Denver, Colorado

In reply please refer to:
DMA-13271

Dear Mr. Hughes:

We have received your sample and have made a spectrographic analysis of it. This analysis shows traces of tungsten, chrome, and cobalt. There is no columbium or tantalum. Although tungsten is not commercial in quantity it might be recovered as a by-product of a gold operation.

As outlined above you have failed to submit evidence which demonstrates any possibility of proving the presence of commercial tungsten ore. Therefore, we must regretfully deny your application as submitted.

Very truly yours,

FWO

Memorandum

To: [illegible]

Through: Director, [illegible]

From: Chief, [illegible]

Subject: [illegible]-1277
Tungsten, [illegible], [illegible], [illegible], [illegible], etc.
Carryall [illegible]
[illegible], Colorado

J. [illegible], Engineer
1361 [illegible]
Denver, Colorado

Reasons and Findings:

The applicant has failed to demonstrate that he has any commercial quantities of the [illegible] mentioned in his application. Primarily, the [illegible] prospect-to-be-explored and developed from which small amounts of tungsten [illegible] have been obtained.

There is no evidence that the program of exploratory drilling would disclose commercial quantities of tungsten, [illegible], or [illegible], the only [illegible] which have been found thus far in these [illegible]. The applicant submitted no [illegible] of [illegible].

Conclusions: The application is denied.

Well
J. F. S.
