Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations along the Puzzle structure continued on a two-shift basis throughout the month of May, 1965. The drift was advanced a total of 322 feet during the month; total drift and crosscut footage to date is 2,572 feet of which 1,662 feet is drifting in or along the Puzzle structure proper.

The country or wall rock continues to be the Campbell Mountain rhyolite which locally is highly fractured or shattered. Considerable alteration is in evidence locally but for the most part alteration does not appear to extend out into the walls any appreciable distance.

The vein material within the fissure zone is composed of barite, quartz, limonite, black manganese oxide, marcasite, silver and galena - these latter two in varying amounts. The ore is mostly oxidized and locally highly stained black with manganese oxides. The gangue is mainly white quartz and barite. The vein has varied in width from only a few inches to seven feet (drift width) and mineralization encountered during the month though spotty and erratic in grade has been encouraging.

During the month a long hole (116') was drilled vertically out of the back of the drift about 75 feet beyond survey spad B-26. The purpose of this hole was to determine the amount of Campbell Mountain rhyolite still existing overhead since information from the two recently completed surface drill holes indicated a steady dip northwards of the Campbell Mountain rhyolite with the possibility of the drift cut-

ting through the Campbell Mountain rhyolite - Windy Gulch Tuff (formation above) before the 4,000 feet of drifting was completed. It appears at this stage (from the long hole data) that the drift will continue in Campbell Mountain through its entire length.

Since the contractor on the project did not obtain prior approval from the operator as regards the positioning of the underground diamond drill holes, diamond drill footage completed to date from the first underground drill station is not being reported. Drilling of the underground drill hole will be stopped and no further underground drilling will be undertaken until a satisfactory program can be worked out.

Respectfully submitted,

Fred E. Baker

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Re: OME6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations in and along the Puzzle fault structure continued on a two-shift basis throughout the month of April, 1965. The drift was advanced a total of 289 feet during the month of which forty feet (40') was on a split on the vein which had to be abandoned after 40' since the split being followed was becoming progressively weaker in strength and the other split was then drifted upon and which appears to be the main branch of the vein.

The vein within the Puzzle structure continues to be a variable one insofar as both width and mineralization is concerned; vein varies in width from one foot to five feet; vein material consists of the past reported quartz and barite with the attendant mud and gouge associated with the brecciated material which also makes up the vein zone.

The loose, uncemented zone reported in last months report as just being encountered and which necessitated driving an offset drift to the vein apparently was only a local zone since vein where it was again intersected by the drift is fairly competent.

Some ten feet beyond point where offset drift and vein intersected, the vein split into two branches - the hanging wall branch was followed for some forty feet before it was realized that this was not the main branch at which time the footwall branch was then drifted upon.

The second of the two currently proposed surface drill holes was completed during the month; the hole was bottomed at a drilled depth of 1120 feet. Hole was surveyed by use of Tropari instrument; log of hole is attached as a part of this report. This second drill hole intersected a structure at a drilled depth of 830 feet which very possibly is the east strand of the Bulldog fault. As can be seen from a review of the drill log for subject hole, core recovery

through a drilled depth of some 30 feet was very poor and no sludge could be recovered. The two feet of mineralized core that was recovered between 831.8' and 836' assayed as follows:

Au.	.005 oz.
Ag.	2.20 oz.
Cu.	.05%
Pb.	5.3%
Zn.	0.6%

Drilling is now being accomplished underground at the drill station just beyond where the Puzzle structure was intersected. It is expected that the east strand at the Bulldog fault will be intersected at approximately 1150' of drill hole depth (-15° hole).

Respectfully submitted,

Fred E Baker Vice Pres.

I certify that to the best of my knowledge and belief the contractor submitting this voucher is operating an exploration project in accordance with the terms of Contract No. 2166

Signature Hugh M. Connors Title _____ Date _____

Approved by OME Executive Officer or Alternate:

Signature Hugh M. Connors Title Acting Field Officer Date 6-22-65

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

End of Hole

Hole drilled by MacPherson Drilling Company, Montrose, Colorado
Hole collared at approximately 10,375' elevation.
Hole drilled at -60° angle
Hole Location is approximately 4,200' N26°W of portal of Exploration tunnel.
Hole was started - December 1, 1964
Hole was completed - March 9, 1965
Hole was surveyed with Tropari Instrument from collar to 1000 Ft. depth on February 24, 1965. Depth & Dip are as follows:

100'	-60°	200'	-60½°	300'	-59°
400'	-60°	500'	-61½°	600'	-62°
700'	-62°	800'	- 63°	900'	-63½°
1000'	-64°				

From 32.0' to 1235.0' a core loss of 98.3' was had.
Total Core Recovery was 92% overall.

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations along the Puzzle fault structure continued on a two-shift basis throughout the month of March, 1965. The drift was advanced a total of 300 feet during the month; total drift and crosscut footage to date is 1,961 feet of which 1,049 feet is drifting along the Puzzle structure proper.

The Puzzle fault structure continues to remain a quite prominent one but the vein within the structure has been quite erratic in both width and continuity during the past three hundred feet of advance. Brecciation persists along the structure; the hanging and footwall sides of the structure consists of Campbell Mountain rhyolite highly altered locally. The vein, where it exists, continues to be composed mainly of quartz and barite with attendant gouge and mud; the vein itself has varied in width from several inches to about four (4) feet during the past 300 feet. Some sulphide mineralization (lead, pyrite and marcasite) has been noted and fractures along the structure are coated with the black manganese oxide; silver mineralization during the past month has been very sporatic with no ore grade material being intersected.

During the latter part of the month, the drift along the structure encountered a loosely filled, highly crushed zone, which has necessitated abandoning following of the structure and going around it. Present plans are to offset the structure some 15 or 20 feet and follow along parallel to the strike of the structure for some 50 or 60 feet then test hole or dog-hole back to the structure to test its competency. If the vein and structure has become competent enough to allow following, then the drift will be turned back on structure - if not, the offset drift will be continued on further until such time that the structure will allow drifting along it.

The zone mentioned in the above paragraph appears to be an uncemented breccia some 12 to 15 feet wide and the back (which continues to work itself upwards) is presently some 30 to 35 ft. high. The material does not appear to be ore or vein material;

a special grab sample taken of the crushed material in the zone assayed as follows:

Ag. - .30 Oz.
Pb. - .95%
Au. - trace

During the month, the first of the two currently proposed surface drill holes was completed and the second hole started. It is expected that the second hole will be completed during the month of April providing weather conditions permit uninterupted drilling. The first hole encountered no structures or mineralization of note - it was thought that the drill hole would intersect the east strand of the Bulldog Mountain fault at a point someplace between 150 and 200 feet below the tunnel elevation but apparently the strike and dip of the fault as noted on the surface changed enough with depth so no intersection was had.

Accompanying this report are sketches showing general area of exploration with progress to date, sampling and mapping of drift advance for the month and data pertaining to diamond drilling completed during the month.

The Border fault, shown on the general sketch map of the area, has not been intersected or at least no evidence of the fault is noted - perhaps the open zone encountered containing the loose, crushed material may be an indication that the fault is being approached.

Respectfully submitted,

Fred E. Baker

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations along the Puzzle fault structure continued on a two-shift basis throughout the month of February, 1965. The drift was advanced a total of 317 feet during the month; total drift and crosscut footage to date is 1,661 feet of which 749 feet is drifting along the Puzzle structure proper.

The Puzzle fault structure continues to be very prominent and the vein within the structure itself has become more and more stronger as the drift advances and which in places is as much as eight (8) feet in width. The vein trends from about N20W to N40W; dips are from nearly vertical to about 66 degrees to the East. The hanging and footwall of the vein or the fissure within the fault zone is composed for the most part of a loosely cemented, highly altered Campbell Mountain rhyolite breccia.

The vein is composed of much quartz and barite; locally, the vein consists of one or two narrow quartz-barite bands separated by a gouge zone or widens to a massive eight foot width of quartz and barite interspersed with fine galena, manganese oxide, pyrite, marcasite and some silver mineralization. Brecciation has been common along the Puzzle fault structure and apparently there has been considerable movement and brecciation during ore deposition since broken fragments (up to 2') in size of quartz and sulphides and rhyolite and sulphides occurs along with gouge and crushed quartz and sulphides throughout the entire fissure zone investigated by drifting thus far.

Surface drilling was resumed during the latter part of the month of February; the first of two surface holes is in the process of being completed and hole should bottom out at around a 1200 foot depth. After completion of the second surface drill hole contemplated to be drilled at this time, underground diamond drilling to test structures out to the west of the Puzzle as well as lower down along the Puzzle itself will be started.

Accompanying this report are sketches showing general area of ex-

Mr. Hugh M. Connors

ploration with progress to date, sampling and mapping of the drift completed during the month and data pertaining to the diamond drilling completed during the month along with a log of the core.

Respectfully submitted,

Fred E. Baker, Vice Pres.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations along the Puzzle structure continued on a two-shift basis throughout the month of January 1965. The drift was advanced a total of 228 feet during the month; total drift and crosscut footage to date is 1,344 feet of which 432 feet is drifting on the Puzzle structure proper.

The structure itself continues to be quite prominent and mineralization and metallization appears to be increasing as drifting continues to the northwest along the vein. The vein itself within the structure is increasing in intensity as the drift progresses to the northwest and in places is up to two (2) feet wide. The vein consists of an abundance of barite, drusy quartz, amethystine quartz and gouge; locally, small cubes of Pb. can be seen scattered throughout the drusy quartz. Although some ore grade mineralization has been intersected as shown by channel samples cut across the vein at regular stated intervals, no ore of mineable thickness has been intersected as yet.

Much brecciation is being encountered within the shear zone itself and broken up pieces (up to 2') of barite, drusy quartz, amethystine quartz and rhyolite with the associated gouge material makes up the better part of the footwall side of the drift. There is no heavy ground, but much timbering is necessary in order to keep the loose brecciated material from falling out of the back of the drift when the gouge dries with exposure to the air.

No surface drilling was accomplished during the month due to the continued inclement weather. Drilling will be resumed when weather permits.

Attached are sketches showing general area of exploration with progress to date and sampling and mapping of drift completed during the month of January.

Respectfully submitted,

Fred E. Baker

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations continued on a two shift basis throughout the month of December, 1964. The drift was advanced a total of 197 feet during the month; total drift footage to date is 1,116 feet of which 204 feet is on the Puzzle structure proper.

The Puzzle structure, thus far, is shown to be a brecciated zone with slickensiding, mud, gouge and fracturing. The vein itself is a discontinuous quartz-barite vein with local thickening and thinning and varying from a few inches to a foot and a half in width. Some alteration is present; a mud seam (3" to 1.0' in width) extends along a portion of the hanging wall side of the vein and is in evidence for approximately 100 feet

Car samples (grabs from the muck pile) are taken every drift round and assayed for silver content; channel samples at 10.0 feet intervals along the vein are also being cut. To date, no significant mineralization has been intersected.

The surface drilling program continues to be plagued by the inclement weather and progress is slow; 88 feet were drilled during the month of December but only 81 feet of core was available for logging - the remaining seven feet of core being in the core barrel at the drill rig. To date, 919 feet of hole has been drilled; 912 feet has been logged. The contact between the Windy Gulch tuff and the Campbell Mountain rhyolite was intersected at 888 feet; some mineralization was intersected at the contact and at 900 feet. The drill log which is a part of this report shows assay results of core sent to assay.

Attached is a sketch showing general area of exploration with progress to date; a sketch showing sampling and mapping of drift completed during the month; and, a breakdown of diamond drilling accomplished along with a log of the core.

Respectfully submitted,

Fred E. Baker

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting (crosscutting) operations continued on a two-shift basis throughout the month of November, 1964. The drift was advanced a total of 224 feet during the month; total drift footage to date is 919 feet.

The Puzzle structure was intersected during the month; the Puzzle vein, as such, consists of a thin, discontinuous quartz vein within a wide shear zone. The main drift (crosscut) was continued on beyond the Puzzle structure intersection for approximately 125 feet or so to insure being on the correct and/or best structure and also to provide a place from which to do some diamond drilling out to the west to intersect the Bulldog faults. One drift round on the Puzzle structure itself was taken during the month.

The shear zone which contains the Puzzle vein also contains numerous thin, black manganese oxide coated fractures and thin barite seams; the zone is quite highly altered and contains fragments of amythyst quartz. Some silver mineralization is associated with the vein but mainly with the gouge of the fractures and the barite veinlets.

A second structure, approximately four feet wide, was intersected about one hundred feet beyond the Puzzle. This structure contains barite veins and black manganese oxide coated fractures with gouge. It appears, from apparent trend, that this structure will intersect the Puzzle further on to the northwest.

The tail end of the drift (crosscut) beyond the Puzzle structure itself is still of interest principally because of the barite seams and manganese oxide coated fractures that were intersected; some silver mineralization is associated with these fractures, etc.

Progress on the exploration project was slowed down somewhat

during the last half of the month due to a heavy snowfall in the area and to low temperatures which hampers starting of equipment, water supply, etc.

MacPherson Drilling Company started drilling the first of two contracted holes at the firat of the month. Owing to bad weather, along with local poor hole conditions, only 831 feet of a contemplated 1000 foot hole has been completed to date.

Attached is a sketch showing general area of exploration with progress to date; a sketch showing mapping of drift completed during the month; and, a breakdown of diamond drilling accomplished during the month along with a log of the core.

Respectfully submitted

Fred E. Baker, Vice Pres.

Memorandum

OFFICIAL COPY
O. M. E.
RECEIVED
MAR 1
INITIALS
ama

To: George C. Selfridge, Chief
Division of Exploration Operations
Washington, D. C. 20240

From: Acting Field Officer, OME, Region III

Subject: OME-6288 (Silver)
Bulldog Mountain, Inc.
Bulldog Mountain Fault
Mineral County, Colorado
Contract 2166

This responds to your memorandum of January 26, 1965 on the subject contract.

The vouchers have been returned to the Operator for minor corrections, however, I believe the 125 feet of crosscut through and beyond what we later determined was the true Puzzle structure was necessary to be certain that we had found the Puzzle structure. We passed through several structures that we could have turned on. As I see it, we had to be sure and it was good insurance. It must be remembered that we are exploring a new area.

When the corrected vouchers are returned to me I will again recommend payment of the 125 feet of crosscut because I believe it is right.

Will you please help me on all vouchers where a disallowance is made by forcing the agency making the disallowance to send me a copy so I can keep my records straight.

I understand that Kellogg had a disallowance but I was not advised by a copy of the disallowance.

Hugh M. Connors

cc: 2166
Chron

JAN 26 1965

Memorandum

To: Acting Field Officer, Region III

From: Chief, Division of Exploration Operations

Subject: CMX-6288 (Silver)
Bulldog Mountain, Inc.
Bulldog Mountain Fault
Mineral County, Colorado
Contract 2166

Enclosed are the three copies of the subject Operator's November voucher which were questioned by Fiscal and referred to us for comment.

The first paragraph of Exhibit A and the second paragraph under Description of the Work state that a crosscut shall be driven to intersect the Fuzzle vein and thereafter drift along it. The second paragraph under General Provisions stipulates that the location, direction, and extent of each work item shall be subject to prior Government approval. Therefore, the driving of 125 feet of crosscut beyond the Fuzzle structure is questioned.

The sheet showing [illegible] the diamond drilling is not signed or certified by the drilling contractor in support of the voucher. As we have no auditor at present and as a matter of record, the drilling of 235 feet of NX core beyond the 500-foot work is acceptable as it was charged at the rate of AX core, a smaller core.

On the same sheet mobilization at half the charge is given as $400. The contract provides only $600 for this item and, therefore, the figure should be $300.

Will you please have the necessary corrections made as outlined above and/or submit your comments thereto.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations continued on a two-shift basis throughout the month of October. The drift was advanced a total of 213 feet during the month; total drift footage to date is 695 feet. Some time was lost during the month owing to the Elk and Deer hunting seasons which occurred and operations were suspended for a three day period in order to allow personnel to hunt.

The drift continues in Campbell Mountain rhyolite and the criss-cross system of fracturing with attendant gouge and barite continues to exist. The Puzzle fault has not been intersected as yet, but if the trend and dip of the structure as observed on the surface and in the Puzzle tunnel continues unchanged then it is anticipated an intersection with the structure will be had somewhere between 750 and 800 feet in from the portal.

MacPherson Drilling Company has started to move equipment onto the property and drilling of the two proposed surface holes will begin by the 1st of the month.

Attached is a sketch map showing mapping of the drift completed during the month.

Respectfully submitted,

Fred E Baker

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations continued throughout the month of September with 239 feet of advance; total drift footage completed to date is 482 feet. Rock conditions have varied from good competent rock to moderately broken where criss-crossed with fractures. Some of the gouge material in the fractures contain slight amounts of silver mineralization; no water has been encountered to date. It is expected that the first major fault and/or vein will be encountered towards the end of the month of October. Operation is on a firm two-shift basis

MacPherson Drilling Company has advised that they will have a drill rig on the property by the end of the first week of October.

The R.E.A. is progressing fairly satisfactorily with its line from South Fork to Creede, Colorado; it is expected now, however, that power will not be available at the mine site until sometime in November.

The steel building to be used as a shop building has been erected and is in daily use.

Attached is a sketch map showing mapping of the drift completed to date.

Respectfully submitted,

Fred E. Baker, Vice Pres.

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

Drifting operations continued throughout the month of August with 163 feet of advance; total drift footage completed to date is 243 feet. A great deal of time during the first half of the month was spent in preparing road bed, rail, etc., at the dump area near the portal and in completing arrangement of facilities at the mine site proper.

Surface buildings to be used as office, change and dry room and storage have been winterized and in daily use at present; concrete foundation for the shop building has been poured and erection of steel building will commence as soon as building has been delivered.

MacPherson Drilling Company has not commenced drilling operations on the property as yet but will do so as soon as he has completed one of the several jobs he is presently working on.

The R.E.A. is in the process of distributing supplies, etc., along the proposed pole line site between South Fork and Creede so it appears that the line will be completed to the mine site around the middle of October as previously noted.

Attached is a sketch map of mapping of the drift completed thus far.

Respectfully submitted,

Fred E. Baker, Vice Pres.

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

August 12, 1964

Mr. Hugh H. Connors
Acting Field Officer - OMS
Building 20 - Federal Center
Denver, Colorado 80225

Re: OMS 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

The following report summarizes the activities on the above project during the month of July, 1964.

Drifting operations were commenced towards the end of the first week of the month; a total of 76 feet was driven of which 45 feet at the portal was timbered. Several minor fractured zones were encountered in the drifting; the contact between the Creede formation and the Campbell Mountain rhyolite was crossed after approximately 30 feet of drifting.

Drifting progressed rather slowly during the month partly because of the delay in receiving certain equipment for the project and partly because of the one shift basis while timbering the portal and taking care of miscellaneous matters on the surface, i. e., preparing surface buildings for office use, etc. It is expected that drifting will be on a firm two-shift basis by the middle of the month of August; all necessary equipment in the way of mine trammers, mine cars, rail, ventilating equipment, etc., is on the property.

Surface buildings are being readied for office, dry and change room and storage use; a steel building to be used as a shop is under investigation.

The R. E. A. advises that electric power will be available at the mine site about the middle of October and arrangements are under way to have permanent substation, compressor, etc., in readiness when power is available

MacPherson Drilling Company, successful bidder on the surface drilling program, has been delayed in getting started on the Creede project but expects to move on the project shortly.

Attached is a sketch map of drifting completed to end of July.

Respectfully submitted,

Fred S. Baker

Re: ~~OME 6288~~
Contract 2166
Bulldog Mountain Project
Mineral County, Colorado

Dear Mr. Connors:

The following report covers the period from June 1 through 30, 1964.

It had been expected that major exploration would be underway before months end, however, final decision on the quiet title action was not handed down until the last week of June. This precluded starting drifting operations before months end since the so-called "dead work", which needed to be done before actual drifting operations could begin, was completed.

During the month, the following was accomplished on the project and on the property:

1. Laying of a 1½" water line from the water dam approximately 2500 feet north of portal site to the water storage tunnel near portal and anchoring down of pipe line.

2. Construction of a concrete bulkhead in above mentioned water storage tunnel to impound water which will be used for drifting operations, etc.; rehabilitation of tunnel portal was also effected as well as construction of a door at portal.

3. Installation of 100 feet of chain-link fencing across area above the portal of the proposed drift to prevent rocks, boulders, debris, etc., to come down into the general portal area while drifting operations are in progress. The area between the link fencing and the drift portal was cleaned down and all loose rock, etc., removed.

4. The cliff face where drift will be collared was stripped and cleaned back to solid.

The preliminary or "dead work" has been about completed and drifting operations ready to begin; compressor, drills, etc., are on the property.

Respectfully submitted,

Fred E. Baker Vice President

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

Re: OME 6288
Contract 2166
Bulldog Mountain Project
Mineral County, Colo.

Dear Mr. Connors:

This report covers the period May 1 through 31, 1964, during which time work was resumed on Bulldog Mountain. During the above period, work performed consisted entirely of bulldozer work done to prepare one new surface drill site and enlarge and clean out two previously prepared sites; one exploration trench for geologic purposes; and, additional access roads to the new drill site and trench area as well as rehabilitation of existing roads within the general area. The water dam which will be used to provide water for drifting operations was cleaned out and enlarged; the dams prepared to provide water at the two previously prepared drill sites were cleaned out and a dam at the new drill site was prepared.

No geologic mapping of the surface trenching accomplished during the month was done due mainly to the timing involved in the work.

Bids for drilling two surface drill holes for a total of approximately 2000 feet were sent out to six (6) drilling companies during the month. All bids have not been received to date; it is expected that surface drilling will begin during the month of July. It is also expected that drifting operations will commence shortly after the middle of the month of June.

Respectively submitted,

Stephen J. Vanderhoven

Bulldog Mountain Project
Mineral Co, Colorado
OME 2106
Operators Monthly Report
for August and Sept, 1963

Gentlemen:

This report is combined for two months because of the still unterminated delays caused by legal problems which raises the question of the ability of Bul dog legal to proceed. Nothing has been done that relates to the OME contract. With your consent and approval I will apply for a further 6 months recess in said contract.

During the month of August the County of Mineral topped the road to the proposed deep level tunnel, and My Miller, the contractors engineer ran a series of level lines to establish the portal elevation. During August and September and continuing to date thecontractor put in several miles of deep cut trenches north of the Kansas City Star claim. There disclosed the several strands of the Bulldog Mountain fault and showed rock to be strongly altered. Samples were collected for systematic heavy metals studies but these have not been done.

As you know the legal difficulty referred to stems from a failure on the part of the County of Mineral scrupulously to follow the prescribed routine in issuing to itself tre surers deed to all of the patented claims in the county then 10-30 years tax delinquent. This happened in 1959, two years prior to the organization of your company. If this action in truth renders all subsequent actions of the county invalid then Bulldog must seek to cure the defect or to proceed only with its unpatented claims. How this can be done, at this time, I do not know.

Respectfully,

Manning W. Cox, project manager

Re: OME-6288 (Silver)
Contract 2166
Bulldog Mountain, Inc.
(Bulldog Mountain Fault)
Mineral County, Colorado

Dear Mr. Cox:

We have had no voucher for any work on the captioned contract since your July voucher. Please note under Article 3 (b) of the contract that the Operator shall provide the Government with copies of monthly reports.

If, for any reason, work on the contract is temporarily suspended you should apply for a recess. The application for recess should state the reasons a recess is required and should be submitted to this office in duplicate.

Will you please advise.

Sincerely yours,

OPERATOR'S MONTHLY REPORT

The Operator, under an Office of Minerals Exploration contract, is required to report monthly to the Government. The report consists of three parts.

FIRST, the Operator's Monthly Voucher on MME Form 60 listing the project costs incurred and claimed by the Operator is the voucher basis for payment of the Government's share of the cost.

SECOND, the Operator's Progress Report on MME Form 61 is a statistical report of the units and cost of of work performed under the contract.

THIRD, the Operator's Narrative Report is a concise description of the work performed, results accomplished, and any unusual situations encountered, illustrated and supported by engineering-geological maps or sketches, drill hole logs, assay reports, etc., as pertinent.

The Operator submits the original and four copies of each of the three sections of this report to the OME regional Executive Officer at the end of each month during the life of the contract.

PREPARATION OF OPERATOR'S MONTHLY VOUCHER, MME FORM 60

After all applicable spaces are filled in, the Operator or his agent must sign the certification in the lower left corner. Categories (2) through (7) apply to "Actual Cost" contracts only.

Under "Fixed Unit Costs" and Category (1) report, (a) the total fixed unit costs of work performed under contract provisions for contribution by the Government on a basis of "fixed unit costs"; and (b) the claimed costs of work performed on a unit-price basis by independent contractors.

Under Category (2) include the claimed costs of all payrolled and invoiced supervisory, technical, and labor personnel, except the costs for services applicable to Categories (5) and (6).

Under Category (3) include the claimed costs of all project materials and supplies other than those used for work under Categories (5) and (6).

Under Category (4) report claimed rentals on equipment belonging to a third party, claimed payments or obligations for payments on the Operator's purchase of equipment, and claimed depreciation for the use of Operator-owned equipment.

Under Categories (5) and (6) include all claimed costs of labor, supervision, technical services, operating materials and supplies, and all other items used in (5) the initial rehabilitation and repairs of existing buildings, fixtures, installations (exclusive of mine workings), and operating equipment; and (6) the installation or construction of new buildings, fixtures, and fixed improvements (exclusive of mine workings). Do not report these costs under Categories (2), (3), (4), and (7).

Under Category (7) include all miscellaneous claimed costs such as repairs (other than initial) and maintenance of equipment, sampling and analysis, travel, communication, accounting, office expenses, and the Operator's share of payroll taxes and insurance.

Except for amounts claimed under "fixed unit costs" provisions of the contract, all costs claimed in this voucher must be supported by documentary evidence consisting of: (a) certified copies or transcripts of payrolls which list each employee, wage rate, period of employment, gross earnings, itemized deductions, and net earnings; (b) original or certified copies of invoices, statements of accounts, or purchase orders which indicate items of materials or services, quantities, unit prices, total charges, and payment terms; and (c) certified memoranda of the Operator for such items as depreciation of Operator-owned equipment, unemployment taxes, and employee's liability insurance. The certification may be stated thus, "Certified True Copy (or Transcript)", followed by the signature of the Operator or his agent. One copy of each document should accompany the original of this voucher.

The requirement for submitting documentary evidence of claimed costs may be waived by the OME regional Executive Officer if he determines that it is impracticable for an Operator to submit this material. In any case of waiver of this requirement an "on-site" audit by an OME auditor is mandatory prior to payment of the final Operator's Monthly Voucher.

REMARKS *(Cont.)*

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

OME Docket 6288
Contract 2166
Operators Monthly Report
July, 1963

Gentlemen:

During the month of July road work and site preparation for the new Bulldog Tunnel continuedby Fred Baker assisted by one man. The road was completed and ready for topping by Mineral County crews at Month end. Layout was made for trenching(not included in OME work) on the north part of the property.

A flat was prepared to take portal site buildings, and the old short adit at the site removed by dozing and shooting.

The total cost of contract work on road, and site preparation was , todate $5,200. There has been no charge made for supervision, engineering, or overhead.

Respectfully submitted,

Manning W. Cox,
project manager

REMARKS *(Cont.)*

INSTRUCTIONS FOR PREPARING OPERATOR'S PROGRESS REPORT, MME FORM 61

This report is the second of the three parts of the Operator's Monthly Report. Submit the original and four copies.

The cost for each operation should be the total of all claimed costs attributable to that type of work with two exceptions, namely—operating equipment purchased and analytical work which are stated separately. For example, drifting costs should be the total of all costs chargeable to drifting including supervision, technical services, timbering (if any), etc. Similarly, drilling costs should include the cost of cementing, reaming, core boxes, etc. This procedure of distribution holds whether the contract was written on an actual cost or a unit cost basis, or some combination of the two. Distribute the cost of such general items as supervision, equipment rented, etc. according to relative footages or on some other conventional basis. The item "Initial Rehabilitation and Repairs" covers all rehabilitation and/or repairs other than the rehabilitation of mine workings.

The item titled "Drilling, Non-core Percussion" includes all drilling performed with wagon, jack-hammer, stoper and mounted drills. The several items labelled "Other" are provided to take care of particular exploration operations not specified on this form.

Bulldog Mountain Project
OME Docket 6288
Contract 2166
Operators Monthly Report
June, 1963

Gentlemen:

During the month a start was made on the Bulldog Mountain project, which had been idle since May of 1962. M. W. Cox and Fred Baker searched for and found all corners of Grover Cleveland patented claim, Survey 11586. Paulin Altimeter work established an acceptable portal site for a new exploration adit at 9700 feet plus or minus 10 feet between two major rock slides but in hard rock. An old adit about 15 feet long is located at this site, but this will be removed in new portal prepataion.

Permission was obtained from the U. S. Forest Service to build approximately 2.5 miles of new road to Forest minimum standards from the existing county road near Creede Cemetery to the new site. A survey of the grade shows a maximum of 10% for short pitches near the cemetery and elsewhere not over 7% grades. 1000 feet of the road crosses a major rock slide and will be difficult to construct, but unavoidable.

At months end 92 hours of bulldozer work with a two man crew had been expended with the result that a very rough pioneer road was within 200 feet of the portal site. Considerable blasting had to be done. Trees are being felled and stacked for winter buning as required by the Forest Service.

July should see the portal site prepared and the new road filled and ditched.

Respectfully submitted,

Manning W. Cox,
project manager.

Contract 2166

Dear Sir:

Herewith the original and four carbon copies of each of the three parts of the OME operators report for June, 1963. Reimbursement should be made to Bulldog Mountain at 112 Adams St., Monte Vista, Colorado, as noted.

Respectfully,

Manning W. Cox,
project manager.

EXPLORATION CONTRACT
BULLDOG MOUNTAIN, INC.
OME-6288

AMENDMENT NO. 4

It is agreed this 23rd day of November, 1965, between the United States of America, acting through the Department of the Interior, U. S. Geological Survey, hereinafter called the "Government," and Bulldog Mountain, Inc., hereinafter called the "Operator," that Exploration Contract No. 2166 (OME-6288), dated May 6, 1963, as amended, is further amended effective November 1, 1965, as follows:

In Exhibit A under the heading Description of the Work the second paragraph, as amended in Amendment No. 3, is further amended by deleting the last sentence thereof and substituting the following therefor:

> In the event the east strand of the Bulldog Mountain fault is not intersected by the drift along the Puzzle vein after approximately 2,230 feet of drifting, then a crosscut shall be driven on a bearing of S.75° W. from a point near the face of the drift on the Puzzle vein to intersect the east strand of Bulldog Mountain fault. Thereafter, a drift to the north and/or to the south shall be driven in or along the east strand structure.

This amendment shall not be construed to increase the estimated total cost of the contract, the aggregate amount which the Government may be required to contribute, the amount of any item designated as a maximum, nor the fixed unit cost of any item of work.

Executed in quintuplicate the day and year first above written.

OME-6288

AMENDMENT NO. 3

It is agreed this 12th day of May, 1965, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter called the "Government", and Bulldog Mountain, Inc., hereinafter called the "Operator", that E ploration Contract No. 2166 (OME-6288), dated May 6, 1963, as amended, is further amended effective March 1, 1965, as follows:

1. In Exhibit A under the heading Description of the Work the second paragraph is deleted and the following is substituted therefor:

From a point near the northwest corner of the Grover Cleveland claim, drive a crosscut in a westerly direction to intersect the Puzzle vein; and thereafter, a drift shall be driven on or if ground conditions necessitate along side of such vein in a northwesterly direction to intersect the east strand of the Bulldog Mountain fault. Thereafter, the drift shall be continued northerly in the same manner along this east fault strand.

This amendment shall not be construed to increase the estimated total cost of the contract, the aggregate amount which the Government may be required to contribute, the amount of any item designated as maximum, nor the fixed unit cost of any item of work.

Executed in quintuplicate the day and year first above written.

EXPLORATION CONTRACT
BULLDOG MOUNTAIN, INC.
OMR-6288

AMENDMENT NO. 2

It is agreed this 24th day of October, 1963, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter called the "Government," and Bulldog Mountain, Inc., hereinafter called the "Operator," that Exploration Contract No. 2166 (OMR-6288), dated May 6, 1963, as amended, is further amended, as follows:

1. (a) Work under the contract shall be suspended during the period beginning August 1, 1963, and ending not later than May 1, 1964.

(b) No costs incurred by the Operator during the period of suspension shall be allowable for contribution by the Government.

(c) The Government shall not contribute to any cost of rehabilitation or repair which in its opinion would not have occurred if there had been no suspension of the work.

(d) The Operator, at its own cost and expense, without contribution by the Government, during the period of suspension shall preserve and protect the project work.

2. The time fixed by Article 1 of the contract for completion of the work is extended from 30 months to 36 months from the date of the contract.

3. The maximum period for royalty payments and for the lien to secure the payment thereof provided for in the contract is extended from fifteen (15) years to sixteen (16) years from the date of the contract.

This amendment shall not be construed to increase the amount of any item designated as maximum, the fixed unit cost of any item of work, the estimated total cost of the project, nor the aggregate total amount which the Government may be required to contribute.

Executed in quintuplicate the day and year first above written.

AMENDMENT NO. 1

It is agreed this 8th day of July, 1963, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter called the "Government," and Bulldog Mountain, Inc., hereinafter called the "Operator," that Exploration Contract No. 2166 is amended, effective May 6, 1963, as follows:

1. In Exhibit A, under the heading Description of the Work, the first paragraph is revised to read as follows:

"In the northern portion of the property trenching and surface diamond drilling shall be performed at locations which appear desirable. Also, an access road, involving not to exceed 200 hours of bulldozing, will be constructed to the tunnel portal. Such work is roughly indicated (in part) on the attached Figure 1."

Re: OME-6283 (Silver)
Contract No. 2166
Bulldog Mountain, Inc.
(Bulldog Mountain Fault)
Mineral County, Colorado

Dear Mr. Varahagen:

Please advise this office the name, address, and title of the person who will supervise and render technical services as may be required to complete the work described in the captioned contract. You also will be expected to notify us a few days before the work is started so that we may establish a starting point in the drift, if deemed necessary. And, in accordance with a General Provision of the Contract, obtain from this office prior approval of each work item.

Future correspondence with this office should be with Mr. Hugh M. Connors, Acting Field Officer, who is expected to return from a vacation on June 10, 1963.

Sincerely yours,

EXPLORATION CONTRACT
(Long Form)

Docket No.	Commodity	Contract No.	County	State
OME [illegible]	Silver	14-23-090- 2166	Mineral	Colorado

It is agreed MAY 6 1963 (Date), between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter called the "Government," and

Cutting Mountain, Inc.,

whose mailing address is Room 511, 57 Post Street, San Francisco 4, California, hereinafter called the "Operator," as follows:

ARTICLE 1. Authority and scope.--(a) This contract, entered into under the authority of Public Law 701, 85th Cong., 2d sess. (72 Stat. 700; 30 U.S.C. § 641 - 646), consists of this form, the attached Annex I (land description), Exhibit A (work and costs), and the maps and documents listed. The work is a search for new or unexplored deposits of the commodity designated above. The Operator shall begin the work on or before July 1, 1963 (Date), and, subject to the provisions of Article 9 and Exhibit A, shall either have completed the work within 60 months from the date of the contract or shall have incurred allowable costs (see Article 6) in a sum not less than the total cost set forth in Exhibit A.

(b) The total allowable cost of the work set forth in Exhibit A is $212,320.00. The Government will contribute 50 percent of the allowable costs as they are incurred, in a total sum not in excess of $106,160.00 in accordance with the provisions of Articles 3, 4, 5, and 6. "Costs incurred" means costs that have been paid or have become due and payable, or that the Government determines have become obligations.

(c) Interest computation.--Simple interest computed annually at the rate of 6 percent shall accrue from the dates Federal funds are made available until the period specified for payment of royalty expires, or until the amount of Federal funds contributed is fully repaid with interest.

(d) The Operator shall not transfer or assign this contract or any right or obligation thereunder without the written consent of the Government.

ARTICLE 2. Operator's rights in land.--(a) The Operator represents and undertakes that Annex I correctly describes the land which is the subject of this contract and the nature of the Operator's right of property and possession therein (whether as owner, lessee, or otherwise), and that such right, title, or interest is subject only to the following claims, liens, or encumbrances:

Interest of Lessor, Kansas City Star Claim

(b) The Subordination Agreement of the holder of any claim, lien, or encumbrance listed above and (if the Operator does not hold the legal title) the lien agreement of any holder of the legal title of the land (lessor, seller, optionor, etc.) are attached as follows:

Lien and Subordination Agreement, signed by Rio Grande River Gift Case, Inc.

(c) The Operator shall preserve and maintain his right, title, or interest in the land and his right to the possession thereof for the purposes of this contract, and shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of this contract. The Operator shall neither transfer, convey, nor surrender the land nor any right, title, or interest therein, nor permit nor suffer any claim, lien, or encumbrance thereon, without expressly referring to and providing in the instrument of conveyance, lien, or encumbrance for the preservation of the Government's right to a royalty on production and liens for the payment thereof. Two true copies of such instrument shall be furnished to the Government. If the Government's rights to royalty as provided in Article 7 have been terminated, the provisions of this paragraph (c) shall become inapplicable.

ARTICLE 3. Performance of the work.--(a) Operator's responsibility.--The work shall be performed diligently, efficiently, in a workmanlike manner in accordance with good mining standards, and in compliance with State laws governing health, safety, and liability insurance covering employment. The Operator shall provide suitable and adequate equipment, facilities, materials, supplies, and labor to complete the work as specified in Article 1(a).

(b) Independent contracts.--To the extent that the allowable costs are estimated in Exhibit A with express reference to performance by independent contractors on a unit-price basis (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations), the work may be so performed (see Article 6(a), Category (1)). Any such independent contract shall refer to some specific and identifiable part of the work, and shall be subject to all of the pertinent terms and conditions of this exploration contract; but the Government shall not be considered a party thereto, and its rights under this contract, including the right to terminate its contributions, shall not be affected thereby. Regardless of the provisions of any such independent contract, the Government will participate in payments to the independent contractor only as to work performed in accordance with the provisions of this exploration contract, and only to the extent that the Government deems the unit prices for the work under the independent contract to be reasonable.

(c) Government may inspect.--The Operator shall consult with and inform the Government on all phases of the work as it progresses. The Government may enter at all reasonable times to inspect the work under the contract and production operations during the period that royalty is payable to the Government. The Operator shall provide the Government with all reasonable means of access for such inspections.

ARTICLE 4. Contribution by the Government.--(a) The Government will make its contribution on the basis of the monthly vouchers referred to in Article 5(b), but all payments by the Government are provisional only, subject to audit. Until the account between the Operator and the Government is finally audited and settled and the Operator's final report has been received, the Government may withhold such sums as are necessary to protect its interests. The Government may make payments for the account of the Operator directly to independent contractors and suppliers rather than to the Operator.

ARTICLE 5. Reports, accounts, audits.--(a) Operator's records.--The Operator shall keep suitable records and accounts of the work performed and of any production in which the Government may have an interest; and shall preserve those with respect to work performed for at least three years after final payment by the Government, and those with respect to production for at least three years after any obligation to pay royalties to the Government has terminated. The Government may inspect and audit said records and accounts at any time, either by itself or by a certified public accountant. The Comptroller General of the United States or his representative, until the expiration of said three-year periods, shall have access to and the right to examine all pertinent books, documents, papers, and records of the Operator. If work under this contract is carried on in conjunction with any other operations, or if labor, supervision, services, materials, supplies, equipment, facilities, or other requirements for carrying on the work are also used in connection with other operations, the costs shall be segregated and accounted for on a basis and by methods and accounts that are satisfactory to and approved by the Government.

(b) Monthly reports.--The Operator shall provide the Government with five copies of monthly reports in three sections as follows:

(1) Operator's Monthly Voucher claiming costs for work performed;

(2) Operator's Progress Report showing the number of units of the various types of work performed; and

(3) a narrative report of the work performed during the reporting period, including adequate engineering-geological maps or sketches, drill hole logs and locations, and assay reports on samples taken concurrently with advance in mineralized ground.

(Forms for reporting under (1) and (2) above will be provided by the Government.)

(c) Final report.--Upon completion of the work or termination of the Government's obligation to contribute to costs, the Operator shall furnish the Government with five copies of a final report (in addition to the final monthly report). This final report shall include a geological and engineering evaluation of the results of the work performed under the contract with an estimate of the ore reserves resulting from such work, complete assay data, adequate geological and engineering maps or sketches, and a summary of the work performed and the related costs.

(d) Report of sales.--The Operator shall provide the Government with suitable accounting and documentary evidence covering all production to which the Government's royalty relates, such as copies of smelter or concentrator settlement sheets and certified accounts of production and sale or other disposition of production.

(e) Compliance with requirements.--If the Government determines that any of the Operator's reports, records, or accounts are insufficient or incomplete, or if the Operator fails to make them, the Government may procure the preparation or completion of the same with suitable attachments as an expense of the work to which the Operator shall contribute. The Government may withhold approval and payment of any vouchers relating to insufficient or incomplete reports, records, or accounts.

ARTICLE 6. Costs.--(a) Allowable costs.--The allowable costs of the work to which the Government will contribute are limited to:

(1) the necessary, reasonable, and direct actual costs that are estimated in Exhibit A by categories as specified in this article; and

(2) fixed costs for units of work to be performed (per foot, per hour, etc.) agreed upon in lieu of actual costs and set forth in Exhibit A.

The Government will not contribute to costs under any category or subcategory omitted from the estimate of costs in Exhibit A. Any excess over any estimate which is indicated as the maximum of any category, subcategory, or item, either as to requirement or related cost; any excess over a fixed unit cost; and any excess over the total allowable cost of the work are not allowable. The Operator shall incur such excesses for his own account without contribution by the Government, but the Operator is not obligated to incur more than his agreed percentage of the total allowable cost of the work.

Any category or subcategory or element thereof not designated as a maximum in this article or in Exhibit A may be exceeded, provided that the total allowable cost of the work, which is a maximum, is not exceeded.

CATEGORY (1)--INDEPENDENT CONTRACTS.--(See Article 3(b)). The total of this category and the average unit cost estimated for each type of work to be performed under an independent contract are maximums.

CATEGORY (2)--PERSONAL SERVICES.

Subcategory (a)--Supervision and Technical Services--All elements of this subcategory (number of supervisors, technicians, outside consultants, periods of employment, rates of pay, and total) are maximums.

Subcategory (b)--Labor.

CATEGORY (3)--OPERATING MATERIALS AND SUPPLIES.--Includes such items as drill bits and steel, explosives, fuel, pipe, power, timber, rail, and small tools costing less than $50 each.

CATEGORY (4)--OPERATING EQUIPMENT.

Subcategory (a)--Rental.--The number of each rented item [6 mine cars, 1 truck], the rate of rental [$100 per month, $5 per hour], and the total of this subcategory are maximums.

Subcategory (b)--Purchases.--The total of this subcategory is a maximum.

Subcategory (c)--Depreciation.--All elements of this subcategory (time periods, rate of depreciation, and subcategory total) are maximums.

CATEGORY (5)--INITIAL REHABILITATION AND REPAIRS.--Costs of items listed under this category include all requirements, such as labor, materials and supplies, and supervision at a rate not higher than provided for in Category (2), and shall not be duplicated under any other category. The total of this category is a maximum.

Subcategory (a)--Initial rehabilitation and repairs of existing buildings, fixtures, and installations (exclusive of mine workings).--The total of this subcategory is a maximum.

Subcategory (b)--Initial rehabilitation and repairs of operating equipment.--The total of this subcategory is a maximum.

CATEGORY (6)--NEW BUILDINGS, FIXTURES, AND INSTALLATIONS (EXCLUSIVE OF MINE WORKINGS).--Costs of items listed under this category include all requirements, such as labor, materials and supplies, and supervision at a rate not higher than provided for in Category (2), and shall not be duplicated under any other category. The total of this category is a maximum.

CATEGORY (7)--MISCELLANEOUS.--Includes requirements and costs that do not fall within any of the first six categories, such as repairs other than initial and maintenance of operating equipment, analytical work, prints and other reproductions, accounting, Operator's share of payroll taxes, liability insurance covering employment, travel, and communications.

(b) Nonallowable costs.--The Government will not contribute to the following costs:

(1) Costs of the land, such as rental, depreciation, depletion, or other costs of acquiring, owning, or holding possession;

(2) Indirect costs, such as general overhead, corporate management, interest, taxes (other than payroll and sales taxes), insurance (other than liability insurance covering employment), damages to persons, damages to property (other than necessary repairs or replacements of equipment or other property used in the work);

(3) Previous work performed or costs incurred before the date of this contract; and

(4) Deferred payments.--Any costs incurred by the Operator under any rental-purchase agreement, installment-purchase agreement, or any agreement for the purchase of goods under the provisions of which payment of the full purchase price is deferred more than 90 days from the delivery of the goods, unless the purchase agreement is approved by the Government in writing.

(c) Reductions in costs.--The Operator shall account for and give the Government credit for any incidental benefits, credits, or money received in the ordinary course of business in prosecuting the work (as by salvage or sale of materials or equipment, furnishing of room or board, furnishing of power or services to third persons, rebates or discounts on purchases, etc.), in the same ratio in which the Government contributes to costs; and such amounts shall be treated as a reduction in costs incurred so that they are available for use within the limit of the original total cost. This provision does not apply to receipts from production which are subject to the Government's royalty under the provisions of Article 7.

ARTICLE 7. Repayment by Operator.--(a) Certification.--If the Government considers that mineral or metal production from the land covered by the contract may be possible as a result of the exploration work, it shall so certify in writing to the Operator at any time not later than six months after a sufficient final report and final accounting (see Article 5) have been furnished.

(b) Royalty on production.--The Operator, whether or not the producer (for example, if the Operator either transfers or does not retain his interest in the land), shall pay to the Government a royalty on all minerals and metals mined or produced from the land as follows:

(1) irrespective of any certification of possible production--from the date of the contract until the lapse of the time within which the Government may issue such certification or until the total net amount contributed by the Government is fully repaid with interest, whichever occurs first; or

(2) if the Government issues a certification of possible production--for a period of [redacted] years from the date of the contract, or until the total net amount contributed by the Government is fully repaid with interest, whichever occurs first.

(c) Payment of royalty.--(1) The Government's royalty shall be five percent of the gross proceeds (including any bonuses, premiums, allowances, or other benefits) from the production sold, in the form sold (ore, concentrate, metal, or equivalent), at the point of delivery (the f.o.b. point); except, that charges of the buyer arising in the regular course of business and shown as deductions on the buyer's settlement sheets (such as treatment processes performed by the buyer, sampling and assaying to determine the value of the production sold, and freight payable by the buyer to a carrier (not the Operator)), shall be allowed as deductions in arriving at the "gross proceeds" as that term is used herein. No costs of the Operator are deductible in arriving at the "gross proceeds" as that term is here used.

The term "treatment processes" means those processes (such as milling, concentrating, smelting, refining, or equivalent, but excluding fabricating or manufacturing) applied to the crude ore or other production after it is extracted from the ground to put it into a commercially marketable form.

(2) The Government's royalty shall be computed and paid currently upon each lot sold, held, or used in integrated operations, as the case may be.

(d) Unsold production.--If any production (ore, concentrate, metal, or equivalent), after the lapse of six months from the date the ore was extracted from the ground, remains neither sold nor used by the Operator in integrated manufacturing or fabricating operations (for instance, if it is stockpiled), the Government, at its option, as long as it so remains, may require the computation and payment of its royalty on the value of such production in the form (ore, concentrate, metal, or equivalent) it is in when the Government elects to require computation and payment. If any production is used by the Operator in integrated manufacturing or fabricating operations before the Government makes its election, the Government's royalty on such production shall be computed on the value thereof in the form in which and at the time it is so used. "Value" as here used means what is or would be gross income from mining operations for percentage depletion purposes in Federal income tax determination or the market value, whichever is greater.

(e) Lien for payment.--To secure the payment of royalty (see Article 7(b)), the Operator hereby grants to the Government a lien upon his interest in the land and upon any production of minerals and metals therefrom until the royalty claim is extinguished by lapse of time or is fully paid.

(f) Notice to purchasers.--The Operator shall give notice of the Government's claim for royalty to any purchaser of the production, and shall authorize and direct such purchaser to pay the royalty directly to the Government and to furnish the Government with copies of the settlement sheets. If the records of any production and sales or other disposition of production, whether the production is by the Operator or by others, are not made available to the Government, the amount of the royalty may be estimated by the Government, and this estimate shall be final and binding upon the Operator.

(g) No obligation to produce.--Nothing in this contract shall be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any production operations.

(h) Government not obligated to buy.--Nothing in this contract shall be construed as imposing any obligation on the Government to purchase any minerals and metals mined or produced from the land.

ARTICLE 8. Interests in purchased property.--(a) Title and ownership.--All costs under this contract shall be incurred by the Operator in the Operator's own name and for the Operator's own account; but any property acquired to the cost of which the Government contributes shall belong to the Operator and the Government jointly in proportion to their respective contributions although title thereto shall be taken in the name of the Operator.

(b) Preservation of property.--Until the final disposal of any property in which the Government has an interest, the Operator shall preserve and protect same for the best interest of the Government, and any reasonable and necessary cost thereof will be treated as an allowable cost of the exploration. After the completion of the work, termination of the Government's obligation to contribute, or when such property is not being used for the work, the Operator shall not use it elsewhere without the written consent of the Government and without paying a reasonable rental to be fixed by the Government for its proportionate interest.

(c) Disposal of property.--Upon the completion of the work, termination of the Government's obligation to contribute to costs, or when the property is no longer needed for the work, the Operator shall promptly dispose of salable or salvageable property in which the Government has an interest for the joint account of the Government and the Operator, either by return to the vendor, sale to others, purchase by the Operator, or sale or transfer to the Government at a price at least as high as could be obtained from others, unless the Government in writing waives its interest in any such property. Without advance approval of the sales price by the Government, the Operator shall not sell at any price any item of property that cost more than $500, and shall not sell at less than 25 percent of the purchase price any item of property that cost $500 or less. The Government, in lieu of approving the sales price for any such item, may itself purchase the item at the best price which the Operator is able to obtain or offers. Property remaining upon any termination of the work shall be considered in groups or categories (such as drill steel, explosives, pipe, or rail), and if the original cost of the remaining unexpended portion of any such group or category is less than $50, the Government waives its interest therein. If necessary to accomplish the disposal of any item, the Operator shall dismantle and sever it from the land, the cost thereof to be treated as a cost of the exploration.

(d) Default of the Operator re disposal.--If within 90 days after the completion of the work, termination of the Government's obligation to contribute to costs, or after the property is no longer needed for the work, the Operator has failed to sell or otherwise liquidate or dispose of any property in which the Government has an interest, the Government, at any time prior to final settlement under the contract, may:

(1) in writing extend the time within which the Operator must dispose of or liquidate the property;

(2) by written notice to the Operator, place upon such property what it determines to be a fair valuation thereof, not in excess of the cost less 1.66 percent per month from the date such property was purchased under this contract to the termination of said 90-day period; and such property shall thereupon be considered and accounted for as having been purchased by the Operator at the valuation so fixed by the Government; and

(3) enter and take possession of such property wherever it may be found, and remove and dispose of it for the joint account of the parties.

ARTICLE 9. Termination of the Government's obligations.--(a) If the Government determines that operations at any time have failed to achieve anticipated results and further work is not justified, the Government may give the Operator written notice thereof, and thereupon:

(1) the Government shall be free of all obligation to contribute to costs not then incurred other than such as may be allowable under the provisions of the contract as necessary and incidental to final accounting and reporting; and

(2) the Operator shall be free of all obligation to prosecute the work other than such as may be necessary and incidental to final accounting and reporting.

(b) If the Government determines that the Operator is in default under the terms of the contract, the Government may give the Operator written notice of such default with a specification of reasonable time within which the default must be cured; and if the Operator fails to cure such default as required, thereupon:

(1) the Government shall be relieved of all obligation to contribute to costs not incurred when the notice was given, other than such as may be allowable by the provisions of the contract as necessary and incidental to final accounting and reporting; and

(2) the Operator shall be free of all obligation to prosecute the work other than such as may be necessary and incidental to final accounting and reporting.

The Government may also avail itself of any other remedy the law may provide for breach of contract, including the right to rescind the contract and to demand repayment of all moneys contributed by the Government under the contract.

(c) The giving of any notice by the Government under the provisions of this Article 9 shall not affect the Government's rights as provided for in the contract with respect to royalty and liens to secure the payment thereof, and such rights shall be fully preserved.

(d) The determinations of the Government are subject to appeal under Article 13.

ARTICLE 10. Notices to be given by the Government may be delivered to the Operator, or may be sent by certified mail addressed to the Operator at his mailing address stated in this contract. If mailed, notices are deemed to have been delivered five days after the date of mailing.

ARTICLE 11. Officials not to benefit.--No member of or delegate to Congress or resident commissioner shall be admitted to any share or part of this contract or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

See Article 16

~~ARTICLE 12. Nondiscrimination.--In connection with the performance of work under this contract, the Operator agrees not to discriminate against any employee or applicant for employment because of race, religion, color, or national origin. The aforesaid provision shall include, but not be limited to, the following: employment, upgrading, demotion, or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The Operator agrees to post hereafter in conspicuous places, available for employees and applicants for employment, notices to be provided by the Government setting forth the provisions of the nondiscrimination clause.~~

~~The Operator further agrees to insert the foregoing provision in all subcontracts hereunder, except subcontracts for standard commercial supplies or raw materials.~~

ARTICLE 13. Disputes.--Any dispute arising under this contract which is not disposed of by agreement shall be decided by the Director, Office of Minerals Exploration, who shall reduce his decision to writing and mail or otherwise furnish a copy thereof to the Operator. The decision of the Director, Office of Minerals Exploration, shall be final and conclusive unless, within 30 days from the date of receipt of such copy, the Operator mails or otherwise furnishes to the Director, Office of Minerals Exploration, a written appeal addressed to the Secretary. The decision of the Secretary or his duly authorized representative for the determination of such appeals shall be final and conclusive unless determined by a court of competent jurisdiction to have been fraudulent, or capricious, or arbitrary, or so grossly erroneous as necessarily to imply bad faith, or not supported by substantial evidence.

The term "Director, Office of Minerals Exploration," as used herein includes his duly authorized representative.

ARTICLE 14. Eight-Hour Law of 1912--Overtime compensation.--This contract, to the extent that it is of a character specified in the Eight-Hour Law of 1912, as amended (40 U. S. Code 324—326) and is not covered by the Walsh-Healey Public Contracts Act (41 U. S. Code 35—45), is subject to the following provisions and exceptions of said Eight-Hour Law of 1912, as amended, and to all other provisions and exceptions of said Law:

No laborer or mechanic doing any part of the work contemplated by this contract, in the employ of the Operator or any independent contractor contracting for any part of said work contemplated, shall be required or permitted to work more than eight hours in any one calendar day upon such work, except upon the condition that compensation is paid to such laborer or mechanic in accordance with the provisions of this clause. The wages of every laborer and mechanic employed by the Operator or any independent contractor engaged in the performance of this contract shall be computed on a basic day rate of eight hours per day; and work in excess of eight hours per day is permitted only upon the condition that every such laborer and mechanic shall be compensated for all hours worked in excess of eight hours per day at not less than one and one-half times the basic rate of pay. For each violation of the requirements of this clause a penalty of five dollars shall be imposed for each laborer or mechanic for every calendar day in which such employee is required or permitted to labor more than eight hours upon said work without receiving compensation computed in accordance with this clause, and all penalties thus imposed shall be withheld for the use and benefit of the Government.

ARTICLE 15. Copeland (Anti-Kickback) Act--Remittals of wages.--The regulations of the Secretary of Labor applicable to contractors and subcontractors (29 CFR, Part 3), made pursuant to the Copeland Act, as amended (40 U.S.C. 276c) and to aid in the enforcement of the Anti-Kickback Act (18 U.S.C. 874) are made a part of this contract by reference. The Operator will comply with these regulations and any amendments or modifications thereof and will be responsible for the submission of affidavits required of independent contractors thereunder. The foregoing shall apply except as the Secretary of Labor may specifically provide for reasonable limitations, variations, tolerances, and exemptions.

ARTICLE 16. Changes and added provisions.--

(a) "Nondiscrimination. The provisions governing performance of work under Government contracts, as set out in Section 301 of the Executive Order 10925, dated March 6, 1961 (a copy of which is attached hereto as Exhibit B and by reference hereby incorporated and made a part of this contract), shall be applicable to this contract.

"In compliance with the Rules and Regulations (41 CFR, Section 60-1.3(a)) issued under Executive Order 10925 of March 6, 1961, the Operator is hereby bound and agrees to include in each subcontract which it shall make with a subcontractor or supplier paragraphs (1) through (7) of Section 301 of said Executive Order, unless exempted pursuant to the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity.

"The Operator shall require each of its subcontractors (first tier) to include in every subcontract with each of its subcontractors (second tier) the following clause: The (here identify the second-tier subcontractor by name) shall incorporate by reference in each subcontract or purchase order with a subcontractor or supplier paragraphs (1) through (5) of Section 301 of Executive Order 10925 of March 6, 1961, unless exempted pursuant to the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity."

Executed in quintuplicate this 21 day of May, 1963.

EXPLORATION CONTRACT
BULLDOG MOUNTAIN, INC.
[illegible]-4288

ANNEX I

The land referred to in Article 1 of the contract consists of sixteen (16) patented and fifty-six (56) unpatented lode mining claims, including all rights pertaining thereto, located in the Bonanzaville Mining District, Mineral County, Colorado, in Township 42, North, Range 1, West of the New Mexico Principal Meridian. All claims are owned by the Operator with the exception of the Kansas City Star patented claim which is held pursuant to a lease dated April 8, 1961.

The claims are:

MME Form 52
Jan. 1959

UNITED STATES
DEPARTMENT OF THE INTERIOR
OFFICE OF MINERALS EXPLORATION

FOR GOVERNMENT USE ONLY
Operator
Docket No. OME –
Contract No. 14-23-090– 2166
Contract Date MAY 6 1963

LIEN AND SUBORDINATION AGREEMENTS[1]

To the United States of America:

That certain land in the County of Mineral, State of Colorado;

described as follows:[2] Kansas City Star; Mineral Survey Number 8697

hereinafter called the "land", is the subject of a proposed exploration contract, hereinafter called the "Contract", between the United States of America, hereinafter called the "Government" and Bulldog Mountain, Inc.[3]

hereinafter called the "Operator". In consideration for and as an inducement to the Government executing the Contract, the undersigned:

1. (a) Being the owner of an interest in the land, hereby grants to the Government a lien upon all of his right, title, and interest in the land and upon any production of minerals therefrom to secure the payment to the Government of the royalty on production provided for by the Contract, and agrees if the Operator's interest should be surrendered or terminated at any time prior to the expiration of the rights of the United States under said Contract to pay royalty to the Government according to the terms of said Contract; or

(b) Being the holder of a claim, lien, or encumbrance against the land, hereby subordinates his claim, lien, or encumbrance in or against the land and in any production therefrom to the rights of the Government under the Contract with respect to royalty on production and liens to secure same.[4]

2. Undertakes and agrees that property in which the Government may acquire an interest or equity under the Contract may be dismantled, severed from the land, and removed as may be provided in the Contract; and the Government's interest and equity in such property shall be prior and superior to any adverse right or claim of the undersigned.

3. Represents and undertakes that there is no claim, lien, or encumbrance upon the undersigned's right, title, claim, or interest in or against the land other than the following: (If "none" insert the word "none". Do not leave blank.)

Except subject to mining lease agreement with Bulldog Mountain, Inc.
dated April 26, 1961, recorded May 2, 1961, in Book 110-I at Pages 322- 323
Of the Mineral County, Colorado Records.

1/ Production from the land is not required, and in the absence of production there is no obligation to pay royalty to the Government.

2/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease /or contract, deed, or other document/ dated _____, and recorded in Book _____, Page _____, official records of said county". If (b) is used, the book and page of recordation must be inserted above. If the space provided is insufficient, use an Annex and refer to the Annex in the space.

3/ Insert name exactly as it appears in the Application MME Form 40.

4/ Subparagraph 1(a) does not apply to the holder of a claim, lien, or encumbrance.

4. Undertakes and agrees (a) neither to commit any act nor assert any claim in conflict with the provisions of this Agreement; and (b) to give advance notice of the Government's rights under this agreement to any subsequent transferee, mortgagee, encumbrancer, or lessee of any of the undersigned's right, title, claim, or interest in or against the land or any production therefrom, furnishing the Government with two true copies of such notice; and

5. Consents to all amendments (including an agreement of termination) and assignments of the Contract without notice thereof, and undertakes and agrees that this agreement shall extend and apply thereto.

6. Added provisions ____None____ (State "None" or "See Annex No.____".)

Dated this 13th day of February, 1963.

E. D. McClure (Seal)	South Park, Colorado	(Street) (City & State)
W. W. Wyley, President (Seal)	South Park, Colorado	(Street) (City & State)

EXPLORATION CONTRACT
BELLROSE MOUNTAIN, INC.
OME-6188

ANNEX II

WHEREAS, most of the property referred to in Article 2 of the contract form was the subject of a contract dated September 12, 1961, No. 2130, Docket OME-6183, between the Government and Humphreys Exploration Company, hereinafter called the "Prior Contract" and

WHEREAS, said Prior Contract has been performed and the contribution of the Government thereunder has been determined (subject to audit) to be $26,901.65 and

WHEREAS the work now provided for in this contract is an extension and continuation of the work under the Prior Contract

NOW THEREFORE it is agreed that:

The contribution of the Government under the Prior Contract shall be and is hereby added to the estimated cost of the work under this contract as indicated in Exhibit A for repayment to the Government under the provisions of this contract. Any royalty accruing under this contract shall be applied first to the repayment of said contribution under the Prior Contract.

EXPLORATION CONTRACT
BULLDOG MOUNTAIN, INC.
GSM-4288

EXHIBIT A

The purpose of this project is to explore for silver-bearing ore bodies by crosscutting to the Fussle vein, by drifting along the vein to its junction with the east strand of the Bulldog Mountain fault and thereafter to drift along such strand. Underground diamond drilling shall also be performed.

Concurrently with the aforementioned work, surface trenching by bulldozing and surface diamond drilling shall be performed in the northern portion of the property.

General Provisions

No work under this contract may be performed at distances less than 100 feet from the exterior boundaries of the property.

The location, direction, and extent of each work item shall be subject to prior Government approval.

The total combined footage of surface and underground diamond drilling shall not exceed 8,000 feet, the total combined footage of crosscutting and drifting shall not exceed 4,000 feet, and the total combined bulldozing for access roads, trenches, and drill sites shall not exceed 300 hours. The Government will contribute to the cost of not more than 4 underground diamond drill stations and to the cost of not to exceed 600 feet of timbering for drifts and crosscuts.

The surface diamond drilling shall be done with standard NX and BX size coring bits (approximately 2-1/8 inch and 1-5/8 inch core diameter, respectively) and, when necessary to complete a hole, standard AX size bit (approximately 1-1/8 inch core diameter) may be used.

The underground diamond drilling shall be performed with standard BX and AX coring bits.

Core from the diamond drilling shall be properly boxed, marked, and stored for later inspection by the Government. With prior Government approval, the Operator may later dispose of such core. Significantly mineralized core shall be split and sampled and the sample assayed. No sample shall represent a core length of greater than five feet.

Facilities shall be provided for the sampling of diamond drill sludges and such sludges shall be retained when drilling in significantly

mineralized areas. Whenever the core recovery is found to have been less than 60 percent the corresponding retained sludges shall be sampled by quartering as necessary and the sample assayed in addition to the sampling and assaying of such core fragments as may have been recovered.

True copies of assay certificates of all samples shall be submitted with the Operator's monthly report which shall also include a map or sketch showing the work completed during the reporting period and showing the locations of all samples taken. The map or sketch should also show the general geological formations and structures traversed by the work performed.

All holes shall be logged geologically and copies of the logs of the completed holes shall likewise be furnished monthly, with the Operator's monthly report.

All drifts and crosscuts shall be of not less than 6' by 7' in cross section in the clear of timber and shall be timbered as necessary, using drift sets of not less than 8' by 8' timber, or equivalent round timber.

All drill stations shall not be less than 5' x 7' in rock section and shall be not less than 15 feet long, from the wall of the drift.

Mine rails shall be of not less than 30 pound size, air lines of not less than 4-inch diameter, and water lines of not less than 1-inch diameter. The drifts and crosscuts shall be ventilated, using not less than 13-inch diameter vent pipe.

All significantly mineralized areas traversed by the drifting shall be sampled normal to their trends at intervals of not more than ten feet. Likewise a representative bulk sample shall be taken of each round broken, in areas showing significant mineralization.

All samples, from whatever source, before being sent for assay, shall be split and one split set aside and made available to the Government, properly marked as to source and location. Samples shall be assayed for gold, silver, lead, and zinc, as appears desirable.

The bulldozer used for the work of access roads, trenches and drill sites shall be of not less than D-7 size or equivalent size of other make.

The Operator shall provide such supervisory and technical services as may be required to complete the work in a satisfactory manner.

Description of the Work

In the northern portion of the property trenching and surface diamond drilling shall be performed at locations which appear desirable. Such work (in part) is roughly indicated on the attached Figure 1.

From a point near the NW corner of the Grover Cleveland claim a crosscut shall be driven westerly to intersect the Puzzle vein and thereafter a drift shall be driven on such vein in a northwesterly direction to intersect the east strand of the Bulldog Mountain fault. Thereafter the drift shall be continued northerly along this east fault strand.

From positions believed proper along the course of the drifting, four diamond drill stations may be excavated. From these stations diamond drill holes shall be drilled westerly to explore the various strands of the Bulldog Mountain fault.

It is estimated that 4,000 feet of such underground drilling will be required and that 4,000 feet will likewise be required for the surface diamond drilling.

Estimated Cost of the Work

Actual Costs

Category (1) Independent Contracts

Core drilling (surface)

Mobilization of equipment	$600.00
Alluvium drilling to bedrock 200 ft. @ $6.00 per ft. cased	1,200.00
NX drilling, bedrock to 250 ft. depth 1,050 ft. @ $5.75 per ft.	6,037.50
BX drilling, bedrock to 250 ft. $5.25 per ft.	
AX drilling, bedrock to 250 ft. $4.95 per ft.	
NX drilling 250 to 500 ft. depth 1,250 ft. @ $5.90 per ft.	7,375.00

BX drilling 251 to 500 ft.
$5.50 per ft.

AX drilling 251 to 500 ft.
$5.15 per ft.

BX drilling, depths in excess of 500 ft.
1,500 ft. @ $5.75 per ft. 8,625.00

AX drilling depths in excess of 500 ft.
$5.40 per ft.

Reaming and casing, cementing and redrilling, surveying
150 hours @ $11.50 per hr. 1,725.00

<u>Underground diamond drilling</u>

Mobilization 300.00

BX drilling 0 to 250 ft. depth
1,750 ft. @ $4.95 8,662.50

AX drilling, 0 to 250 ft. depth
$4.75 per ft.

BX drilling 251 to 500 ft. depth
1,000 ft. @ $5.25 5,250.00

AX drilling 251 to 500 ft. depth
$5.00 per ft.

BX drilling 501 to 750 ft. depth
650 ft. @ $5.60 3,640.00

AX drilling 501 to 750 ft. depth
$5.35 per ft.

AX drilling depths in excess of 750 ft.
600 ft. @ $5.80 3,480.00

Cementing and redrilling, reaming and casing, hole surveying
150 hours @ $11.30 per hr. 1,725.00

$48,620.00

Agreed unit costs

Building 300 hrs. @ $12.50 per hr.	3,750.00	
Incidental allowance for each ft. of drilling completed 8,000 ft. @ $0.40	3,200.00	
Compressed air and water allowance for each foot of underground drilling completed 4,000 ft. @ $0.60	2,400.00	
Crosscutting and drifting 4,000 ft. @ $36.00	144,000.00	
Timbering of drifts and crosscut 600 ft. @ $8.00 per ft.	4,800.00	
Diamond drill sections 4 @ $350 each	1,400.00	
Core boxes (wooden) 500 @ $3.50 each	1,750.00	
Assaying 1,200 determinations @ $2.00 each	2,400.00	
		$163,700.00
Total Estimated Cost		$212,320.00
Government Participation @ 50%		$106,160.00
Contribution of Government under Prior Contract		$ 26,981.65
Combined contribution under both contracts		$133,141.65

EXHIBIT B

NONDISCRIMINATION IN EMPLOYMENT

(Section 301, Executive Order 10925, March 6, 1961, 26 FR 1977)

"In connection with the performance of work under this contract, the contractor agrees as follows:

"(1) The contractor will not discriminate against any employee or applicant for employment because of race, creed, color, or national origin. The contractor will take affirmative action to ensure that applicants are employed, and that employees are treated during employment, without regard to their race, creed, color, or national origin. Such action shall include, but not be limited to, the following: employment, upgrading, demotion or transfer; recruitment or recruitment advertising; layoff or termination; rates of pay or other forms of compensation; and selection for training, including apprenticeship. The contractor agrees to post in conspicuous places, available to employees and applicants for employment, notices to be provided by the contracting officer setting forth the provisions of this nondiscrimination clause.

"(2) The contractor will, in all solicitations or advertisements for employees placed by or on behalf of the contractor, state that all qualified applicants will receive consideration for employment without regard to race, creed, color, or national origin.

"(3) The contractor will send to each labor union or representative of workers with which he has a collective bargaining agreement or other contract or understanding, a notice, to be provided by the agency contracting officer, advising the said labor union or workers' representative of the contractor's commitments under this section, and shall post copies of the notice in conspicuous places available to employees and applicants for employment.

"(4) The contractor will comply with all provisions of Executive Order No. 10925 of March 6, 1961, and of the rules, regulations, and relevant orders of the President's Committee on Equal Employment Opportunity created thereby.

"(5) The contractor will furnish all information and reports required by Executive Order No. 10925 of March 6, 1961, and by the rules, regulations, and orders of the said Committee, or pursuant thereto, and will permit access to his books, records, and accounts by the contracting agency and the Committee for purposes of investigation to ascertain compliance with such rules, regulations, and orders.

"(6) In the event of the contractor's noncompliance with the nondiscrimination clauses of this contract or with any of the said rules, regulations, or orders, this contract may be cancelled in whole or in part and the contractor may be declared ineligible for further government contracts in accordance with procedures authorized in Executive Order No. 10925 of March 6, 1961, and such other sanctions may be imposed and remedies invoked as provided in the said Executive order or by rule, regulation, or order of the President's Committee on Equal Employment Opportunity, or as otherwise provided by law.

"(7) The contractor will include the provisions of the foregoing paragraphs (1) through (6) in every subcontract or purchase order unless exempted by rules, regulations, or orders of the President's Committee on Equal Employment Opportunity issued pursuant to section 303 of Executive Order No. 10925 of March 6, 1961, so that such provisions will be binding upon each subcontractor or vendor. The contractor will take such action with respect to any subcontract or purchase order as the contracting agency may direct as a means of enforcing such provisions, including sanctions for noncompliance: *Provided, however,* That in the event the contractor becomes involved in, or is threatened with, litigation with a subcontractor or vendor as a result of such direction by the contracting agency, the contractor may request the United States to enter into such litigation to protect the interests of the United States."
