Re: L-A-1124

Mr. Raphael J. Moses, Secretary-Treasurer
Metals Production Company
P. O. Box 77
Alamosa, Colorado

Dear Mr. Moses:

Your application (L-A-1124) requesting a Federal loan to be used for the construction of a 50 ton custom mill in Saguache County, Colorado, has been reviewed by the Lead Zinc Branch of the Defense Minerals Administration.

Before the loan can be recommended to the R. F. C., it will be necessary to have a field examination made to substantiate the tonnage and grade of reserves that you have indicated in your application. We will also need further information from you as to your proposal. I am enclosing two sets of forms, one of which should be filled out and returned to me, the one used depending on whether the loan needed is less or greater than $50,000. You have previously submitted Form RF-100, which is a necessary companion form for the new ones I am forwarding.

I note that you have commitments from mine owners for custom milling and that these can be forwarded upon request. As they will be needed eventually, I suggest that you forward them when the forms are returned, so that the examining team will be in possession of all information that might be pertinent to the project.

Very truly yours,

SIGNED

T. P. Billings, Chief
Lead Zinc Branch
