Re: OME-6050 (Copper)
Golden Copper Queen Mining Corp.
Copper Queen Mine
Lemhi County, Idaho
Contract 2104

Dear Mr. Harward:

On October 15, 1962, we wrote you explaining an incorrect computation of royalty due the Government on Lot B-749, enclosing a Thermo-Fax copy of the settlement sheet, and requesting payment of the balance due the Government in the amount of $2.10.

We have received another royalty payment in the amount of $7.13 for Lot B-816. A Thermo-Fax copy of the smelter settlement sheet showing the computation of royalty is enclosed. Your attention is directed to Article 7(c) of the OME contract, which indicates that in this case only the haulage charge paid by the smelter is deductible from the gross smelter price to arrive at the net on which royalty due the Government is based. As in the former settlement, the Government's royalty has been based on the allowable net smelter price after deduction of royalty paid to M. W. Harwood.

Royalty due the Government on B-816 is therefore $7.51, which is $0.38 more than the amount paid. Request is hereby made for payment of royalty due the Government as follows:

Lot B-749	$2.10	requested October 15, 1962, but not received.
Lot B-816	.38	
Total	$2.48	

If you will call this error in computation to the attention of the smelter, I am sure that they will be glad to cooperate.

If Campbell or any other party or parties have leased the Copper Queen mine, please send us two copies of the lease as required by Article 2(e) of the contract and requested in the Director's letter of July 7, 1961,

and our letter of October 15, 1962. To clarify this point, would you kindly advise us if the property is still under the control of Golden Copper Queen Mining Company?

Sincerely yours,

D. R. MacLaren

Re: OME-6050 (Copper)
Golden Copper Queen Mining Corporation
Copper Queen Mine
Lemhi County, Idaho
Contract 2104

Dear Mr. Harward:

Enclosed is a Thermo-Fax copy of a settlement sheet received October 15, 1962, from the Anaconda Company, Anaconda Sampler. The settlement sheet was accompanied by a check in the amount of $18.89, representing the royalty due the Government on Smelter Lot B-749. However, you will note that the Government's royalty is computed on the balance of $377.86, after deduction from the net proceeds of 10 percent royalty paid to M. W. Harward. Under the terms of the contract, Article 7(c), only the sampling charge of $5.00 and the haulage charge of $30.88, paid by the buyer, are allowable deductions from the gross proceeds of $455.73. Thus, the royalty due the Government is:

Gross proceeds	$455.73	
Less sampling & hauling charges	35.88	
	$419.85	
Government's royalty at 5% of	$419.85	$20.99
Royalty paid		18.89
Balance due the Government		$ 2.10

Payment of the balance of royalty in the amount of $2.10 is hereby requested.

The settlement sheet indicates that Campbell and Jepson were the shippers of the ore. If they have leased the property, will you kindly send us two copies of the instrument as required by Article 2(c) of the contract and requested in the Director's letter of July 7, 1961.

Sincerely yours,

D. R. MacLaren

Memorandum

To: Chief, Division of Field Operations

From: Acting Field Officer, Region I

Subject: Final inspection report, Docket No. OME-6050 (Copper), Golden Copper Queen Mining Corporation, Lemhi County, Idaho, Contract No. 2104.

The property was visited October 4, 1960. No one was present except one miner acting as watchman. He advised me that no contract work had been done since my last inspection on August 25, 1960, that J. R. Payne Mine Superintendent, had left the company, and that all miners and surface men had been laid off "about a week ago." He also told me that "about 1 or 2 tons" of concentrate had recently been shipped, he understood, to Anaconda.

That evening I met Harold T. Allen, president of the company, in Dillon, Montana. He said that his directors would not spend any money to extend the 75 level drift on the Cookhouse vein, Stage I of the contract, until they had driven a crosscut about 280 feet northerly to open a new ore zone which "we have proven by drilling and opened up in a dozer cut."

I told Mr. Allen that a recess if not too long might be considered and asked him how long he thought it might take to complete the crosscut. He estimated about 60 days. I reminded him that in about a year's time only one surface drill hole had been completed under the contract and asked if he was reasonably certain that contract work could be resumed at the end of that time if a recess were authorized. He admitted that it would probably be a considerably longer time before any contract work would be undertaken and said it would be better to terminate the contract.

I asked him about the shipment of concentrates. He said he had not been to the property for 2 weeks and was not aware that the shipment had been made. At present he is opening a gold property west of Dillon and has been spending most of his time there. I suggested that he advise the buyer to deduct the Government's royalty from any shipments and send a check therefor to this office.

MEMORANDUM

TO : Chief, Division of Field Operations, OME

FROM : Acting Field Officer, OME, Region I

SUBJECT: Interim inspection report, Docket No. OME-6050 (Copper)
Golden Copper Queen Mining Corporation, Lemhi County, Idaho,
Contract No. 2104

The Copper Queen mine was visited August 25, 1960. Neither Harold T. Allen nor J. R. Payne was present. Two miners were working on the 250 level and one of them accompanied me on my inspection of the 75 level where the OME work is to be done.

On my last visit, July 25, 1960, Mr. Payne assured me that track and air and water lines were being installed preparatory to starting drifting on the 75 level, that the rails would be at the face probably by the end of the shift, and that drifting would be started within a day or so.

Referring to the accompanying sketch, the track and air lines have been installed to a point about 8 feet north of the drift on the Cook House vein. The miner who accompanied me was instructed to tell Mr. Payne that the track should be turned and laid along the Cook House drift.

The sump indicated on the sketch is about 3 feet in diameter and a foot and one half deep. The operator intends to deepen it slightly and use the water that accumulates in that area for drilling. As yet neither a pump nor water line has been installed.

The two miners on the 250 level are driving a raise on a high grade shoot of copper ore which will be run through the mill. The mill was not running but there are about 20 tons of ore in the bins.

Omitted from my last inspection report is a new company address:
120 E. 16th Street
Idaho Falls, Idaho
The newly appointed Secretary is M. W. Harward.

Subject: Interim inspection report, Docket No. OME-6050 (Copper) Golden Copper Queen Mining Corporation, Lemhi County, Idaho, Contract No. 2104

The referenced property was visited July 25, 1960. Harold T. Allen, president of the company, was not present, but the project was discussed with J. R. Payne, Mine Superintendent.

Unwatering the workings which had been flooded nearly to the shaft collar was started July 15, 1960. By the time of the inspection the 75 level was open. Track and air and water lines were being installed preparatory to starting drifting from the heading indicated in the contract. Drifting should be started within a few days.

February 11, 1960

Memorandum

To: OME Field Team, Region I

From: S. W. Zoldok, Mining Engineer, U. S. Bureau of Mines

Subject: Interim inspection report, Docket No. OME-6050 (Copper), Golden Copper Queen Mining Corporation, Lemhi County, Idaho, Contract No. 2104

The project was inspected on February 3, 1960. The previous inspection was made by D. R. MacLaren, geologist, U. S. Geological Survey, on December 9, 1959.

The property was reached with some difficulty due to the icy condition of the narrow access road. Two men were doing some repair work in the mill. No underground work was being done and the mine was not entered.

Contract matters were discussed with Mr. Harold T. Allen, President, Golden Copper Queen Mining Corp., on the evening of February 4. No underground work has been done since November 1959, due to freezing temperatures and mechanical difficulties. Mr. Allen had requested a recess during the months of January and February, but now has changed his mind and expects to start underground work immediately. The cut-off C-F shown on Plate I accompanying Mr. MacLaren's December 16, 1959 inspection report will be finished on company account before contract work is started.

On the Princess Pat vein DDH No. 3 (Contractor's Hole No. 1) was completed to 250 feet. As the core was stored in a locked shed at the mine it was not examined; however, the drill contractor reports the vein as having been cut from 82 to 86 feet.

Status of the contract is given on the attached sheet.

Memorandum

To: OME Field Team, Region I

From: D. R. MacLaren, Geologist, U. S. Geological Survey

Subject: Interim inspection report, Docket No. OME-6050 (Copper), Golden Copper Queen Mining Corporation, Lemhi County, Idaho, Contract No. 2104

The project was inspected December 9, 1959, in the company of Harold T. Allen, President, and J. R. Payne, Mine Superintendent. The last inspection was made by the writer on October 27, 1959.

On the Princess Pat vein, DDH No. 3, the first hole to be drilled, is down 133 feet in quartzite. Core recovery has been very poor, totaling only 55 feet or 41 percent. Mr. Campbell, the driller, was present and stated that the rock was badly shattered for the first part of the hole and that in the future recovery should improve.

Underground there appears to have been considerable confusion and misunderstanding. During prior inspections both Zoldok and I were shown what we understood to be the face where the contract drifting would be started. Neither of us checked the indicated face with the contract map as only preliminary work was being done. By the time of the presently reported inspection this face had been advanced 27 feet. The advance was so little that I decided to postpone any detailed mapping until my next inspection. The Operator had built a dam from which he was pumping water for drilling and which I located by pacing from the crosscut leading to the working face. The dam was 50 feet east of the crosscut in what I had been given to understand was a short length of veinless drift. However, it was not until that evening when I was plotting the location of the dam on the map that I discovered that there was something very wrong.

Referring to the accompanying plate 1, I had assumed that the face of the contract drift was at A and the dam at B before realizing that this could not be in accord with the contract. The next day,

December 10, 1959, I returned to the mine late in the afternoon and took a map underground to check locations. The face being advanced was actually at C and the dam at D. That day's round had broken into the workings at E.

Mr. Allen accompanied me underground on my second visit and was as surprised as I was to find out where he had been working. He realizes that this work is not provided for in the contract and that he cannot be reimbursed for it. However, he feels that it will now be less costly for him if he continues the C-E drift to connect with the drift on the Cookhouse vein near F. If the project is successful, he would do this work anyhow and will also drive a drift between G and H. However, when he gets to F, he should be given OME assistance to lay air and water lines and track from F to the face, a distance of about 200 feet (scaled from plate 4 of Alvord's report dated June 25, 1958). No ventube has yet been installed.

In view of the foregoing, it is recommended that Amendment No. 1 be rescinded and a new amendment be prepared to allow under Item B:

1.	200 ft. of track at $1.85/ft.	$370.00
2.	200 ft. of air and water line at $0.50/ft.	100.00
3.	300 ft. of ventube at $0.67/ft.	201.00
		$671.00

The cost per foot of each of these items is the same as that recommended in Zoldok's memorandum of September 29, 1959.

OME Certifying Officer, Region I

Golden Copper Queen Mining Corp., Contract No. 2104
Monthly operating report for November 1959

The subject monthly operating report has been processed and forwarded to the Disbursing Officer for payment.

We have deleted the 27 feet of drifting claimed ($945.00), as this was non-OME drifting and, therefore, is not reimbursable.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Memorandum

To: OME Field Team, Region I

From: D. R. MacLaren, Geologist, U. S. Geological Survey

Subject: Interim inspection report, Docket No. OME-6050 (Copper), Golden Copper Queen Mining Corporation, Lemhi County, Idaho, Contract No. 2104

The property was visited on October 27, 1959, in the company of James R. Allen, President, and J. R. Payne, Mine Superintendent. The last inspection was made by S. W. Zoldok on September 24, 1959. So far, work has been limited to part of the slabbing under item A of the contract, changing rail in a 55-foot section of track, straightening out and adjusting the track gauge, and cleaning out the eastern part of the drift preparatory to starting the drift east. Installation of new air and water line and new track will start October 28 and drifting will begin early in November.

The proposed locations of the three surface diamond drill holes to be drilled under item I of the contract were checked and it is expected that drilling will be started the week of November 1, 1959.

MEMORANDUM

To: OME Field Team, Region I

From: S. W. Zoldok, Mining Engineer, Bureau of Mines

Subject: Initial inspection, Docket No. OME-6050 (Copper), Golden Copper Queen Mining Corporation, Lemhi County, Idaho, Contract No. 2104

The initial inspection was made on September 24, 1959, accompanied by J. R. Payne, mine superintendent. Mr. Payne informed me that Mr. James R. Allen, manager, was staying in Salmon. The hotel clerk informed me that Mr. Allen was a permanent guest at the hotel but happened to be out of town. The contract sent to Mr. Allen for signature on September 10, 1959, has not yet been returned.

The inspection disclosed that much of the rail and air and water lines under Item "B" of the contract had already been installed. Recommendation for a change in costs to cover this situation is contained in a separate memorandum. Track consists of 12# rail, air line of heavy duty 4-inch hose and water line of 1-inch hose. Mr. Payne stated that he would pull up this installation and replace it with one that would meet contract specifications; however, I suggested he leave it in and we would make an adjustment in the contract. In my opinion, the existing installation is adequate for exploration purposes. *

An old Chevrolet automobile, with a shaft attached between the rear axle and the hoist, is used for hoisting. Mr. Payne stated that a hoist engine was on order when I questioned the safety of the installation.
