Raymaster Mine Trust, DMA Docket 2063

Dear Mr. Paulson:

All the questions on Form MF-103 must be answered before we can process your application for an exploration loan.

Question 21, Form MF-103, for the Tungsten Activities Trust has not been answered. The proposed work should be described, and the time required to complete the work should be estimated. For example, the statement of the proposed work should include the number of feet of drifting, crosscutting, sinking, or diamond drilling contemplated. Maps should accompany the application so that the location of the proposed work would be defined.

Question 23 should be answered in detail. The daily or hourly wage of the miners should be itemized. The building to be repaired should be identified with a statement of the cost of materials and labor. Each piece of equipment to be purchased or rented should be itemized as to class and size with the estimated cost or rental. The supplies should be itemized with the estimated cost of each class of material.

The same applies to the applications for the Raymaster Mine Trust and the Moffat Metals Trust.

Kindly submit the above information to this office so that we may process your applications.

Yours very truly,

P. T. Allsman, for
