, pyrite chalcopyrite.
	280-335	Diopside rock. Moderate magnetite and copper sulfides. Quartz vein material and weaker mineralization last 15 feet.
335-390		Garnetized limestone. Moderate diopside intermittantly. Weak limonite and oxides last 25 feet. Weak magnetite, pyrite, chalcopyrite.
390-450		Quartzite.
	390-405	Dark gray quartzite with strong chrysocolla and very strong limonite. Strong magnetite weak pyrite and chalcopyrite.
	405-420	Dark gray quartzite. Weak magnetite, pyrite, chalcocite. Weak oxides.
	420-450	Light tan quartzite. Weak pyrite, chalcocite and oxides first 15 feet.

Ore Zones: 165-325, Sulfide
Heavy Sulfide Zone : 275-320. Heaviest 230-265. Heavy Magnetite 390-405.

Memorandum

To: T. A. Christensen

From: Acting Executive Officer, DMEA Field Team, Region III

Subject: DMEA Docket-4221 (Copper) Contract Idm-E1027,
Lewisohn Copper Corporation (Peach mine)
Pima County, Arizona - Operator's Monthly Progress
Report for the month of January, 1957

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended for 50 percent of the amount reported on Form MF-104 for January, 1957, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

Remarks

Date of Report----------February 15, 1957
Date Received in Field Office----------February 16, 1957

Memorandum

To : W. M. Traver, Executive Officer, DMEA Field Team

From : L. A. Stewart for Superintendent, Southwest Experiment Station

Subject : Progress Report for January 1957, Docket DMEA-4221 (Copper) Contract Ldn-21027, Louisiana Copper Corp. (Peach Mine), Pima County, Ariz.

Enclosed in quintuplicate are the following:

1. Bureau of Mines engineer's report;

2. Operator's narrative report with map;

3. Forms MF-104 and MF-104A.

Also enclosed are 4 extra copies of our engineer's report.

As all work is in accordance with terms of the contract, I recommend that the Government's share of the cost be paid.

Memorandum

To : Walter R. Storms, Supt, Southwest Exp. Station

From : T. M. Rosale, Mining Engineer, Tucson, Ariz.

Subject : Progress Report for January 1957, Docket DMEA-422H (Copper) Contract Lim-21067, Louisiana Copper Corp. (Peach Mine), Pima County, Ariz.

J. H. Falck and I visited the Peach Mine February 1, 1957. After I had checked progress under captioned contract, Falck and I examined the area of the operator's proposed additional drilling. Representatives of the operator present were R. K. Chilson, president, R. H. Martin, Manager, and A. Hyman, geologist.

Progress in churn drilling under the contract for the reporting period was confined to the completion of holes G-5 and M-3 for a total advance of 756 feet. Both holes reportedly were bottomed in quartzite, G-5 at 365 feet and M-3 at 400 feet. Sections of potential ore penetrated by the holes totalled 256 feet averaging 0.75 percent copper, according to the operator.

Hole G-46, in the area of proposed additional drilling, also was drilled during the reporting period. It was drilled, at no cost to the Government, for data pertinent to investigation of the area of proposed drilling near the Eight mine.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling - The $8,523.75 is for the authorized 756 feet of churn drilling. The cost is documented by the Independent Contractor's detailed invoice, certified by the operator. The average per foot costs of drilling for January and to date are $11.29 and $8.42. Reasons for abnormally high costs during January are explained in the Operator's Narrative Report. As the average cost to date is less than the allowable maximum of $16.06 per foot, the reported total cost for January probably is allowable.

The reported 756 feet of drilling also is supported by separate geologic and assay log.

CC W. M. Traver (Orig. & 8)
DMEA-422H
MF

TMRosale:frj

Incidental - The $1,338.65 is for the 755 feet of drilling at the authorized cost of $2.03 per foot.

Assays - The $233.60 is for 146 assays at the authorized cost of $1.60 per sample. The assays are shown on the assayer's reports and on logs of the holes.

Totals - The totals, $18,398.00, $35,146.30 and $36,436.30, appear to be correct.

Form MF-1044

The form is properly completed.

Narrative Report

The report with attached map is acceptable. Mr. Martin, verbally reported that the vertical sections which I had requested are being prepared by Harrison Schmitt. He said the sections would be ready for next month's report which will include requested ore reserve estimates.

NARRATIVE REPORT FOR JANUARY 1957

Docket No. DMEA 4221 (copper)
Contract No. Idm-E 1027
Lewisohn Copper Corp. (Peach Mine)
Pima County, Arizona

Churn drilling under Contract No. Idm-E 1027 was continued through the month of January by the Purcell Mining and Drilling Company of Tucson, Arizona, using a type 60L Bucyrus-Erie churn drill.

The two holes completed in January are summarized below. (Refer to attached map, assay and geologic logs.)

DMEA NO.	OUR NO.	GRID LOCATION	DEPTH
8	45	O-5	355
9	47	M-3	400

Hole No. 46 was also drilled in January, in the Elgin area, but was not a part of the DMEA program. This was because we did not have an approved Peach drill site completed when Hole 45 was finished.

A total of 146 samples were taken, the sampling and assaying procedure being the same as described for December. No check samples were run in January due to the slow return of pulps by the assayer.

There is attached to this report a photostatic copy of the assay and geologic logs of the two holes. There is also attached a map showing previous as well as January drilling in both plan and section.

Copies of assay certificates are also attached and made a part of this report.

Drilling conditions have been substantially the same as before. There has been some difficulty with hard drilling and keeping a straight hole for approximately the first 100 feet of both Holes Nos. 45 and 47. After this upper 100 feet, no more trouble was encountered.

The two holes drilled in January represent a total of 755 feet of drilling. This drilling developed 255 vertical feet of material averaging 0.75% copper, which is believed to be of a grade sufficient to constitute ore. The overburden ratio thus far is approximately 1:1.

Signature E. M. Hartman Title acting Executive Officer Date FEB 27 1957

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

D.M.E.A. Hole No. 8
Grid Location: O-5
Collar Elevation: 4479 Feet
Total Depth: 355 Feet

Hole Diameter

Depth (feet)	Diameter (inches)
0-50	10
50-355	8

Depth (feet)	Geology
0-130	Garnetized limestone and siltstone.
0-65	Garnetized limestone and black siltstone. Mostly black siltstone 20-35. Weak chrysocolla and copper pitch. Trace magnetite, pyrite, covelitte 50-60.
65-130	Garnetized limestone. Minor black siltstone and diopside rock. Disseminated limonite: weak 65-110, strong 110-130. Moderate chrysocolla and copper pitch. Weak magnetite 110-130.
130-300	Diopside rock and garnetized limestone.
130-155	Diopside rock, minor garnetized limestone. Moderate chrysocolla, copper pitch, malachite, magnetite 130-145. Strong magnetite, moderate pyrite, chalcopyrite, and covellite, weak oxides 145-150. All weaker last 5 feet.
155-175	Garnetized limestone. Gray-green siltstone last 5 feet. Weak oxides. Weak magnetite. Weak pyrite last 5 feet.
175-230	Diopside rock, minor garnetized limestone. Moderate magnetite, pyrite, chalcopyrite, covellite; weak oxides. Weak magnetite and very strong pyrite first 5 feet. More garnetized limestone and weaker mineralization in last 5 feet.
230-270	Garnetized limestone. Minor gray-green siltstone 245-255 and 265-270. Weak oxides.
270-300	Diopside rock, minor garnetized limestone. Minor gray-green siltstone 175-190. Weak oxides. Weak-moderate magnetite and pyrite. Weak chalcopyrite last 5 feet.

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: DMEA Docket 4221 (copper) Contract Idm-E1027
Lewisohn Copper Corporation (Peach Mine)
Pima County, Arizona. Operator's Monthly
Progress Report for the month of December, 1956.

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended for 50 percent of the amount reported on Form MF-104 for December, 1956, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

Remarks:

Memorandum

To : Walter R. Stearns, Superintendent, Southwest Experiment Station

From : T. M. Ramale, Mining Engineer, Tucson, Ariz.

Subject : Progress Report for December 1956, Project DMEA-423H (Copper) Contract Idm-81027, Lexington Copper Corp. (Peach Mine), Pima County, Ariz.

On January 2, 1957, I visited the Peach Mine and checked progress under subject exploratory contract with Richard E. Chilson and S. H. Martin, President and Field Manager of the Corporation, respectively. I found that during December churn drill holes P-6, O-3 and P-4 had been completed for a reported total of 1,025 feet. Hole O-5 was being drilled.

Sections of potential ore in the above completed 3 holes were reported to be as follows:

Hole No.	Depth	Interval	Thickness	Percent Total Copper
P-6	460'	130 - 295'	165'	0.41
		375 - 410'	35'	0.93
O-3	220	20 - 115'	95'	0.67
P-4	345	40 - 198'	158'	0.97
		265 - 295'	30'	0.85

As a check on the accuracy of assays reported by the operator, the rejects of 6 samples were obtained for analysis by the Bureau's laboratory at Tucson. The reasonably close check obtained indicates that the assays reported by the operator are acceptable.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-104

Drilling - The $9,225.75 is for the authorized 1,025 feet of churn drilling. The cost is documented by the independent contractor's detailed invoice. The maximum allowable and actual per foot costs are $10.00 and $9.00, respectively. The 1,025 feet of drilling also is documented by separate geologic and assay logs.

Incidental - The $2,250.75 is for other costs less assaying for the 1,025 feet of drilling at an authorized cost of $2.25 per foot.

Assays - The $213.50 is for the assaying of 196 samples at an authorized cost of $1.50 a sample. Analyses are shown on assayer's report and assay logs.

Check assays - The $28.00 is for the check assaying of 14 samples at an authorized per sample cost of $2.00. The 14 analyses are shown on the assayers report.

Totals - The costs, $11,640.10, $13,497.20 and $25,146.30, appear to be correct.

Form MF-104A

The Form is properly completed.

Narrative Report

The report with attached map is acceptable. Vertical sections through the deposit which I have requested, are being prepared for subsequent reports.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

(Instructions on reverse)

(For Government use only) W Pomeroy

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

NARRATIVE REPORT FOR DECEMBER, 1956

Docket No. D.M.E.A. 4221 (Copper)
Contract No. Idm-E 1027
Lewisohn Copper Corp. (Peach Mine)
Pima County, Arizona

Churn drilling under Contract No. Idm-E 1027 was continued through the month of December by the Purcell Drilling Company of Tucson, Arizona, using a type 60-L Bucyrus Erie churn drill.

The three holes completed in December are summarized below. (Refer to attached map, assay and geologic logs.)

D.M.E.A. NO.	OUR NO.	GRID LOCATION	DEPTH
5	42	P-6	460
6	43	O-3	220
7	44	P-4	345
			1,025 feet

A total of 196 samples were taken, the sampling and assaying procedure being the same as described for November. A total of 14 check assays were run by Hawley & Hawley of Douglas, Arizona, and the results agreed very well with the initial assays by Dickinson Laboratories, Inc. of El Paso, Texas. More check samples will be sent out as the pulps are returned.

There is attached to this report a photostatic copy of the assay logs and geologic logs of the three holes. There is also attached a map showing previous, as well as present, drilling in both plan and section.

Copies of assay and check assay certificates are also attached and made a part of this report.

Drilling conditions in general have been good as before, except for the first 60 feet of Hole No. 44 (DMEA No. 7), in which extremely hard drilling limestone was encountered. In addition, there was some difficulty experienced in keeping the hole straight through this hard zone.

These 3 holes drilled during December represent a total of 1,025 feet of drilling. This drilling developed 415 vertical feet of material averaging 0.74% copper, which is believed to be of a grade sufficient to constitute ore. The overburden ratio is thus far less than 1:1.

DRILL HOLE LOG - C-42

D.M.E.A. Hole No. 5
Grid Coordinate: P-6
Collar Elevation: 4427 feet
Total Depth: 460 feet

Hole Diameter

Depth (feet)	Diameter (inches)
0-235	10
235-426	8
426-460	7

Depth (feet)		Geology
0-70		Marble with moderate garnet alteration and siltstone.
	0-70	White marble. Moderate garnet alteration 0-45. Strong garnet alteration 45-70. Purple hematite stain. Weak chrysocolla and copper pitch except in siltstone zone.
	15-30	Siltstone, minor marble. Very weak oxides.
	20-70	Weak magnetite.
70-375		Garnetized limestone, minor siltstone.
	70-80	Garnetized limestone; weak magnetite and copper oxides.
	80-95	Dark and light green siltstone, minor salite rock. Moderate limonite in last 5 feet. Moderate magnetite and copper oxides.
	95-140	Garnetized limestone, minor siltstone. Weak magnetite, weak copper oxides. Moderate chrysocolla and copper pitch last 10 feet.
	140-155	Siltstone and garnetized limestone. Weak magnetite and chalcopyrite, moderate pyrite, weak copper oxides.
	155-170	Garnetized limestone, minor limonite. Weak magnetite, pyrite, chalcopyrite and chrysocolla.
	170-195	Siltstone and garnetized limestone. Moderate magnetite, pyrite and trace chalcopyrite first 10 feet, then weak magnetite and chrysocolla.
	195-375	Garnetized limestone. Weak yellow calcite-quartz material. Weak chrysocolla. Weak magnetite and pyrite. No pyrite 230-270 and 310-365. Trace chalcopyrite, chalcocite, covellite 365-375.
375-405		Garnetized limestone and diopside garnet rock and 20% quartz vein material.

	375-390	Garnetized limestone and diopside garnet rock. Weak magnetite, pyrite, chalcopyrite, bornite, and chalcocite. All moderate in last 5 feet.
	370-405	Diopside garnet rock and siltstone, minor garnetized limestone. Moderate magnetite, pyrite, chalcopyrite, weak bornite.
405-460		Granite.
	405-440	Weak magnetite and pyrite.

Ore Zone: 375-405 sulfide.
No Heavy Sulfide Zone.

DRILL HOLE LOG C-43

D.M.E.A. Hole No. 6
Grid Location: O-3
Collar Elevation: 4456 feet
Total Depth: 220 feet

Hole Diameter

Depth (feet)	Diameter (inches)
0-220	10

Depth (feet)		Geology
0-80		Garnetized limestone, diopside rock, and minor marble. Weak yellow calcite-quartz material. Minor marble first 25 feet. Dominantly diopside rock with weak limonite 25-80. Moderate chrysocolla.
	0-50	Weak magnetite.
	50-70	Moderate magnetite, weak pyrite, trace chalcopyrite, chalcocite.
	70-80	Moderate magnetite and pyrite; weak total chalcopyrite, bornite, chalcocite and covellite.
80-185		Garnetized limestone and siltstone.
	95-115	Minor siltstone and moderate diopside content, weak limonite. Weak chrysocolla. Weak magnetite, pyrite, trace chalcopyrite. Moderate pyrite 100-115.
	115-185	Garnetized limestone and minor siltstone. Weak magnetite. Weak pyrite 150-170. Weak chrysocolla.
185-220		Black quartzite. Weak magnetite. Weak pyrite last 10 feet.

Ore Zone: 20-115
No Heavy Sulfide Zone.

DRILL HOLE LOG C-44

D.M.E.A. Hole No. 7
Grid Location: P-4
Collar Elevation: 4408 feet
Total Depth: 345 feet

Hole Diameter

Depth (feet)	Diameter (inches)
0-266	10
266-345	8

Depth (feet)	Geology
0-130	Garnetized lime with minor diopside and minor siltstone. (Transition zone between grossularite rock and grossularite-diopside rock.)
0-60	Little diopside. Minor siltstone 25-30, 50-60. Weak chrysocolla. Very weak magnetite and pyrite 40-55.
55-95	Moderate diopside. Minor limestone first 15 feet. Minor siltstone 70-95. Strong magnetite; weak pyrite, chalcopyrite, bornite; moderate chrysocolla and copper pitch, weak malachite.
95-130	Weak diopside. Moderate gray-green siltstone. Strong black siltstone 110-115. Weak chrysocolla. Weak magnetite. Weak pyrite first 10 feet. Weak magnetite, moderate pyrite, weak chalcopyrite and bornite last 5 feet.
130-215	Diopside-garnet rock. Moderate limonite to 185. Strong limonite 155-160 and 165-170. Minor siltstone 130-135. 20% quartz vein material 150-165, 185-190, 210-215. Moderate to strong magnetite, moderate pyrite, strong total of covellite, chalcopyrite, bornite, chalcocite. Weak copper pitch and chrysocolla. Moderate malachite and chrysocolla last 10 feet.
215-345	Black quartzite.
215-265	Weak magnetite, pyrite, chalcopyrite, chrysocolla.
265-295	Weak magnetite, moderate chrysocolla.
295-345	Weak magnetite, weak chrysocolla; weak pyrite 295-335.

Ore Zones: 60-130 mixed, 130-215 sulfide.
Heavy Sulfide Zone: 130-215

Memorandum

To: T. A. Christensen

From: Executive Officer, DMEA Field Team, Region III

Subject: Docket DMEA 4221 (Copper) Contract Idm-E1027, Lewisohn Copper Corporation (Peach mine) Pima County, Arizona - Operator's Monthly Progress Report for the month of November, 1956

Enclosed are the original and four copies each of Forms MF-104 and MF-104A, Operator's Narrative Report, and Engineer's Report for the above period.

We consider that the Operator has complied with the intent of the contract, and the work for which payment is recommended is acceptable to the Government. Payment is recommended for 50 percent of the amount reported on Form MF-104 for November, 1956, contingent on your verification of the correctness of applicable rates and arithmetical accuracy of computations.

Memorandum

To : W. M. Tuzzer, Executive Officer, DMEA Field Team

From : Lincoln A. Stewart for Superintendent, Southwest Experiment Station

Subject : Progress Report for November 1956, Project DMEA-42H (Copper) Contract Ldn-[illegible], Louisiana Copper Corp. (Peach Mine), Pima County, Ariz.

Enclosed in quintuplicate are the following:

1. Bureau of Mines engineer's report;

2. Operator's narrative report with map;

3. Forms MF-104 and MF-104A.

Also enclosed are 4 extra copies of our engineer's report.

As all work is in accordance with terms of the contract, I recommend that the Government's share of the cost be paid.

December 20, 1956

Memorandum

To : Walter R. Stamm, Superintendent, Southwest Experiment Station:

From : T. M. Rumale, Mining Engineer, Tucson, Ariz.

Subject : Progress Report for November 1956, Docket DMEA-4221 (Copper) Contract IDA-1187, Lucianna Copper Corp. (Peach Mine) Pima County, Ariz.

On December 6, 1956, I visited the Peach Mine and inspected progress under subject exploration contract with Richard E. Chilson, President of the Corp., and R. H. Martin, Manager and project supervisor.

I found that 4 of the 12 approved holes of Stage I (P-2, P-3, P-4, and P-7) reportedly had been completed for a total depth of 1,220 feet during November. Drilling of the fifth hole, P-6, was in progress.

The drilling is being done by the Parnell Mining and Drilling Company, under an independent contract, using a 50-I. Sullivan Rock diamond drill. Three shifts are worked daily for 6 days a week. This company recently completed drilling at the nearby Parnell copper property. The operations are supervised by Mrs. Martha A. Parnell, who I met at the drilling. Mrs. Parnell reportedly entered the business several years ago after inspecting the operations of several drilling contractors, one of whom had drilled her property near Oracle, Ariz. She reportedly found most of the drilling was not in conformance with accepted practices and that the operations were inefficient. Based on these findings she set up a company that has been successful; probably the most important reason for this is that the operations are carried out efficiently and properly by well-paid experienced drillers. Other reasons for the successful operations are that excellent equipment is kept in good operating condition and an adequate supply of accessories is available from an orderly arranged depot at each job.

W. M. Trayer (Orig. & 3)
DMEA-4221
SF

TMRumale:frj

A total of 128 5-foot samples were obtained from 4 holes by samplers employed by the operator. They were prepared by other samplers, also employed by the operator, for assay by the Richmond Laboratories, Inc., El Paso, Texas. My inspections at both the drill rig and the sampling frame on the property indicated that the samples were properly obtained and prepared for analyses.

The less than average thickness and grades of ore penetrated by holes 3-D, 3-E and 3-G indicate a weakening of mineralization at the northeasterly portion of the zone. Hole 3-F in the northwestern portion of the zone penetrated 70 feet of potential ore containing an average of about 1.16 percent copper.

ANALYSIS OF THE OPERATOR'S REPORT

Form MF-124

Shown Drilling - The $16,610.50 is for 1,330 feet of advance at an agreed total cost documented by the certified drill contractor's invoice. The average per foot cost of about $8.43 is less than the maximum allowable $10.00. The reported 1,330 feet of drilling is shown on the sub-contractor invoice and the separate geological and assay logs of holes.

Sampling and Analysis - The $169.00 is for the assay of the 128 samples at the authorized fixed cost of $1.40 per sample. The analyses of the 128 samples are shown on the assayers report and the assay logs.

Shown 4 Shown 7 (less assaying) - The $2,486.50 is for the 1,330 feet of drilling at the authorized fixed cost of $1.83 per foot.

Total Costs - The Monthly and To-Date totals of $13,497.50 appear to be correct.

Form MF-124A

The form is properly completed.

Narrative Report

The report with attached map is considered satisfactory. Separate geologic and assay logs are a part of the report.

Signature [illegible] Title Mining Engineer Date Dec 19 1956

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature [illegible] Title Executive Officer Date JAN 8 1957

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

DEPARTMENT OF THE INTERIOR
DEC 26 1956
REGION III
DENVER, COLORADO

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

NARRATIVE REPORT FOR NOVEMBER

Docket No. D.M.E.A. 4221 (Copper)
Contract No. Idm-E 1027
Lewisohn Copper Corp. (Peach Mine)
Pima County, Arizona

Churn drilling under contract No. Idm-E 1027 was begun on November 2, 1956, by the Parcell Drilling Company of Tucson, Arizona, using a type 60-L Bucyrus Erie churn drill.

The four holes completed in November are indicated below:
(Refer to attached map)

DMEA NO.	OUR NO.	GRID LOCATION	DEPTH
1	C-38	D-2	285
2	C-39	E-3	380
3	C-40	G-3	460
4	C-41	T-3	105
			1,230 feet

A total of 238 samples were taken, each representing an interval of 5 feet. Overburden was not sampled. These samples were split out of the entire volume of material by Jones splitters until approximately one gallon of material remained which is then dried on an automatic steam table. This gallon is further split until enough material remains for 3 sample pulps. The material is then pulverized. One pulp is sent to the assayer, the other 2 are filed. The rejects from this operation are also filed for future metallurgical testing. Dickinson Laboratories, of El Paso, Texas, are the assayers and the samples are being run for total copper. When sufficient have accumulated, approximately 10% of these returned pulps will be sent to Hawley & Hawley, assayers, of Douglas, Arizona, for check purposes.

The following procedure governs the drilling of all churn drill holes:

A 17 inch diameter hole is drilled through overburden to solid rock and 16 inch casing is then set. A 13 inch hole is then drilled until the ore zone is encountered. Ten inch casing is then set from the surface to the bottom of the hole. The hole size is now reduced to 9 inches and drilling below the casing further than the length of the drilling tools (about 40 feet) is prohibited to prevent salting of the samples. When 40 feet is reached, 8 inch casing (called liner) is run from just inside the bottom of the 10 inch to the bottom of the hole. The next 40 feet is now drilled 7 1/2 inches in diameter, then the above mentioned 8 inch casing pulled, the 7 1/2 inch hole reamed to 9 inches and an additional 40 feet of 8 inch casing run in. This process is repeated until the hole is bottomed in quartzite or granite. This continuous casing is necessary to preserve the integrity of the samples. No holes are being drilled smaller than 7 inches in diameter.

There is attached to this report a photostatic copy of the assay logs and geologic logs of the 4 holes.

There is also attached a map showing previous as well as present drilling in both plan and section.

Copies of the assay certificates are also attached and made a part of this report.

The 4 holes with which this report is concerned represent a total of 1,230 feet of drilling. This drilling developed 395 vertical feet of material with a weighted average of 0.70% copper. This is believed to be of a grade sufficient to constitute ore. Drilling conditions have in general been excellent.

Gentlemen:

We hereby submit our bill for drilling done on your property at Helvetia, for the period of November 2, 1956, to November 26, 1956, inclusive:

GRID LOCATION	HOLE NO.		
D - 2	38	Drilled to 285 feet - - - - -	$ 2,801.75
E - 3	39	Drilled to 380 feet - - - - -	3,534.00
G - 3	40	Drilled to 460 feet - - - - -	3,588.25
T - 3	41	Drilled to 105 feet - - - - -	695.50
	Total	1230 feet - - - -	$10,619.50

Yours truly,
