Date: April 18, 1956

Memorandum

To: Chairman, Operating Committee, DMEA

From: Executive Officer, DMEA Field Team, Region III

Subject: Royalty payments, DMEA Docket 3182 (Tungsten), Contract Idm-E654, L. P. Mock - Colorado

Period: March, 1956

During the above month the following royalty payments were received for ore or concentrates shipped from the subject property:

Lot No.	Dry Tons	Royalty Due	Royalty Pd.
		(NONE)	

Royalty

Totals:

Past Due Royalties Collected	None
Total Dry Tons (Ore or Cons.) Shipped to Date	0.733
Expiration Date of Royalty Repayment	Not to be Certified
Amount of Government Participation	$6,676.50
Total Royalty Payments to Date	$3.09
Percent of Loan Repayment	0.046% --

To: Chairman, Operating Committee

From: Executive Officer, DMEA Field Team, Region IV

Subject: Docket No. DMEA 3182, Contract Idm-E654 (Tungsten)
Lloyd P. Mock, Big 6 Mine, Boulder County, Colorado

WSM

Reference is made to your memorandum dated October 26, 1954, regarding the amount allowed for construction of a headframe and hoist house under Contract Idm-E654.

We are enclosing 4 copies of a memorandum by Carl Belser which contains an estimate of the amount expended by the Operator in construction of the headframe and hoist house.

Memorandum

To: Chief, Mineral Resources Branch, Mining Division, Region IV

From: Carl Belser

Subject: DMEA 3182, Contract Idm-8654 (Tungsten) Lloyd P. Mock (Mock shaft) Boulder County, Colorado - Cost of construction of headframe and hoist house at Mock shaft

The hoist house is a frame, 15- by 24-foot, hip-roofed building covered with rolled roofing and asbestos base siding. The leveling of the site gave more trouble than was anticipated and the building was larger than needed. A hand-mixed concrete base was poured for the hoist. Materials and costs for the hoist house follow:

Lumber (2,500 board feet at $90.00/M (delivered)	$225.00
Windows (four 24-inch by 24-inch)	27.40
Nails, hinges, etc.	15.00
Roofing and siding (11 rolls)	30.25
Sand, cement (hoist base)	25.00
Total supplies	$322.65
Bulldozing site (1-1/2 days)	150.00
Labor (16 shifts at $14.40)	230.40
Total cost	$702.05

The contract allowed $500.00 for the building. Salvage value of building (boards and windows) would be as follows:

Total lumber in building (2,500 board feet of which two-thirds is salvable) 1,675 feet at $40.00/M	$67.00
Four windows at $4.000	16.00
	$83.00
Less: Cost one man 5 days to tear down and pull nails at $14.40	$72.00
Truck to possible market	10.00
	$82.00
Net salvage value	$1.00

There is at present no known use for the shaft house in the near vicinity and any attempt to salvage the lumber would only pay for the labor and trucking charges.

The headframe is made of four round posts. It is 22 feet high and has a span of 10 feet by 11 feet at the bottom. Some bolts and lumber were used in the construction but the main cost was labor. The sheave and dumping apron belonged to Mack. The contract allowed $490.00 for the headframe which is about what it cost to build it. The headframe would not be worth salvaging either than for the sheave and dumping apron which belong to the contractor.
