Re: Docket No. DMEA-3802 - Beryl, Mica and Columbium
Lake of the Woods Mining Company
Feldspar Mine
Lake of the Woods County, Minnesota

Gentlemen:

Reference is made to our letters of May 18, August 12 and October 17, 1955, requesting additional information to process your application.

Inasmuch as no reply to these requests has been received from you we assume you are no longer interested in securing Government assistance for an exploration project on your property. Therefore, we have removed your application from our active file and the matter is now considered closed.

We thank you for your interest in the Defense Minerals Program.

Sincerely yours,

Administrator

Memorandum

To: Robert E. Adams, Chief, Operations Control and Statistics Division

From: Nonmetallic Minerals Division

Subject: Removal of application from active file

Docket No. DMEA-3802 - Beryl, Mica and Columbium
Lake of the Woods Mining Company
Feldspar Mine
Lake of the Woods County, Minnesota

This Division has been unable by repeated requests to obtain additional information from the applicants to process the subject application. Therefore, we assume that they no longer desire to proceed with it.

We are removing the application from the active file and now consider the matter closed.

James Hopkins
Nonmetallic Minerals Division

Gentlemen:

Reference is made to our letters of May 13 and August 12, 1955, requesting additional information to process your application. To date we have not received a reply to these letters and we assume you no longer desire to proceed with the application.

We wish to cooperate with you in allowing ample time to submit this information but if the needed data have not been received by November 17, 1955, we will then remove the application from the active file and consider the matter closed.

Sincerely yours,

Frank E. Johnson

Re: Docket No. [illegible] - Beryl,
Mica and Columbium
Lake of the Woods Mining Company
Feldspar Mine
Lake of the Woods County, Minnesota

Gentlemen:

Reference is made to your application for exploration assistance for beryl, mica and columbium. You have omitted replies to items 5(b) and 5(d). Please send us a full description of the proposed work and costs for each unit. Under item 5(d) include information relating to your ability to supervise the exploration work or the names and mining background of the person or persons who will supervise the operations.

Under item 4(e) you state that, "Drilling in the immediate area disclosed further deposits of beryl." Please enlarge on this statement and submit whatever details you have on the extent of the deposits, the estimated beryl content, by whom the drilling was performed and their location in relation to the proposed work.

Upon receipt of the above requested information we will continue processing your application.

Sincerely yours,

SIGN

$99,350
Beryl-Columbium-Mica

Memorandum

To: L. G. Houk, Defense Minerals Exploration Administration

From: N. E. Nelson, U. S. Geological Survey

Subject: Review of application

This application concerns a property of which no information has been found. Neither does the area appear to have been written up, but it is one underlain by pre-Cambrian rocks in which mica and beryl bearing pegmatites could be expected.

The property probably is Minnesota's lone contributor to pest feldspar production and no specific statistics concerning the output are listed in the Mineral Year Books.

The production of mica and beryl given does not indicate a mica-beryl-columbite mine, but these minerals may have been discarded. A mica-beryl count in the quarry and of the large pegmatite outcrops, by a Field Team, is needed and here recommended.

Memorandum

To: L. G. Houk, Defense Minerals Exploration Administration

From: N. E. Nelson, U. S. Geological Survey

Subject: Review of application

This application concerns a property of which no information has been found. Neither does the area appear to have been written up, but it is one underlain by pre-Cambrian rocks in which mica and beryl bearing pegmatites could be expected.

The property probably is Minnesota's lone contributor to past feldspar production and no specific statistics concerning the output are listed in the Mineral Year Books.

The production of mica and beryl given does not indicate a mica-beryl-columbite mine, but those minerals may have been discarded. A mica-beryl count in the quarry and of the large pegmatite outcrops, by a Field Team, is needed and here recommended.
