Dear Mr. Huntley:

A review of your application of May 28, 1951, for a $25,000.00 exploration contract reveals that a letter dated January 21, 1952, by Mr. G. C. Selfridge, Chief, Iron and Ferro-Alloy Division of Defense Minerals Exploration Administration requests additional information necessary to process your application. We have not received an answer from you and we assume that you no longer desire to proceed with the application.

We wish to cooperate with you in the matter of allowing ample time, but if the needed data have not been received by April 15, 1952, we will then remove your application from the active file and consider the matter closed.

Sincerely yours,

C. O. Mittenderf

Defense Minerals Administration,
Washington 25, D.C.

Attention: George B. Holderer, Chief, Tungsten Branch.

Gentlemen:

In reply to your letter of July 26, 1951:

The adit is open and accessable. The 70 foot and 35 foot winzes are full of water to the collar, but only produce about 50 gallons per hour. Otherwise the winzes are in perfect condition.

We are now shipping substantial quantities of ore from two other mines on the property and would like to have further word on our application at your earliest convenience.

Very truly yours,
Huntley Industrial Minerals Inc.

W. H. Huntley By

W.H.Huntley, President.

Bishop, California

In reply please refer to
DMA-1586X Tungsten

Dear Mr. Huntley:

Thank you for your recent letter concerning the condition of the two winzes in the main adit level.

Because of conflicting information we have at hand with regard to the grade of ore on the adit level, we feel that the two winzes should be unwatered and sampled with a minimum of expense before an exploration program is undertaken. We would be willing to sample the winzes if you could arrange to have the mine unwatered at your convenience and account.

We are now in a position to process your application in a relatively short time and shall be interested to receive your reaction to the above suggestion.

Very truly yours,

George B. Holderer

Dear Mr. Huntley:

Reference is made to your application for an exploration loan under date of May 28, 1951, form MF-103, item 16 (a).

Can one reach the two winzes, 35 and 70 feet deep respectively, sunk from the main adit level? If the adit is accessible can you tell us in what condition the winzes are?

We would appreciate this information.

Very truly yours,

George B. Holderer

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.
*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.
*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.
*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.
15. State in detail how the ore could be shipped and how and where milled.
*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.
*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining	NOT IN OPERATION			
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.
19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?
21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.
22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.
24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

16—64067-1 U. S. GOVERNMENT PRINTING OFFICE

INFORMATION FOR
FORM MF-103
May 28, 1951

Huntley Industrial Minerals, Inc.
P. O. Box 305 - Bishop, Calif.

1. The applicant is a California Corporation.
2. Not a partnership.
3. Officers of the Corporation: Wright H. Huntley, Pres.; L. G. Hummel, Sec.-Treas.; Cecile M. Huntley, Vice Pres.; C.E.Demorest, Asst. Sec.-Treas. Directors: Wright H. Huntley, L. G. Hummel, Kenneth G.Irons, E. E. Berg, C. E. Demorest. Five largest stockholders, same as directors.
4. The president of the Corporation has had sixteen years of mining experience, is personally supervising the largest diversified non-metallic mining and milling organization in California and will personally supervise the project.
5. The Corporation is owner of the property.
6. There are no claims, liens or encumbrances against the property.
7. Not a lessee.
8. A current financial statement attached.
9. $6500.00. This will pay our portion of cost in accordance with Section 9 of Mineral Order 5.
10. (a) The property involved is the Tungsten City Claims, consisting of eight unpatented claims. On this property we have the Jackrabbit Mine which we are now putting into operation on ore above the main tunnel level.The Jackrabbit Mine is on Claim No. 7.
(b) The exploration will be done below the glory-hole and tunnel level on Claim No. 1 of the Tungsten City Group.
11. This mine was formerly known as part of the Little Sister Mine.
12. The mine is located three miles from a paved road, on a good graded county road, seven miles west of Bishop and eleven miles from the railroad station at Laws, Calif., all connecting to the mine with excellent roads.
13. There is 10 gallons per minute of water from springs on the property-sufficient for mining and domestic use. There is a main power line and sub-station on the property. This power is purchased from California Electric Power Co. The cost is an average of 3¢ per K.W. hour. The amount of power to be used will be approximately 20 K.W. per hour.
14. The existing useable facilities are main power line and transformer station and four cabins (needing some repair).
15. The ore will be shipped in our own Diesel trucks and will be milled at Red Hill mill 3½ miles from the mine or at U.S.Vanadium Mill 15 miles from the mine.
16. (a) The mine was previously operated from a lower main tunnel with 100 foot raises and large stopes connecting to the floor of an open-pit of 120 foot depth, 200 foot length and 80 foot width. From this area approximately 200,000 tons of ore was mined running from 3% to 5% tungsten. (Actual figures of the original owners). In 1940 a lessee took out in about five months, approximately 8000 tons of low-grade ore from the old stopes averaging above 0.75% tungsten. The mine was opened in about 1916 by J. V.Baldwin of Los Angeles and the Fisher Bros. of General Motors in Detroit. It was the largest producer in

the U.S. In World War I but was closed in about 1919. The owners diamond drilled below the tunnel in about 1925 but never operated the mine again after the original closing. This drilling, we are informed now by the former owners, disclosed at that time at least 150,000 tons of ore below the level they worked, averaging 1.5% tungsten. This was verified about twelve years ago when lessees sunk two winzes from the main tunnel to a depth of 35 and seventy feet, all in ore of about 2%. The former owners occasionally leased out the tailings on the property and the applicant has personal knowledge of two different outfits clearing approximately $50,000.00 per year from these tailing operations. The tailingsstill contain an average of approximately 0.3% sheelite.

Mining was never resumed after the original closing, by the original owners, from whom we purchased the property, (with the exception of occasional small leasers)due to the death of Mr. Baldwin, soon after their diamond drilling program, and the fact the Fisher Bros. of Fisher Body Co. in Detroit had become so extremely wealthy they had lost interest. We bought the property so they could liquidate, the Senior Investment Corporation, of Detroit, their private holding corporation.

(b) All adjoining properties are again active. This property was the largest producer and the key property of the famous Bishop Tungsten Hills District.

(c) The diamond drill maps and accompanying geological reports were loaned out by the former owners and were never returned to them, so are not available. They state the reports indicated the major ore bodies below the present tunnel level, which is definitely indicated on recent examination. The applicant has personally verified by interview with men on the original drilling crew, the quality and depth of the ore drilled at that time. The ore is tactite and has always been readily recovered in a gravity plant, though flotation is now available at U.S. Vanadium mill.

17. Mine is not in operation except for present recovery from hillside of 200 tons of float from the original outcropping, which is running approximately 2.0% sheelite.

18. (a) The ore, containing sheelite, is a tactite containing about 56% garnet and is a massive deposit between limestone and granite.

(b) We have no assays as the two winzes are full of water (making about 50 gallons per hour) . One map of the property enclosed.

(c) There is estimated to be 150,000 tons of 1.5% tungsten ore below tunnel level. The purpose of the loan is to determine this.

19. This is an all-year property, at less than 5000 foot elevation, with good roads open the year around, to the property.

THE EXPLORATIONS:

20. The exploration will be for sheelite ore.

21. The proposed work will be deepening the seventy foot winze to 150 feet and running 420 feet of drifts to determine the ore. This work will take not to exceed one year.

H[illegible]ley Industrial Minerals, Inc.
P.O. Box 305 - Bishop, Calif.

22. Diamond drilling in the past has indicated ore in this area. The drifts will follow the ore and can not be mapped in advance, except that they will be run at not less than 50 foot intervals vertically.

23. (a) Two miners @ $1.75 per hour and two muckers @ $1.60 per hour.
(b) One supervisor, part time @ $250.00 per month.
(c) $500.00 repair to housing for workers.
(d) $1000.00 for power line from sub-station to mine.
(e) Tugger hoist, $750.00. Pump $350.00.
(f) None
(g) Rental of compressor, electric hoist, cars, rails, pipe, etc. $400.00 per month..
(h) Powder, caps, fuse, bits, fuel, etc. $300.00 per month.
(i) Power, $50.00 per month.

THE REQUIREMENTS AND COST.

24. The project should be finished in ten months, after approval, averaging 50 feet per month including installation time, lost time, etc. and should be finished at a cost of approximately $24,600.00. Estimated costs as follows:

Labor	$12,000.00
Supplies	3,000.00
Equipment rental	4,000.00
Supervision	2,500.00
Power	500.00
Repairs	500.00
Purchased equipment	1,000.00
Power line	1,000.00
Assaying & sampling.	400.00
	$25,000.00

Date of filing MF-100 May 28, 1951

DMA Docket Number, if available

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.

*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.

*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.

*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.

15. State in detail how the ore could be shipped and how and where milled.

*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling	NOT IN OPERATION			
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.

19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?

21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.

24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

Huntley Industrial Minerals, Inc. (Name of company) By W. H. Huntley (Signature of authorized official)

May 28, 1951 (Date) President (Title)

Title 18, U. S. Code (Crimes), Section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

16—64067-1 U. S. GOVERNMENT PRINTING OFFICE

INFORMATION FOR
FORM MF-103
May 28, 1951

Huntley Industrial Minerals, Inc.
P. O. Box 305 - Bishop, Calif.

1. The applicant is a California Corporation.
2. Not a partnership.
3. Officers of the Corporation: Wright H. Huntley, Pres.; L. G. Hummel, Sec.-Treas.; Cecile M. Huntley, Vice Pres.; G.E.Demorest, Asst. Sec.-Treas. Directors: Wright H. Huntley, L. G. Hummel, Kenneth O.Irons, E. H. Berg, G. E. Demorest. Five largest stockholders, same as directors.
4. The president of the Corporation has had sixteen years of mining experience, is personally supervising the largest diversified non-metallic mining and milling organization in California and will personally supervise the project.
5. The Corporation is owner of the property.
6. There are no claims, liens or encumbrances against the property.
7. Not a lessee.
8. A current financial statement attached.
9. $6500.00. This will pay our portion of cost in accordance with Section 9 of Mineral Order 5.
10. (a) The property involved is the Tungsten City Claims, consisting of eight unpatented claims. On this property we have the Jackrabbit Mine which we are now putting into operation on ore above the main tunnel level. The Jackrabbit Mine is on Claim No. 7.
    (b) The exploration will be done below the glory-hole and tunnel level on Claim No. 1 of the Tungsten City Group.
11. This mine was formerly known as part of the Little Sister Mine.
12. The mine is located three miles from a paved road, on a good graded county road, seven miles west of Bishop and eleven miles from the railroad station at Laws, Calif., all connecting to the mine with excellent roads.
13. There is 10 gallons per minute of water from springs on the property-sufficient for mining and domestic use. There is a main power line and sub-station on the property. This power is purchased from California Electric Power Co. The cost is an average of 3¢ per K.W. hour. The amount of power to be used will be approximately 20 K.W. per hour.
14. The existing useable facilities are main power line and transformer station and four cabins (needing some repair).
15. The ore will be shipped in our own Diesel trucks and will be milled at Red Hill mill 3½ miles from the mine or at U.S.Vanadium Mill 15 miles from the mine.
16. (a) The mine was previously operated from a lower main tunnel with 100 foot raises and large stopes connecting to the floor of an open-pit of 120 feet depth, 200 foot length and 80 foot width. From this area approximately 200,000 tons of ore was mined running from 3% to 5% tungsten. (Actual figures of the original owners). In 1940 a lessee took out in about five months, approximately 8000 tons of low-grade ore from the old stopes averaging above 0.75% tungsten. The mine was opened in about 1916 by J. V.Baldwin of Los Angeles and the Fisher Bros. of General Motors in Detroit. It was the largest producer in

1. The applicant is California Corporation.
2. Not applicable.
3. Officers of the Corporation: Ralph K. Hurley, President; [illegible]
[illegible]; Orville M. Hurley, Vice Pres.; C.L. Hurley, Sec.-Treas. Directors: Ralph K. Hurley, M. M. Hurley, Kenneth C. Lewis, E. Bing, C. L. Lawrence. Five [illegible] shareholders, same as directors.
4. The president of the [illegible] operation has had sixteen years of mining experience, is versed in engineering the largest diversified non-metallic mining and milling organization in California, and will personally supervise the project.
5. The Corporation is owner of the property.
6. There are no liens, liens or encumbrances against the property.
7. Not a lease.
8. A current financial statement is enclosed.
9. $5500.00. This will pay our portion of case in accordance with Section 9 of Mineral Order 5.
10. (a) The property involved is the Dungeon Mtn Claims, consisting of eight unpatented claims. On this property we have the [illegible] [illegible] which are now getting into operation on ore above the main tunnel level. The location this is on Plate No. 7.
(b) The mining action will be done below the glory-hole and tunnel level on Plate No. 1 of the Dungeon Mtn Group.
11. This mine was formerly mined as part of the Lilly Silver Mine.
12. The mine is located three miles from a paved road, on a good graded county road, seven miles west of Silver and eleven miles from the railroad station at [illegible], Calif., all connecting to the mine by excellent roads.
13. There is 10 gallons per minute of water from another on the property-sufficient for mining and domestic use. [illegible] is a high power line [illegible] on the property. This power is purchased from California Electric Power Co. The cost is an average of 3¢ per K.W.H. The amount of power to be used will be approximately 20 K.W. per hour.
14. The existing operating facilities are main shaft, the and [illegible] [illegible] and [illegible] (working [illegible]).
15. [illegible] in our [illegible] and will [illegible] [illegible] the mine [illegible] [illegible] the mine.
16. (a) The mine was previously operated from a lower main tunnel [illegible] [illegible] large stope connecting to the floor of an [illegible] of 120 feet depth, 200 feet length, 50 feet width. There this area approximately 400,000 tons of ore [illegible] [illegible] [illegible] [illegible] (the [illegible] of the [illegible]). In July [illegible] [illegible] five months, approximately 8000 tons of [illegible] [illegible] [illegible] averaging above 0.75% tungsten. [illegible] [illegible] in 1918 by [illegible] of Los Angeles [illegible] [illegible] of General Metals in Detroit. It was the largest producer in

the U.S. In World War I but was closed in about 1919. The owners diamond drilled below the tunnel in about 1925 but never operated the mine again after the original closing. This drilling, we are informed now by the former owners, disclosed at that time at least 150,000 tons of ore below the level they worked, averaging 1.5% tungsten. This was verified about twelve years ago when lessees sunk two winzes from the main tunnel to a depth of 35 and seventy feet, all in ore of about 2%. The former owners occasionally leased out the tailings on the property and the applicant has personal knowledge of two different outfits clearing approximately $50,000.00 per year from these tailing operations. The tailingsstill contain an average of approximately 0.3% sheelite.

Mining was never resumed after the original closing, by the original owners, from whom we purchased the property, (with the exception of occasional small leasers)due to the death of Mr. Baldwin, soon after their diamond drilling program, and the fact the Fisher Bros. of Fisher Body Co. in Detroit had become so extremely wealthy they had lost interest. We bought the property so they could liquidate the Senior Investment Corporation, of Detroit, their private holding corporation.

(b) All adjoining properties are again active. This property was the largest producer and the key property of the famous Bishop Tungsten Hills District.

(c) The diamond drill maps and accompanying geological reports were loaned out by the former owners and were never returned to them, so are not available. They state the reports indicated the major ore bodies below the present tunnel level, which is definitely indicated on recent examination. The applicant has personally verified by interview with men on the original drilling crew, the quality and depth of the ore drilled at that time. The ore is tactite and has always been readily recovered in a gravity plant, though flotation is now available at U.S. Vanadium mill.

17. Mine is not in operation except for present recovery from hillside of 200 tons of float from the original outcropping, which is running approximately 2.0% sheelite.

18. (a) The ore, containing sheelite, is a tactite containing about 56% garnet and is a massive deposit between limestone and granite.

(b) We have no assays as the two winzes are full of water (making about 50 gallons per hour) . One map of the property enclosed.

(c) There is estimated to be 150,000 tons of 1.5% tungsten ore below tunnel level. The purpose of the loan is to determine this.

19. This is an all-year property, at less than 5000 foot elevation, with good roads open the year around, to the property.

THE EXPLORATIONS:

20. The exploration will be for sheelite ore.

21. The proposed work will be deepening the seventy foot winze to 150 feet and running 420 feet of drifts to determine the ore. This work will take not to exceed one year.

Bentley Industrial Minerals, Inc.
P.O. Box 305 - Bishop, Calif.

22. Diamond drilling in the past has indicated ore in this area. The drifts will follow the ore and can not be mapped in advance, except that they will be run at not less than 50 foot intervals vertically.

23. (a) Two miners @ $1.75 per hour and two muckers @ $1.60 per hour.
(b) One supervisor, part time @ $250.00 per month.
(c) $500.00 repair to housing for workers.
(d) $1000.00 for power line from sub-station to mine.
(e) Tugger hoist, $750.00. Pump $350.00.
(f) None
(g) Rental of compressor, electric hoist, cars, rails, pipe, etc. $400.00 per month.
(h) Powder, caps, fuse, bits, fuel, etc. $300.00 per month.
(i) Power, $50.00 per month.

THE REQUIREMENTS AND COST.

24. The project should be finished in ten months, after approval, averaging 50 feet per month including installation time, lost time, etc. and should be finished at a cost of approximately $24,600.00. Estimated costs as follows:

Labor	$12,000.00
Supplies	3,000.00
Equipment rental	4,000.00
Supervision	2,500.00
Power	500.00
Repairs	500.00
Purchased equipment	1,000.00
Power line	1,000.00
Assaying & sampling.	400.00
	$25,000.00

INSTRUCTIONS

This form is to be filed with Defense Minerals Administration, Department of the Interior, Washington 25, D. C. It should be accompanied by appropriate application form when a specific type of Government assistance is requested, in the form of (1) loan, (2) purchase contract, (3) Government guarantee of a private loan, (4) ~~Necessity Certificate pursuant to the provisions of Section 124 (a) of the Defense Production Act of 1950~~ (5) priorities or allocation of mining equipment, and maintenance, repair and operating supplies, and (6) other forms of Government assistance that might arise under the Act. Submit four (4) signed copies of the form and accompanying papers. Name and address should be stamped or typed on each sheet of this form and all accompanying papers. *When a question is inapplicable it should be so stated on the form.* Additional sheets may be attached in answering any questions or in supplying additional information. (IF YOU CANNOT ANSWER A QUESTION, SO STATE.) If a question is answered elsewhere indicate where answered. It is not necessary to answer it again.

5

GENERAL TECHNICAL DATA

Supply the following information on separate sheets, arranged, numbered, and lettered as indicated:

1. Materials produced:
   (*a*) What are the chief mine, mill, or smelter products?
   (*b*) What are the byproducts, if any?
2. Name(s) and type(s) of mine(s), mill(s), smelter(s), refinery(ies), pit(s), quarry (ies), drilling operation(s). Include old names of property, if any. Show extent of workings, including the following:
   (*a*) Linear feet of shafts.
   (*b*) Linear feet of drifts and crosscuts.
   (*c*) Linear feet of tunnels or adits.
   (*d*) Linear feet of other mine openings (explain briefly).
   Indicate whether mine is flooded or not. Describe any pumping problems. Give size or productive capacity.
3. For each operation listed above supply the following:
   (*a*) Distance and direction from nearest town and shipping point.
   (*b*) Mining district.
   (*c*) Township, Section, Range.
   (*d*) County, State.
4. (*a*) State whether or not property is now in operation, and if in operation, by whom operated.
   (*b*) Are you operating this property as:
   - ☐ Owner.
   - ☐ Lessee.
   - ☐ Contractor.
5. Number of years in production 8
   If not in production or operation, estimated date when production will begin 30 days
6. Experience of operators:
   Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who manage the project.
7. History:
   (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for suspension of operation.
   (*b*) State briefly the known history and production of adjoining and neighboring properties.
   (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

8. Names and addresses of Officers, Directors, or Partners, and in addition thereto, the five largest stockholders if applicant is a corporation.

Name and Address (a)	Official Title (If officer is also director indicate by "D") (b)	Total of Annual Salary, Commissions, Bonuses, Etc., Received From Applicant and Affiliates During Last Fiscal Year (c)	Estimated Net Worth Outside of Interest in Applicant (d)	Number of Shares Held in Applicant Corporation: Common (e)	Number of Shares Held in Applicant Corporation: Preferred (f)	Life Insurance Carried for Benefit of Applicant: Amount (g)	Life Insurance Carried for Benefit of Applicant: Net Cash Surrender Value After Loans (h)
Wright H. Huntley	Pres. D	$9000.00	$218,000	$300,000	$9,500		
L. G. Hummel	Sec.-Treas. D	$9000	$50,000		$3,000		
C. E. Demorest	Asst. Sec. D			$4,500	$3,500		
Cecile M. Huntley	Vice Pres.						
Elmer E. Berg	D			$25,500	$25,500		
Kenneth G. Irons	D			$ 5,000	$ 5,000		
	Total	$18,000	x x x x x	$335,000	$46,500	x x x x x	x x x x x

If more lines are needed continue on separate sheet.

9. Capital Stock Issues:

For Corporate Applicants

Item	Authorized (a)	Outstanding (b)	Par Value (c)	Number of Shares Outstanding (d)	Dividend Rate Last Paid* (e)
Common stock	$ 350,000	$ 350,000	$ 1.00	350,000	
Preferred stock	$ 50,000	$ 50,000	$ 1.00	50,000	Accrued

*Indicate period covered.

10. Production:

Item	Kind of Product (a)	1948 Total (b)	1949 Total (c)	1950 Total (d)	Present Average Monthly (e)
1. Quantity of product mined or quarried (Short, long, metric tons; barrels; pounds; etc.)	No tungsten produced.				
2. Quantity of product processed (specify unit of measure and type of process)					
3. Quantity and grade of product sold or shipped (specify units of measure)					

11. Do you contemplate a change in the present average monthly rate of production? If so, state estimated maximum monthly production and basis of change.

12. Ore or Mineral Reserves:

(a) Describe the ore or mineral deposit briefly. Accompany the application by any available report on the geology and ore reserves. A large scheelite deposit containing scheelite, between granite and limestone.

16—68792-1

(b) If deposit is other than placer:

(1) Submit assay plans and/or sections showing location and size of proved (measured) and probable (indicated) ore or mineral reserve.

(2) State the tonnage (indicate type of ton) and grade of each class of ore reserve, as above, and show how computed. Tabulated total ore reserve as follows:

TOTAL ORE OR MINERAL RESERVES

Ore or Mineral Reserve	Estimated Tons (a)	Metal or Mineral Content Per Ton (Grade) (b)	Gross Value Per Ton (c)	Recoverable Unit Value Per Ton (d)	Estimated Cost of Production Per Ton (e)
Measured (proved)					
Indicated (probable)	150,000	1.5% Sheelite	$97.50	$78.00	$34.00 Including Milling.

(c) If placer: Not placer

(1) Give estimated total yardage and average marketable mineral content of each deposit.

(2) Submit map showing location of placer deposit and surrounding area, with all test holes or pits. Submit logs of each hole and test pit with depth and average value of each.

(3) Describe gravel, stating whether fine, medium or coarse; loose, tight, cemented, or frozen, and whether it contains stumps or boulders more than 1 foot in diameter; if so, how large, and in what proportion.

(4) Describe bedrock, giving type (granite, sandstone, shale, etc.) and state whether it is hard or soft, smooth, uneven or rough.

(5) Describe overburden, stating whether loose, tight, or cemented; fine or coarse textured; furnish estimate of average thickness and total amount.

(6) Tabulate the reserves using the form outlined above for ore or mineral reserves.

13. Access Roads:

Give road distances to shipping, supply and residence points, stating kind and condition of roads.

7 miles - excellent roads.

14. Water Supply:

State source and quantity of water available for operations and whether sufficient for all seasons of year.

10 gal. per minute from springs - sufficient for all seasons.

15. Power:

State amount of power used, rate per hour, and source thereof.

20 K.W. per hour - average 3¢ per K.W. - Calif. Electric Power Co.

16. Labor:

State number and classes (miners, muckers, millmen, etc.) of men employed during a recent representative payroll period.

None used on this property recently.

17. Equipment and Facilities:

Describe present equipment on the property, including buildings. (State condition.) List major pieces of equipment now owned or controlled and in serviceable condition available for this operation.

Four cabins needing $500.00 worth of repairs.

18. Are there any particular conditions or circumstances affecting your operations that are not described above? If so, explain.

Excellent location for all-year operation.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

U. S. GOVERNMENT PRINTING OFFICE 16—68792-1

Information for
Form MF-100
May 28, 1951

Huntl[illegible] Industrial Minerals, Inc.
P. O. Box 305, Bishop, Calif.

1. Materials Produced.
   a. Sheelite
   b. Garnet sand
2. Tungsten City Mine. (formerly Little Sister Mine)
   a. 105 feet of shafts.
   b. 350 feet of drifts and crosscuts.
   c. 300 feet of tunnel.
   d. 400 feet of raises and stopes.

   Both shafts or winzes full of water with about 50 gallons per hour to be pumped. An estimated 150,000 tons of ore below main tunnel level.

3. a. Seven miles west of Bishop, Calif.
   b. Tungsten City Mining District.
   c. Township 7 S., Section 12 and 13, Range 31E M.D.M.
   d. Inyo County, Calif.

4. a. This portion of property not in operation.
   b. Owner

5. Operation could be within 30 days.

6. The President of the Corporation is a mining engineer of sixteen years experience, is personally supervising the largest diversified non-metallic mining and milling organization in California and will personally supervise the project.

7. a. The mine was previously operated from a lower main tunnel with 100 foot raises and large stopes connecting to the floor of an open-pit of 120 foot depth, 200 foot length and 80 foot width. From this area approximately 200,000 tons of ore was mined running from 3% to 5% tungsten. (Actual figures of the original owners). In 1940 a lessee took out in about five months, approximately 8000 tons of low-grade ore from the old stopes, averaging above 0.75% tungsten. The mine was opened in about 1916 by J. V. Baldwin of Los Angeles and the Fisher Bros. of General Motors in Detroit. It was the largest producer in the U. S. in World War I, but was closed in about 1919. The owners diamond-drilled below the tunnel in about 1925, but never operated the mine again after the original closing. This drilling, we are informed now by the former owners, disclosed at that time at least 150,000 tons of ore below the level they worked, averaging 1.5 tungsten. This was verified about twelve years ago when lessees sunk two winzes from the main tunnel to a depth of 35 and 70 feet, in ore of about 2%. The former owners occasionally leased out the tailings on the property and the applicant has personal knowledge of two different outfits clearing approximately $50,000.00 per year from these tailings operations. The tailings still contain about 0.30% sheelite.

   Mining was never resumed after the original closing, by the original owners, from whom we purchased the property. This was due to the death of Mr. Baldwin soon after the diamonddrilling program, and the fact the Fisher Bros. of Fisher Body Co. in Detroit had become so extremely wealthy they had lost interest. We bought the property so they could liquidate the Senior Investment Corp. of Detroit, their private holding corporation.

   b. Several hundred thousand tons of ore have been produced from directly adjoining mines and these are again in operation.

   c. The indicated developement is exploration of the downward extension of the previously mined ore bodies.

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.
*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.
*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.
*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.
15. State in detail how the ore could be shipped and how and where milled.
*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.
*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling	NOT IN OPERATION			
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.
19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?
21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.
22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.
24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

Huntley Industrial Minerals, Inc. (Name of company)

By W. H. Huntley (Signature of authorized official)

May 28, 1951 (Date)

President (Title)

Title 18, U. S. Code (Crimes), Section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

*Same as footnote on page 1.

16—64067-1 U. S. GOVERNMENT PRINTING OFFICE

INFORMATION FOR
FORM MF-103
May 28, 1951

Huntley Industrial Minerals, Inc.
P. O. Box 305 - Bishop, Calif.

1. The applicant is a California Corporation.
2. Not a partnership.
3. Officers of the Corporation: Wright H. Huntley, Pres.; L. G. Hummel, Sec.-Treas.; Cecile M. Huntley, Vice Pres.; C.E.Demorest, Asst. Sec.-Treas. Directors: Wright H. Huntley, L. G. Hummel, Kenneth G.Irons, E. E. Berg, C. E. Demorest. Five largest stockholders, same as directors.
4. The president of the Corporation has had sixteen years of mining experience, is personally supervising the largest diversified non-metallic mining and milling organization in California and will personally supervise the project.
5. The Corporation is owner of the property.
6. There are no claims, liens or encumbrances against the property.
7. Not a lessee.
8. A current financial statement attached.
9. $6500.00. This will pay our portion of cost in accordance with Section 9 of Mineral Order 5.
10. (a) The property involved is the Tungsten City Claims, consisting of eight unpatented claims. On this property we have the Jackrabbit Mine which we are now putting into operation on ore above the main tunnel level. The Jackrabbit Mine is on Claim No. 7.
(b) The exploration will be done below the glory-hole and tunnel level on Claim No. 1 of the Tungsten City Group.
11. This mine was formerly known as part of the Little Sister Mine.
12. The mine is located three miles from a paved road, on a good graded county road, seven miles west of Bishop and eleven miles from the railroad station at Laws, Calif., all connecting to the mine with excellent roads.
13. There is 10 gallons per minute of water from springs on the property-sufficient for mining and domestic use. There is a main power line and sub-station on the property. This power is purchased from California Electric Power Co. The cost is an average of 3¢ per K.W. hour. The amount of power to be used will be approximately 20 K.W. per hour.
14. The existing useable facilities are main power line and transformer station and four cabins (needing some repair).
15. The ore will be shipped in our own Diesel trucks and will be milled at Red Hill mill 3½ miles from the mine or at U.S.Vanadium Mill 15 miles from the mine.
16. (a) The mine was previously operated from a lower main tunnel with 100 foot raises and large stopes connecting to the floor of an open-pit of 120 foot depth, 200 foot length and 80 foot width. From this area approximately 200,000 tons of ore was mined running from 3% to 5% tungsten. (Actual figures of the original owners). In 1940 a lessee took out in about five months, approximately 8000 tons of low-grade ore from the old stopes averaging above 0.75% tungsten. The mine was opened in about 1916 by J. V.Baldwin of Los Angeles and the Fisher Bros. of General Motors in Detroit. It was the largest producer in

the U.S. In World War I but was closed in about 1919. The owners diamond drilled below the tunnel in about 1925 but never operated the mine again after the original closing. This drilling, we are informed now by the former owners, disclosed at that time at least 150,000 tons of ore below the level they worked, averaging 1.5% tungsten. This was verified about twelve years ago when lessees sunk two winzes from the main tunnel to a depth of 35 and seventy feet, all in ore of about 2%. The former owners occasionally leased out the tailings on the property and the applicant has personal knowledge of two different outfits clearing approximately $50,000.00 per year from these tailing operations. The tailings still contain an average of approximately 0.3% sheelite.

Mining was never resumed after the original closing, by the original owners, from whom we purchased the property, (with the exception of occasional small leasers) due to the death of Mr. Baldwin, soon after their diamond drilling program, and the fact the Fisher Bros. of Fisher Body Co. in Detroit had become so extremely wealthy they had lost interest. We bought the property so they could liquidate the Senior Investment Corporation, of Detroit, their private holding corporation.

(b) All adjoining properties are again active. This property was the largest producer and the key property of the famous Bishop Tungsten Hills District.

(c) The diamond drill maps and accompanying geological reports were loaned out by the former owners and were never returned to them, so are not available. They state the reports indicated the major ore bodies below the present tunnel level, which is definitely indicated on recent examination. The applicant has personally verified by interview with men on the original drilling crew, the quality and depth of the ore drilled at that time. The ore is tactite and has always been readily recovered in a gravity plant, though flotation is now available at U.S. Vanadium Mill.

17. Mine is not in operation except for present recovery from hillside of 200 tons of float from the original outcropping, which is running approximately 2.0% sheelite.

18. (a) The ore, containing sheelite, is a tactite containing about 56% garnet and is a massive deposit between limestone and granite.

(b) We have no assays as the two winzes are full of water (making about 50 gallons per hour) . One map of the property enclosed.

(c) There is estimated to be 150,000 tons of 1.5% tungsten ore below tunnel level. The purpose of the loan is to determine this.

19. This is an all-year property, at less than 5000 feet elevation, with good roads open the year around, to the property.

THE EXPLORATIONS:

20. The exploration will be for sheelite ore.

21. The proposed work will be deepening the seventy foot winze to 150 feet and running 420 feet of drifts to determine the ore. This work will take not to exceed one year.

[illegible] Mining [illegible] Minerals, Inc.
[illegible] P.O. Box 105 - Albany, Oregon.
[illegible] 1951

[illegible] U.S. In world war I yet was closed in about 1919. The mines [illegible] drilled below the ground in about 1945 but never operated big mine again [illegible] the national stockpile. This building, we are informed [illegible] mines, [illegible] at least this at least 150,000 tons of ore below the level they [illegible] 1.5% tungsten. This was verified about [illegible] ago when [illegible] two miners from the main tunnel [illegible] of 75 and [illegible] 1 of whom 25. The former owners [illegible] that the [illegible] on the property and the equipment and personnel [illegible] of the different mining [illegible] approximately $25,000.00 per year from these [illegible] operations. The [illegible] will [illegible] an average of approximately 1.5% [illegible].

[illegible] have never [illegible] after the [illegible] closing, by the [illegible], [illegible] acquired the property, (with the exception of [illegible] [illegible]) [illegible] the hands of Mr. [illegible], [illegible] after their [illegible] [illegible], was the first the [illegible] Mr. [illegible] Corporation [illegible] [illegible] so extremely [illegible] their [illegible] interest. [illegible] the property [illegible] [illegible] the Senior Investment Corporation, [illegible], their [illegible] [illegible].

(b) [illegible] are [illegible] active. The property was the [illegible] property of the Tungsten Mining [illegible].

(c) The [illegible] drill [illegible] [illegible] assaying [illegible] were [illegible] by the former owners [illegible] were returned to them, so [illegible] not available. They [illegible] indicate the veins are [illegible] below the present [illegible] level, which is initially indicated on [illegible] [illegible]. The [illegible] has personally verified by interview with [illegible] on the [illegible] [illegible] the [illegible] and death of the [illegible] [illegible] at that time. The [illegible] facility [illegible] been [illegible] [illegible] in [illegible] [illegible], though [illegible] is not available to [illegible] [illegible].

17. [illegible] to [illegible] assay for present recovery from [illegible] [illegible] from [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible].

18. (a) [illegible], [illegible], [illegible], [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible].

(b) [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible].

(c) There is [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible] [illegible]

H[illegible]ley Industrial Minerals, Inc.
P.O. Box 305 - Bishop, Calif.

22. Diamond drilling in the past has indicated ore in this area. The drifts will follow the ore and can not be mapped in advance, except that they will be run at not less than 50 foot intervals vertically.

23. (a) Two miners @ $1.75 per hour and two muckers @ $1.60 per hour.
(b) One supervisor, part time @ $250.00 per month.
(c) $500.00 repair to housing for workers.
(d) $1000.00 for power line from sub-station to mine.
(e) Tugger hoist, $750.00. Pump $350.00.
(f) None
(g) Rental of compressor, electric hoist, cars, rails, pipe, etc. $400.00 per month.
(h) Powder, caps, fuse, bits, fuel, etc. $300.00 per month.
(i) Power, $50.00 per month.

THE REQUIREMENTS AND COST.

24. The project should be finished in ten months, after approval, averaging 50 feet per month including installation time, lost time, etc. and should be finished at a cost of approximately $24,600.00. Estimated costs as follows:

Labor	$12,000.00
Supplies	3,000.00
Equipment rental	4,000.00
Supervision	2,500.00
Power	500.00
Repairs	500.00
Purchased equipment	1,000.00
Power line	1,000.00
Assaying & sampling.	400.00
	$25,000.00

HUNTLEY INDUSTRIAL MINERALS, INC.
BISHOP, CALIFORNIA.

DMA-1586X Tungsten

Dear Mr. Huntley:

Thank you for your recent letter concerning the condition of the two winzes in the main adit level.

Because of conflicting information we have at hand with regard to the grade of ore on the adit level, we feel that the two winzes should be unwatered and sampled with a minimum of expense before an exploration program is undertaken. We would be willing to sample the winzes if you could arrange to have the mine unwatered at your convenience and account.

We are now in a position to process your application in a relatively short time and shall be interested to receive your reaction to the above suggestion.

Very truly yours,

George B. Holderer 8/29/51

Dear Mr. Huntley:

Reference is made to your application for an exploration loan under date of May 28, 1951, form MF-103, item 16 (a).

Can one reach the two winzes, 35 and 70 feet deep respectively, sunk from the main adit level? If the adit is accessible can you tell us in what condition the winzes are?

We would appreciate this information.

Very truly yours,

George B. Holderer

Re: Exploration Loan
Tungsten City Claims

My dear Mr. Huntley:

Receipt is acknowledged of your application and attachments of May 28, 1951 for an exploration loan under the Defense Production Act of 1950.

The application was assigned Docket Number DMA-1586X and was referred to Mr. George S. Holderer, Chief, Tungsten Branch on June 11, 1951.

In any future correspondence relating to your application, kindly refer to DMA-1586X.

Sincerely yours,

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.
*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.
*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.
*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.
15. State in detail how the ore could be shipped and how and where milled.
*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.
*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining	NOT IN OPERATION			
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.
19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?
21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.
22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.
24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

16—64067-1 U. S. GOVERNMENT PRINTING OFFICE

INFORMATION FOR
FORM MF-103
May 28, 1951

Huntley Industrial Minerals, Inc.
P. O. Box 305 - Bishop, Calif.

1. The applicant is a California Corporation.
2. Not a partnership.
3. Officers of the Corporation: Wright H. Huntley, Pres.; L. G. Hummel, Sec.-Treas.; Cecile M. Huntley, Vice Pres.; C.E.Demorest, Asst. Sec.-Treas. Directors: Wright H. Huntley, L. G. Hummel, Kenneth G.Irons, A. E. Berg, C. E. Demorest. Five largest stockholders, same as directors.
4. The president of the Corporation has had sixteen years of mining experience, is personally supervising the largest diversified non-metallic mining and milling organization in California and will personally supervise the project.
5. The Corporation is owner of the property.
6. There are no claims, liens or encumbrances against the property.
7. Not a lessee.
8. A current financial statement attached.
9. $6500.00. This will pay our portion of cost in accordance with Section 9 of Mineral Order 5.
10. (a) The property involved is the Tungsten City Claims, consisting of eight unpatented claims. On this property we have the Jackrabbit Mine which we are now putting into operation on ore above the main tunnel level. The Jackrabbit Mine is on Claim No. 7.
(b) The exploration will be done below the glory-hole and tunnel level on Claim No. 1 of the Tungsten City Group.
11. This mine was formerly known as part of the Little Sister Mine.
12. The mine is located three miles from a paved road, on a good graded county road, seven miles west of Bishop and eleven miles from the railroad station at Laws, Calif., all connecting to the mine with excellent roads.
13. There is 10 gallons per minute of water from springs on the property-sufficient for mining and domestic use. There is a main power line and sub-station on the property. This power is purchased from California Electric Power Co. The cost is an average of 3¢ per K.W. hour. The amount of power to be used will be approximately 20 K.W. per hour.
14. The existing useable facilities are main power line and transformer station and four cabins (needing some repair).
15. The ore will be shipped in our own Diesel trucks and will be milled at Red Hill mill 3½ miles from the mine or at U.S.Vanadium Mill 15 miles from the mine.
16. (a) The mine was previously operated from a lower main tunnel with 100 foot raises and large stopes connecting to the floor of an open-pit of 120 foot depth, 200 foot length and 80 foot width. From this area approximately 200,000 tons of ore was mined running from 3% to 5% tungsten. (Actual figures of the original owners). In 1940 a lessee took out in about five months, approximately 8000 tons of low-grade ore from the old stopes averaging above 0.75% tungsten. The mine was opened in about 1916 by J. V.Baldwin of Los Angeles and the Fisher Bros. of General Motors in Detroit. It was the largest producer in

the U.S. In World War I but was closed in about 1919. The owners diamond drilled below the tunnel in about 1925 but never operated the mine again after the original closing. This drilling, we are informed now by the former owners, disclosed at that time at least 150,000 tons of ore below the level they worked, averaging 1.5% tungsten. This was verified about twelve years ago when lessees sunk two winzes from the main tunnel to a depth of 35 and seventy feet, all in ore of about 2%. The former owners occasionally leased out the tailings on the property and the applicant has personal knowledge of two different outfits clearing approximately $50,000.00 per year from these tailing operations. The tailingsstill contain an average of approximately 0.3% sheelite.

Mining was never resumed after the original closing, by the original owners, from whom we purchased the property, (with the exception of occasional small leasers)due to the death of Mr. Baldwin, soon after their diamond drilling program, and the fact the Fisher Bros. of Fisher Body Co. in Detroit had become so extremely wealthy they had lost interest. We bought the property so they could liquidate the Senior Investment Corporation, of Detroit, their private holding corporation.

(b) All adjoining properties are again active. This property was the largest producer and the key property of the famous Bishop Tungsten Hills District.

(c) The diamond drill maps and accompanying geological reports were loaned out by the former owners and were never returned to them, so are not available. They state the reports indicated the major ore bodies below the present tunnel level, which is definitely indicated on recent examination. The applicant has personally verified by interview with men on the original drilling crew, the quality and depth of the ore drilled at that time. The ore is tactite and has always been readily recovered in a gravity plant, though flotation is now available at U.S. Vanadium Mill.

17. Mine is notin operation except for present recovery from hillside of 200 tons of float from the original outcropping, which is running approximately 2.0% sheelite.

18. (a) The ore, containing sheelite, is a tactite containing about 56% garnet and is a massive deposit between limestone and granite.

(b) We have no assays as the two winzes are full of water (making about 50 gallons per hour) . One map of the property enclosed.

(c) There is estimated to be 150,000 tons of 1.5% tungsten ore below tunnel level. The purpose of the loan is to determine this.

19. This is an all-year property, at less than 5000 foot elevation, with good roads open the year around, to the property.

THE EXPLORATIONS:

20. The exploration will be for sheelite ore.

21. The proposed work will be deepening the seventy foot winze to 150 feet and running 420 feet of drifts to determine the ore. This work will take not to exceed one year.

Bentley Industrial Minerals, Inc.
P.O. Box 305 - Bishop, Calif.

22. Diamond drilling in the past has indicated ore in this area. The drifts will follow the ore and can not be mapped in advance, except that they will be run at not less than 50 feet intervals vertically.

23. (a) Two miners @ $1.75 per hour and two muckers @ $1.60 per hour.
(b) One supervisor, part time @ $250.00 per month.
(c) $500.00 repair to housing for workers.
(d) $1000.00 for power line from sub-station to mine.
(e) Tugger hoist, $750.00. Pump $350.00.
(f) None
(g) Rental of compressor, electric hoist, cars, rails, pipe, etc. $400.00 per month.
(h) Powder, caps, fuse, bits, fuel, etc. $300.00 per month.
(i) Power, $50.00 per month.

THE REQUIREMENTS AND COST.

24. The project should be finished in ten months, after approval, averaging 50 feet per month including installation time, lost time, etc. and should be finished at a cost of approximately $24,600.00. Estimated costs as follows:

Labor	$12,000.00
Supplies	3,000.00
Equipment rental	4,000.00
Supervision	2,500.00
Power	500.00
Repairs	500.00
Purchased equipment	1,000.00
Power line	1,000.00
Assaying & sampling.	400.00
	$25,000.00

INSTRUCTIONS

This form is to be filed with Defense Minerals Administration, Department of the Interior, Washington 25, D. C. It should be accompanied by appropriate application form when a specific type of Government assistance is requested, in the form of (1) loan, (2) purchase contract, (3) Government guarantee of a private loan, (4) ~~Necessity Certificate pursuant to the provisions of Section 124 of the Defense Production Act of 1950, as amended~~ (5) priorities or allocation of mining equipment, and maintenance, repair and operating supplies, and (6) other forms of Government assistance that might arise under the Act. Submit four (4) signed copies of the form and accompanying papers. Name and address should be stamped or typed on each sheet of this form and all accompanying papers. *When a question is inapplicable it should be so stated on the form.* Additional sheets may be attached in answering any questions or in supplying additional information. (IF YOU CANNOT ANSWER A QUESTION, SO STATE.) If a question is answered elsewhere indicate where answered. It is not necessary to answer it again.

GENERAL TECHNICAL DATA

Supply the following information on separate sheets, arranged, numbered, and lettered as indicated:

1. Materials produced:
   (*a*) What are the chief mine, mill, or smelter products?
   (*b*) What are the byproducts, if any?
2. Name(s) and type(s) of mine(s), mill(s), smelter(s), refinery(ies), pit(s), quarry (ies), drilling operation(s). Include old names of property, if any. Show extent of workings, including the following:
   (*a*) Linear feet of shafts.
   (*b*) Linear feet of drifts and crosscuts.
   (*c*) Linear feet of tunnels or adits.
   (*d*) Linear feet of other mine openings (explain briefly).

   Indicate whether mine is flooded or not. Describe any pumping problems. Give size or productive capacity.
3. For each operation listed above supply the following:
   (*a*) Distance and direction from nearest town and shipping point.
   (*b*) Mining district.
   (*c*) Township, Section, Range.
   (*d*) County, State.
4. (*a*) State whether or not property is now in operation, and if in operation, by whom operated.
   (*b*) Are you operating this property as:
   - ☐ Owner.
   - ☐ Lessee.
   - ☐ Contractor.
5. Number of years in production 8

   If not in production or operation, estimated date when production will begin 30 days
6. Experience of operators:
   Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who manage the project.
7. History:
   (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for suspension of operation.
   (*b*) State briefly the known history and production of adjoining and neighboring properties.
   (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

8. Names and addresses of Officers, Directors, or Partners, and in addition thereto, the five largest stockholders if applicant is a corporation.

Name and Address (a)	Official Title (If officer is also director indicate by "D") (b)	Total of Annual Salary, Commissions, Bonuses, Etc., Received From Applicant and Affiliates During Last Fiscal Year (c)	Estimated Net Worth Outside of Interest in Applicant (d)	Number of Shares Held in Applicant Corporation: Common (e)	Number of Shares Held in Applicant Corporation: Preferred (f)	Life Insurance Carried for Benefit of Applicant: Amount (g)	Life Insurance Carried for Benefit of Applicant: Net Cash Surrender Value After Loans (h)
Wright H. Huntley	Pres. D	$9000.00	$218,000	$300,000	$9,500		
L. G. Hummel	Sec.-Treas. D	$9000	$50,000		$3,000		
C. E. Demorest	Asst. Sec. D			$4,500	$3,500		
Cecile M. Huntley	Vice Pres.						
Elmer E. Berg	D			$25,500	$25,500		
Kenneth G. Irons	D			$ 5,000	$ 5,000		
	Total	$18,000	x x x x x	$335,000	$46,500	x x x x x	x x x x x

If more lines are needed continue on separate sheet.

9. Capital Stock Issues:

For Corporate Applicants

Item	Authorized (a)	Outstanding (b)	Par Value (c)	Number of Shares Outstanding (d)	Dividend Rate Last Paid* (e)
Common stock	$ 350,000	$ 350,000	$ 1.00	350,000	
Preferred stock	$ 50,000	$ 50,000	$ 1.00	50,000	Accrued

*Indicate period covered.

10. Production:

Item	Kind of Product (a)	1948 Total (b)	1949 Total (c)	1950 Total (d)	Present Average Monthly (e)
1. Quantity of product mined or quarried (Short, long, metric tons; barrels; pounds; etc.)	No tungsten produced.				
2. Quantity of product processed (specify unit of measure and type of process)					
3. Quantity and grade of product sold or shipped (specify units of measure)					

11. Do you contemplate a change in the present average monthly rate of production? If so, state estimated maximum monthly production and basis of change.

12. Ore or Mineral Reserves:

(a) Describe the ore or mineral deposit briefly. Accompany the application by any available report on the geology and ore reserves. A large stactite deposit containing shee[illegible]e, between granite and limestone.

16—69792-1

(*b*) If deposit is other than placer:

(1) Submit assay plans and/or sections showing location and size of proved (measured) and probable (indicated) ore or mineral reserve.

(2) State the tonnage (indicate type of ton) and grade of each class of ore reserve, as above, and show how computed. Tabulated total ore reserve as follows:

TOTAL ORE OR MINERAL RESERVES

Ore or Mineral Reserve	Estimated Tons (a)	Metal or Mineral Content Per Ton (Grade) (b)	Gross Value Per Ton (c)	Recoverable Unit Value Per Ton (d)	Estimated Cost of Production Per Ton (e)
Measured (proved)					
Indicated (probable)	150,000	1.5% Sheelite	$97.50	$78.00	$34.00 Including Milling.

(*c*) If placer: Not placer

(1) Give estimated total yardage and average marketable mineral content of each deposit.

(2) Submit map showing location of placer deposit and surrounding area, with all test holes or pits. Submit logs of each hole and test pit with depth and average value of each.

(3) Describe gravel, stating whether fine, medium or coarse; loose, tight, cemented, or frozen, and whether it contains stumps or boulders more than 1 foot in diameter; if so, how large, and in what proportion.

(4) Describe bedrock, giving type (granite, sandstone, shale, etc.) and state whether it is hard or soft, smooth, uneven or rough.

(5) Describe overburden, stating whether loose, tight, or cemented; fine or coarse textured; furnish estimate of average thickness and total amount.

(6) Tabulate the reserves using the form outlined above for ore or mineral reserves.

13. Access Roads:

Give road distances to shipping, supply and residence points, stating kind and condition of roads.

7 miles - excellent roads.

14. Water Supply:

State source and quantity of water available for operations and whether sufficient for all seasons of year.

10 gal. per minute from springs - sufficient for all seasons.

15. Power:

State amount of power used, rate per hour, and source thereof.

20 K.W. per hour - average 3¢ per k.w. - Calif. Electric Power Co.

16. Labor:

State number and classes (miners, muckers, millmen, etc.) of men employed during a recent representative payroll period.

None used on this property recently.

17. Equipment and Facilities:

Describe present equipment on the property, including buildings. (State condition.) List major pieces of equipment now owned or controlled and in serviceable condition available for this operation.

Four cabins needing $500.00 worth of repairs.

18. Are there any particular conditions or circumstances affecting your operations that are not described above? If so, explain.

Excellent location for all-year operation.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

Huntley Industrial Minerals, Inc. (Name of company)

Information for
Form MF-100
May 28, 1951

Hunt[illegible] Industrial Minerals, Inc.
P. O. Box 305, Bishop, Calif.

1. Materials Produced.
   a. Sheelite
   b. Garnet sand
2. Tungsten City Mine. (formerly Little Sister Mine)
   a. 105 feet of shafts.
   b. 350 feet of drifts and crosscuts.
   c. 300 feet of tunnel.
   d. 400 feet of raises and stopes.

   Both shafts or winzes full of water with about 50 gallons per hour to be pumped. An estimated 150,000 tons of ore below main tunnel level.

3. a. Seven miles west of Bishop, Calif.
   b. Tungsten City Mining District.
   c. Township 7 S., Section 12 and 13, Range 31E M.D.M.
   d. Inyo County, Calif.

4. a. This portion of property not in operation.
   b. Owner

5. Operation could be within 30 days.

6. The President of the Corporation is a mining engineer of sixteen years experience, is personally supervising the largest diversified non-metallic mining and milling organization in California and will personally supervise the project.

7. a. The mine was previously operated from a lower main tunnel with 100 foot raises and large stopes connecting to the floor of an open-pit of 120 foot depth, 200 feet length and 80 foot width. From this area approximately 200,000 tons of ore was mined running from 3% to 5% tungsten. (Actual figures of the original owners). In 1940 a lessee took out in about five months, approximately 8000 tons of low-grade ore from the old stopes, averaging above 0.75% tungsten. The mine was opened in about 1916 by J. V. Baldwin of Los Angeles and the Fisher Bros. of General Motors in Detroit. It was the largest producer in the U. S. in World War I, but was closed in about 1919. The owners diamond-drilled below the tunnel in about 1925, but never operated the mine again after the original closing. This drilling, we are informed now by the former owners, disclosed at that time at least 150,000 tons of ore below the level they worked, averaging 1.5 tungsten. This was verified about twelve years ago when lessees sunk two winzes from the main tunnel to a depth of 35 and 70 feet, in ore of about 2%. The former owners occasionally leased out the tailings on the property and the applicant has personal knowledge of two different outfits clearing approximately $50,000.00 per year from these tailings operations. The tailings still contain about 0.30% sheelite.

   Mining was never resumed after the original closing by the original owners, from whomwe purchased the property. This was due to the death of Mr. Baldwin soon after their diamonddrilling program, and the fact that the Fisher Bros. of Fisher Body Co., in Detroit had become so extremely wealthy they had lost interest. We bought the property so they could liquidate the Senior Investment Corp. of Detroit, their private holding corporation.

   b. Several hundred thousand tons of ore have been produced from directly adjoining mines and these are again in operation.

   c. The indicated developement is exploration of the downward extension of the previously mined ore bodies.
