CONTRACT ADMINISTRATION AND AUDIT DIVISION

ROYALTY AUDIT CERTIFICATE

I have examined the records and sales documents pertaining to the sale of cobalt, copper and incidental gold and silver for the period of December 9, 1953 to June 20, 1958, by:

THE CALERA MINING COMPANY
Cobalt, Idaho

produced from the Blackbird Mine, located near Cobalt, in Lemhi County, State of Idaho, under the terms of Contract No. Idm E 645, Docket No. DMEA 3143 (cobalt-copper), dated December 9, 1953, including Amendments Nos. 1 to 4 inclusive.

My examination was made in accordance with generally accepted standards applicable in the circumstances.

The audit established the net value of the cobalt and copper (copper included the incidental gold and silver) contained in the mine-run ore for this period to be $2,499,311.00. Royalty due the United States Government at the contract rate of five percent to be $124,965.56. Royalty paid and balance due are as follows:

Total Royalty Due	$124,965.56
Total Royalty Paid	124,965.56
Balance Royalty Due	— 0 —

August 5, 1958

C. A. Turner - Auditor.

III SCOPE OF AUDIT AND FINDINGS

A. CONFERENCE WITH THE EXAMINING ENGINEER

A conference with the examining engineer, Mr. John D. Bardill, Metallurgist, United States Bureau of Mines, disclosed the following:

(a) The Operator does stockpile ore subject to royalty repayment.

The Operator has contracted the open pit mining to the Isbell Construction Co. of Reno, Nevada, whose mining operations have produced more ore than the mill has been able to process. At the time of the audit, a temporary stockpile of 20,741 tons of ore was on hand to be milled.

The stockpiled open pit ore is piled in a separate pile and the production record's control is considered adequate by the examining engineer and this auditor.

(b) The Operator does commingle production subject to DMEA royalties with exempt production.

The allocation of commingled ore subject to DMEA royalties is considered by the examining engineer and this auditor to be equitable.

(c) The Operator does stockpile low-grade ore from the Blacktail open pit, which at the present low prices is submarginal. The present stockpile of 177,844 tons is not expected to have any potential value within the royalty payment period.

It is the opinion of the examining engineer and this auditor that the records maintained by the Operator are adequate to protect the Government's interest.

(d) Assay controls are deemed adequate.

(e) The manner of disposing of production is considered as giving the Government its fair royalty return.

(f) Periodic examinations by the examining engineers indicate that the Operator is properly reporting his production of ore subject to DMEA royalty.

(g) The Operator does not buy from or sell to other operators.

Check Sheet of Examining Engineer

Operator's Name Calera Mining Company

Address Cobalt, Idaho

Exploration Contract No. Idm-E645 Docket No. DMEA-3143

	Check One Yes	No
1. (a) Does the Operator stockpile ore subject to royalty repayment?	x	
(b) If so, is segregation and identification procedure adequate?	x	
2. (a) Does Operator commingle production subject to DMEA royalties with exempt production?	x	
(b) If so, do you consider the allocation of the commingled production equitable?	x	
3. (a) Does the Operator stockpile mine or mill rejects (low grade ore, tailing, middlings, etc.) that may have potential value within the royalty payment period?		x
(b) If so, are adequate records maintained on such material to protect the Government's interest?		
4. Do you consider the assay controls in effect are adequate?	x	
5. Do you consider that the manner of disposing of production gives the Government its fair royalty returns?	x	
6. Do your periodic examinations of operations indicate the Operator is properly reporting his production of ores subject to DMEA royalties?	x	
7. Does the Operator buy from or sell to other Operators?		x

8. Comment on any item 2 (b) to 6 if answer is No.

3. (a) Operator is stockpiling low-grade ores from the Blacktail open pit but at the present low prices they are submarginal. The loan should be repaid in several months so stockpiling of these low-grade ores is not a factor.

MEMORANDUM

To: DMEA Field Team, Region I

From: John B. Bardill, Bureau of Mines

Subject: Method of computing royalty repayments, Docket No. DMEA-3143, Galena Mining Company, Blackbird Mine, Lemhi County, Idaho, Contract No. Ida-3143

Mr. C. A. Turner, DMEA auditor, made a royalty audit at the main mine office on June 24, 1958. I accompanied him to determine the method and the reasonableness and fairness of the method of computing DMEA royalty repayments to the Government on the company's production of cobalt and copper from their Blacktail ore body.

The total amount repayable to the Government under the contract was $185,863.88. The company has repaid $124,965.56 on production through the month of May 1958. At the present rate of repayment, which is expected to continue, the full amount should be repaid in from 4 to 5 months.

All production from the Blacktail ore body is subject to DMEA royalty at the rate of 5 percent on estimated cobalt and copper contents of mine run ore until the whole loan has been repaid. The ore body is being developed to mine a portion of the ore by open pit methods and the remainder by underground methods. Present rate of mining is approximately 1 ton of underground ore to 7 tons of open pit ore. The underground ore results from the development of the mine for underground mining. The open pit ore reserve is expected to be depleted in about a year unless more ore is discovered by drilling now in progress.

The top of the Blacktail ore body is quite oxidized; however, as it attains depth the oxidation progressively lessens. Tests indicate that the oxidized cobalt is very difficult to recover by flotation, resulting in high cobalt losses in the mill tailings. Measures are being taken to decrease these losses.

Prior to 1957, ore was being mined underground from the Dandy, Chicago and Brown Bear stopes.

Non-DMA ore and DMA ore from both open pit and underground Blacktail mining are commingled and milled together. Each ore is carefully weighed and sampled before commingling. Under these conditions it is impossible to accurately determine the cobalt and copper reserveries that would result if each ore was milled separately. Treatment of the ores separately at the present rate of about 1200 tons per day would be unnecessarily expensive and would require either separate milling facilities for each ore or large storage facilities for ores awaiting milling.

The effect of the oxidized Blacktail ores being mixed with the company ores from underground workings is reflected in the cobalt reserveries. The production of Blacktail ore prior to the fall of 1957 was from underground exploration and development. Average tonnage milled was approximately 1,200 tons per day, or roughly 22,000-24,000 tons per month including Blacktail ore.

The following tabulation illustrates the detrimental effect of the Blacktail ores on the overall cobalt reserveries and the month by month estimated cobalt reserveries upon which the company paid royalties; also, the estimated and actual copper reserveries for Blacktail and commingled ores.

B. AUDIT OF SETTLEMENT SHEETS

A considerable amount of preaudit work was accomplished in the DMEA Office, Region I, Spokane, Washington, prior to the on-site audit. This consisted of a recomputation of the detailed settlement sheets. This information was tabulated, and a reconciliation was made with the amounts of royalty receipts indicated by the records of the Finance Officer. These tabulations are filed as a part of my audit working papers. A summary analysis of these statements is included in Section IV of this audit report.

The on-site audit included a comparison and reconciliation of the data compiled during the pre-audit work, with the Operator's production records, sales records and general records in the Company office located at the mine.

The Operator sold the cobalt concentrates to the Garfield Division of the Company, Garfield, Utah; and the copper concentrates to the American Smelting and Refining Co., Tacoma, Washington.

IV CONCLUSIONS AND RECOMMENDATIONS

A summary analysis of the Operator's production of cobalt and copper (copper including the incidental gold and silver), from the mine-run ore produced from the Blacktail ore body of the Blackbird Mine, for the period of December 9, 1953 to May 31, 1958 on which royalty payment was received by the Finance Officer June 20, 1958 follows:

SUMMARY OF ROYALTY PAID ON PRODUCTION TO JUNE 20, 1958

FOR THE PERIOD OF DECEMBER 9, 1953 TO JUNE 20, 1958

Sale of Cobalt to The Calera Mining Co.
Garfield Division, Garfield, Utah

	Tons	Grade
Mine-run ore		
Underground Ore	47,342	.55219%
Open pit ore	83,957	.45566%

Metal Content - Cobalt	Tons	Value
Underground	261.41816	$581,260.44
Open pit	382.56626	803,364.63
Total	643.98442	$1,384,625.07

Royalty Paid	$1,384,625.07	@ 5%	$ 69,231.26

Sale of Copper to The American Smelting and Refining Co.
Tacoma, Washington

Mine-run Ore	Tons	Grade
Underground Ore	47,342	2.24394%
Open pit ore	83,957	2.21650%

Metal Content - Copper	Tons	Value
Underground	1062.32732	$ 473,069.68
Open pit	1860.91223	641,616.25
Total	2923.23955	$1,114,685.93

Royalty Paid	$1,114,685.93	@ 5%	$ 55,734.30
Total Production and Royalty Paid	$2,499,311.00	@ 5%	$124,965.56

The audit has confirmed the accuracy and propriety of the royalty payments received by the Regional Office for the period under dudit, December 9, 1953 to June 20, 1958.

At the conclusion of the audit, the findings were discussed with Mr. G. B. Deacon, chief accountant for The Calera Mining Co.

The audit report and findings were discussed with Mr. A. E. Weissenborn, Executive Officer, DMEA Field Team, Region I August 11, 1958.

SUMMARY

Period	Tons Blacktail area	Weighted Avg. % Spinli Recoveries: Company based equations	Weighted Avg. % Spinli Recoveries: Total commingled ores
1956	12,720	72.4	66.45
1957	58,186	67.9	70.69
1958 thru April	42,649	57.7	55.37
Weighted average Total Blacktail Ores	113,563	64.57	64.46

Period	Tons Blacktail area	Weighted Avg. % Copper Recoveries: Company based equations	Weighted Avg. % Copper Recoveries: Total commingled ores
1956	12,720	87.8	91.6
1957	58,186	78.1	86.3
1958 thru April	42,649	76.1	85.6
Weighted average Total Blacktail Ores	113,563	78.4	86.6

It is quite a coincidence that the weighted averages of the estimated and actual cobalt recoveries are almost identical. If the cobalt mill recoveries of the underground ores prior to the discovery of the Blackbird were about 80 percent, then the cobalt recoveries of the Blackbird ores if treated alone would probably be considerably lower than the cobalt recoveries of the commingled ores. If this is true the Government is being overpaid.

The mine, mill and Garfield refinery are an integrated operation. It is my understanding that at the time the Blackbird ore body came into production it was tentatively agreed between the Executive Officer and the Operator that, because of the integrated operation, royalty payments would be based on the cobalt and copper contents of the mine run ore plus recovered incidental gold and silver. At the time, cobalt was selling for $2.60 per pound and the Government contract was at the base price of $2.30 per pound. It was tentatively agreed that $1.35 per pound would be a fair price for contained cobalt in the ore. Cost of mining and milling was estimated at $1.00 per pound, leaving a $0.35 per pound profit for the Blackbird Division of the company. When the price of cobalt dropped to the base price of $2.30 per pound the value of contained cobalt to mine was reduced to $1.05 per pound.

As an example of the method of computing cobalt royalty, April 1958 is cited. Production of underground ore was 1,609 tons, averaging 1.13 percent cobalt with an estimated mill recovery of 70 percent. Open pit ore production was 11,372 tons, averaging 0.86 percent cobalt with an estimated mill recovery of 50 percent. Then,

Underground	22.6 lbs. Co (1.13% Co) x 70% recovery x $1.05/lb.	=	$16.61
Open pit	17.2 lbs. Co (0.86% Co) x 50% recovery x 1.05/lb.	=	$ 9.03

This may or may not be a strictly accurate method of computing the royalty, but if the loan will be repaid in several months it makes little difference.

The Operator's estimated average copper mill recoveries for Blackbird ores are approximately 8.2 percent lower than the mill recoveries of commingled ores. This seems reasonable because during the first four months of 1958, Blackbird ores constituted approximately one-half of the entire mill feed and the overall average mill recovery of commingled ores had dropped to 85.6 percent. During 1956, Blackbird ores represented only a small percentage of the total mill feed when the overall mill recovery of commingled ores was 91.6 percent or approximately 5 percent higher than in 1958.

A review of the smelter settlements for copper concentrates shows that the net smelter returns are approximately 71 percent of the gross value of the copper, gold and silver. The Operator evidently used this figure to estimate monthly net smelter return price for copper. For example, the average price of domestic electrolytic copper, f.o.b. refinery, during April 1958 was $0.33 per pound. The Operator estimated the net smelter return for copper during April at $0.235 per pound or approximately 71 percent of $0.33.

As in the case of the method of computing royalties on exhaust production, this may or may not be a strictly accurate method of computation, but if the loan will be repaid in several months it makes little difference.

Under the circumstances I believe the basis for the Operator's methods of computing and repayments is fair and reasonable.

Lemhi County, Idaho
Contract No. Idm-0645

Dear Mr. Douglas:

With the approaching close of the fiscal year, it is desirable for DMEA to have its royalty accounts up to date. To this end Mr. Charles Turner, DMEA auditor, and Mr. John D. Bardill, U. S. Bureau of Mines Engineer, will make an audit of the Calera royalty account and plan on arriving at Cobalt on Tuesday, June 24, 1958. Any assistance you or the members of your staff can give them will be much appreciated.

If this date is not convenient, will you please telephone me upon receipt of this letter.

With best regards,

A. E. Weissenborn

Contract E645, Calera Mining Company
Royalty receipt

E 645

Calera Mining Company

Mr. Weissenborn telephoned from Spokane on February 6, 1957, and spoke to Mr. Palbert and the undersigned about supporting detail required in connection with royalty due under terms of this contract.

It was decided that no request should be made on the operator at this time for any specific detailed information. Instead, we should wait until remittances of royalty have been received. If sufficient information does not accompany the remittances request can then be made or the information may be secured when a royalty audit is made.

Re: [illegible] 3143
[illegible] No. [illegible]

Dear Mr. Weissenborn:

Your Mr. Don McLaren contacted us yesterday in connection with our basis of calculation of and repayments of the D.M.E.A. Loan.

Until a definite method of determination is set we have used the following procedures:

For the calculation of cobalt values:

The average grade of the ore drawn from the Blacktail stated in pounds is multiplied by the estimated recovery of cobalt for the month in the mill, and that result is multiplied by $1.25. The latter figure is our estimated value at the mine per pound of cobalt.

For the calculation of copper value:

The same procedure as above with the exception that the current price of copper is reduced by the marketing charge to get the net smelter value.

The sum of these values multiplied by the number of tons drawn from the Blacktail orebody and that result multiplied by the appropriate royalty rate gives the liability for the month.

As you know the Blacktail ore is not milled separately, so we feel that the average mill recoveries are the most appropriate.

We are awaiting instructions from our New York office on the mechanics of repayment. You no doubt will hear from them in due course.

Yours very truly,

E. B. Douglas, Manager

DEFENSE MINERALS EXPLORATION ADMINISTRATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF REVIEW

I have reviewed the Monthly Reports of:

The Calera Mining Company
Cobalt, Idaho

pertaining to Exploration Project Contract No. Idm-E645, Docket No. DMEA-3143, dated December 9, 1953, including Amendments Nos. 1 to 4, inclusive, and a Termination Agreement dated January 2, 1957, with an effective date of December 9, 1956, for the period of December 9, 1953 to December 9, 1956, covering a project for the exploration of cobalt and copper on property known as the Blackbird Mine, located in Lemhi County, State of Idaho.

My review included an examination of the Monthly Reports (Forms MF-104) and supporting documents attached thereto, comparison of the costs claimed with the contract and pertinent schedules, consultation with the Government representative who visited and examined the project, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the following reasons:

(a) The accepted costs ($143,505.12) of all work incurred under a contract provision for payment by the Government on the basis of agreed unit costs of units of work actually performed were covered by an interim Audit Report and Audit Certificate, dated June 17, 1955, issued by C. A. Turner, DMEA Auditor, and

(b) the remaining portion ($122,014.71) of the costs incurred were under a contract provision for payment by the Government on the basis of agreed unit costs of units of work actually performed.

The review disclosed the following facts in regard to the amount paid or to be paid the contractor:

Total cost as billed by Contractor	$265,519.83
Exceptions	-0-
Accepted cost	$265,519.83

The contract calls for a 70 percent participation of exploration expenses by the United States Government. Therefore, payment to the contractor by the Government in the amount of One hundred eighty-five thousand eight hundred sixty three and 88/100 Dollars

--$185,863.88--

is considered valid and proper, provided that the Regional Executive Officer, the Administrator, or other competent official has accepted or will accept the project as having otherwise met the terms of the contract.

C. A. Turner

Re: Docket No. DMEA-3143 (cobalt-copper)
Calera Mining Company
Blackbird Mine
Lemhi County, Idaho
Contract No. Idm-E645

Dear Mrs. Long:

The project work under the referenced contract was performed to the satisfaction of the Government. The contract was terminated by mutual agreement effective December 9, 1956, before completion of the work. A final engineering and geological report has been received from the Operater and accepted by the Executive Officer.

The Government has no interest in supplies or equipment purchased for use on the project.

A final Field Team report will recommend Certification of Discovery.

A final Report of Review dated August 15, 1957 by DMEA Auditor C. A. Turner has been received.

As all contract requirements have been met, it is requested that final settlement of our account with the Operator be made.

Sincerely yours,

A. E. Weissenborn, Exec. Officer

Re: Docket No. DMEA-3143 (cobalt-copper)
Salora Mining Company
Blackbird Mine
Lemhi County, Idaho
Contract No. Ida-2645

Dear Mr. Turner:

The project work under the referenced contract was performed to the satisfaction of the Government. The contract was terminated by mutual agreement, effective December 9, 1956, before completion of the work.

A final inspection report was submitted by D. D. Walker on January 14, 1957, together with a supplemental report on April 18, 1957.

The Operator's final engineering and geological report was received in this office on March 22, 1957 and is considered as having met the requirements of Article 7(b) of the contract.

No equipment, materials or supplies were purchased with Government participation; consequently, the Government has no equity in these items.

The Field Team's letter of December 5, 1956 to Washington stated that a discovery can be certified as a result of the DMEA work.

Work units completed within the terms of the contract are as follows:

Stage I	Authorized	Completed
Bulldozing	864 hrs.	864 hrs.
Surface diamond drilling	8,576.5 ft.	8,576.5 ft.
Running	1,145 ft.	1,145 ft.
Assays	3,100 units	2,344 units
Underground diamond drilling	664.38 ft.	612 ft.

Stage II	Authorized	Completed
Drift and crosscut	6,000 ft.	3,369 ft.
Assays	5,900 units	2,338 units
Normal timber	5,000 ft.	2,195.5 ft.
Heavy timber	790 ft.	790 ft.
Framing	1,150 sets	447 sets
Diamond drilling	10,500 ft.	6,671.5 ft.
Rock bolts	1/	348
Spiling	500 ft.	500 ft.

1/ See Amendment No. 2. Total footage included in normal timber.

It is now in order for you to issue your Report of Review.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

/s/ David A. Walker, Mining Engineer

RECEIVED APR 5 1957 D.M.E.A.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. DMEA 3143 (Cobalt and Copper)
Contract No. Ida-2645
Monthly operating report for October 1956

Gentlemen:

The subject monthly operating report has been processed and forwarded to the Disbursing Officer for payment.

We are withholding an amount of $500, pending receipt of a final audit by a representative of the Contract Administration and Audit Division of Defense Minerals Exploration Administration. This is the customary procedure and is applicable to all contracts.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. project No. 3143 for the month of October, 1956.

A long exploratory hole was drilled into the hanging wall approximately 75 feet back from the face of the drift. Several zones of ore grade and width were intersected from 9 to 94 feet. An additional narrow zone of ore grade was intersected from 236 to 239 feet. Mechanical difficulties hampered progress considerably. At 490 feet a bit was twisted off, and the hole was temporarily abandoned.

Another hole was started about 55 feet north of the long one and was drilled to 60 feet before drilling was again suspended because of the necessity of doing additional immediate drilling in the Blacktail zone.

Sincerely yours,

CALERA MINING COMPANY

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature /S/ A. E. Weissenborn Title Exec. Officer Date 10/16/56

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

South 157 Howard Street
Spokane 8, Washington

Dear

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the map and assays pertinent to the D.M.E.A. Project No. 3143 for the month of September 1956.

Work in the 74/843 H. W. Drift North was suspended to allow diamond drilling of the area. The first hole, drilled to the northwest approximately 100 feet from the 74/787 crosscut, intersected no significant mineralization and was completed at 150 feet. A second hole drilled in the same direction 100 feet northwest of the first hole crossed a mineralized zone from 85-100 feet with an average grade of 0.65% Co and 0.11% Cu. A third hole in the opposite direction found no significant mineralization, although assays are incomplete.

A long hole (approximately 600 feet) to the northeast is planned to intersect the mineralized zone found in the second hole and to explore deeply into the hanging wall.

Sincerely yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Mining Engineer

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are map and assays pertinent to the D.M.E.A. Project No. 3143 for the month of August 1956.

During the month the 74/843 H. W. Drift North was advanced 110 feet. A total of 144 rock bolts were installed to stabalize the weak ground. At a point approximately 20 feet from the present face of this drift, badly fractured and sheared ground was encountered which required the driving of spiling. Four sets of spiled drift timber were stood.

The development of the Blacktail orebody was continued. This work consisted of constructing an access road and collaring a drift at the 7675 elevation, which was advanced 18 feet. Preparatory work for collaring a drift at the 7265 elevation was 70 per cent completed. Drifting was continued on the 7540 Level. A stope raise was collared and advanced 11 feet on the 7400 Level.

Sincerely yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the map and assays pertinent to D.M.E.A. Project No. 3143 for the month of July 1956.

During the month the 74/843 H. W. Drift North was advanced 120 feet. One set of drift timber and 121 rock bolts were installed to support the weak rock which was encountered.

The development of the Blacktail ore body, which is part of this D.M.E.A. project, was continued on Calera's account. The recent development consisted of a total of 356 feet of drift on the 7540 Level, a service raise connecting the 7400 and 7540 Levels, and the driving of three crosscuts - two on the 7400 Level and one on the 7540 Level. The installation of one stope chute on the 7400 Level was 75 per cent completed.

Sincerely yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project No. 3143 for the month of June, 1956.

During the month the 787 H.W. Crosscut was advanced 8 feet at which point it was named the 843 H.W. drift north and advanced 115 feet for a total of 123 feet. This heading encountered a moderately faulted and contorted Garnet Schist cut by some irregular Quartz zones and replaced by some Cobalt-Copper mineralization at one place on the turn to the north west. The general incompetency of the ground required the standing of 23 sets of timber.

No diamond drilling was done under the D.M.E.A. contract.

Sincerely yours,

CALERA MINING COMPANY

Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the monthly and progress reports pertinent to the D.M.E.A. project No. 3143 for the month of May, 1956.

No diamond drilling was done under the D.M.E.A. contract.

In the latter part of the month work was resumed in the 74/787 N. W. crosscut. This heading was advanced 32 feet in waste. Because of the small amount of advance no maps are included with this report.

We have corrected the records by deducting 18 feet of drift that was shown in our January, 1956 report, and was disallowed by the government officials.

Sincerely yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment, will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project No. 3143 for the month of March, 1956.

No headings were advanced under the D.M.E.A. contract.

Diamond drilling amounted to 175 feet for the month.

The hole drilled northeast from the south end of the Blacktail zone to test the hanging wall was completed. No mineralization of significance was intersected in the hanging wall, and the Blacktail zone itself proved to be narrow and low grade at this point.

The second up-hole drilled at 78½° over the north end of the Blacktail zone was also completed. This hole intersected 14 feet of ore of very good grade and with some secondary copper enrichment.

Drilling on the 7400 Level has been suspended for the present to allow the advance of development headings.

Sincerely yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project No. 3143 for the month of March, 1956.

No headings were advanced under the D.M.E.A. contract.

Diamond drilling amounted to 700 feet for the month.

Drilling of the Horseshoe zone from the 74/787 crosscut was completed. A zone about 6 feet wide striking north 75° west was found 175 feet beyond the face of the crosscut. At best the zone is of moderate grade.

A hole was drilled southwest from the collar of the 74/787 crosscut to complete the drilling between the Brown Bear and Blacktail zones. Two mineralized zones were intersected about 50 feet apart. The first zone is too low grade to be of much consequence, but the second is of good grade and 8 feet wide. However, the rest of the drilling in this area indicated the mineralization to be rather narrow and discontinuous at this elevation.

A hole is now being drilled to test the hanging wall of the Blacktail zone on both sides of a north trending major fault. So far only mineralization of very low grade has been found.

A hole was drilled at plus 45° from the 7400 drift north above the 74/852 drift north and found the Blacktail zone to be 47 feet thick, of good grade, and dipping about 40° along this plane. A second hole at plus 78½° has so far intersected 14 feet of ore of good grade.

Sincerely yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project #3143 for the month of February, 1956.

The 74/787 H. W. Crosscut was advanced 44 feet in the early part of the month and stopped at the projection of the hanging wall mineralized zone for the purpose of diamond drilling. This heading continued to advance through a sheared, faulted and fractured garnet schist that required the driving of spiling. A total of nine sets of drift timber were stood.

From this heading a hole was drilled to 294 feet by the end of the month. Narrow zones of ore grade were intersected at 9½ feet, 175 feet and 181 feet. The last two zones would constitute 9½ feet of better than ore grade. The hole is being continued to approximately 300 feet, and another hole will be drilled to intersect this mineralization 100 feet to the northwest.

Drilling in the Blacktail zone was completed for the present. The long hole to prospect the hanging wall was completed at 502 feet with no further mineralization of significance found. Two hundred feet to the southeast another hole was drilled into the hanging wall for a distance of 226 feet. Two zones of ore grade and width were crossed.

Sincerely yours,

CALERA MINING COMPANY
BLACKBIRD DIVISION

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases; such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project No. 3143 for the month January, 1956.

Work on the D.M.E.A. Project was continued on a three shift basis for the month. The 74/787 H.W. Crosscut was advanced 52 feet. This heading continued to advance through a sheared and fractured zone that requires the driving of spiling.

The 74/852 Drift North was collared and advanced 18 feet. This is being driven to examine the ore body in the northwest area of the D.M.E.A. Project that was found by the underground diamond drilling.

Diamond drilling amounted to 1,028 feet for the month. Drilling to the north from the face of the 7400 drift north intersected 5½ feet of ore. Four holes on the south end of the newly explored part of the Blacktail zone indicate the ore zone in this area to be of good grade but rather irregular in shape. Hole U-74-80 was extended to 500 feet to test the hanging wall of the zone and intersected mineralization revealed in the surface trenches and missed by surface drilling. However, the ore intersected is rather narrow and low grade. Drilling of the footwall so far shows a similar type of mineralization.

Another hole was completed in the area between the Brown Bear and Blacktail ore zones and also located mineralization which appears to be discontinuous and of marginal grade.

Very truly yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project No. 3143 for the month of December, 1955.

The 74/787 Hanging Wall Crosscut continued to be worked on a three shift basis and was advanced 191 feet during the month. A total of 100 feet of the crosscut required timbering; 54 feet of which was weakened by north trending fault and required the driving of spiling.

Drilling of the northern hanging wall part of the Blacktail Zone has now outlined an orebody of good grade over 400 feet in length and an average of 31 feet wide. Two holes drilled to the northeast failed to locate ore east of the major fault which appears to bisect the Blacktail Zone. A third and much longer hole is planned in this area. Another hole is being started from the face to intersect the zone as far north as possible. Drilling is also being started to further examine a possible southeast extension of the small footwall zone, which was intersected in one hole out of two drilled to the southwest.

Drilling continued in the area between the Brown Bear and Blacktail zones. So far two holes have located a zone which is rather narrow and spotty in distribution but of ore grade.

Gold assays of the Blacktail zone show that although they are somewhat better in general than the Chicago and Brown Bear zones, the values are not of the importance as was first indicated.

Very truly yours,,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-R645

Dear Mr. Weissenborn:

Enclosed are maps and assays pertinent to the D.M.E.A. Project No. 3143 for the month of November, 1955.

The 7400 Drift North was advanced 25 feet on a three shift basis. The drift encountered moderately weak caving ground caused by north trending faults and required the standing 6 sets of timber. This heading was stopped temporarily for diamond drilling.

The 74/787 Hanging Wall Crosscut was advanced 117 feet on a three shift basis. The drift encountered badly faulted and fractured schistose quartzite and garnet schist requiring heavy timbering for 54 feet. Beyond this distance the faulting was less severe and required only 32 feet of timbering.

Holes are being drilled northeast and southwest from the 7400 Drift North to locate the northern extension of the Blacktail zone, 552½ feet of drilling in this area have located two possible ore zones. The footwall zone in the left rib has been intersected in only one hole and is narrow but of good grade. The hanging wall zone has been intersected in two holes and is wide and of very good grade. Drilling is now being concentrated on this more promising hanging wall zone.

The hole drilled west along the 17,293 north coordinate line was abandoned at 272 feet because of drilling difficulties. Two small zones of ore grade were intersected but were not of sufficient width.

Two holes were drilled from the dead end footwall drift to locate the northern extension of the Brown Bear Zone. The southernmost hole intersected ore of good grade 3½ feet wide. The hole drilled from the face intersected no significant mineralization. A third hole is being started from the main haulage drift and drilled southwest to examine this same possible zone 100 feet farther to the north.

Yours very truly,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-2645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project No. 3143 for the month of October, 1955.

The 7400 Drift North was advanced 273 feet on a three shift basis during this month. The drift encountered weak caving ground in three areas and a total of 167 feet of the drift required the standing of timber.

A hole is being drilled west along the 17,298 North coordinate beneath a surface trench showing a possible ore zone. The self potential survey also indicates a mineralized zone in this area. The first 226 feet of the hole shows numerous small basic dikes accompanied by faults of varying size. A rather sparsely mineralized zone was intersected from 207½ to 226 feet including a narrow high chalcopyrite zone 222 to 223 feet. Assays are not complete for the entire zone. If definite ore is not intersected, it is planned to drill this hole to approximately 300 feet.

Yours very truly,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-2643

Dear Mr. Weissenborn:

Enclosed is the map and assays pertinent to the D.M.E.A. Project No. 3143 for the month of September.

The work in the 7400 Drift North continued on a three shift basis with the advance amounting to 194 feet for the month.

In the first part of the month, the drift continued to advance in a heavy ground that required timber and the driving of spiling. However, a firmer argillaceous quartzite has been encountered and the drift is now advancing without timber, encountering moderately dipping North-South faults about 30 feet apart.

Very truly yours,

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-E645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project No. 3143, for the Month of August, 1955.

The D.M.E.A. Project continued to be operated on a three-shift basis, with the total advance amounting to 155 feet. The 74/787 Hanging Wall Crosscut was advanced 147 feet in a badly fractured schistose quartzite and garnet schist. All of the crosscut required the standing of drift timber and 117 feet required heavy timbering.

As soon as the diamond drilling was completed in the 7400 Drift North, the miners were moved back into this drift and it was advanced 8 feet in very heavy ground that required the use of spiling.

Diamond Drilling in the 7400 Drift North intersected a mineralized zone along the drift from 150 feet to 600 feet SE of the present face. The zone is very irregular in shape and is off-set by numerous north-south faults. Two parts of the mineralized zone, each about 130 feet in length and from 2-to-16 feet wide, may be of minable grade and width.

Very truly yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-2645

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.E.A. Project No. 3143, for the Month of July, 1955.

The 74/787 Hanging Wall Crosscut continued to be worked on a three-shift basis, and was advanced 285 foot in a moderately firm shistose quartzite. Normal drift timbering was stood in 48 feet of the drift.

Diamond Drilling continued in the 7400 Drift North and amounted to 800½ foot during the month. The ore that has been intersected was found to be very irregular in shape and offset by closely spaced north striking faults. It has been necessary to space the drill holes 25 foot apart in some places to follow the ore.

Very truly yours,

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm - 1645

Dear Mr. Weissenborn:

Enclosed are the reps and assays pertinent to the D.M.E.A. Project No. 3143 for the month of June, 1955.

The 7400 Drift North was advanced 45 feet and stopped for Diamond Drilling. This heading continued to advance in extremely heavy ground, and all the advance required the use of spiling.

The crosscut to explore the hanging wall mineralized zone was collared at a point approximately 1,560 feet back from the face of the 7400 Drift North. The crosscut was advanced 25 feet in ground that required normal timbering.

Diamond Drilling amounted to 97 feet in three holes collared near the face of the 7400 Drift North. An additional hole, U-74-33, was not charged to the D.M.E.A. account. No ore has been intersected.

Very truly yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Re: Docket No. D.M.E.A. 3143
Contract No. Idm-8645

Dear Mr. Weissenborn:

Enclosed are the maps and assays showing the progress during the month of May for D.M.E.A. Project No. 3143.

The 7400 Drift North was advanced 73 feet on a three shift basis during the first part of the month. The miners went out on strike the 16th of May and stayed out the remainder of the month.

The heading was slowed down when it intersected a large north striking fault that dips steeply to the east. A series of NE striking faults that dip at a low angle to the west were also intersected. The bad ground made it necessary to spile 59 feet of the advance. No ore was intersected during the month.

Very truly yours,

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MAY 17 1955

Mr. A. B. Holmesborn
Inspection Station - Region 1
Bureau of Field Tests
South 157 Howard Street
Spokane 8, Washington

Re: Project No. Defaldo 3143
Contract No. [illegible]

Dear Mr. Holmesborn:

Enclosed are the maps and assays pertinent to the Bellefonte Project No. 3143 for the month of April, 1955.

The 7400 Drift North was driven 222 feet on a three-shift basis during this period. Ground conditions remained good until the closing week of the period, when a fault was encountered. There were 65 feet of altered ground during April and approximately four of gelled ground. The heading was left in the fault zone at the month closed.

A series of north trending faults and one mineralized zone of one foot was encountered. None of the faulting proved serious until the end of the month.

Very truly yours,

CALERA MINING COMPANY
BLACKBIRD DIVISION

DEFENSE MINERALS EXPLORATION ADMINISTRATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

INTERIM AUDIT CERTIFICATE

RECEIVED
JUN 1955

I have examined the records and transactions of the:

Calera Mining Company
Cobalt, Idaho

pertaining to Exploration Project Contract No. Idm-3645, Docket No. DMEA-3143, dated December 9, 1953, including Amendment No. 1, covering a project for the exploration of cobalt and copper on property known as the Blackbird Mine, located in Lemhi County, State of Idaho, for the period of December 9, 1953, to March 31, 1955, inclusive.

My examination was made in accordance with generally accepted standards applicable in the circumstances.

The audit disclosed the following facts in regard to the amount to be paid the contractor:

Total cost as billed by contractor	$143,505.12
Less: Salvage proceeds	None
Net claimed cost	143,505.12
Exceptions (see Audit Report)	None
Total Accepted Cost	$143,505.12

The contract calls for a 70 percent participation of exploration expenses by the United States Government. Therefore, payment to the contractor by the Government in the amount of One hundred thousand four hundred fifty-three and 58/100 Dollars,

$100,453.58

is valid and proper.

This certificate is issued on the provision that the Regional Executive Officer, the Administrator, or other competent official has accepted or will accept the project as having otherwise met the terms of the contract.

C. A. Turner, Auditor

June 17, 1955

INTERIM AUDIT REPORT

RECEIVED
JUN 1955

I. INTRODUCTION

During the period of May 10, 1955, to May 14, 1955, inclusive, an interim audit (covering operations for the period of December 9, 1953, to March 31, 1955,) was made of the records and transactions pertaining to Exploration Project Contract No. Idm-8545, Docket No. DMEA-3143, dated December 9, 1953, including Amendment No. 1 with the:

Calera Mining Company
Cobalt, Idaho

covering a project for the exploration of cobalt and copper on property known as the Blackbird Mine, located in Lemhi County, State of Idaho.

The original accounting records under this contract are maintained under the direction of H. R. Douglas, general manager, are in the custody of G. B. Deacon, chief accountant, and Joe Stansfield, accountant, and are located in the mine office near the mine, which is approximately 9 miles from Cobalt, Idaho.

Garvin Young, mine superintendent, Bill O'Neal, mine foreman, and Don McPherson, thief warehousemen, were also consulted as required during the course of the audit. All employees consulted were most cooperative at all times.

A. L. Service, mining engineer, Bureau of Mines, Region I, N. W. District, as representative of the DMEA Field Team accompanied the auditor and assisted in the necessary analysis of payrolls and operating materials and supplies. Mr. Service was also available for consultation as needed.

The actual on-site audit was preceded by considerable pre-audit analysis and audit preparatory work in Spokane, Washington, office of the DMEA. A considerable portion of the summarizing of the audit findings was completed subsequent to the actual on-site audit.

II. GENERAL INFORMATION ON RECORDS

The Company maintains a complete and comprehensive set of records to cover the various departmentalized operations of the mine, mill, and the exploration project, consisting of general ledger, cash books, and voucher distribution records, all of which are properly supported by the necessary items and records of original entry, from which the monthly cost and statistical statements are prepared of each department, for the Company's management and department heads.

The entire mining operation prior to January 1, 1955, was considered by the Company to be exploration and development work. On January 1,

1955, the mine was put on a production basis with the costs charged to mining operations and the exploration project contract as applicable.

A subsidiary ledger has been maintained in which the actual costs of the exploration project contract have been recorded. Analysis of these costs follows in Appendix A attached to this report wherein a comparison of the Operator's actual costs of units of work performed is compared with the Unit Costs claimed by the Operator on the Operator's Monthly Report and Voucher, Form MF-104.

The Company's records are audited annually by Smith, Davis, and Wills, certified public accountants, New York, New York.

III. SCOPE OF AUDIT AND FINDINGS

The first stage of this audit was limited to ascertaining the accuracy, propriety, and validity of the costs shown in the "Totals to Date" column of the Operator's Monthly Report and Voucher, Form MF-104, for the month of March, 1955.

All of the costs claimed by the Operator cover work performed on the basis of agreed estimated costs of units of work actually performed. The basic portion of this audit report refers only to the unit costs claimed.

Comments and findings with reference to the Operator's actual costs incurred on the work performed on the basis of agreed estimated cost of units of work actually performed will be presented in Appendix A attached to this report.

(1) Agreed Unit Costs

The Operator's claim under the contract provision for contribution by the Government on the basis of agreed estimated cost of units of work performed consisted of:

Stage I					
Trenching	864 Hours	@	$11.876	$10,262.59	
Diamond Drilling					
Surface	8576.5 Feet	@	6.96	59,692.44	
Underground	612.0 Feet	@	3.3802	2,069.91	
Reaming and Cementing	1145 Feet	@	2.50	2,862.50	
Assays	2346 Assays	@	3.00	7,038.00	
Total Stage I					$81,925.44

Stage II					
Drifting	1238 Feet	@	$35.535	$43,992.34	
Timbering					
Normal	994.3 Feet	@	7.00	6,960.10	
Heavy	313.5 Feet	@	7.00	2,194.50	
Spiling	297.0 Feet	@	20.00	5,940.00	
Framing	210 Sets	@	5.48	1,150.80	
Diamond Drilling					
Underground	155.5 Feet	@	3.3822	525.94	
Assays	272 Assays	@	3.00	816.00	
Total Stage II					$61,579.68
Total Accepted Costs					**$143,505.12**

The "Allowable Maximum" of 864 Hours of Trenching was not exceeded.

The following categories of cost were not applicable to this contract:

(2) Labor and Supervision
(3) Operating Materials and Supplies
(4) Operating Equipment
(5) Initial Rehabilitation and Repairs
(6) New Buildings, Improvements, etc.
(7) Miscellaneous
(8) Contingencies

Observations

The Calera Mining Company's Blackbird mine is one of the several mines located in the United States, Canada, and Mexico which are owned and operated by the Howe Sound Company, 730 Fifth Avenue, New York, New York.

The Calera Mining Company's Blackbird mine was prior to January 1, 1955, considered to be in a state of exploration and development. Mining and milling operations since January 1, 1955, are considered to be on a production basis. Mill concentrates are being shipped via trucks to Salt Lake City, Utah, for final refining.

IV. CONCLUSIONS

The audit disclosed that all costs charged to this project, as itemized in section III of this report, are reasonable and proper under the terms of the contract.

The adjustments between "Items of Cost" as shown on March 31, 1955, Form MF-104, the disallowances, and the accepted costs as disclosed by this audit are summarized as follows:

	Totals March 31, 1955 MF-104	Corrected Distribution	Disallowed by Audit	Accepted Cost Stage I	Accepted Cost Stage II
(1) Independent Contracts:	$	$	$	$	$
Trenching	10,262.59	-	-	10,262.59

(8) Contingencies	-	-	-	-	-
Totals	$ 143,505.12	$ -	$ -	$ 81,925.44	$ 61,579.68

The contract designates one "Allowable Maximum" of trenching not in excess of 864 hours, which was not exceeded.

The exploration work specified in the contract is designated in units of the various kinds of work to be completed. A summary of the units of work authorized by the contract, units of work completed, and units of work remaining to be completed follows:

	Units Specified in Contract			Units Completed			Units Remaining		
Stage I

*Allowable Maximum

At the conclusion of the audit on May 14, 1955, the findings were discussed with G. B. Deacon, chief accountant, and Joe Stansfield, accountant. E. B. Douglas, general manager, was at this time temporarily away from the mine.

The final summarization of facts was discussed with A. H. Weissenborn, Executive Officer, DMEA Field Team, Region I, N. W. District, on June 17, 1955.

C. A. Turner, Auditor

June 17, 1955

RECEIVED
JUN 1 1955

APPENDIX A

Operator's Costs of Units of Work Completed

Exploration Project Contract No. Idm-1043, Docket No. DMEA-3143, provides that the Government will contribute to the costs of the work specified in the contract on the basis of agreed unit costs as they accrue in lieu of actual costs, for a period of 1 year from the date of the contract, and thereafter unless and until the Government, at its option, notifies the Operator that the Government will contribute to the incompleted portions of any remaining work to be done on the basis of actual costs as set forth in the contract.

This audit of actual costs of units of work completed was made to enable the Government to exercise its option to convert to actual costs if it is determined to be to the Government's advantage to do so.

Prior to the date of the on-site audit the Operator submitted to the DMEA Field Team, Region I, N. W. District, a statement of the actual costs to March 31, 1955, of the exploration project work.

An audit and analysis of the costs pertaining to the Operator's actual costs of units of work completed was made. This audit consisted of: (1) analysis of the costs of work performed by independent contractors; (2) analysis of costs claimed as labor, supervisory, and technical services including rates of pay per shift, per foot, and bonuses; (3) a partial analysis of costs representing materials and supplies and miscellaneous stores, and certain prorations based on actual at the face drilling hours; (4) verification of payroll taxes and liability insurance based on the labor distributions; (5) verification by test checks on prorating factors based on at the face drilling hours; and (6) a verification of the total of the exploration project costs.

The Operator's records do not provide an adequate breakdown of labor and other costs between normal timbering, heavy timbering, spiling and framing.

(1) Independent Contracts:

The Nichols Thompson Drilling Company of Boise, Idaho, performed drilling on the exploration project as well as the Operator's other mining activities.

The drilling costs were verified by: (1) examination of the drilling contract between the Operator and the Nichols Thompson Drilling Company; (2) examination of invoices and drill logs submitted by the drilling company; and (3) examination of voucher checks rendered in payment of the drilling.

Drilling performance and footages were verified by the DMEA Engineer, A. L. Service, in charge of the project.

Independent contract costs applicable to diamond drilling were found to be as follows:

Nichols Thompson Drilling Company:

			$	$
Surface drilling	8,576.5 Feet	@	5.53	47,396.15
Underground drilling	767.5 Feet	@	3.30	2,[illegible]96.25
Casings left in hole	555.0 Feet	@	.70	388.60
Reaming and cementing	1,145.0 Feet	@	2.50	2,861.25
Total	9,[illegible].0 Feet	@	5.71	$[illegible]

(See attached Schedule No. 1.)

(2) Labor and Supervision:

Labor is recorded by a daily time card made out by the employee and approved by the shift boss. The time card includes date and shift worked, hours worked and contract work completed, rates of pay and the level or location in which the work was performed. The approved time card goes to the timekeeper who accumulates the employees' earnings for the period. Costs are recorded in the cost ledger after the cards have been processed by the distribution clerk and distributions journalized into the voucher record.

Payrolls are for the periods of 1st to 15th and 16th to end of month. Paydays are the 8th and 23rd of the month.

An audit and analysis was made of payroll charges against the exploration project for the months of May 1954, October 1954, and February 1955. This included checking the daily time cards, distribution record, and voucher distributions. Rates used were examined and found to be in agreement with those listed in the union contract. Computations and distributions were test checked to the extent of 50 percent for the months of May and October 1954 and February 1955. Payroll charges for the balance of the period under review were checked only as to totals and distribution charges made to the exploration project.

Labor as charged to the exploration project during the period of May and October 1954 and February 1955 was paid at the following shift rates:

Rates Per Shift		February 1, 1954 to June 30, 1954	July 1, 1954 to March 31, 1955
		$	$
Surface Mine Labor		13.04	13.44
Mucker		13.44	13.84
Timberman		15.04	15.44
Timberman-Helper		13.84	14.24
Trackman		14.24	14.64
Trackman-Helper		13.84	14.24
Compressorman		13.84	14.24
Miner-Stope		14.24	14.64
Powderman		14.24	14.64
Nipper		13.84	14.24
Pumpman		14.64	15.04
Hoistman, Single Drum		14.64	15.04
Hoistman, Double Drum		16.24	16.64
Cager		14.64	15.04
Locomotive Operator		14.64	15.04
Shift Boss	Per Month	466.00 - 475.00	475.00 - 490.00
	Per Month	520.00 - 535.00	535.00 - 550.00

These rates with the exception of Shift Boss were in conformity with the contract between the Operator and the International Union of Mine, Mill and Smelter Workers Local No. 911. This contract also provides shift premiums, vacations with pay, health and welfare plan, and paid holidays.

Bonuses are paid miners who work on a footage basis and work accomplished basis in lieu of daily shift basis.

Contract Rates of Pay:

	Without Timber	Timbered
Drill Out	$ 2.40	$ 3.15
Load & Blast	.60	.60
Muck Out	3.50	4.75
Cost per foot	$ 6.50	$ 8.50
Stand Rail per foot	.25	.25
Ties each	.30	.30
Water Line per foot	.05	.05
Air Line per foot	.10	.10
Stand Ditch Post	-	3.60
Stand 2nd Post	-	3.60
Lagging per foot		.15
Place Caps	-	1.50
Bridge each		3.00
Vent Pipe per foot	.10	.10

Contract rates of pay are not a part of the Union Agreement.

These contract rates of pay have not been changed since they were established several years ago when a miner was paid the daily rate of $12.31 per shift.

Bonus calculations are made by deducting from the miner's total contract earnings the amount he would have earned if paid at the rate of $12.31 per day instead of the current wage rate per day.

In bad ground miners are paid pay (at the current rate) plus $10.00 per shift bonus.

Labor charges applicable to the exploration project were found to be as follows:

	$
Diamond Drilling	190.34
Trenching	4,493.43
Drifting	31,168.68
Timbering	13,285.16
Assaying	1,178.20
Total	$ 50,315.81

See attached Schedules Nos. 1 to 5, inc.

Timbering costs include the costs applicable to normal timbering, heavy timbering, framing, and spiling.

Supervision:

The Operator charged to his exploration project costs, the time devoted to the project by the engineers and geologists as follows:

	$
Engineers	2,182.58
Geologists	5,699.03
Total	$ 7,881.61

Only the actual time spent on the project was charged to the project costs; however, in the actual cost section of the contract an allowable maximum of $500.00 per month is specified for supervision. A deletion of $841.61 is made to bring the actual project costs in line with the costs allowed in the event that the contract is converted to an actual cost basis.

Supervision costs were prorated to the various operations on the basis of labor charges with the exceptions of diamond drilling which was charged at the rate of $0.125 per foot and assaying which was not charged any supervision.

The allocation of supervision expense to the Operator's Actual Costs of Units was discussed with DMEA Engineers, who after taking into

consideration the operation as a whole and the various other operations affected suggested an arbitrary charge of $0.125 per foot to drilling and no charge to assaying. While the engineers feel that this charge is low it is known that the Operator is spending more than the Allowable Maximum of $500.00 per month for supervision.

Supervision was distributed as follows:

	Labor	Percent	Distribution of Supervision
Trenching	$ 4,493.43	9.180	$ 935.36
Drifting	11,168.68	63.678	3,713.70
Timbering	13,285.16	27.142	1,582.92
	$ 28,947.27	100.000	5,832.00
Diamond Drilling	190.34		
9,344 Feet @ 12½¢/ft.			1,168.00
Assaying	1,178.20		-
No Charge			
Total	$ 30,315.81		$ 7,000.00

See attached Schedules Nos. 1 to 5, inc.

(3) Operating Materials and Supplies:

A stores account and warehouse facilities are maintained by the Operator to supply the mining and milling operations as well as the exploration project with materials and supplies as needed. Purchases are all charged to the stores account with the few exceptions of items charged direct to the operations.

A complete set of store card records is maintained by Don Mc Pherson, chief warehousemen, upon which a record is made of dates, purchases, issues and the department issued to for consumption.

Supplies and materials are issued to the Operator's mining and milling operations and the exploration project at the actual cost to the Operator. The expense of maintaining the warehouse and the warehouse labor as well as the salary of Mr. McPherson, chief warehousemen, is not considered by the Operator as an additional cost of the supplies but an overhead item of expense. Warehouse expense is charged to Mining Operations one-third, Milling Operations two-thirds, Exploration Project none.

Supplies are all charged directly to the department in which they are used with the following exceptions: (1) Drill supplies, (2) Steel and Bits, (3) Air, and (4) Air and Water lines. Supplies consumed in these four exceptions are prorated on the basis of actual at the face drilling hours.

Audit of the materials and supplies consisted of checking the entries in the cost ledger back to the books and records of original entry which included the journal and stores requisitions, and occasional recomputations of extensions. Stores cards covering large items such as track and timber were examined for a three months period to determine the methods used to record supplies purchased and supplies consumed in the various mining, milling and exploration project activities.

Cost ledger balances were compared with the monthly operating statement, which was prepared for the use of the management and the department heads.

Supplies were charged to the exploration project at the same price used on the Operator's other operations without any marking.

Operating materials and supplies were found to be as follows:

Diamond Drilling:		
Drill supplies		$ 81.37
Trenching:		
Cat supplies, fuel oil and lubricants		3,709.89
Drifting:		
Explosives	2,673.77	
Truck	1,983.56	
Ventilation pipe and supplies	1,179.29	
Air and water lines	3,064.53	
Power feeder	1,345.90	
Air supplies	709.83	
Drill steel and bits	826.11	
Drill supplies	609.89	
Muking supplies	1,063.26	
Battery Maintenance	338.08	
Miscellaneous	89.51	
		13,892.91
Timbering:		
Timber and supplies		8,083.90
Assaying		648.47
Total		$ 26,[illegible]

See attached Schedules Nos. 1 to 5, inc.

(4) Operating Equipment:

Rental:

This category of cost not applicable to this contract.

Purchases:

This category of cost not applicable to this contract.

Depreciation:

The actual cost section of the contract specifies equipment to be depreciated and the rates of depreciation to be used in case the contract is converted to an actual cost basis in lieu of a unit cost basis. These rates of depreciation were used to determine the Operator's actual costs for the period under review.

To be furnished by Operator:

		Value
1	5-Ton Plymouth Locomotive	$7,[illegible].05
2	Mines 128 Mucking Machines	5,674.40
15	C. S. Cars - 30 cubic feet Rocker Dump Cars	3,660.00
2	Mancha 1½-ton locomotives	6,690.96
4	Batteries	5,[illegible].00
2	Charging panels	1,[illegible]1.96
2	A.M.C. car transfers	900.00
1	Buffalo Forge Blower, 15 H.P.	375.00
1	Clarage Blower, 7½ H.P.	275.00
	Starting Equipment for blowers	175.00
2	Timber trucks	266.78
4	Jackleg type pusher drills @ $505.00/ea.	2,020.00
4	Line collars @ $17.54/ea.	70.16
1	Mh8 Stopar	670.00
1	Water pump	153.00
1	Track jack and 1 rail bender	90.00
	Total	$ 35,[illegible]

An allowance of $595.00 per month, which is an allowable maximum, is specified in the contract. Depreciation for the period of February 1, 1954, to March 31, 1955, is:

14 Months @ $595.00 $8,330.00

Depreciation is allocated to the various exploration project activities on the basis of labor used on each activity as follows:

	Labor	Percent	Depreciation
	$		$
Diamond Drilling	190.34	.3871	32.24
Trenching	4,493.43	9.1445	761.74
Drifting	31,[illegible].68	63.4314	5,283.84
Timbering	13,[illegible].16	27.0370	2,252.18
Total	$49,[illegible].41	100.0000	$8,330.00
Assaying	1,[illegible].80		None
Total	$50,[illegible]		$8,330.00

See attached Schedules Nos. 1 to 5, inc.

The assaying laboratory is located in the mill and was not charged any depreciation.

(5) Initial Rehabilitation and Repairs:

This category of cost not applicable to this contract.

(6) New Buildings, Improvements, etc.:

This category of cost not applicable to this contract.

(7) Miscellaneous:

Payroll Taxes:

Payroll taxes were allocated to the exploration project payroll in the same ratio as the exploration project payroll was to the Operator's entire payroll, as follows:

	Payroll	Percent
Exploration Project Payroll	$ 57,315.81	3.3511
Balance of Payroll	1,653,007.44	96.6489
Total Payroll Jan. 1, 1954, to Mar. 31, 1955	$1,710,323.25	100.000

Payroll tax rates were found to be as follows:

	Percent
F.I.C.A.	2.0
Idaho Unemployment Insurance	2.1
Federal Unemployment Insurance	.3
Total	4.4

Examination of the Operator's reports:
State of Idaho - Employer's Contribution Report
Identification No. 82-0184968
Federal Excise Tax Return Form 940
Federal - Employer's Quarterly Tax Return
indicated, that taxes amounting to $60,986.11 had been paid for the period of Jan. 1, 1954, to March 31, 1955, of which 3.3511 percent or $2,041.70 was applicable to the DMM payroll.

Payroll taxes were distributed to the various exploration project activities on the basis of the exploration labor cost as follows:

	Labor	Supervision	Total Labor	Percent	Payroll Taxes
Diamond Drilling	$ 190.34	$ 1,168.00	$ 1,358.34	2.3699	$ 48.38
Trenching	4,493.43	535.38	5,028.81	8.7738	179.14
Drifting	31,168.68	3,713.70	34,882.38	60.8601	1,242.58
Timbering	13,285.16	1,582.92	14,868.08	25.9406	529.63
Assaying	1,178.20	-	1,178.20	2.0556	41.97
Total	$50,315.81	$7,000.00	$57,315.81	100.0000	$2,041.70

See attached Schedules Nos. 1 to 5, inc.

Liability Insurance:

Liability insurance was made up of premiums paid on the payroll with rates as follows:

	Percent
Industrial Insurance	
Year of 1954	6.0000
Year of 1955	4.5500
Group Life Insurance	0.1294
Hospital	0.7440
Health and Welfare	0.6544

Premiums are computed on the exploration project payroll as follows:

Industrial Insurance:				
1954 Labor	$39,781.39	@ 6%	$2,386.88	
1955 Labor	17,534.42	@ 4.55%	797.82	$3,184.70
Group Life Insurance:				
	57,315.81	@ 0.1294%		74.17
Hospital and Medical Care:				
	57,315.81	@ 0.7440%		426.43
Health and Welfare:				
	57,315.81	@ 0.6544%		374.97
Total		7.0278%		$4,060.37

Premiums were allocated to the various phases of the exploration project on the basis of the combined labor and supervision charges as follows:

	Total Labor	Percent	Liability Insurance
Diamond Drilling	$ 1,358.34	2.3699	$ 96.23
Trenching	5,028.81	8.7738	356.25
Drifting	34,882.38	60.8601	2,471.15
Timbering	14,868.08	25.9406	1,053.28
Assaying	1,178.20	2.0556	83.46
Total	$57,315.81	100.0000	$ 4,060.37

See attached Schedules Nos. 1 to 5, inc.

The Operator had not included liability insurance costs in the exploration project costs. These costs were computed to determine the Operator's actual unit costs.

Industrial Insurance was carried by the Western Pacific Insurance Company, Policy No. WS 11476, for the year of 1954 and by the Liberty National Insurance Company, Policy No. C 21986, for the year of 1955, whose rates are as follows:

	1954	1955
Underground Mining	$6.00	$4.55
Surface	1.50	1.62
Milling	1.50	.98
Clerical	-	.84

The Union agreement Article 15 provides for a Health and Welfare Plan, which provides hospitalization, medical care, surgical, weekly lost time benefits, life insurance and accidental death benefits for employees and their dependents. A joint Union-Company Committee is administering the plan.

The Company is insured by the Aetna Insurance Company, Policy No. 3143. The premium is based on an average age of the crew and is $15.00 per $1,000.00 insurance. An employee must have worked six months to obtain $500.00 protection which may be increased $200.00 for each six months service until the maximum is reached.

Assaying:

The Company laboratory made assay determinations for the Operator's milling operation, mining operation and the exploration project. Labor and supply costs were prorated by the Operator on the basis of the total number of determinations of all kinds made. Costs based on the above facts were found to be as follows:

Labor	2,618 assays	@ $ 0.45	$ 1,178.20
Supplies		0.25	648.47
Payroll Taxes		0.02	41.97
Industrial Insurance		0.03	83.46
Total	2,618 assays	$ 0.75	$ 1,952.10

Incl in cat. (2), (3) + (7)

(See Schedule No. 5.)

The laboratory crew consists of two research chemists and four to six assayers and helpers. During the years of 1954 and 1955 to March 31st the following determinations were made:

	1954 Year	1955 March 31
DMEA	3,704*	270*
Mining	27,161	6,918
Diamond Drilling	3,108	1,343
Mill	43,021	13,637
Total	76,994	22,168

* Operator claimed on his Form MF-184 for the period 2,618 assays.

The Company for the period under review used an average price per assay based on the total number of determinations made regardless of how simple or complex the assay might have been.

DMEA samples being tested for several metals were of the more complex nature and benefited by this method of cost proration.

Schedule No. 1

Re: Calera Mining Company
Contract No. Idm-E645
Docket No. DMEA-3143

Dear Mr. Talbert:

Reference is made to your letter of August 22, 1955 in which you have requested a breakdown of the difference of $9,507.97 between the Operator's cost statement and the costs allowed by the interim audit.

Adjustments were made as follows:

Adjustments Caused by Audit			
Diamond Drilling			
Labor	$190.34		
Supplies	81.37	$271.71	
Less - adjustment on invoice covering contract drilling		70.26	$ 201.45
Depreciation			8,330.00
Payroll taxes			183.39
Workmen's compensation			1,634.74
			$10,349.58
Less - Disallowance supervision			841.61
Total			$ 9,507.97
Operator's Cost Statement			141,958.70
Interim Audit Totals			$151,466.67

See schedule attached.

Accounting labor, as well as holiday pay and vacation pay, are included in the labor costs of drifting, timbering, and trenching. Miscellaneous labor was prorated on the basis of direct labor as follows:

Accounting	$1,996.44
Holiday pay	479.14
Vacation pay	621.11
Total	$3,096.69

	Direct Labor	Percent	Distribution	Total Labor
Drifting	$29,196.76	63.678%	$1,971.92	$31,168.68
Timbering	12,444.66	27.142	840.50	13,285.16
Trenching	4,209.16	9.180	284.27	4,493.43
	$45,850.58	100.000%	$3,096.69	$48,947.27
Drilling				190.34
Assaying				1,178.20
Total Labor Schedules, 1 to 5 inclusive				$50,315.81

At the time this distribution was made it was decided to charge all of the miscellaneous labor to drifting, timbering and trenching.

I am sorry to have caused you this inconvenience and do hope that the above explanations will clear the situation for you.

Yours very truly,

C. A. Turner

AIR MAIL

Re: Calera Mining Company
Contract No. Idm-E645
Docket No. DMEA-3143

Dear Mr. Turner:

Reference is made to your Interim Audit Report dated June 17, 1955, covering the referenced project contract.

Further use and study of this report has indicated the need of an explanation on one important point. A summary of the actual costs shown in the Appendix A to the report and the several schedules attached thereto aggregates $151,466.67; however the Operator's statement of actual costs (referred to in the third paragraph of the Appendix A) indicates $141,958.70 as the total.

Your report does not include a reconciliation and I have been unable to pin-point this $9,507.97 difference. Probably part of the amount is the depreciation of $8,330.00, but partially offsetting that amount is your disallowance of $841.61 for supervision plus the accounting costs of $1,996.44 indicated by the Operator. Furthermore it is not understood why your costs do not include the accounting costs.

Please furnish such reconciliation and explanation as may be indicated.

Incidentally I have noted two typographical errors in the report. Please correct the available field copies. In the penultimate paragraph on page 3 of the Report the reference to "section I" should be "section III" and on page VI of the Appendix A the total for materials and supplies should be $26,386.54 rather than $25,386.54.

Sincerely yours,

(Signed) E. D. Talbert

Re: Calera Mining Co.
Contract Idm-[illegible]45
Docket No. DMEA 3143

Dear Mr. Talbert:

Reference is made to your letter of July 12, 1955 in which you have asked for additional information on the drifting and timbering costs of $25.18 and $13.36 per foot, respectively, which were shown in my Interim Audit Report dated June 17, 1955.

During the on-site audit an analysis was made of the labor charges for the months of May 1954, October 1954, and February 1955. The information on the daily time card submitted by the employee was traced through the various accumulation records and payrolls to the final journal entry to the cost ledger. During the examination it was noted that the time cards were O.K.'D by the shift boss and that the rates were in agreement with the wage schedules.

A work sheet showing the total number of shifts worked and the total amount earned was not made on this audit like the work sheet prepared on the Bunker-Hill job because I was able to check each item step by step to the final cost ledger on the Operator's own records.

The drifting and timbering costs are high due to the extremely bad ground in the drift. This is borne out by the fact that 1238 feet of drift required 994.3 feet of timber. The timbering is made up of 383.8 feet of normal timbering, 313.5 feet of heavy timbering, and 297.0 feet of spiling.

The U. S. Bureau of Mines engineers were consulted regarding the high costs of drifting and timbering and they agree that the bad ground is a real factor.

Repair items (labor and supplies) were not set up on the Operator's records as repairs, but were charged to the various operations applicable. This would also have the tendency to increase the drifting and timbering costs.

Comment should have been made in the audit report regarding the repair items, but it was overlooked.

I have just returned from the Polaris job at Wallace, Idaho, and this report should be coming along soon.

Yours very truly,

C. A. Turner, Auditor

JUL 12 1955

AIR MAIL

Re: Calera Mining Company
Contract Idm-E645
Docket No. DMEA-3143

Dear Mr. Turner:

Reference is made to your Interim Audit Report dated June 17, 1955, covering the referenced project contract.

On pages XIV and XV of Appendix A to this Audit Report, the drifting and timbering labor costs are indicated as averaging $25.18 and $13.36 per foot, respectively. Since these amounts appear to be relatively high the desirability of a further analysis of these costs is indicated.

It is noted that on page II of the Appendix you state, "An audit and analysis was made of payroll charges against the exploration project for the months of May 1954, October 1954, and February 1955", and on page III you list the types of labor and both the shift and bonus rates of pay applicable to this contract.

Your work sheets covering three months' detailed analysis probably contain sufficient information to show the types of labor and the number of hours or shifts employed in drifting and timbering during these months. If this is so, it is requested that you have photostats of the applicable work sheets made and forwarded to this office. Also, other information which may be of assistance in determining the reasons for these high labor costs per foot will be appreciated.

It is noted that your schedules of costs on pages XIV and XV of the Appendix A do not include any costs, either parts or labor, specifically indicated as repairs to equipment. Inasmuch as repairs undoubtedly were required, an explanation is requested.

Sincerely yours,

(Signed) E. D. Talbert

Contract No. Idm-[illegible]5

Dear Ed:

I have your letter of April 15 forwarding the costs on the Blackbird project. Mr. Charles Turner, our auditor, tells me that he will plan to be in Cobalt on the 2d or 3d of May; however, since it would be very desirable to have your accountant there at the same time, this date can be changed if Mr. Beacon will not be able to be there at that time.

Because of the slow mail service between here and Cobalt perhaps it would be well if you would wire me whether or not this date is satisfactory.

Sincerely,

A. E. Weissenborn

Re: Docket No. DMEA-3143 (cobalt-copper)
Blackbird Mine
Lemhi County, Idaho
Contract Idm-E645

Dear Mr. Weissenborn:

This is in reply to your letter of April 8 in which you request a summary of the cost of work performed under the above-mentioned contract. In accordance with your request, we are enclosing two copies of our cost summary of work completed to March 31, 1955. This summary covers our costs, with the following reservations:

1. Assaying is charged to the contract at the average cost per determination for all determinations made at the assay office. This is much less than actual cost of making cobalt determinations;

2. No charge has been made to the contract for the use of miners' lamps;

3. On March 31, 1955, underground diamond drilling was just started. The established rate is $3.3832 per foot. The lowest contract rate available is $4.00 per foot. On 10,500 feet to be drilled, this will accrue an extra cost to the Company of at least $6,500.00

Mr. Haddon, who has been our Chief Accountant, has resigned and is being replaced by Mr. George Deacon. Mr. Deacon is being transferred from our Brittania property and is arranging the necessary immigration papers. As he may be called away from the property because of this situation, I will appreciate your advising me, in advance, of Mr. Turner's visit so that if at all possible, arrangements can be made to have Mr. Deacon here at that time.

Yours very truly,

CALERA MINING COMPANY
Blackbird Division

Re: Idm-E645, Docket DMEA 3143
Calera Mining Company

Dear Mr. Chambers:

I have discussed the audit of the Calera Mining Company, Idm-E645, with Mr. Weissenborn, the Executive Officer, and he feels that an audit made at a later date, after the drift is in the ore body, would give a better picture than an audit made at this time.

I will, therefore, await your instructions before scheduling the audit.

Yours very truly,

C. A. Turner, Auditor

NOV 17 1954

Mr. Charles A. Turner
DMEA Auditor
1201 North Division Street
Spokane, Washington

Dear Mr. Turner:

I have received a letter from E. D. Talbert under date of November 10, 1954, in which he calls my attention to a previous letter sent to you advising that an audit of Contract No. F645, Calera Mining Company, should be made as soon after December 9, 1954, as possible.

I have discussed the audit of this contract with the Division concerned and with the Deputy Administrator and both are of the opinion that the contract should not be audited at this time but should await further underground work, unless Mr. Weissenborn for some reason not known to us decides that an audit should be made.

The progress now being made at the mine indicates that better information might be obtained from an audit in February. Please discuss the matter with Mr. Weissenborn and let me know his reaction.

Sincerely yours,

Jay L. Chambers, Chief
Contract Administration
and Audit Division

AUG 24 1954

Mr. Charles A. Turner
DMEA Auditor
1201 North Division Street
Spokane 2, Washington

Dear Mr. Turner:

While discussing your audit program with Mr. Tulbert during our recent Denver meeting, you requested advice as to the contracts in Region II which required interim audits at specified times for "renegotiation" purposes.

The four contracts involved are as follows:

[illegible] Taylor-[illegible]

Amended contract dated February 1, [illegible], provides for contribution by the Government on the basis of agreed unit costs "for a period of one year from the date of this Amended Contract, and thereafter unless and until the Government, at its option, notifies the Operator that from the time fixed by the notice the Government will contribute to the incompleted portions of any of these work requirements on the basis of actual costs as set forth in Article 6(a) of the contract form".

Therefore, it will be necessary to perform an audit of the Operator's actual costs on February 1, 1955, and to expedite the preparation and submission of the audit report in order that any benefit by conversion to an actual cost basis may be promptly secured by the Government.

[illegible] Dunker Hill & Sullivan

Contract dated February 25, 1950, provides for contribution by the Government to the costs of exploration work (as distinguished from rehabilitation and preparatory work) on the basis of agreed unit costs "until two years from the date of this contract or until the drift on the 3,200 foot level has reached the point of departure of the crosscut referred to in Item VI of said exploration work, whichever occurs first, and thereafter unless and until the Government at its option, notifies the Operator that from the time fixed by the notice the Government will contribute to any incompleted work, in whatever category, only on the basis of actual costs".

Accordingly, it will be necessary for you to keep currently advised as to the progress of the drifting on the 3,200 foot level and to schedule an audit when the drifting reaches the point referred to above or, at the latest, on February 25, 1955. This audit report also must be expedited.

F-541, DMA-2079, Valeria

Short Form (Unit Cost) contract dated June 3, 1953, provides that upon the expiration of a first period (18 months from the first day of the calendar month next succeeding the date of commencement of the work) "the Operator shall provide the Government with a detailed computation of the actual unit cost of drifting and crosscutting (treated as one operation) performed under this contract during said period. The Government may audit said computations to the extent it sees fit, and shall have access to the Operator's books and records for this purpose. If the actual unit cost of drifting and crosscutting for the first period is less than $51.00 per foot, the actual cost for drifting and crosscutting shall be and become the agreed unit cost for drifting and crosscutting for the second period".

Since it appears that work started on this contract on October 16, 1953, the first period would expire on May 1, 1955. An audit should be scheduled promptly upon receipt from the Operator of the detailed computation required by the Contract.

F-645, DMA-3143, Calera

Contract dated December 9, 1953, provides for the Government to contribute on the basis of agreed unit costs "for a period of one year from the date of this contract, and thereafter--unless and until the Government, at its option, notifies the Operator that the Government will contribute to the incompleted portions of any of the work on the basis of actual costs as set forth in Article 6(a) of the contract".

Accordingly, an audit should be scheduled for performance shortly after December 9, 1954, and the audit report, of course, should be expedited.

It is suggested that you appropriately "flag" these contracts so that the dates, on which audits will be required, will not be overlooked. I think you also will find it beneficial to currently maintain pre-audit work sheets for these projects.

Sincerely yours,

(Signed) J. L. Chambers

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Spokane 8, Washington

Re: Docket No. D.M.A. 3143
Contract No. idr-1045

Dear Mr. Weissenborn:

Enclosed are the maps and assays pertinent to the D.M.A. Project No. 3143 for the month of March, 1955.

The 7400 Drift North was driven 294 feet on a three shift basis. Only 65 feet of this advance required timber. There were 11 sets of drift timber installed, and 11 feet of ground was spiled.

Ground conditions in this heading improved greatly during the month. Two small ore zones were encountered, one of which was of exceptional grade. A diamond drill hole was drilled to investigate this high grade zone.

Very truly yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. 1dr-E645

Dear Mr. Weissenborn:

We enclose herewith, the maps and assays covering the underground advance of the D.M.E.A. Project No. 3143 for the month of February, 1955.

The work of driving the 7400 Drift North, was continued on a three shift basis. Total advance in this heading amounted to 130 feet. Badly sheared and fractured ground continued to be a hindrance on the driving of the drift; 78 feet of the drift required the driving of spiling. During the month, a total of 28 sets of drift timber were used in the drift.

Two Diamond Drill holes were completed into the hanging wall of the Chicago Zone. Hole U-71-206 was drilled to a depth of 232 feet and intersected the mineralized zone that was exposed in the 500 surface trench. The zone was about 13 feet wide and consisted of Quartz and Pyrite mineralization, with minor Chalcopyrite and a trace of Cobalt. Hole U-71-205 was drilled to a depth of 455 feet and intersected only minor mineralization. Seventy-five feet at this hole was not charged to this contract.

Very truly yours,
Calera Mining Company
Blackbird Division

E. B. Douglas, Manager

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

D.M.E.A. Field Team
South 157 Howard Street
Spokane, Washington

Re: Docket No. D.M.E.A. 3143
Contract No. Idr-2645

Dear Mr. Kiesserborn:

We enclose herewith, the maps and assays covering the adverse of the D.M.E.A. Project No. 3143, for the month of December, 1950.

During the month, work was carried on only in Stage II of the project and consisted of the driving and the sampling of the Main Drift North. This heading continued to advance through a badly fractured schistose quartzite that required the driving of spiling on both sides and the back of the drift. In order to give close supervision to the operations, this work was carried on only by a day-shift crew. A total of eleven sets of spiled drift timber were placed.

Traces of Cobalt and Copper mineralization were found by the assaying of the seven samples that were taken.

Very truly yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Re: Project No. DMI-Idaho 3143
Contract No. [illegible]

Dear Mr. Wolcombers:

We enclose herewith the maps and diamond drill logs covering the activities of the Blackbird Project No. 3143 for the month of September, 1954.

Trenching continued during the month on the hanging wall zone. Work was done on 8 trenches, exposing approximately 1200 feet of bedrock. Several pods of mineralization were found.

Work on the 7400 Drift North was continued with the advance amounting to 116 feet for the month. The standing of drift timber continued and 21 sets were stood. The direction of the 7400 Drift North has been changed to a 12[illegible]W bearing.

Diamond drilling was completed in the tunnel behind north of the Drum Hear zone. Only three of the seven holes drilled in this area intersected mineralization of ore grade. Drilling is now in progress on the Indian Creek claim east of the Chicago zone.

Very truly yours,

CALERA MINING COMPANY,

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

REMARKS:

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Re: Docket No. D.M.E.A. 3143
Contract No. 4dm-E543

Dear Mr. Weissenborn:

We enclose herewith the daily and diamond drill logs covering the activities of the D.M.E.A. Project No. 3143 for the month of August, 1954.

At the first of the month, trenching was started on the Indian Quarts area and continued in this area most of the month crossing approximately 2,100 feet of bed rock. Several small zones of oxidization were found by this operation.

Diamond drilling was done in three surface holes, namely S-40, S-41, S-42. The S-42 incompleted. Several zones of mineralization were intersected by this diamond drilling. Total diamond drilling for the month amounted to 1,155 feet.

The driving of the 7400 Drift was resumed and this heading was advanced 93 feet on the D.M.E.A. account. In an effort to find fresh ground this drift was turned on a N.30°E. bearing at a point 125 feet from the old face. A 20 scale geological map of this work is enclosed.

Very truly yours,

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Re: Docket No. D.M.E.A. 3143
Contract No. 16m-3645

Dear Mr. Weissenborn:

We enclose herewith the reports covering the activities of the D.M.E.A. Project No. 3143 for the month of July, 1954.

Trenching continued intermittently during the month. A trench approximately 1,100 feet long east of the Chicago zone was nearly completed.

Surface diamond drilling continued in the garnet schist. The holes drilled in this area have all intersected a highly siliceous zone that contains low-grade cobalt and copper mineralization. The zone strikes about N30W and dips about 55° to the NE.

The 7400 Drift North was started at the end of the month on a line N30W from the 17,2[illegible] coordinate. There was no advance north of the D.M.E.A. boundary.

Very truly yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this report is correct and complete to the best of their knowledge and belief.

Date July 7, 1954 Operator Calera Mining Company

Per [signature] Title [signature]

REMARKS:

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

South 157 Howard Street
Spokane 4, Washington

Re: Docket No. DMEA 3143
Contract No. idm-E645

Dear Mr. Weissenborn:

We enclose herewith the reports covering the activities of the D.M.E.A. Project No. 3143 for the month of June, 1954.

Trenching was continued with the D-7 bulldozer for a total of 87 hours of bulldozer operation. The 763 Trench was opened up and approximately 350 feet of bedrock was exposed. The overburden in the western part of this trench was found to be approximately 20 feet deep.

Surface diamond drilling was completed for the present in the area northeast of the Brown Bear Ore Zone and was started in the garnet schist approximately a thousand feet east of the previous drilling. The first hole in the garnet schist intersected low grade cobalt mineralization.

Very truly yours,

CALERA MINING COMPANY

I certify that the above bill is correct and just and that payment therefor has not been received.

Date June 7, 1954 Payee Calera Mining Company

Per [signature] Title Vice President

*When a voucher is signed or receipted in the name of a company or corporation, the name of the person writing the company or corporate name, as well as the capacity in which he signs, must appear. For example: "John Doe Company, per John Smith, Secretary," or "Treasurer," as the case may be.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

Pursuant to authority vested in me, I certify that this account is correct and proper for payment in the amount of:

$ 8747 23

Signature [signature]
(Authorized Certifying Officer)

Date 6/23/54 Vou. No. 1194
(See other side)

(For Government use only)

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. E645 in accordance with the terms of the contract.

Signature /S/ Stephen W. Zoldok Title Mining Engr Date 6/17/54

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature /S/ Stephen W. Zoldok Title Mining Engr Date 6/17/54

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

June 3, 1954

Mr. A. E. Weissenborn
Executive Officer - Region 2
D. M. E. A. Field Team
South 137 Howard Street
Spokane 6, Washington

Re: Docket No. DMEA 3143
Contract No. AEC-E645

Dear Mr. Weissenborn:

We enclose herewith the reports covering the activities of the D.M.E.A. Project No. 3143 for the month of May, 1954.

Trenching was continued with the D-7 bulldozer, for a total of 225 hours of bulldozer operation. New bedrock exposed by this work during the month amounted to 2,500 feet. The average depth of overburden removed amounted to nine feet.

Diamond drilling was continued in the area northeast of the Prom Rim Ore Zone. Ore has been intersected in three of the core holes that were drilled during the month. The mineralized zone is trending approximately N45°W and appears to consist of small ore pods plunging NW. The logs of the core holes 4-30 and 5-31 are included herein.

Very truly yours,

CALERA MINING COMPANY

CERTIFICATION BY GOVERNMENT REPRESENTATIVE:

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating a Defense Minerals Exploration Administration project under Contract No. E6645 in accordance with the terms of the contract.

Signature /S/ Verdo Z Johnson Title Mining Engr Date 5/13/54

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature /S/ Stephen W Zoldok Title Mining Engr Date 5/13/54

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc.". The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

South 157 Howard Street
Spokane 4, Washington

Dear Mr. Weissenborn:

Re: Docket No. D.M.E.A. 3143
Contract No. 4dm-8643

We enclose herewith the reports covering the activities of D.M.E.A. project No. 3143 for the month of April, 1954.

Work with the D-7 bulldozer was continued and operated on a two-shift basis for a greater part of the month. Total time for the bulldozer operation amounted to 265 hours for April.

Bulldozer work was continued in the 798 Trench, making a total of over 1300 feet of bedrock exposed in this trench. Average depth of overburden was a little over 10 feet.

Bulldozer work was started in the 844 Trench and the 874 Trench. Overburden at the western end of the 844 Trench reached a depth of over 12 feet, whereas, the overburden along the 874 Trench averages approximately 9 feet in depth. A total of 1,120 feet of bedrock was exposed by the opening of these two trenches. Observation of the newly exposed bedrock revealed only minor mineralization.

Surface core drilling was started by drilling the first hole, S-29, at a minus 45° in the 796 Trench which was dug in 1953. The results of the balanced sludge and core assays from the first hole drilled were 39 feet of 1.19% cobalt and 3.38% copper. In an effort to determine the extent and dip of the mineralized zone, another core hole, S-30, is being drilled on the same vertical plane at minus 60° dip.

Very truly yours,

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

April 6, 1954

Mr. A. E. Weissenborn
Executive Officer, Region II
D.M.E.A. Field Team
South 157 Howard
Spokane 4, Washington

Dear Mr. Weissenborn:

Re: Docket No. D.M.E.A. 3143
Contract No. IDM - E 643

During the month of March, the 7400 Drift was advanced 11 feet. Since the zone of faulting continued to be present in the heading, advancing of the drift was most difficult and necessitated the driving of spiling with each set of timber that was stood.

It was decided in the early part of the month to stop driving the drift and diamond drill at the face of the 7400 Drift North. One hole was drilled on the line of the drift in search of firmer rock. This was not charged to the D.M.E.A. account. A 70 foot hole drilled eastward from the drift and a 28 foot hole drilled westward from the drift did not intersect ore. A week poor coring ground was encountered in all three of the diamond drill holes.

On March 9, surface trenching was started on the 798 trench. As of April 1, approximately 600 feet of bed rock has been exposed. The average depth of overburden was found to be approximately 10 feet, and the maximum depth of overburden was found to be 20 feet. The trench intersected a favorable appearing mineralized zone containing many small pods of gossan. This exposed gossan is approximately 800 feet north of the 7400 Drift North face. The bulldozing operation for the month amounted to 92½ hours of work.

Very truly yours,

CALERA MINING COMPANY

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

5 cy (a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

5 cy (b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

5 cy (c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the DMEA ~~Executive Officer~~ of the Region not later than the 15th of the month following. 1201 N. Division St., Spokane, Wn.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

CALERA MINING COMPANY

BLACKBIRD DIVISION

COBALT, IDAHO

March 4, 1954

Mr. A. E. Weissenborn
Executive Officer, Region II
D.M.E.A. Field Team
South 157 Howard
Spokane 4, Washington

Dear Mr. Weissenborn:

Re: Docket No. D.M.E.A. 3143
Contract No. IDM - E 645

During the month of February, the 7400 Drift North was advanced 94 feet in waste. At approximately 15 feet past the D.M.E.A. boundary, a large north striking fault was encountered, and west of this fault very bad ground was found that consisted of sheared and faulted schistose quartzite and altered dike material. Standing of drift timber was started at 10 feet past the D.M.E.A. line. To date, 27 sets have been stood, consisting of 38.3 feet of normal drift timbering, and 17.0 feet of spiling, making a total of 84.3 feet of drift timbered during the month.

The work was started in this heading on a two-shift basis; then on February 8, three shifts were started and continued throughout the month.

Very truly yours,

CALERA MINING COMPANY
BLACKBIRD DIVISION

Re: Docket No. DMEA-3143 (Cobalt and Copper)
Blackbird Mine
Lemhi County, Idaho
Contract No. Ida-3645

Gentlemen:

Thank you for your royalty payment of $4,315.58 which was received during November. This repays in full the Government's participation of $185,863.88 in your exploration contract for cobalt and copper.

As a result of this repayment the Government retains no lien or claim against the property or on any future production.

Congratulations on the successful exploration. It has been a pleasure to participate with you in this undertaking.

Sincerely yours,

FRANK E. JOHNSON

CERTIFICATION BY THE UNITED STATES OF AMERICA
OF A DISCOVERY OR DEVELOPMENT UNDER
AN EXPLORATION PROJECT CONTRACT

To: Calera Mining Company
Cobalt, Idaho

Pursuant to the provisions of Exploration Project Contract No. Ida-E645, executed December 9, 1953, (Docket No. DMEA 1143) as amended, hereinafter called the "Contract", between Calera Mining Company, a corporation, and the United States of America, hereinafter called the "Government"; to establish and fix the Government's royalty on production and its lien therefor and on the land described in the contract, the Government considers and therefore certifies that a discovery or development from which production may be made has resulted from the exploration.

The nature of said discovery or development is described broadly or indicated as follows:

Bulldozer trenching, surface and underground diamond core drilling, and drifting and crosscutting on the 7400 level of the Blackbird mine have indicated the presence of cobalt-copper ores, occurring in veins and lenses in fractured and sheared zones traversing quartzites and schists.

Re: Project No. [redacted] - Cobalt and Copper
Blackbird Mine
[redacted] County, Idaho
Contract No. [redacted]

Gentlemen:

Enclosed is a certification of discovery or development which covers all the land described in Article 2 of the contract.

By the terms of the Exploration Project Contract, as amended, out of the certification all minerals mined or produced from December 9, 1953, to December 9, 1956, are subject to the Government's percentage royalty as set forth in the contract until the sum of $187,063.08 is paid.

You should continue to make royalty payments, as in the past, to Mr. A. T. Weisenborn, Executive Officer, DMEA Field Team, Region I, Room 357 Denver Block, Spokane 8, Washington. The payments should be accompanied, as has been customary, by suitable evidence showing price, quantity and grade of the product sold, with deductions certified to be correct by you.

You are requested to notify Mr. Weisenborn of any changes in ownership or production rights that might have any effect on the Government's right to its percentage royalty. Also, if production ceases at any time for any extended period, please notify Mr. Weisenborn at [redacted] month intervals that no production has been made, when this is the case.

Sincerely yours,

Re: Project No. DMEA 3143, Cobalt-copper
Calumet Mining Company
Standard mine
Lemhi County, Idaho
Contract No. DMEA-[illegible]

Dear Mr. Fredell:

Enclosed is a copy of a certification of discovery, or development toward under the subject contract.

Contract No. DMEA-[illegible] for the exploration of the Standard mine cobalt-copper deposits was executed December 9, 1953. Expenditures up to $1,407,320.00 were authorized by the contract as amended, of which the Government's share at 70 percent was $985,124.00. Cost of the work completed was $1[illegible],513.83, of which the Government's share was $1[illegible],[illegible].

The object of the exploration program was to test the possible cobalt and copper occurrences in veins and lenses along zones of fracturing and shearing in quartzites and argillites. The program employed bulldozer trenching, surface and underground diamond drilling, drifting and crosscutting, to explore the mineralized zones.

The contract, as amended, provided for 564 hours of bulldozer trenching, 8,276.5 feet of surface diamond drilling, 11,214.35 feet of underground diamond drilling, and 6,000 feet of drifting and crosscutting.

Work completed consisted 564 hours of bulldozer trenching, 8,276.5 feet of surface diamond drilling, 7,283.5 feet of underground diamond drilling, and 3,369.0 feet of drifting.

A preliminary approximation of reserves of cobalt-copper ore discovered by project work is more than 700,000 tons of ore, averaging 0.60 percent cobalt and 2.23 percent copper.

Sincerely yours,

Frank E. Johnson

TERMINATION AGREEMENT

It is agreed this 2nd day of January, 1957, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and Calera Mining Company, hereinafter called the "Operator," parties to Exploration Project Contract No. Idm-E646 (Docket No. DMEA-3143), dated December 9, 1953, as amended, that:

1. Effective 12:01 a.m. December 9, 1956, the Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

2. The Government shall contribute only to the agreed unit costs of work performed prior to December 9, 1956.

3. The Operator shall promptly perform all winding-up and settlement actions provided for in the Contract, including the rendering of the final report and final account.

4. The Operator hereby releases and agrees to save the Government harmless from all claims or demands by the operator under or arising out of said Contract, except as otherwise provided in this termination agreement.

5. All rights of the Government provided for in the Contract with respect to certification of discovery or development, percentage royalty and liens for its payment, records, audits, and recovery of any overpayment, are preserved.

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

AMENDMENT NO. 4
to
EXPLORATION PROJECT CONTRACT Idm-E645
Dated December 9, 1953
DOCKET NO. DMEA-3143
between
THE UNITED STATES OF AMERICA
and
CALERA MINING COMPANY

It is agreed this 12th day of March, 1956, that the Contract is further amended as follows:

1. In Amendment No. 2, delete the second paragraph in Footnote 1/, and substitute the following:

"If it is necessary to replace a rock bolted section with normal timbering, only the difference between the allowable cost per foot of rock bolting and the allowable cost of $7.00 per foot of normal timbering and/or rock bolting shall be an allowable cost."

2. In Article 3 of the contract form, the period for completion of the work is further extended from "24 months" to "36 months."

3. In Article 10 of the contract form, that part of the second sentence beginning with the word "Provided" is deleted.

4. In Annex II to the Contract, the period for royalty payments is extended to thirteen (13) years from the date of the Contract; that is, to December 9, 1966.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate amount which the Government may be required to contribute, nor the agreed unit cost of any item of work.

MAR 14 1956

Mr. Vinton H. Clarke, Vice President
Calera Mining Company
730 Fifth Avenue
New York 19, New York

Re: Docket No. DMEA-1143,
Cobalt-Copper
Blackbird Mine
Lemhi County, Idaho
Contract No. Ida-2645

Dear Mr. Clarke:

Reference is made to your letter of March 1, 1956, and, insofar as it concerned the subject project, to our conference here in Washington on March 8, that was also attended by Messrs. Malmed and Roper from your company and Messrs. Johnson, Selfridge, and Martin from the DMEA staff.

This letter will confirm that we are sending to Mr. Weissenborn, for your approval, a proposed Amendment No. 4, which differs from the proposed Amendment No. 4 that you returned to Mr. Weissenborn with your letter of February 9 in that the new proposed Amendment No. 4 does not substitute Annex III for Annex II. Item 4 thereof, however, extends the period for royalty payments in Annex II by one year; that is, the new Item 4, like the former Item 4, changes the period for royalty payments from 12 years to 13 years from the date of the contract.

With respect to the manner of computing royalty payable to the Government, you were advised that computation of royalty under the subject contract would depend in the case of your copper concentrates on the information provided by your smelter settlement sheets.

In the case of your cobalt concentrates, for the preliminary ship[illegible] we are agreeable to using the same value which you estimate as gross revenue to mining operations for income tax purposes. Such preliminary payments shall be subject to adjustment when the Internal Revenue Service shall have approved or adjusted your same estimated gross value.

Sincerely yours,

E. O. Millenbach

Administrator

March 1st, 1956

Mr. C. O. Mittendorf, Administrator
Defense Minerals Exploration Administration
Washington 25, D. C.

Dear Mr. Mittendorf:

Mr. A. E. Weissenborn has advised me that you will require a letter stating our reasons for objecting to wording in the proposed Amendment No. 4 to our Exploration Contract.

Will you please refer to the Memorandum of Understanding between Mr. E. B. Douglas and Mr. Weissenborn, under date of February 6th, 1956. As is stated therein, our objections are based on the fact that Annex III, which is a part of proposed Amendment No. 4, alters drastically the meaning of Article 9 of the original contract. May I illustrate this by using the following example of future royalty payments on production:

Assume grade of 0.71% Co(1), 1.31% Cu(1)
Mill recoveries 75% Co, 90% Cu

Terms of Original Contract:

Recovered Cobalt(2) per ton at mill 10.66# @ $1.35	-	$14.39
Recovered Copper (3) per ton at mill 23.58# @ .33	-	7.78
Net smelter returns		$22.17
Royalty @ 5% max.	=	1.11/ton
Royalty per month @ 26,000 tons/mo.		$28,900.00

Terms of Annex III of Proposed Amendment No. 4:

Annex III does not allow for cobalt concentrate transportation, refining costs, depreciation and metal marketing.

Recovered cobalt per ton at refinery 10.66#x.90x2.60	=	$24.94
Recovered copper per ton at mill 23.58#x.33	=	7.78
Gross returns		$32.72

/alty @ 5% max. = $ 1.64
oyalty per month @ 26,000 tons $42,640.00

(1) Per ore reserve grade
(2) Cobalt concentrates shipped to Calera Refinery, Garfield, Utah
(3) Copper concentrates to A.S.& R. Smelter, Garfield, Utah

The above comparative figures are estimates, of course, and will change with varying metal prices, recoveries, and refinery and smelting costs, but are indicative of the magnitude of royalties which may be involved with full production from the areas now being explored. A royalty increase of over 47% is indicated under the provisions of the proposed Amendment, in addition to the fact that the term of contract has been increased one (1) year, to a total of thirteen (13) years.

Actually there is little likelihood that we will not have paid off the full loan from production long before the thirteen-year period has elapsed. However, payment of royalties of the magnitude above-indicated over a short time period would be extremely burdensome in our high cost operation. We, therefore, request that the terms of Article 9 of the original contract be retained in Amendment No. 4.

Yours sincerely,

/s/ VINTON H. CLARKE
Vice-President

Changes and Modifications

In Exhibit "A" of the contract under Description of the Work, Stage II, Underground Work,

add

"800 feet of diamond drilling may be done at approximately 25-foot intervals in those areas where the vein is extensively faulted and close drilling may be required to indicate the continuity of the vein. Such drilling is to be done only with the approval of the Government."

RECEIVED
SEP - 2 1955

Exploration Project Contract Idm-E645
Calera Mining Company
Docket No. DMEA 3143 (cobalt-copper)

Justification for Amendment No. 3

Underground diamond drilling at 100-foot intervals may not pick up faulted vein segments if the offsetting faults cut the vein at small angles. Mineralized vein segments may be lost if drilling at 100-foot intervals is adhered to.

The cobalt ore also occurs in pods having a short strike length. It is in the interest of the Government to drill at shorter, even 25-foot, intervals if the presence of an ore body is indicated by the results of prior drill holes.

CALERA MINING COMPANY
Exploration Project Contract Idm-E645
Docket No. DMEA-3143 (cobalt-copper)

AMENDMENT NO. 1

Exhibit "F"

Changes and modifications:

1. In Exhibit "A" of the contract under Description of the Work, Stage I, Surface Diamond Drilling,

delete - "Surface Diamond Drilling"

substitute - "Surface and Underground Diamond Drilling"

delete - "approximately 8,700 feet of diamond drilling"

substitute - "8,576.5 feet of surface diamond drilling"

delete - "an estimated 1,700 feet" (of reaming and cementing)

substitute - "1,145 feet" (of reaming and cementing)

add paragraph- "Drill two underground drill holes totaling 664.38 feet.

"Hole 1 will be collared in the face of an intermediate drift off the 7100 level at approximate coordinates 15,190N, 4,687E at plus 20 degrees inclination, bearing N. 63° E.; the Government will not participate in the cost of the first 75 feet of Hole 1, which lies southwest of the DMEA boundary, as stated in Annex I of the contract.

"Hole 2 will be drilled from the face of an intermediate drift at approximate coordinates 15,077N, 4,975E at plus 20 degrees inclination, bearing N. 27° E.

"Sampling procedures, etc., shall be the same as those described above."

2. Under Estimated Costs of the Project, Agreed Unit Costs, Stage I,

delete	-	Surface Diamond Drilling - 8,700 feet @ $6.96/ft.	$60,552.00
substitute	-	Surface Diamond Drilling - 8,576.5 feet @ $6.96/ft.	59,692.44
delete	-	1,700 feet of reaming and cementing @ $2.50/ft.	4,250.00
substitute	-	1,145 feet of reaming and cementing @ $2.50/ft.	2,862.50
add	-	Underground Diamond Drilling - 664.38 feet @ $3.3822/ft.	2,247.06

Exploration Project Contract Idm-E645
Calera Mining Company
Docket No. DMEA-3143 (cobalt-copper)

Justification for Amendment No. 1

The diamond drilling outlined in this amendment will be used to explore for a vein which was found on the surface by trenching. The projection of this vein is within 200 to 300 feet from workings off the 7100 level. This vein can be explored at depth from these workings at less cost and with better results than from the surface locations. This amendment does not increase the costs allowed in the contract.

EXPLORATION PROJECT CONTRACT [1]

IT IS AGREED this 9th day of December, 195 3, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and [2] Calera Mining Company, a corporation duly organized and existing under and by virtue of the laws of the State of New Jersey, Cobalt, Idaho

hereinafter called the "Operator," as follows: ~~and as set forth in Annexes I, II and III attached~~ hereto and made a part hereof

ARTICLE 1. *Authority for contract.*—This agreement is entered into under the authority of the Defense Production Act of 1950, as amended, pursuant to DMEA Order 1 entitled "Government Aid in Defense Exploration Projects."

ARTICLE 2. *Operator's property rights.*—With respect to that certain land situated in the State of Idaho, County of Lemhi, described as ~~follows~~ [3] set forth in Annex I and on Map No. 2

the Operator represents and undertakes: [4]

(*a*) That the Operator is the owner, in possession and entitled to possession, ~~[illegible]~~ and there are no encumbrances

(*b*) ~~[illegible]~~.

The Operator shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of the exploration project without any allowance for the use, rental value, depreciation, depletion, or other cost of acquiring, owning, or holding possession thereof.

ARTICLE 3. *Exploration project.*—The Operator, within 70 days from the date of this contract shall commence work on a project of exploration for [5] Cobalt-Copper

in or upon the described land; and shall bring the project to completion within a period of 24 months from the date of this contract. The work to be performed is more fully described in Exhibit "A" attached hereto, which, with any maps or drawings thereto attached, are made a part of this contract. The Government will contribute to the cost of this work as hereafter provided.

ARTICLE 4. *Performance of the work.*—(*a*) *Operator's responsibility.* The work shall be performed efficiently, expertly, in a workmanlike manner, in accordance with good mining standards and State regulations for health and safety and for workmens' compensation and employers' liability insurance, with suitable and adequate equipment, materials, and labor, to bring the project to completion within the time fixed. To the extent specified in Exhibit "A," attached hereto, the work may be performed by independent contractor or contractors; and work not specified in Exhibit "A" for performance by independent contractor may nevertheless be so performed upon amendment of Exhibit "A," as agreed to by the parties, to state the work to be so performed and the estimated unit costs thereof, as provided hereafter.

(*b*) *Independent contracts.*—Any independent contract for the performance of work shall be on a unit-price basis (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved), or on some basis that will indicate the amount due for work performed at any stage of the work to be performed under such independent contract. The Government shall not be nor be considered to be a party to any such independent contract, and the Government's right to terminate the exploration project contract under any of its provisions shall not in any manner be affected by reason of any such independent contract. If the reference in Exhibit "A" to any such independent contract states that the Government's approval thereof is required, the Government may refuse to participate in the cost thereof unless and until it has given its written approval of the independent contract.

(*c*) *Government may inspect.*—The Government shall have the right to enter and observe and inspect the work at all reasonable times, and the Operator shall provide the Government with all available means for doing so. The Government may consult with and advise the Operator on all phases of the work.

ARTICLE 5. *Estimated costs of the project.*—A statement of the estimated cost of the project is set forth in Exhibit "A," attached hereto. Except insofar as any item of requirement or the estimated cost thereof set forth in Exhibit "A" is there or elsewhere designated as an "allowable maximum," such items of requirement and of related cost are estimates only, and may be exceeded to the extent that the Government may from time to time approve for the most economic and beneficial performance of the work within the limitation of the total aggregate estimate of costs. The Government's approval of any such excess over the estimate for an item of requirement or related cost will be signified by its approval and payment of any invoice or voucher for payment which expressly calls attention to such excess. Items expressly designated in Exhibit "A" or elsewhere as "allowable maximum," and the total aggregate estimated cost are limitations, and any excess therein will be for the sole account of the Operator in which the Government will not participate.

ARTICLE 6. *Allowable costs of the project.*—(*a*) The costs of the project in which the Government will participate are limited to the following: and also the costs referred to in Article 13.

(1) *Independent contracts.*—Payments to independent contractors under independent contracts listed in Exhibit "A." The estimated cost of any work to be performed under an independent contract is or shall be included in the estimate of costs in Exhibit "A" in terms of the estimated numbers of units of work to be performed, the estimated amount to be paid per unit, and the estimated total amount to be paid to the independent contractor, and such estimates shall be allowable maximums above which the Government will not contribute. Regardless of the provisions of any such independent contract, the Government will participate in the payments to the independent contractor only on account of work actually performed and that conforms with the provisions of the exploration project contract, and only to the extent that the Government deems the unit prices for the work under the independent contract to be reasonable and necessary. No such independent contract shall have the effect of increasing the estimated total cost of the exploration project contract nor the maximum amount which the Government will pay as provided in the exploration project contract.

(2) *Labor, supervision, consultants.*—Labor, supervision and technical services (including engineering and geological consultants), a schedule of which is included in the estimate of costs set forth in Exhibit "A." The requirements and related estimated costs for supervision and technical services are allowable maximums.

(3) *Operating materials and supplies.*—Necessary materials and supplies including items of equipment costing less than $50.00 each, and power, water, and fuel, a schedule of which is included in the estimate of costs in Exhibit "A."

(4) *Operating equipment.*—Any operating equipment to be rented or purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or the allowable depreciation, as the case may be, a schedule of which is included in Exhibit "A." Any items listed as owned and to be furnished by the Operator, and related ~~initial~~ allowable depreciation, are allowable maximums.

(5) *Rehabilitation and repairs.*—Any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and to be devoted to the purposes of the exploration contract, a schedule of which is included in the estimate of costs set forth in Exhibit "A." These items are allowable maximums.

(6) *New buildings, improvements, installations.*—Any necessary buildings, fixed improvements, or installations to be purchased, installed, or constructed for the purposes of the exploration work, with the estimated cost of each, a schedule of which is included in the estimate of costs in Exhibit "A." All of these items are allowable maximums.

(7) *Miscellaneous.*—Repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance and payroll taxes.

(8) *Contingencies.*—Such other necessary, reasonable direct costs of performing the exploration work, within the limit of the total aggregate estimate of costs, whether or not included in any schedule of costs in Exhibit "A," as may be approved by the Government in the course of the work, as indicated by its approval and payment of invoices and vouchers.

[1] If sufficient space is not provided in any blank, use an extra sheet of paper and [illegible]
[2] State name, address, and nature of [illegible]
[3] [illegible]

(*b*) The Government's payments in all cases will be based on actual, necessary costs (including contract unit prices) incurred not in excess of any "allowable maximum," and not in excess of the fixed percentage of the total aggregate estimated cost. Costs will be considered to be incurred only as they are or become due and payable.

(*c*) No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes) or any other indirect costs, or work performed or costs incurred before the date of this contract, shall be allowed as costs of the project in which the Government will participate.

ARTICLE 7. *Reports, accounts, audits.*—(*a*) *Progress reports.* The Operators shall provide the Government with monthly reports of work performed and costs (including contract unit prices) incurred under the contract, in quintuplicate (five copies), upon forms provided by the Government. These progress reports shall be certified by the Operator, and shall constitute both the Operator's invoice of costs incurred on the project during the period covered by the report and his voucher for repayment by the Government, unless the Government requires the use of a standard voucher form with invoice attached. Progress reports shall include surface and/or underground engineering-geological maps or sketches showing the progress of the exploration, with assay-reports on samples taken concurrently with the advance in mineralized ground.

(*b*) *Final report.*—Upon completion of the exploration work or termination of the contract the Operator shall provide the Government with an adequate geological and engineering report, in quintuplicate (five copies), including an estimate of ore reserves resulting from the exploration work.

(*c*) Compliance with requirements.—If, in the opinion of the Government, any of the Operator's reports are insufficient or incomplete, the Government may procure the making or completion of such reports and attachments as an expense of the exploration work; and the Government may withhold approval and payment of any vouchers depending upon insufficient or incomplete reports.

(*d*) *Accounts and audits.*—The Operator shall keep suitable records and accounts of operations, which the Government may inspect and audit at any time. The Government may at any time require an audit of the Operator's records and accounts by a certified public accountant, the cost thereof to be treated as a cost of the project. The Operator shall keep and preserve said records and accounts for at least 3 years after the completion of the project or the termination of this contract. Upon the completion of the project or termination of the contract the Operator shall render a final account as provided in Article 12.

ARTICLE 8. *Payments by the Government.*—(*a*) The Government will pay 70 percent of the allowable costs incurred, as they accrue, in an aggregate total amount not in excess of $285,138.00, which is 70 percent of $407,340.00, the agreed, estimated total cost of the project in which the Government will participate; *Provided,* that until the Operator's final report and final accounting have been rendered to the Government, and any final auditing required by the Government has been made, and a final settlement of the contract has been made, the Government may withhold from the last voucher or vouchers such sums as it sees fit not in excess of ten (10) percent of the maximum total which the Government might have been called upon to pay under the terms of the contract.

(*b*) The Government may make any payment or payments direct to independent contractors and to suppliers, for the account of the Operator, rather than to the Operator.

ARTICLE 9. *Repayment by Operator.*—(*a*) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than 6 months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) percent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) percent of any such net amounts, plus one-half (½) percent of such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such net amounts.

(For instance: The percentage royalty on a net amount of five dollars ($5.00) per ton would be one and one-half (1½) percent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(*b*) As here used, "net smelter returns," "net concentrator returns," and "other net amounts realized from the sale or other disposition," mean gross revenue from sales; or if not sold, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income-tax determination.

(*c*) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(*d*) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations. See Annex II, substituted for Article 9.

ARTICLE 10. *Assignment, transfer, or loss of Operator's interest.*—Without the written consent of the Government, the Operator shall not assign or otherwise transfer or hypothecate this contract or any rights thereunder. The Operator shall not make any voluntary nor permit any involuntary transfer or conveyance of the Operator's rights in the land described in Article 2, without making suitable provision for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof; *Provided,* that mere failure by the Operator to maintain the Operator's rights in the land, without any consideration running to the Operator other than relief from the cost of maintaining such rights (as by surrender of a leasehold, failure to perform assessment work, or failure to exercise an option), coupled with complete abandonment by the Operator of all interest in or operations on the land for a period of 10 years from the date of this contract, shall not constitute such a transfer or conveyance. Should the Operator make or permit any transfer or conveyance in violation of this provision, the Operator shall be and remain liable for payment to the Government of the same amounts, at the same times, as would have been paid under the terms of the percentage royalty on production. If for any reason the net smelter returns, net concentrator returns, or other net amounts realized from the sale or other disposition of such production are not available as a means of measuring the amount of the Operator's liability, the amount thereof shall be estimated as well as may be, and in the event of dispute as to such estimates, the determination thereof by the Administrator of Defense Minerals Exploration Administration or by his successor shall be final and binding upon the Operator. Number "10" is replaced by "12"

ARTICLE 11. *Title to and disposition of property.*—All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.

ARTICLE 12. *Termination and completion.*—The Government may, at any time, by written notice to the Operator, terminate this contract: (*a*) If the Operator fails to provide his share of the money necessary to prosecute operations pursuant to the terms of the contract; (*b*) if the Operator, in the opinion of the Government, fails to prosecute operations pursuant to the terms of the contract; or (*c*) if in the opinion of the Government, operations up to the time of the notice have not indicated the probability of making any worth while discovery and in the opinion of the Government further operations are not justified. Upon the completion of the project or any termination of the contract the Operator shall dispose of any remaining materials, supplies, facilities, buildings, fixtures, and equipment in which the Government has an interest, for the joint account of the Operator and the Government in the proportion of their respective interests; shall render to the Government a full and final accounting of his operations under the contract and his expenditures of money; and shall pay to the Government its pro rata share of any money remaining.

ARTICLE 13. *Changes and added provisions.* To the extent that costs are set forth in Exhibit "A" as "agreed unit costs," they are in lieu of the actual costs that would otherwise be allowable costs of the project as provided in Article 6(a) of the contract form. (and see Annex III)

attach or the produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) percent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) percent of any such net amounts, plus one-half (½) percent of such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such net amounts.

(For instance: The percentage royalty on a net amount of five dollars ($5.00) per ton would be one and one-half (1½) percent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(*b*) As here used, "net smelter returns," "net concentrator returns," and "other net amounts realized from the sale or other disposition," mean gross revenue from sales; or if not sold, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income-tax determination.

(*c*) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(*d*) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations. See Annex II, substituted for Article 9.

ARTICLE 10. *Assignment, transfer, or loss of Operator's interest.*—Without the written consent of the Government, the Operator shall not assign or otherwise transfer or hypothecate this contract or any rights thereunder. The Operator shall not make any voluntary nor permit any involuntary transfer or conveyance of the Operator's rights in the land described in Article 2, without making suitable provision for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof; *Provided,* that mere failure by the Operator to maintain the Operator's rights in the land, without any consideration running to the Operator other than relief from the cost of maintaining such rights (as by surrender of a leasehold, failure to perform assessment work, or failure to exercise an option), coupled with complete abandonment by the Operator of all interest in or operations on the land for a period of 10 years from the date of this contract, shall not constitute such a transfer or conveyance. Should the Operator make or permit any transfer or conveyance in violation of this provision, the Operator shall be and remain liable for payment to the Government of the same amounts, at the same times, as would have been paid under the terms of the percentage royalty on production. If for any reason the net smelter returns, net concentrator returns, or other net amounts realized from the sale or other disposition of such production are not available as a means of measuring the amount of the Operator's liability, the amount thereof shall be estimated as well as may be, and in the event of dispute as to such estimates, the determination thereof by the Administrator of Defense Minerals Exploration Administration or by his successor shall be final and binding upon the Operator. Number "10" is replaced by "12"

ARTICLE 11. *Title to and disposition of property.*—All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.

ARTICLE 12. *Termination and completion.*—The Government may, at any time, by written notice to the Operator, terminate this contract: (*a*) If the Operator fails to provide his share of the money necessary to prosecute operations pursuant to the terms of the contract; (*b*) if the Operator, in the opinion of the Government, fails to prosecute operations pursuant to the terms of the contract; or (*c*) if in the opinion of the Government, operations up to the time of the notice have not indicated the probability of making any worth while discovery and in the opinion of the Government further operations are not justified. Upon the completion of the project or any termination of the contract the Operator shall dispose of any remaining materials, supplies, facilities, buildings, fixtures, and equipment in which the Government has an interest, for the joint account of the Operator and the Government in the proportion of their respective interests; shall render to the Government a full and final accounting of his operations under the contract and his expenditures of money; and shall pay to the Government its pro rata share of any money remaining.

ARTICLE 13. *Changes and added provisions.* To the extent that costs are set forth in Exhibit "A" as "agreed unit costs," they are in lieu of the actual costs that would otherwise be allowable costs of the project as provided in Article 6(a) of the contract form. (and see Annex III)

EXPLORATION PROJECT CONTRACT
CALERA MINING COMPANY
DOCKET NO. DMEA-3143

ANNEX I

With respect to the land referred to in Article 2 of the contract form, the Calera Mining Company owns the following 17 patented and 12 unpatented mining claims, which are recorded in the Court House at Salmon, Lemhi County, Idaho.

Patented Mining Claims	Patent No.
Anna	1592
Blacktail	1592
Blacktail No. 2	1592
Brown Bear	1592
Buckeye	1592
Catherine	1592
Dandy	1592
Dandy No. 2	1592
Idaho	1592
Iowa	1592
Lemhi	1592
St. Louis	1592
McKinley	1980
Indian Quartz	2009
Anaconda*	2557
Copper Gold	2557
Panther*	2557

*Only those portions of the Anaconda and Panther claims which overlap the Copper Gold claim are included in this agreement.

Unpatented Mining Claims	Book No.	Page No.
Jaycee	1	607
Chelan	2	64
Chelan No. 1	2	63
Chelan No. 2	2	251
Chelan No. 3	2	252
Chelan No. 7	2	263
Chelan No.15	2	283

Unpatented Mining Claims	Book No.	Page No.
Chelan No. 4	3	519-520
Chelan No. 5	3	520
Old Gold	3	2
Chelan No. 57	4	25
Chelan No. 85	4	221
Jaycee Amended	4	222
Old Gold Amended	4	229

Should the Operator obtain an interest in the Queen claim set forth on Map No. 2, it shall be included in the claims listed in Article 2.

All minerals mined or produced from presently developed ore bodies, with their extensions to depth, occurring below planes Nos. 1, 2, 3, and 4, hereinafter described (the traces of which on the 7100 and 7400 Levels are shown on Maps 2, 3, and 4) are exempt from the royalty payment provisions of Article 9; all other minerals mined or produced from the claims set forth in this Annex I are subject to these royalty payment provisions.

Plane #1. Strikes E-W, dips 38° N.; intersects the 7400-foot level at coordinate 17290 N. (coordinates are shown on the attached maps) and the 7100-foot level at coordinate 17670 N.; is bounded on the west by vertical planes through the southwest side of the Blacktail No. 2; is bounded on the east by its intersection with plane #2 at coordinates 17290 N., 3340 E. on the 7400-foot level, and coordinates 17670 N., 3360 E. on the 7100-foot level.

Plane #2. Strikes S. 30° E. dips 55° NE; goes from its intersection with plane #1, at coordinates 17290 N., 3340 E. on the 7400-foot level, and 17670 N., 3360 E. on the 7100-foot level, S. 30° E, to its intersection with plane #3, at coordinates 14910 N., 4720 E. on the 7400-foot level, and 15100 N., 4850 E. on the 7100-foot level.

Plane #3. Strikes S. 77° E., dips 55° NE; goes from its intersection with plane #2 at coordinates 14910 N., 4720 E. on the 7400-foot level, and 15100 N., 4850 E. on the 7100-foot level, S. 77° E, to the intersection with plane #4, at coordinates 14640 N., 5900 E, on the 7400-foot level, and 14860 N., 5890 E. on the 7100-foot level.

Plane #4. Strikes S. 25° E., dips 75° NE; goes from its intersection with plane #3, at coordinates 14640 N., 5900 E. on the 7400-foot level, and 14860 N., 5890 E. on the 7100-foot level, S. 25° E. to its intersection with a vertical plane through the east side of the Idaho claim, and the north side of the Monitor claim and the west side of the Little Queen claim.

ANNEX II

The following provisions are in lieu of Article 9 :

Repayment by Operator.--a. Certification.--If at any time the Government considers that a discovery or development from which production may be made has resulted from the exploration work, the Government, at any time not later than six months after the Operator has rendered the final report and final account, may so certify in writing to the Operator. Such certification shall describe broadly or indicate the nature of the discovery or development.

b. Percentage royalty.--The Operator, or his successor in interest, shall pay to the Government a royalty on all minerals mined or produced from the land described in Article 2,--(1) regardless of any certification of discovery or development, from the date of the contract until the lapse of the time within which the Government may make such certification of discovery or development, or until the total net amount contributed by the Government, without interest, is fully repaid, whichever occurs first, unless the Government waives its right to a royalty; or (2) if the Government makes a certification of discovery or development, for a period of ten *years (or other period fixed by this contract) from the date of the contract, or until the total net amount contributed by the Government, without interest, is fully repaid, whichever occurs first. Said royalty shall be a percentage of the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production (including any bonuses), in whatever form disposed of, including ore, concentrates, or metal, as follows:

(a) One and one-half ($1\frac{1}{2}$) per cent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(b) One and one-half ($1\frac{1}{2}$) per cent of any such net amounts, plus one-half ($\frac{1}{2}$) per cent of such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) per cent of such net amounts.

(For instance: the percentage royalty on a net amount of five dollars ($5.00) per ton, would be one and one-half ($1\frac{1}{2}$) per cent; on a net amount of ten dollars ($10.00) per ton, three and one-half ($3\frac{1}{2}$) per cent.)

c. Definitions.--As here used, "net smelter returns", "net concentrator returns", and "other net amounts realized from the sale or other disposition", mean gross revenue from sales; or if not sold, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income tax determination.

d. Lien for Payment.--To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

e. Notice to Purchasers.--The Operator shall notify any purchaser of the production of the Government's royalty interest, and shall authorize and direct the purchaser to pay the royalty directly to the Government and to furnish the Government with copies of the settlement sheets; but failure or refusal by the purchaser to comply shall not relieve the Operator of liability to pay any royalty falling due.

f. No Obligation to Produce.--This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

*Wherever the number "10" appears, it is replaced by the number "12".

ANNEX III */

Materials and Supplies. For the purpose of determining the Government's interest in materials or supplies remaining upon any termination of the work, they shall be considered in groups or categories (such as pipe, or explosives, or rails, or drill steel), and if the original cost of the remaining unexpended portion of any such group or category exceeded $50, the Government shall have an interest therein as provided in Article 11 of the contract form.

Equities in Equipment. Unless expressly permitted by provisions in Exhibit "A", the operator shall not procure equipment or any other item under a rental-purchase agreement, an installment-purchase agreement, any agreement which creates or builds up an equity or interest in the thing procured which can be converted to legal title only by further payment or some other consideration, or any agreement other than for straight rental or cash purchase and delivery.

Preservation of Property. Until the final disposal of any equipment or other property in which the Government has an interest or equity, the operator shall preserve and protect same for the mutual best interests of the parties, any reasonable and necessary cost thereof to be treated as an allowable cost of the exploration work to which the Government will contribute.

*/ The provisions in this annex apply only to materials and supplies, equipment, and property to the cost of which the Government has contributed on an actual cost basis; they have no application to costs contributed to on a unit-cost basis.

The Operator's obligation to bring the project to completion continues only as long as the units of work provided for in the contract are sufficient to accomplish the work required, and as long as the accumulated costs of the work, whether unit costs or actual costs, do not exceed the total estimated.

EXPLORATION PROJECT CONTRACT
CALERA MINING COMPANY
DOCKET NO. DMEA-3143

EXHIBIT "A"

Description of the Work

The following maps are attached to the contract:

Map No. 1. Index map showing location of the Blackbird Mining District in Lemhi County, Idaho.

Map No. 2. Claim map of the claims owned by the Calera Mining Company and the Northfield Mines, outlining claims included in the exploration area and traces of cut-off planes or boundary lines (Annex I) separating the present production area from the exploration area.

Map No. 3. Underground workings of the Calera Mining Company in plan and longitudinal section, indicating proposed underground exploration work and traces of cutoff planes or boundary lines (Annex I) separating the present production area from the exploration area.

Map No. 4. General surface map showing location of proposed trenching and surface diamond drill holes and traces of cutoff planes or boundary lines on the 7100 and 7400 Levels separating the present production area from the exploration area.

Nine section maps (A-A') (B-B') (C-C') (D-D') (E-E') (F-F') (G-G') (H-H') (I-I'), showing inclination and depth of proposed diamond drill holes.

This project will be divided into the following two stages:

Stage I

In this stage as indicated on Map No. 4, the work will consist of:

Trenching:

Surface trenching with a D-7 bulldozer, or equivalent, to uncover outcrops not in excess of 864 hours. This work will be done under proper supervision and with necessary surveying and mapping, and will consist of 12 trenches having a total length of approximately 9,000 feet. The trenches shall be sampled in the mineralized area and it is estimated that approximately 700 samples will be necessary.

Surface Diamond Drilling:

This work will consist of approximately 8,700 feet of diamond drilling in 20 holes of AX size, to be performed under proper supervision and with necessary surveying, mapping, and logging. Sludge samples shall be taken at approximately 5-foot intervals, and the number of core samples necessary shall be determined by the results obtained from the sludge samples. Representative portions of the residue of the cores, after obtaining core samples, shall be preserved for Government inspection in core boxes or sample sacks. It is estimated that 1,700 sludge samples will be necessary and approximately 700 core samples will be needed, and there will be an estimated 1,700 feet of reaming and cementing.

Stage II

In this stage, as indicated on Maps Nos. 3 and 4, the work will consist of:

Underground Work

On the 7,400 level at coordinates 17290 N, 3025 E, on the Brown Bear claim, a drift 5 feet by 7 feet in the clear shall be driven 500 feet north, and then approximately 1,500 feet N. 35° W. This work may be done concurrently with that in Stage I, or prior thereto.

If and when the surface trenching and diamond drilling has advanced sufficiently and if mineralization is indicated, then the Operator with the approval of the Government shall (1) start a crosscut, 5 feet by 7 feet in the clear, at 15020 N, 4760 E. on the 7,100 level, approximately 1,200 feet in length on a course N 47° E., and then, at a point to be selected by the Operator with the approval of the Government, a drift 5 feet by 7 feet in the clear shall be driven approximately 800 feet northerly along the mineralized zone, and (2) shall drive a crosscut 5 feet by 7 feet in the clear from 17790 N, 3025 E. on the 7,400 level approximately 800 feet, and then drift northerly 5 feet by 7 feet in the clear approximately 1,200 feet.

All drifts and crosscuts shall be sampled at approximately 5-foot intervals, with one or two samples to each section as justified. Approximately 2,400 samples should be taken.

Drifts and crosscuts shall be timbered where necessary. It is estimated that 5,000 feet of the 6,000 feet of drifting and crosscutting will require timbering. In addition it is estimated that this ground

will also require, out of the 5,000 feet, 750 feet of heavy timbering and 500 feet of spiling.

When the drifts and crosscuts have advanced sufficiently to allow for setups, then approximately 10,500 feet of underground diamond drilling under proper supervision and with the necessary surveying, mapping, and logging, shall be done on both sides of the drifts and crosscuts, where justified. These holes shall be at approximately 100-foot intervals and the location, course, and inclination shall be selected by the Operator with the approval of the Government. The depth will be dependent on the mineralization indicated by the preceding work. These drill holes shall be completely sampled and approximately 3,500 samples should be taken. Representative portions of the residue of the cores, after obtaining the core samples, shall be preserved for Government inspection in core boxes or sample sacks.

Estimated Costs of the Project

Agreed Unit Costs

The Government will contribute to the costs of the work listed below on the basis of the agreed unit costs specified therefor, as they accrue, in lieu of actual costs, for a period of one year from the date of this contract, and thereafter these unit costs will continue unless and until the Government, at its option, notifies the Operator that the Government will contribute to the incompleted portions of any of the work on the basis of actual costs as set forth in Article 6(a) of the contract form, but the schedules there referred to are waived except as set forth below under the heading "Estimated Actual Costs of Work that may remain incompleted if and when the Government exercises its option to convert to actual costs."

That work to which the Government will contribute on the basis of agreed unit costs may be performed by independent contractors without reference to the provisions relating to independent contracts and contractors in Articles 4(a) and (b) and 6(a)(1) of the contract form.

Stage I

Trenching - 864 hours @ $11.878/hr. (rounded to)	$10,263.00
Surface Diamond Drilling - 8,700 feet @ $6.960/ft.	60,552.00

1,700 feet of reaming and cementing @ $2.50/ft.	$ 4,250.00	
Assaying		
3,100 assays @ $3.00/each (Cobalt and Copper)	9,300.00	
Stage II		
Drifting and Crosscutting		
6,000 feet @ $35.535/ft.	213,210.00	
Timbering		
Normal timbering 5,000 feet @ $7.00/ft.	35,000.00	
Heavy timbering 750 feet (of the 5,000 feet) @ $7.00/ft.,additional	5,250.00	
Spiling 500 feet (of the 5,000 feet) @ $20.00/ft.,additional	10,000.00	
Framing 1,150 sets of timber @ $5.48/set, complete with blocking, lagging,and wedges	6,302.00	
Underground Diamond Drilling		
10,500 feet @ $3.3822/ft.	35,513.00	
Assaying		
5,900 assays @ $3.00/each (Cobalt and Copper)	17,700.00	
Total Agreed Unit Costs		$407,340.00
Government Participation @ 70%		$285,138.00

Estimated Actual Costs of Work that may remain Incompleted, if and when the Government Exercises its Option to Convert to Actual Costs

(1) Independent Contracts

All or any element of the remaining work may be performed by independent contractor upon amendment of Exhibit "A" as provided for in Articles 4 and 6 of the Contract form, the Government's approval of any such independent contract being required.

(2) Labor, Supervision, Consultants

Labor

Schedule and Estimate of cost waived

Supervision

(Includes Superintendent, foreman)
$500.00 per month

Consultants

None

(3) Operating Materials and Supplies

Schedule and estimate of cost waived

(4) Operating Equipment

To be purchased

None

To be rented

None

To be furnished by Operator

	Value
1 - 5-ton Plymouth Locomotive	$7,287.05
2 - Eimco 12B Mucking Machines	5,674.40

		Value	
15 -	C. S. Cars - 30 cubic foot Rocker Dump Cars	$3,660.00	
2 -	Mancha 1½-ton locomotives	6,690.96	
4 -	Batteries for above locomotives	5,566.80	
2 -	Charging panels	1,821.96	
2 -	A.M.D. car transfers	900.00	
1 -	Buffalo Forge Blower, 15 H.P., or equivalent	375.00	
1 -	Clarage Blower, 7½ H.P., or equivalent	275.00	
	Starting equipment for blowers	175.00	
2 -	Timber trucks	236.78	
4 -	Jackleg type pusher drills @ $505.00/ea.	2,020.00	
4 -	Line oilers @ $17.54/ea.	70.16	
1 -	R48 Stoper	670.00	
1 -	Water pump	153.02	
1 -	Track jack and 1 rail bender	90.00	
	Total		$35,666.13

The Operator will maintain and keep the above equipment in good repair and shall receive for its use while full operations under the contract are in progress a depreciation allowance of $595.00 per month.*

(5) Rehabilitation and Repairs

None

(6) New Buildings, Improvements, Installations

None

(7) Miscellaneous

Schedule and estimate of cost waived.

(8) Contingencies $5,000.00

Total Estimated Costs	1/ $407,340.00*
Government Participation at 70%	$285,138.00*

---

* Indicates allowable maximum.

1/ This sum will be apportioned between agreed unit costs and actual costs as they are determined; any excess over this total shall be for the sole cost of the Operator.
