Application
- [ ] Denied
- [ ] Withdrawn

Contract
- [ ] Terminated - Not Certified
- [x] Terminated - Certified
- [ ] Cancelled
- [ ] Royalty Agreement

The records contained in this file are marked (x) and arranged in this order:

Folder No. 1:

Left Side

- [x] Royalty Audits
- [x] Certification of Discovery
- [ ] Closing Letter
- [x] Cost Audits
- [ ] Termination Notice or Agreement
- [ ] Recision Notice
- [ ] Assignment of Contract
- [x] Contract Amendments
- [x] Contract with all exhibits and annexes
- [x] Owner's Consent to Lien and Subordination Agreement
- [x] Application and attachments

Right Side

- [x] Project summary (final)
- [x] Work Completed analysis (final)

All other material filed in chronological order including the following reports if checked:

- [x] Field Team Semi-Annual Report for Certified Project
- [x] Final Field Team Report (Tab)
- [ ] Operator's Final Report (Tab)
- [x] Interim Field Team Reports
- [x] Operator's monthly reports and all attachments
- [x] On-site Exam Report (Tab)
- [ ] Settlement Sheets
- [ ] Drill Logs

Additional Folders:

Left Side

Folders No. _____: Reports
- [ ] Analysis of Semi-Annual Inspection Reports
- [ ] Project Summary (Interim) by DMEA Engineers

Right Side

- [x] Field Team Semi-Annual Report for Certified Project
- [ ] Field Team Interim Reports
- [ ] Operator's Monthly Reports with transmittal, narrative and maps.

Folders No. _____: Maps (Use pocket folder or envelope)

Folders No. _____: Settlement Sheets

Folders No. _____: Drill Logs

Folders No. _____: Royalty material

OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files of the Washington office pertaining to Contract Idm-E393, Docket DMEA-2293 (Mica), dated August 29, 1952, with

Dixie Minerals, Inc.
131 Main Street
Waynesville, N. C.

for the purpose of determining the amount of royalty payable to the U. S. Government on sales of minerals from property referred to as the D. H. Stephens Mine located in Jackson County, North Carolina, during the period March 10, 1955, through May 1, 1961.

A certification of discovery or development was issued on June 21, 1954, and, in accordance with Article 9 of the contract, royalty is payable on all minerals produced from the land described in Article 2 of the contract for a period of 10 years from the date of the contract or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first. A Report of Review dated January 19, 1954, indicated accepted costs under the exploration contract amounting to $5,390.00 with the Government's contribution on a 90 percent basis being $4,851.00.

The status of the project, the scope of review, and the reasons therefor are stated on page 2.

This review established no sales subject to the Government's royalty during the period subsequent to a prior Report of Royalty Review, which found no sales subject to the Government's royalty through March 9, 1955. The royalty account as of May 1, 1961, was:

Total Royalty Payable	$ -0-
Total Royalty Paid	-0-
Balance of Royalty Due	$ -0-

E. D. Talbert, OME Auditor

November 20, 1961

STATUS OF PROJECT, SCOPE OF REVIEW
AND REASONS THEREFOR

A review of the docket files indicates that no work has been performed on the property under the contract since 1954 and that no production has been made since the date of the contract. Inspections by field representatives, the last on May 1, 1961, have confirmed the lack of activity.

Article 10 of this contract contains the so-called "abandonment" provision. Accordingly, if the Operator has or does terminate or surrender its lease, it is relieved of obligation to pay royalty on future production, if any, unless the property is reacquired within the royalty repayment period. In the event of such termination or surrender, the Owner's Consent to Lien (executed on July 23, 1952, by D. H. Stephens and Liddie Stephens) may not be legally enforceable as it secures payment only for the royalty "provided for under the terms of said exploration project contract". The lien, at any rate, is specifically limited to $5,600.00.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(1) The property has been inactive since 1954;

(2) No production has occurred since the date of the contract; and

(3) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible royalty which might be disclosed.

DEFENSE MINERALS EXPLORATION ADMINISTRATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ~~SECOND~~ ROYALTY REVIEW

I have reviewed the files of the Executive Officer, DMEA Field Team, Region V, pertaining to Contract Idm-E393, Docket No. DMEA-2293, with:

Dixie Minerals, Inc.
131 Main Street
Waynesville, North Carolina

for the purpose of determining the amount of royalties due the U. S. Government on sales of mica produced from property referred to as the D. H. Stephens Mine located in Macon County, North Carolina, during the period August 29, 1952, to March 9, 1955.

My review included a conference with Mr. William A. Beck, Mining Engineer, U. S. Bureau of Mines, Knoxville, Tennessee, who is thoroughly familiar with the project.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(1) A check of the records of the General Services Administration Mica Purchase Depot, Spruce Pine, North Carolina, did not disclose any sales of mica produced from this mine.

(2) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible royalty which might be disclosed.

The review has not disclosed any sales of mica from this project which would be subject to royalty payments to the U. S. Government.

CERTIFICATION OF THE UNITED STATES OF AMERICA
OF A DISCOVERY OR DEVELOPMENT UNDER
AN EXPLORATION PROJECT CONTRACT

To: Dixie Minerals, Inc.
131 Main Street
Mayesville, North Carolina

Pursuant to the provisions of Exploration Project Contract No. DMA-293, dated August 29, 1952 (Docket No. DMA-293), hereinafter called the "contract" between you and the United States of America, hereinafter called the "Government"; to establish and fix the Government's percentage royalty on production and its lien thereon and on the land described in the contract, the Government considers and therefore certifies that discovery or development from which production may be made has resulted from the exploration work.

The nature of said discovery or development is described briefly or indicated as follows:

The exploration work encountered a zoned pegmatite in Biotite schist from which strategic mica may be produced.

REPORT OF REVIEW

I have reviewed the Monthly Reports of:

Dixie Minerals, Inc.
Box 561
Sylva, North Carolina

pertaining to Exploration Project Contract No. Idm-E393, Docket No. DMEA-2293, including Amendments Nos. 1, 2, 3, 4 and 5, for the months of October, 1952 to November, 1953, inclusive, covering a project for the exploration of mica in Jackson County, North Carolina on property known as the D. H. Stephen's Upper Mine.

My review included an examination of the Monthly Reports (Forms MF-104) and supporting documents attached thereto, comparison of the costs claimed with the contract and pertinent schedules, consultation with the Executive Officer of the Regional Field Team, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the following reasons:

(a) the administrative cost to the Government of an audit would be excessive in relation to value of the contract or the estimated amount of possible disallowances thereunder;
(b) the Monthly Reports were supported by documentary proof of the costs incurred on an actual cost basis under the contract; and
(c) a major portion ($4,900.00) of the costs were under a contract provision for payment by the Government on the basis of agreed estimated costs of units of work actually performed.

The review disclosed the following facts in regard to the amount paid or to be paid the contractor:

Total cost as billed by Contractor		$5,390.00
Exceptions:		
By DMEA Finance Officer	$ - 0 -	
Herewith	- 0 -	- 0 -
Total Accepted Cost		$5,390.00

The contract calls for a 90 percent participation of exploration expenses by the United States Government. Therefore, payment to the contractor by the Government in the amount of Four thousand eight hundred fifty-one and no/100 Dollars

$4,851.00

is considered valid and proper.

Amendment No. 5

Contract Idm-E 393, Docket No. 2293, dated 29th day of August 1952, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and Dixie Minerals, Inc., of Waynesville, North Carolina is hereby amended as follows:

Article 3 is amended to provide that the Operator is to complete the project within a period of sixteen months from the date of the contract, instead of fourteen (14) months as provided in Amendment 4.

This amendment is necessary because the Operator has not completed the work by the specified date. It is in the Government's interest to complete this work.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be obligated to pay, or the percentage of the costs which the Government may be obligated to pay, under the provisions of Article 8 of the contract form.

EXPLORATION PROJECT CONTRACT
DIXIE MINERALS, INC.
DOCKET NO. DMEA-2293, Idm-E-393

AMENDMENT NO. 3

It is agreed this 3rd day of June, 1953, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and Dixie Minerals, Inc., each acting in consideration of the agreement of the other to the terms hereinafter set forth, that Exploration Project Contract Idm-E393, Docket No. DMEA-2293, dated August 29, 1952, between the parties hereto, be modified and amended, effective August 29, 1952, as follows:

1. In Article 8 of the contract, delete the figures $3,600.00 and $4,000.00 and substitute $4,860.00 and $5,400.00, respectively.

2. In Exhibit "A," under "Description of the Work," Stage II, change the number 100 to 140; and add the words "or crosscut" after the word drift" wherever the latter word appears in the description.

3. In Exhibit "A," under "Estimated Costs of the Project," Stage II, delete everything following the heading "Stage II" and substitute the following:

Unit Costs

140 feet of drifting or crosscutting @ $35.00/ft., including all costs	$4,900.00
The Government will contribute to the cost of drifting or crosscutting on the basis of this agreed, estimated unit cost in lieu of actual costs.	
Total Cost, Stage II	$4,900.00
Total Cost of the Project	$5,400.00*
Government Participation @ 90%	$4,860.00*

4. Article 6(a) of the contract form is amended by adding thereto the following provision:

> "To the extent that costs are set forth in Exhibit 'A' as 'agreed unit costs,' they are in lieu of the actual costs that would otherwise be allowable costs of the project as provided in Article 6(a) of the contract form."

5. Article 3 of the contract is amended to provide that the Operator is to complete the project within a period of one year from the date of the contract.

Executed in sextuplicate the day and year first above written.

EXPLORATION PROJECT CONTRACT[1]

IT IS AGREED this 29th day of August, 1952, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and[2] Dixie Minerals, Inc., a North Carolina Corporation, 131 Main Street Waynesville, N. C.

hereinafter called the "Operator," as follows:

ARTICLE 1. *Authority for contract.*—This agreement is entered into under the authority of the Defense Production Act of 1950, as amended, pursuant to DMEA Order 1 entitled "Government Aid in Defense Exploration Projects."

ARTICLE 2. *Operator's property rights.*—With respect to that certain land situated in the State of North Carolina, County of Jackson, described as follows:[3] See Annex I attached hereto and made a part hereof.

the Operator represents and undertakes:[4]

(*a*) [redacted]

(*b*) That the Operator is a lessee, in possession and entitled to possession, and the Owner's Consent to Lien is attached.

The Operator shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of the exploration project without any allowance for the use, rental value, depreciation, depletion, or other cost of acquiring, owning, or holding possession thereof.

ARTICLE 3. *Exploration project.*—The Operator, within 60 days from the date of this contract shall commence work on a project of exploration for[5] Mica in or upon the described land; and shall bring the project to completion within a period of 4 months from the date of this contract. The work to be performed is more fully described in Exhibit "A" attached hereto, which, with any maps or drawings thereto attached, are made a part of this contract. The Government will contribute to the cost of this work as hereafter provided.

ARTICLE 4. *Performance of the work.*—(*a*) *Operator's responsibility.* The work shall be performed efficiently, expertly, in a workmanlike manner, in accordance with good mining standards and State regulations for health and safety and for workmens' compensation and employers' liability insurance, with suitable and adequate equipment, materials, and labor, to bring the project to completion within the time fixed. To the extent specified in Exhibit "A," attached hereto, the work may be performed by independent contractor or contractors; and work not specified in Exhibit "A" for performance by independent contractor may nevertheless be so performed upon amendment of Exhibit "A," as agreed to by the parties, to state the work to be so performed and the estimated unit costs thereof, as provided hereafter.

(*b*) *Independent contracts.*—Any independent contract for the performance of work shall be on a unit-price basis (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved), or on some basis that will indicate the amount due for work performed at any stage of the work to be performed under such independent contract. The Government shall not be nor be considered to be a party to any such independent contract, and the Government's right to terminate the exploration project contract under any of its provisions shall not in any manner be affected by reason of any such independent contract. If the reference in Exhibit "A" to any such independent contract states that the Government's approval thereof is required, the Government may refuse to participate in the cost thereof unless and until it has given its written approval of the independent contract.

(*c*) *Government may inspect.*—The Government shall have the right to enter and observe and inspect the work at all reasonable times, and the Operator shall provide the Government with all available means for doing so. The Government may consult with and advise the Operator on all phases of the work.

ARTICLE 5. *Estimated costs of the project.*—A statement of the estimated cost of the project is set forth in Exhibit "A," attached hereto. Except insofar as any item of requirement or the estimated cost thereof set forth in Exhibit "A" is there or elsewhere designated as an "allowable maximum," such items of requirement and of related cost are estimates only, and may be exceeded to the extent that the Government may from time to time approve for the most economic and beneficial performance of the work within the limitation of the total aggregate estimate of costs. The Government's approval of any such excess over the estimate for an item of requirement or related cost will be signified by its approval and payment of any invoice or voucher for payment which expressly calls attention to such excess. Items expressly designated in Exhibit "A" or elsewhere as "allowable maximum," and the total aggregate estimated cost are limitations, and any excess therein will be for the sole account of the Operator in which the Government will not participate.

ARTICLE 6. *Allowable costs of the project.*—(*a*) The costs of the project in which the Government will participate are limited to the following:

(1) *Independent contracts.*—Payments to independent contractors under independent contracts listed in Exhibit "A." The estimated cost of any work to be performed under an independent contract is or shall be included in the estimate of costs in Exhibit "A" in terms of the estimated numbers of units of work to be performed, the estimated amount to be paid per unit, and the estimated total amount to be paid to the independent contractor, and such estimates shall be allowable maximums above which the Government will not contribute. Regardless of the provisions of any such independent contract, the Government will participate in the payments to the independent contractor only on account of work actually performed and that conforms with the provisions of the exploration project contract, and only to the extent that the Government deems the unit prices for the work under the independent contract to be reasonable and necessary. No such independent contract shall have the effect of increasing the estimated total cost of the exploration project contract nor the maximum amount which the Government will pay as provided in the exploration project contract.

(2) *Labor, supervision, consultants.*—Labor, supervision and technical services (including engineering and geological consultants), a schedule of which is included in the estimate of costs set forth in Exhibit "A." The requirements and related estimated costs for supervision and technical services are allowable maximums.

(3) *Operating materials and supplies.*—Necessary materials and supplies including items of equipment costing less than $50.00 each, and power, water, and fuel, a schedule of which is included in the estimate of costs in Exhibit "A."

(4) *Operating equipment.*—Any operating equipment to be rented or purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or the allowable depreciation, as the case may be, a schedule of which is included in Exhibit "A." Any items listed as owned and to be furnished by the Operator, and related allowable depreciation, are allowable maximums.

(5) *Rehabilitation and repairs.*—Any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and to be devoted to the purposes of the exploration contract, a schedule of which is included in the estimate of costs set forth in Exhibit "A." These items are allowable maximums.

(6) *New buildings, improvements, installations.*—Any necessary buildings, fixed improvements, or installations to be purchased, installed, or constructed for the purposes of the exploration work, with the estimated cost of each, a schedule of which is included in the estimate of costs in Exhibit "A." All of these items are allowable maximums.

(7) *Miscellaneous.*—Repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance and payroll taxes.

(8) *Contingencies.*—Such other necessary, reasonable direct costs of performing the exploration work, within the limit of the total aggregate estimate of costs, whether or not included in any schedule of costs in Exhibit "A," as may be approved by the Government in the course of the work, as indicated by its approval and payment of invoices and vouchers.

[1] If sufficient space is not provided in any blank, use an extra sheet of paper and refer to it in the blank.
[2] State name, address, and nature of organization if any.
[3] Give legal description or enough to identify the property, particularly excluding any land or interest therein to which the Government's lien is not to attach or the production from which is not to be subject to the Government's percentage royalty.
[4] Strike out the provision not applicable.
[5] Name of mineral or minerals.

(*b*) The Government's payments in all cases will be based on actual, necessary costs (including contract unit prices) incurred not in excess of any "allowable maximum," and not in excess of the fixed percentage of the total aggregate estimated cost. Costs will be considered to be incurred only as they are or become due and payable.

(*c*) No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes) or any other indirect costs, or work performed or costs incurred before the date of this contract, shall be allowed as costs of the project in which the Government will participate.

ARTICLE 7. *Reports, accounts, audits.*—(*a*) *Progress reports.* The Operators shall provide the Government with monthly reports of work performed and costs (including contract unit prices) incurred under the contract, in quintuplicate (five copies), upon forms provided by the Government. These progress reports shall be certified by the Operator, and shall constitute both the Operator's invoice of costs incurred on the project during the period covered by the report and his voucher for repayment by the Government, unless the Government requires the use of a standard voucher form with invoice attached. Progress reports shall include surface and/or underground engineering-geological maps or sketches showing the progress of the exploration, with assay-reports on samples taken concurrently with the advance in mineralized ground.

(*b*) *Final report.*—Upon completion of the exploration work or termination of the contract the Operator shall provide the Government with an adequate geological and engineering report, in quintuplicate (five copies), including an estimate of ore reserves resulting from the exploration work.

(*c*) Compliance with requirements.—If, in the opinion of the Government, any of the Operator's reports are insufficient or incomplete, the Government may procure the making or completion of such reports and attachments as an expense of the exploration work; and the Government may withhold approval and payment of any vouchers depending upon insufficient or incomplete reports.

(*d*) *Accounts and audits.*—The Operator shall keep suitable records and accounts of operations, which the Government may inspect and audit at any time. The Government may at any time require an audit of the Operator's records and accounts by a certified public accountant, the cost thereof to be treated as a cost of the project. The Operator shall keep and preserve said records and accounts for at least 3 years after the completion of the project or the termination of this contract. Upon the completion of the project or termination of the contract the Operator shall render a final account as provided in Article 12.

ARTICLE 8. *Payments by the Government.*—(*a*) The Government will pay 90 percent of the allowable costs incurred, as they accrue, in an aggregate total amount not in excess of $3,600.00, which is 90 percent of $4,000.00, the agreed, estimated total cost of the project in which the Government will participate; *Provided,* that until the Operator's final report and final accounting have been rendered to the Government, and any final auditing required by the Government has been made, and a final settlement of the contract has been made, the Government may withhold from the last voucher or vouchers such sums as it sees fit not in excess of ten (10) percent of the maximum total which the Government might have been called upon to pay under the terms of the contract.

(*b*) The Government may make any payment or payments direct to independent contractors and to suppliers, for the account of the Operator, rather than to the Operator.

ARTICLE 9. *Repayment by Operator.*—(*a*) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than 6 months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) percent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) percent of any such net amounts, plus one-half (½) percent of such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such net amounts.

(For instance: The percentage royalty on a net amount of five dollars ($5.00) per ton would be one and one-half (1½) percent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(*b*) As here used, "net smelter returns," "net concentrator returns," and "other net amounts realized from the sale or other disposition," mean gross revenue from sales; or if not sold, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income-tax determination.

(*c*) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(*d*) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

ARTICLE 10. *Assignment, transfer, or loss of Operator's interest.*—Without the written consent of the Government, the Operator shall not assign or otherwise transfer or hypothecate this contract or any rights thereunder. The Operator shall not make any voluntary nor permit any involuntary transfer or conveyance of the Operator's rights in the land described in Article 2, without making suitable provision for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof; *Provided,* that mere failure by the Operator to maintain the Operator's rights in the land, without any consideration running to the Operator other than relief from the cost of maintaining such rights (as by surrender of a leasehold, failure to perform assessment work, or failure to exercise an option), coupled with complete abandonment by the Operator of all interest in or operations on the land for a period of 10 years from the date of this contract, shall not constitute such a transfer or conveyance. Should the Operator make or permit any transfer or conveyance in violation of this provision, the Operator shall be and remain liable for payment to the Government of the same amounts, at the same times, as would have been paid under the terms of the percentage royalty on production. If for any reason the net smelter returns, net concentrator returns, or other net amounts realized from the sale or other disposition of such production are not available as a means of measuring the amount of the Operator's liability, the amount thereof shall be estimated as well as may be, and in the event of dispute as to such estimates, the determination thereof by the Administrator of Defense Minerals Exploration Administration or by his successor shall be final and binding upon the Operator.

ARTICLE 11. *Title to and disposition of property.*—All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.

ARTICLE 12. *Termination and completion.*—The Government may, at any time, by written notice to the Operator, terminate this contract: (*a*) If the Operator fails to provide his share of the money necessary to prosecute operations pursuant to the terms of the contract; (*b*) if the Operator, in the opinion of the Government, fails to prosecute operations pursuant to the terms of the contract; or (*c*) if in the opinion of the Government, operations up to the time of the notice have not indicated the probability of making any worth while discovery and in the opinion of the Government further operations are not justified. Upon the completion of the project or any termination of the contract the Operator shall dispose of any remaining materials, supplies, facilities, buildings, fixtures, and equipment in which the Government has an interest, for the joint account of the Operator and the Government in the proportion of their respective interests; shall render to the Government a full and final accounting of his operations under the contract and his expenditures of money; and shall pay to the Government its pro rata share of any money remaining.

ARTICLE 13. *Changes and added provisions.* _____

DIXIE MINERALS, INC.
EXPLORATION PROJECT CONTRACT
DOCKET NO. DMEA-2293

ANNEX I

The property of D. H. Stephens and Liddie Stephens, described as follows:

Beginning on a sycamore on the South West side of Moses Creek at the mouth of the Flush Running Branch, and runs up the meanders of said branch above the falls of said branch to a large chestnut tree on the West side of said branch, Mary Wood corner, thence North 25 West thirty poles to a beach, now down, thence North to the John R. Queen line 45 East with said line to what is known as the Meggs and Freeman line, thence South 52 East with Meggs and Freeman line to a chestnut corner in the head of what is known as Gooses cove, thence in a southwest direction down a ridge to a chestnut corner, thence on down the ridge between the low field and Henry Field to Moses Creek to a chestnut at or near the mouth of the Henry Field branch, thence down Moses Creek with the meanders to the Beginning.

Deed from R. H. Stephens to D. H. Stephens, dated March 15, 1900 and recorded in the office of the Register of Deeds for Jackson County, N. C. in Book 85 at page 406.

DIXIE MINERALS, INC.
EXPLORATION PROJECT CONTRACT
DOCKET NO. DMKA-2293

EXHIBIT "A"

Description of the Work

The exploration work is divided into two stages.

Stage I

Excavate two trenches as shown on the map captioned "D. H. Stephens Mine, No. 1, Main Workings," attached hereto. The exact location, direction, length, and depth of these trenches shall be specified by the Government.

Stage II

If, in the opinion of the Government, the results of Stage I indicate that further exploration is warranted, drift from the lower trench 100 feet northwest. This drift shall be 5' x 7' in cross-section, and the exact location and direction of it shall be specified by the Government.

Estimated costs of the Project
(*Indicates allowable maximum)

Stage I

(1) Independent Contracts

None

(2) Labor, Supervision, Consultants

1 Working foreman - 5 eight hour shifts @ $12.00 per shift*	$ 60.00*

(3) Operating materials and supplies 30.00

(4) Operating Equipment

To be rented

1 Bulldozer, including operator, oil, grease, fuel, and repairs, 40 hrs. at $10.00 per hr.	400.00*

(5) **Rehabilitation and Repairs**

None

(6) **New buildings, improvements, installations**

None

(7) **Miscellaneous**	$ 10.00	
Total - Stage I		$ 500.00

Stage II

Unit Costs

100 feet of drifting @ $35.00 per foot, including all costs	3,500.00	
The Government will contribute to the cost of drifting on the basis of this agreed, estimated unit cost in lieu of actual costs.		
Total - Stage II		3,500.00
Total cost of the Project		$4,000.00*
Government participation @ 90%		$3,600.00*

OWNER'S CONSENT TO LIEN

WHEREAS, the undersigned, as owner, co-owner, lessor, or seller has an interest in certain property in the State of North Carolina, County of Jackson, described as follows:1/

The property of the undersigned, being described as adjoining the lands of L. E. Hooper, L. M. Stephens, and Blackwood Lumber Co., and lying on the waters of Moses Creek in Caney Fork Township, Jackson County, N. C.

which is the subject of a proposed exploration project contract, hereinafter called the "contract", between the United States of America, hereinafter called the "Government", and

2/ Dixie Minerals, Inc. 151 Main Street, Waynesville, N. C.

hereinafter called the "Operator"; and

WHEREAS, under certain provisions of said contract which are set forth on the reverse side hereof, the Government is entitled to a percentage royalty on production and to certain other rights and equities which do or may conflict with or be adverse to the interest of the undersigned in said property;

NOW THEREFORE, the undersigned, in consideration of said contract and as an inducement to the Government to enter into same, undertakes and agrees as follows:

1. The Government's equity in and right to dismantle, sever, take possession of, and remove and dispose of facilities, buildings, fixtures, equipment, or other items as provided in the contract, or any amendment thereof, shall prevail over and be prior and superior to any conflicting or adverse rights of the undersigned, and the Government is authorized to enter upon the land for such purposes.

2. To secure the payment to the Government of the percentage royalty on production3/ provided for under the terms of said exploration project contract, or any amendment thereof which does not increase the maximum amount of the Government's claim here stated or alter the provisions for repayment, there is hereby granted to the Government a lien upon the land herein described and upon any production of minerals therefrom, until the royalty claim is fully paid in the amount of the Government's contribution, not in excess of 4/$ 3,600.00, or ten years have elapsed from the date of the contract.

3. The undersigned shall commit no act nor assert any claim that may contravene or conflict with the lien, claim, or rights of the Government under the provisions of said contract. This agreement shall be binding upon the heirs, executors, administrators, successors, and assigns of the undersigned.

Dated this 23rd day of July, 1952.

L. M. Stephens [Seal]

Lickie Stephens [Seal]

[Seal]

1/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated _____, and recorded in book _____ page _____ official records of said county." If (b) is used, the book and page of recordation cannot be dispensed with. If the space provided is insufficient, use an Annex, and refer to the Annex in the space.

2/ Insert the name of the Operator as it will appear in the exploration project contract.

3/ Mining or production from the land is not required, and in the absence of production there is no obligation to repay the Government.

4/ Insert the maximum amount of the Government's contribution.

RELEVANT CONTRACT PROVISIONS

Repayment by Operator. (a) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than six months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) per cent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) per cent of any such net amounts, plus one-half (½) per cent such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) per cent of such net amounts.

(For instance: the percentage royalty on a net amount of five dollars ($5.00) per ton, would be one and one-half (1½) per cent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) per cent.)

(b) As here used, "net smelter returns", "net concentrator returns", and "other net amounts realized from the sale or other disposition", mean gross revenue from sales; or if not sold, the market value, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income tax determination.

(c) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(d) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

Title to and disposition of property. All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation? A Coppration.

*2. If a partnership, state names and addresses of partners. Reference is to Form MF-100

*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.

*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project. Reference is to Form MF-100

*5. Are you the owner or the lessee of the property?

6. If owner, state what claims, liens, or encumbrances, if any, are against the property.

7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

X 8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.

X 9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.

*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.

*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.

*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.

15. State in detail how the ore could be shipped and how and where milled.

*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.

19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?

21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.

24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

By H. A. Lawhead

SUPPLEMENTAL SHEETS TO BE ATTACHED TO FORM MF#103. (D.H.Stephens Mine Project)

Application of: Dixie Minerals, Inc.
131, Main Street,
Waynesville, N. C.

For: Aid for an Exploration Project Pursuant to Mineral Order No. 5, under Defense Production Act of 1950.

Items 1 through 5, MF 103, are answered upon Form MF-100, submitted with application.

6. Not applicable. Applicant is lessee of property.

7. Copy of Lease is attached. Lease is in good standing.

8. No Profit and Loss Statement for past operations can be furnished in as much as Corporation is only recently organized and has not heretofore operated.

Statement of Assets and Liabilities is as follows:

Assets		Liabilities	
Paid in Capital Stock - - -	$300.00	Capital Stock Outstanding -	$300.00
TOTAL	$300.00		$300.00

Approximately five thousand dollars ($5,000.00) worth of equipment and machinery will be transferred to corporation in exchange for capital stock, which will shortly give corporation that much additional assets.

9. How much money is applicant prepared to invest in the proposed project?

Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation? - - - YES.

10. Answers to questions ten through 16, see attached lease and form MF100 submitted with this application.

17. Production:
Mine has not been operating for the past several years.

18. Mineral Reserves:
Unknown, but believed to be extensive.

19. None

THE EXPLORATION:

20. Exploration is to be conducted for Sheet Mica, with punch mica and scrap mica and feldspar as by-products.

Supplemental Sheets to be attached to Form MF-103 (D.H.Stephens Mine Project)

21. Proposed work will require cleaning out old open pit operation, tunneling and probing for vein and relocation of same, requiring an estimated time of five months, or sixty working days.

22. This mine was formerly opened as an open pit operation by the use of hand tools and some good mica was gotten out. It is in the area of several proven mines which were operated during World War II. There are also a number of promising outcroppings in near vicinity.
In this connection, reference is made to Item 7, Form MF-100.

THE REQUIREMENTS AND COSTS: D.H.Stephens Mine.

23. (a) Labor required: (Estimated)

2 miners @ $1.50 per hour, 8 hrs.per day, 60 working days - - -	$1440.00
4 muckers @ $1.00 " " " " " " " " "	1920.00
1 powder & general utility man, $8.00 per day, 60 " "	480.00
(b) 1 foreman, @ $12.00 per day, - - - - - - - - " " "	720.00
	$4560.00

(c) None.

(d) Necessary installation, structures, buildings, will consist of Compressor house and tool shed, powder magazine, mica house, at an estimated cost of - $1000.00

(e) Items which must be purchased:

2 jack hammers - - - - - - - - - -	$250.00	
Jack hammer steel - - - - - - - - - -	200.00	
Blacksmith Shop Equip. - - - - - - -	200.00	
Mine car and rails - - - - - - - - -	500.00	
Sump Pump - - - - - - - - - - - - -	200.00	
	$1350.00 - -	1350.00

(f) Cost of rental of compressor - - - - - - - - - - - - - - - - -	450.00
(g) Rental value of items to be devoted to work: Truck -	450.00
(h) Materials and supplies costing less than $50, each, consisting of hand tools, explosives, wheel barrows, etc. - - -	1000.00
(i) Power: Gas, oil, grease, electricity, @ $6.00 per day - - -	360.00
Total	$9170.00

24. Time Schedule:
Approximately two calendar months will be required for obtaining equipment and installing same and preparing site of mine for exploratory work. Approximately three months, or sixty working days will be required to properly open, explore and locate vein of mica.

Supplemental Sheets to be attached to Form MF-103 (D.H.Stephens Mine Project)

24. (continued)

In the first phase of operation named above, it is expected that one third of the cost estimate submitted will be expended in those items set forth for installation, structures, buildings, items that must be purchased, and that by the end of the second phase of operations indicated above, the entire amount requested will be expended.

GENERAL TECHNICAL DATA
FOR USE UNDER THE
DEFENSE PRODUCTION ACT OF 1950

NOT TO BE FILLED IN BY APPLICANT

Docket No. DMEA-2292

Date received 11-17-51

DIXIE MINERALS, INC.
131 Main Street,
Waynesville, N. C.

Name and address of applicant

Date December 5th, 1951

INSTRUCTIONS

This form is to be filed with Defense Minerals Administration, Department of the Interior, Washington 25, D. C. It should be accompanied by appropriate application form when a specific type of Government assistance is requested, in the form of (1) loan, (2) purchase contract, (3) Government guarantee of a private loan, (4) priorities or allocation of mining equipment, and maintenance, repair and operating supplies, and (5) other forms of Government assistance that might arise under the Act. Submit four (4) signed copies of the form and accompanying papers. Name and address should be stamped or typed on each sheet of this form and all accompanying papers. *When a question is inapplicable it should be so stated on the form.* Additional sheets may be attached in answering any questions or in supplying additional information. (IF YOU CANNOT ANSWER A QUESTION, SO STATE.) If a question is answered elsewhere indicate where answered. It is not necessary to answer it again.

GENERAL TECHNICAL DATA

Supply the following information on separate sheets, arranged, numbered, and lettered as indicated:

1. Materials produced:
   (*a*) What are the chief mine, mill, or smelter products?
   (*b*) What are the byproducts, if any?
2. Name(s) and type(s) of mine(s), mill(s), smelter(s), refinery(ies), pit(s), quarry (ies), drilling operation(s). Include old names of property, if any. Show extent of workings, including the following:
   (*a*) Linear feet of shafts.
   (*b*) Linear feet of drifts and crosscuts.
   (*c*) Linear feet of tunnels or adits.
   (*d*) Linear feet of other mine openings (explain briefly).

   Indicate whether mine is flooded or not. Describe any pumping problems. Give size or productive capacity.
3. For each operation listed above supply the following:
   (*a*) Distance and direction from nearest town and shipping point.
   (*b*) Mining district.
   (*c*) Township, Section, Range.
   (*d*) County, State.
4. (*a*) State whether or not property is now in operation, and if in operation, by whom operated.
   (*b*) Are you operating this property as:
   - ☐ Owner.
   - ☐ Lessee.
   - ☐ Contractor.
5. Number of years in production _____

   If not in production or operation, estimated date when production will begin _____
6. Experience of operators:
   Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who manage the project.
7. History:
   (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for suspension of operation.
   (*b*) State briefly the known history and production of adjoining and neighboring properties.
   (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.

8. Names and addresses of Officers, Directors, or Partners, and in addition thereto, the five largest stockholders if applicant is a corporation.

Name and Address (a)	Official Title (If officer is also director indicate by "D") (b)	Total of Annual Salary, Commissions, Bonuses, Etc., Received From Applicant and Affiliates During Last Fiscal Year (c)	Estimated Net Worth Outside of Interest in Applicant (d)	Number of Shares Held in Applicant Corporation: Common (e)	Number of Shares Held in Applicant Corporation: Preferred (f)	Life Insurance Carried for Benefit of Applicant: Amount (g)	Life Insurance Carried for Benefit of Applicant: Net Cash Surrender Value After Loans (h)

10. Production: not applicable, (new corporation)

Item	Kind of Product (a)	1948 Total (b)	1949 Total (c)	1950 Total (d)	Present Average Monthly (e)
1. Quantity of product mined or quarried (Short, long, metric tons; barrels; pounds; etc.)					
2. Quantity of product processed (specify unit of measure and type of process)					
3. Quantity and grade of product sold or shipped (specify units of measure)					

11. Do you contemplate a change in the present average monthly rate of production? If so, state estimated maximum monthly production and basis of change. none

12. Ore or Mineral Reserves: Believed extensive; see answers to items 2, 7.

(a) Describe the ore or mineral deposit briefly. Accompany the application by any available report on the geology and ore reserves.

GENERAL TECHNICAL DATA: to accompany MF Form-100.

Application of: Dixie Minerals, Inc.
131 Main Street,
Waynesville, N. C.

December 5th, 1951.

1. Materials produced:
   (a) Mica, -sheet, punch and scrap.
   (b) Byproducts, - feldspar.

2. Name and type of mine, including old names of property, extent of workings, etc.:
   Name: The D. H. Stephens Mine.
   Type: Mica, drilling operation and tunnels.
   (a) There are no shafts.
   (b) There is no tunnel in old working, -it is an open cut. No Crosscuts.
   (c) There is a 25 foot drift as an open cut which was made several years
   (d) ago. Mine is not flooded, however, some water may be encountered. Productive capacity presently unknown. This mine has hardly been more than opened and good mica has been found.

3. Location and distances:
   (a) Nearest town is Sylva, N. C., which is also shipping point. Mine is approximately 16 miles Southeast of Sylva, N. C.
   (b) Mining District: Region #VII.
   (c) Township: Caney Fork.
   (d) County and State: Jackson County, North Carolina.

4. (a) Property is not now in operation.
   (b) Will operate this property as Lessee.

5. As to the number of years previously operated, that information is unknown.

6. Experience of operators:

   (a) H. A. Lawhead, Sylva, N. C., President of Applicant corporation, has had the following experience: for the last 11 years has engaged in the business of mining mica, feldspar, and vermiculite; prior to that he has had 10 years experience in the mining of coal; he has also had 14 years experience in the business of operating a trucking line in interstate commerce, both as manager and owner-manager. Experience in mining has been as manager and as part-owner manager.

   (b) H. L. Liner, Waynesville, N. C., Secretary-Treasurer of applicant corporation, has been in business for himself for over 30 years, during which time he has and is now engaged in various and sundry enterprises consisting of logging, lumbering, building supplies, real estate and insurance, all of which are going enterprises.

7. History:

(a) At time of the opening of this mine, no facilities for mining other than by hand operations were available; suspension of previous operations seems to have been due to lack of facilities and funds. This mine is therefore undeveloped, the prospects of being in a good mica mining lead are good and considered extremely encouraging. One exceptionally large block of good sheet mica was pulled from this area.

(b) Upon neighboring properties, within approximately ½ mile, was mined the largest block of mica mined in North Carolina. During World War II there were several proven mines of good quality in neighborhood or near vicinity, approximately six such mines in number.

(c) Mr. Fred Shaeffer, who was the government engineer in this district during World War II approved several mines in the near vicinity of this prospect, including one mine on the same property as this prospect, for government aid; while his reports are not available to us, it is felt that they are available to the Bureau of Mines.

- - - - - - - - - - - - - -

13. Access Roads:

Prospect is 35 feet off of Moses Creek Road in Caney Fork Township, Jackson County, N. C. This road is graveled to within ¼ mile of prospect. Road is a good county road. Prospect is located 16 miles southeast of Sylva, N. C., which is the nearest shipping point, supply point, and point of residence.

14. Water Supply:

Moses Creek, with amply year-round supply, is within fifty feet of prospect.

15. Power:

The intention is to use gasoline driven machinery. However, should a change be made, electric power is available nearby from REA at their current industrial rates.

16. Labor: as to present or recent payroll period, inapplicable, in as much as applicant is a new corporation and has not previously operated.

However, it is anticipated that at this particular prospect, the following labor shall be employed: 2 miners, 4 muckers, 1 powder & general utility man, and one foreman.

17. Equipment and facilities:

There is no equipment, buildings, etc, on the property.

18. Particular circumstances: none.

(b) If deposit is other than placer: not applicable

(1) Submit assay plans and/or sections showing location and size of proved (measured) and probable (indicated) ore or mineral reserve.

(2) State the tonnage (indicate type of ton) and grade of each class of ore reserve, as above, and show how computed. Tabulated total ore reserve as follows:

TOTAL ORE OR MINERAL RESERVES

Ore or Mineral Reserve	Estimated Tons (a)	Metal or Mineral Content Per Ton (Grade) (b)	Gross Value Per Ton (c)	Recoverable Unit Value Per Ton (d)	Estimated Cost of Production Per Ton (e)
Measured (proved)	not applicable				
Indicated (probable)					

(c) If placer:

(1) Give estimated total yardage and average marketable mineral content of each deposit.

(2) Submit map showing location of placer deposit and surrounding area, with all test holes or pits. Submit logs of each hole and test pit with depth and average value of each.

(3) Describe gravel, stating whether fine, medium or coarse; loose, tight, cemented, or frozen, and whether it contains stumps or boulders more than 1 foot in diameter; if so, how large, and in what proportion.

(4) Describe bedrock, giving type (granite, sandstone, shale, etc.) and state whether it is hard or soft, smooth, uneven or rough.

(5) Describe overburden, stating whether loose, tight, or cemented; fine or coarse textured; furnish estimate of average thickness and total amount.

(6) Tabulate the reserves using the form outlined above for ore or mineral reserves.

13. Access Roads: For answers to Items 13 thru 18, see attached sheets.

Give road distances to shipping, supply and residence points, stating kind and condition of roads.

14. Water Supply:

State source and quantity of water available for operations and whether sufficient for all seasons of year.

15. Power:

State amount of power used, rate per hour, and source thereof.

16. Labor:

State number and classes (miners, muckers, millmen, etc.) of men employed during a recent representative payroll period.

17. Equipment and Facilities:

Describe present equipment on the property, including buildings. (State condition.) List major pieces of equipment now owned or controlled and in serviceable condition available for this operation.

18. Are there any particular conditions or circumstances affecting your operations that are not described above? If so, explain.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

MINING LEASE

THIS LEASE AGREEMENT, made this the 24th day of November, 1951, between D.H.Stephens, his wife Giddie Stephens of Jackson County, State of North Carolina, hereinafter called the Lessor, of the first part, and Dixie Minerals Incorporated of Waynesville, N.C. hereinafter called the Lessee, of the second part.

W I T N E S S E T H

THAT WHEREAS, the party of the first part is the owner of certain mica mines and which mines are commonly known as the Douglas Stephens mica mines, and from which mica has been removed heretofore on various occasions, and

WHEREAS, the said party of the second part has leased the mica mines upon the terms and conditions herein stated.

NOW THEREFORE, the said Lessor, in consideration of the rents, royalties, covenants and agreements hereinafter reserved and expressed to be paid and performed by the Lessee, hereby lets and demises unto the Lessee, for mica mining any and all mica mines on the property of the Lessor and with the right to prospect and open up new mines if the Lessee so desires. The property of the Lessor being described as being adjoined by the lands of L.E.Hooper, L.M.Stephens and Blackwood Lumber Company, and the same being situate on the waters of Moses Creek in Caney Fork Township, said State and County.

TO HAVE AND TO HOLD unto the said Lessee for the term of 5 years from the date hereof, expiring on the 24th day of November, 1956.

The Lessee covenants with the Lessor as follows, to-wit:

1. To enter upon the lands embracing the mine or mines of said premises and work the same in manner necessary to good and equitable mining, so as to take out the greatest amount of mica possible, with due regard to safety, development, and preservation of said premises as workable mines.

2. To work and mine said premises as aforesaid steadily and continuously from within 90 days; it being expressly agreed and understood that any failure to work said premises with at least two persons in said mines for the space of ninety (90) consecutive days shall be deemed, at the option of the Lessor a breach of this covenant.

3. To keep correct accounts as to classes, grades, weights and prices per pound of all mica obtained from said premises and to render same to the Lessor monthly, or as often as sales are made, accompanied by bouchers, showing

the amounts obtained in cash therefor and pay to the Lessor as rent or royalty for said premises 10 per cent of the gross sales of all mica sold from said premises.

However, the Lessor reserves the right, upon giving notice to the Lessee, to be present when all sales of mica are made. And no expense to be deducted by the Lessee, for mining, sheating, hauling or any other expense whatever in preparing said mica for the market from the gross sales.

4. It being mutually understood and agreed that if the said Lessee shall fail to pay the royalties or rents at times sales are made or money obtained for said mica as herein stated, or fail to comply with any other provision of this lease, then and in that event, at the option of the Lessor, this lease shall be null and void, and the Lessee hereby contracts and agrees to vacate the above described premises on demand of the Lessor or his agent, and the said Lessee hereby waives all notice to vacate the same, in default by the Lessee as above stated.

IN WITNESS WHEREOF, the said party of the first part and the said party of the second part have hereunto set their hands and seals, on this the day and year first above written.

(SIGNED) GIDDIE STEPHENS

DMEA-2293

UNITED STATES
DEPARTMENT OF THE INTERIOR
DEFENSE MINERALS EXPLORATION ADMINISTRATION
WASHINGTON 25, D. C. 600

Project Summary Report

By: Walter C. Anderson June 17, 1954

1. DMEA Docket No. 2293 - Mica
Contract No. Idm-E393
D. H. Stephens Mine
Jackson County, North Carolina

Operator: Dixie Minerals, Inc.
131 Main Street
Waynesville, North Carolina

Operator's property rights:
Five year lease dated November 24, 1951
Owner's Consent to Lien dated July 23, 1952.

2. Contract - dated August 29, 1952
Work authorized:

Bulldozing, including rental, labor, supervision, etc.	$500.00
100 feet of drifting @ $35.00/ft.	3,500.00
Total estimated cost of project	$4,000.00
Government participation @ 90%	$3,600.00

Amendments:
No. 1 - 12/24/52 - extends completion date from 4 mos. to 7 mos.
No. 2 - 3/27/53 - extends completion date from 7 mos. to 10 mos.
No. 3 - 6/3/53 - adds the words "or crosscut" after "drift" wherever it appears and increases drifting and/or cross-cutting from 100 feet to 140 feet. Increases cost of authorized contract work from $4,600.00 to $5,400.00.
No. 4 - 8/18/53 - extends completion date from 10mos. to 14 mos.
No. 5 - 10/26/53 - extends completion date from 14 mos. to 16 mos.

Work completed:

Bulldozing 670 cubic feet @ $0.73/cu.ft.	$490.00
140 feet of drifting and/or crosscutting @ $35.00/ft.	4,900.00
Total accepted cost	$5,390.00
Government participation @ 90%	$4,851.00

Work began on September 28, 1952, and was completed on November 30, 1953.
Field Team Final Report received 3/22/54.
Field Team Report recommending certification received 5/17/54.
Operator's Final Report - none received. Operator reports he is unable to prepare one.

3. Audit - certificate issued on January 19, 1954 (no exceptions).

Accepted cost	$5,390.00
Government participation	$4,851.00

4. Certification of discovery - issued June 21, 1954.
There is insufficient information to make ore reserve estimates, but the project gave the Operator access to mica occurrence and therefor it should be certified.

5. Comments:

How conducted - Operator did not comply with general principles regarding mining and cooperation with the Government was not good.

Operation - very slow.

Engineering - bad. Reporting was inadequate.

Geological premise - The premise that a pegmatite would be found in an adit was realized at the completion of the project. The last 10 feet of the adit exposes mica-bearing pegmatite.

Geological criteria upon which work was based:
1. Pegmatite 2 to 5 feet thick.
2. Occurrence of good quality mica.
3. Sold to the Government during World War II 460 pounds of mica valued at $2,795.40.

Criteria developed during project:
1. None developed by trenching.
2. Adit exposed zoned pegmatite 11 feet thick.

Future possibilities: Exposure of mica-bearing pegmatite at completion of project has given the Operator encouragement to continue.

Recommendations:

The Nonmetallic Minerals Division concurs in Field Team's recommendation to certify. The Field Team states "the project lead directly to mica production", although this is insufficient information to estimate reserves. Also agrees that Operator be denied further exploratory aid because of lack of cooperation with the Government in performance of the work. The Geological Survey and the Bureau of Mines concur.

To: Robert A. Laurence, U. S. Geological Survey
Room 11, Post Office Building, Knoxville 2, Tennessee

From: Acting Chief, Division of Field Operations

Subject: DMEA-2293 (Mica)
Dixie Minerals, Inc.
D. H. Stephens Mine
Jackson County, North Carolina
Contract Idm-E393

Enclosed are two copies of the Director's letter to the Operator releasing the Government's lien on the subject property.

Also enclosed are the original and distribution copies of a letter to Mr. D. H. Stephens and Mrs. Liddie Stephens, signers of the Owner's Consent to Lien, dated July 23, 1952. It will be appreciated if you will ascertain the address and mail the original letter to Mr. and Mrs. Stephens. Kindly insert the address on the original and all copies, retain the two copies indicated for Region IV, and return the remaining copies to our office.

Contract Idm-E393

Dear Mr. and Mrs. Stephens:

Enclosed is a self-explanatory letter of today to the Operator under the subject contract.

This correspondence relates to the Owner's Consent to Lien signed by you on July 23, 1952, under the Defense Minerals Exploration Administration program which has been succeeded by the Office of Minerals Exploration program.

Sincerely yours,

ACTING Director

Re: DMEA-2293 (Mica)
Dixie Minerals, Inc.
D. H. Stephens Mine
Jackson County, North Carolina
Contract Idm-E393

Gentlemen:

By the terms of the subject Exploration Project Contract, as amended, and the certification of discovery or development dated June 21, 1954, all minerals mined or produced from August 29, 1952, to August 29, 1962, were subject to the Government's percentage royalty as set forth in the said contract.

As the period during which production was subject to royalty has now expired, the Government according to its present records retains no claim or lien against the property subject to the contract or any future production therefrom. We, therefore, are closing our books and records on this contract. Your attention, however, is called to the provisions of the contract which require the Operator to keep and preserve certain records for the periods indicated.

Sincerely yours,

(signed) FRANK E. JOHNSON

Materials Division
Emergency Procurement Service
General Services Administration
Washington 25, D. C.

Re: Docket No. DMEA-2293 - Mica
Dixie Minerals, Inc.
B. H. Stephens Mine
Jackson County, North Carolina
Contract No. Ida-2393

Dear Mr. Gumbel:

I am enclosing one copy of a certification of discovery or development relating to the subject contract.

The exploration contract was signed on August 29, 1952, with the Government participating to the extent of 90% of $5,400.00 or $4,860.00.

The project was started on September 28, 1952, and completed November 30, 1953, after the expenditure of $5,390.00 which is the total net accepted cost according to the Audit Review. The Government paid 90% of the total accepted cost or $4,851.00.

The work performed on this project consisted of bulldozing two trenches and driving a 140-foot adit. The exploration afforded the Operator access to an 11-foot thick zoned mica-bearing pegmatite which was encountered at the end of the adit.

The DMEA concurs with the field team evaluation of the work performed and has certified that a discovery or development has resulted from the work under this contract.

Sincerely yours,

C. O. Mittenderf

Administrator

Re: Docket No. DMEA2293 - Mica
D. H. Stephens Mine
Jackson County, North Carolina
Contract No. Idm-2393

Gentlemen:

Transmitted herewith is a certification of discovery or development on Contract No. Idm-2393 on the D. H. Stephens Mine, Jackson County, North Carolina.

By the terms of the Exploration Project Contract and of the certification, all production from the property from the date of the Exploration Project Contract, August 29, 1952, is subject to the Government's percentage royalty as set forth in the contract until the sum of $4,851.00 is paid or until August 29, 1962, whichever occurs first.

Payments should be made to Mr. Robert A. Laurence, Executive Officer, Defense Minerals Exploration Administration Field Team, Region VII, Room 13, Post Office Building, Knoxville 2, Tennessee. Checks should be drawn payable to the Treasurer of the United States. The purchaser should be advised to deduct the royalties from the amount due on each shipment and forward check direct to the Executive Officer.

Royalty payments to the Government should be accompanied by suitable evidence, such as copies of settlement sheets showing quantity and grade of ore sold, the name of the purchaser, and the price and charges certified to be correct by the purchaser.

You are requested to notify Mr. Laurence of any changes in ownership or production rights that may have any effect on the Government's right to its percentage royalty. Also, if production ceases at any time for any extended period, please notify Mr. Laurence at six-month intervals that no production has been made.

Sincerely yours,

C. O. Mittenderf

Administrator

May 14, 1954

Memorandum

To: Operating Committee, DMEA - Washington

From: Field Team, DMEA - Region VII

Subject: Recommendations for Certification.

Reference is made to your letter of May 4, 1954.

We recommend that certification of discovery and development be issued on all 3 of these projects.

DMEA-2293: This work definitely exposed a mica-bearing pegmatite; if any mica is recovered in the future, it will be from pegmatite and therefore a direct result of the exploratory work.

DMEA-2582: Similarly, any additional mica produced here will be from the pegmatite discovered at the west end of the underground workings where it appears to be thickening.

DMEA-3008: Considerable mica of poor quality was discovered during the exploration, and the pegmatite thus explored extended beyond the exploratory workings where better grade mica was recovered. Obviously the latter recovery depended directly upon the earlier exploration.

In all three cases, there is insufficient information to make any estimates of reserves developed, but we think the work under the contract did lead directly to production and therefore certification is warranted on all three.

Robert A. Laurence
EXECUTIVE OFFICER

Contract Idm-E560

Dear Mr. Laurence:

Reference is made to the final field ~~examination~~ reports and to the recommendations that certifications be delayed.

Under the original contract forms (MF-200 of April and June 1951) certification can be made only within six months after "the completion of the exploration project or termination of the contract." Under subsequent contract forms certification may be made "at any time not later than 6 months after the Operator has rendered the final report and final account . . ." If a project is to be certified, it is requisite, of course, that this action be taken within the time limited in the particular contract. All of the forms, however, contemplate that the certification should have "resulted from the exploration work," rather than from work prosecuted independently by the operator after the completion or termination of the work provided for in the exploration project contract. In other words, if certification cannot be justified at the time of completion or termination of the work provided for in the exploration project contract, it cannot be justified

R.C.G.

by any work performed subsequently thereto by the operator on his own account.

Sincerely yours,

W. S. Martin

ACTING Chairman, Operating Committee

Bureau of Mines Minerals Materials
RECEIVED
APR 8 1954

April 7, 1954

Memorandum

To: Nonmetallic Minerals Division
Defense Minerals Exploration Administration

From: Chief, Ceramic and Fertilizer Materials Branch

Subject: DMEA-2293

Contract Number: Idm-E 393

Applicant: Dixie Minerals, Inc.

Name and Location of Property: D. H. Stephens Mine
Jackson County, North Carolina

Date of Field Team Final Report: March 19, 1954

Date Rec'd. by Ceramic & Fert. Mats. Br.: March 29, 1954

Field Team Recommendation:

1. Certification should be deferred pending additional work to be performed by applicant at his expense.

Comments:

1. Exploration by bulldozing two trenches and driving 140-foot adit.
2. Mica encountered was poor quality mica.
3. Expenditures - Total approved $5,400
Total cost 5,390
Government share 4,851
Value None
4. Sufficient pegmatite was not exposed through DMEA exploration to determine value of the mineralization.

Recommendation:

It is suggested that the Government wait the allotted period after the date of the final report and final account submitted by the applicant before commitment. If strategic mica is encountered, a certificate of discovery or development should be issued.

RECEIVED
MAR 24 1954

Memorandum March 23, 1954

REVIEW OF FIELD TEAM REPORT ON APPLICATION DMEA-2293 (mica)

To: L. G. Houk, Defense Minerals Exploration Administration
From: D. M. Larrabee, U. S. Geological Survey
Applicant: Dixie Minerals, Inc., 131 Main St., Waynesville, N. C.
Name of property: D. H. Stephens Mine.
Location of property: Jackson County, N. C.
Date of field team report: March 16, 1954
Authorship of field team report: K. H. Teague, L. E. Shirley, and D. H. Amos.
Field team's recommendation:

1. Project completed.
2. Certification should be delayed pending additional work by operator at his own expense.
3. Because of failure of operator to comply with general principles regarding mining, and with suggestions from field team examiners, no further DMEA applications be processed, should they be submitted.

Comments:

Any character who repeatedly refuses to accept recommendations of our field examiners as to manner of working, etc., should be prevented from handling public funds from DMEA.

ACTION RECOMMENDED:

Follow field team's recommendation.

March 19, 1954

Memorandum

To: Operating Committee, D M E A - Washington

From: Field Team, D M E A- Region VII - Knoxville, Tenn.

Subject: Final Examination Reports:
DMEA-2293, Idm-E 393, D.H. Stephens Mine (mica)
DMEA-2582, Idm-E 461, Kasson Mine (mica)

Enclosed are 4 copies of the final examination reports on the subject exploration contracts.

In both of these projects, pegmatites of possibly workable dimensions were cut, but not sufficiently exposed to determine if they contain a workable deposit of commercial mica; therefore certification of discovery would be difficult to make at this time. However, additional work underway at the Operators' own expense may well prove that these deposits are workable, therefore we agree with the examiners' recommendation that final decision be delayed until after they have examined the new workings.

FINAL REPORT

ON

DMEA-2293, Idm-E 393, D. H. Stephens Mine
(Mica)
Jackson County, North Carolina

Operator: Dixie Minerals, Inc., 131 Main St., Waynesville, N. C.

The mine is located 2.7 airline miles N. 40° E. of East Laport, Jackson County, North Carolina and about 300 feet north of Moses Creek.

Work completed under the contract consisted of bulldozing two trenches under Stage I, and driving a 140 foot adit under Stage II. No significant quantity of strategic mica was discovered.

Work began on September 28, 1952 and was completed on November 30, 1953. Two northeast trending cuts were made but failed to reveal an eastward extension of the pegmatite. An adit was driven westward from the lower cut for a total of 140 feet.

Biotite schist with numerous quartz and pegmatite stringers is present in the cuts and the adit; both the schist and the stringers contain considerable disseminated pyrite and some garnet. Massive quartz occurs on the south wall of the adit at 93 to 108 feet from the portal. A zoned pegmatite about 11 feet thick is exposed in the west end of the adit. It consists of a quartz core which is enclosed by feldspar containing scattered pyrite and small mica books. All of the mica is bent, cracked and contains biotite inclusions.

The operator has resumed work on his own, thus final action as to certification should be deferred until more pegmatite is exposed by the current work.

Expenditures:

(a)	Total approved	$5,400.00
(b)	Total cost of project	5,390.00
(c)	Government's share of cost	4,851.00
(d)	Government's share unexpended	9.00
(e)	Value of production operation	- none

An unduly excessive amount of time was required to complete this project due largely to a lack of effort on the part of the Operator.

Numerous suggestions were complied with only after persistent effort by the Field Examiners. It is recommended that any future application by the Operator for exploratory aid under the DMEA program be denied. //

No equipment was purchased for the project.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS.

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, N. C. It is about 300 feet north of Moses Creek.

Drifting continues on this contract and will probably be completed within the coming week. Adit and drift footage now totals 136 feet. Pegmatite was encountered at 129 feet and 7 feet has been driven in pegmatite. The drift direction is essentially east-west and biotite schist can be observed on the south wall and partially in the present face. The pegmatite material consists of a quartz core enclosed by feldspar containing secondary sulphides. A small but rich mica zone was encountered along the north wall at 134 feet.

Re: DMEA-2293, Idm-E 393 (mica)
D. H. Stephens Mine

Dear Mr. Lawhead:

The contract for work at the Stephens Mine, as amended call for completion of the exploratory work by October 30, 1953. As this work is still incomplete, I enclose an amendment extending the completion date for two months, or until December 30, 1953.

We are unable to understand why this work has not been completed long ago, especially since the pegmatite was cut in the crosscut at 129 feet nearly 2 months ago, and at the field examiners last visit the heading had been advanced only 4 feet into this pegmatite. This job should be completed in the very near future.

Please sign all 6 copies of the enclosed amendment, keep one copy and return the original and 4 copies to me as soon as possible.

Very truly yours,

Robert A. Laurence

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

Progress on this contract is at a standstill. The adit is now at 133 feet and only 7 feet remains to be driven on the contract. The pegmatite body was encountered at 129 feet in the adit, which was reported on September 8, 1953 and only 4 feet has been accomplished since that time. It is not clear to the Field Examiners why the operator does not concentrate on the target, now that the objective has been reached. The pegmatite in the present face is predominantly quartz and small muscovite mica with scattered feldspar. Not enough pegmatite has been removed to produce any mica to date.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

Crosscutting of the pegmatite body continues slowly on this contract and is now at 130.5 feet. The pegmatite was encountered at 129 feet and it was suggested that the width of the body be explored before any drifting is begun. The material has not changed from that given in the last Interim Report.

The mine was not working at the time of this visit, but later contact with the operator disclosed that an air compressor break down was responsible for the slow progress during the past two weeks.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

Crosscutting is nearing completion on this contract. A pegmatite body was encountered in the last heading pulled at 129 feet from the portal. It was suggested that the heading be continued in the same general direction until the width of the body was explored and then drive drifts. The pegmatite as observed at the contact with the wall rock contains principally feldspar and small muscovite mica, which is bent, cracked and contains biotite specks. The country rock, a biotite schist, contained considerable amounts of pyrite.

This mine continues to be drilled with dry heads. It was again suggested that water be provided for drilling, either from gravity or pressurized tanks.

EXECUTIVE OFFICER

Signature Robert A. Lawrence Title DMEA REGION VII Date SEP 9 1953

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, N. C. It is about 300 feet north of Moses Creek.

This adit continues to be driven slowly and is now at 125.5 feet. Biotite schist, with narrow quartz stringers, is showing in the heading. An exploratory lateral is being driven to the SW at a point 100 feet from the portal. This work had not progressed over 2', but pegmatite material consisting of quartz, small thumbnail size mica and secondary sulphides was observed. It was suggested that additional work be accomplished at this point in an effort to locate a producing body.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

This adit continues to be driven slowly on this contract and is now at 122 feet, an advance of 4 feet in the past two work weeks. The present face was badly dust covered and could not be observed very well. No one was working at the mine at the time of this visit. Dump material observed did not indicate any appreciable change from country rock. At a later contact with the operator it was learned that one test hole had been made in the left wall, at a point about 100 feet from the portal, the completed hole showing quartz. The operator indicated that a narrow crosscut would be made at this point in an effort to pick up pegmatite.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

This adit continues to be driven under contract and is now at 188 feet. No granitic or pegmatite material was observed in the heading. Present heading is biotite schist and is being driven slowly.

Recent surface measurements by the field examiners places present adit position within a few feet of the target. Apparently the dip on the pegmatite body as observable at the surface has changed considerably with depth. It is hoped that the target will be encountered in the very near future. 22 feet remains to be driven on the contract.

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

This adit continues to be driven slowly in a S 80° W direction and is now at 112.5 feet. Material encountered since last report consists of granitic stringers and biotite gneiss containing finely disseminated garnet.

Suggestions made recently concerning test holes in the left wall, quartz and stringer material to determine the extent of this mineralization, has not been complied with. No one was working at the mine at the time of this visit.

DMEA-2293 Idm-E393 (mica) D. W. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

This adit continues to be driven and is now at 109 feet. No pegmatite material has been encountered to date. Massive quartz with occasional stringers of granitic material was persistent in the left wall from 93 to 108 feet. Present heading is in biotite schist. It was suggested that the 15 foot zone in the left wall be tested with long horizontal drill holes to determine the lateral extent of the quartz and the possibility of a nearby pegmatite body.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

10th. Finished drilling and blasted, and mucked.
11th. Cleaned tunnel.
Did not work due to men farming until the 26th.
26th. Drilled and blasted.
29th. Mucked.
30th. Finished mucking and started drilling after setting column.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

The driving of this adit continues and is now at 103 feet. No appreciable change in the material was noted from that observed and reported on June 3, 1953. Massive quartz has been observed in the left wall for the last 10 feet, with biotite schist remaining persistent in the right wall.

Progress on this job is expected to be accelerated, since an amendment for additional footage under the present contract has been approved.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

The driving of this adit continues and is now at 102 feet. The last heading pulled showed massive quartz and granitic material in the face, with some scattered small pieces of mica. Pyrite remains disseminated through the quartz. The country rock is biotite schist. Additional footage in the form of an amendment to the present contract, will be needed by the operator to reach the target.

Dear Mr. Laurence:

Please find herewith the original and five copies of the amendment covering the subject exploration project which have been signed by the Administrator on the date as shown.

Please present the amendment to the Operator for approval and signature. After execution of the amendment, the copies are to be distributed in the usual manner.

A copy of our recommendation to the Administrator is enclosed for your file.

Sincerely yours,

George C. Selfridge
Chairman, Operating Committee

Memorandum

Docket No. DMEA-2293 - Mica
Dixie Minerals, Inc.
D. H. Stephens Upper Mine
Jackson County, North Carolina
Contract No. Idm-E393

To: Administrator

From: Nonmetallic Minerals Division

Subject: Review of Amendment No. 3

Purpose: To provide an additional 40 feet of drifting or cross-cutting on agreed estimated unit cost of $35 per foot increasing cost of project from $4,000 to $5,400, Government participation from $3,600 to $4,860.

To give a two months time extension to complete the additional work.

Justification: The geologic target has not been reached by the work proposed under the original contract. The time increase is necessary to complete the additional work proposed.

Recommendation: The Nonmetallic Minerals Division concurs with the field team's recommendation and recommends approval of the work proposed and the cost cited.

Signature Robert A. Laurence Title EXECUTIVE OFFICER DMEA REGION VII Date JUN 11 1953

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Memorandum

To: Operating Committee, DMEA, Washington, D. C.

From: Field Team, Region VII

Subject: Amendment No. 3 to DMEA-2293, Idm-E393 (mica)
Dixie Minerals, Inc.

Transmitted herewith are original and five copies of a proposed amendment to the subject contract increasing the total amount of the contract from $4,000.00 to $5,400.00 for your approval and the Administrator's signature.

The operators have completed the work outlined in the contract and the objective has not been reached. It is assumed that the pegmatite has changed its dip and it is requested that 40 feet of additional footage be allowed to reach the pegmatite and further explore it.

The Field Team feels that this is necessary, and it is in the interest of the Government to increase the footage.

Robert A. Laurence

BL

EXPLORATION PROJECT CONTRACT
DIXIE MINERALS, INC.
DOCKET NO. DMEA-2293, IDM-E-393

AMENDMENT NO. 3

It is agreed this ____ day of _____, 1953, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and Dixie Minerals, Inc., each acting in consideration of the agreement of the other to the terms hereinafter set forth, that Exploration Project Contract Idm-E393, Docket No. DMEA-2293, dated August 29, 1952, between the parties hereto, be modified and amended ~~as of May 1, 1952~~ Effective August 29, 1952, as follows:

(1 ~~A~~) In Article 8 of the contract, delete the figures $3,600.00 and $4,000.00 and substitute ~~the following~~ $4,860.00 and $5,400.00 respectively.

(2 ~~B~~) In Exhibit "A", under "Description of the work," Stage II, change the number 100 to 140. and add the words "or crosscut" after the word "drift" where the latter word appears in the description.

(3 ~~C~~) In Exhibit "A", under "Estimated Costs of the Project," Stage II, delete everything following the heading "Stage II" and substitute the following:

Unit Costs

140 feet of drifting or crosscutting
@ $35.00 per foot, including all costs $4,900.00

~~Note:~~ The Government will contribute to the cost of drifting or crosscutting on the basis of this agreed, estimated unit cost in lieu of actual costs.

Total Cost, Stage II	$4,900.00
Total Cost of the Project	$5,400.00*
Government Participation @ 90%	$4,860.00*

(4 ~~D~~) Article 6(a) of the contract form is amended by adding thereto the following provision:

"To the extent that costs are set forth in Exhibit "A" as "agreed unit costs" they are in lieu of the actual costs that would otherwise be allowable costs of the project as provided in Article 6(a) of the contract form."

(E) Article 3 of the contract is amended to provide that the Operator is to complete the project within a period of one year from date of contract, ~~instead of 10 months as amended by Amendment No. 2, dated March 27, 1953.~~

This amendment is made because the objective was not reached in the original footage set up in the contract due to the apparent change in dip of the pegmatite. The time extension is necessary in order to complete the added work.

Executed in sextuplicate the day and year first above written.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

IMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

This adit continues to be driven slowly and is now at 84.5 feet. More granitic material is beginning to show up in the face and dump material. Finely disseminated pyrite and garnet were noted in separate pieces of material recently removed from the adit. 15.5 feet remains to be driven under the contract.

D. M. Larrabee, Commodity Specialist, U. S. Geological Survey, accompanied the field examiners on this visit to the mine.

To: Administrator

From: Nonmetallic Minerals Division

Subject: Review of Amendment No. 2 - Docket No. DMEA-2293 - Mica
Dixie Minerals, Inc.
D. H. Stephens Upper Mine
Jackson County, North Carolina
Contract No. Idm-E393

Purpose: To amend Article 3 of the contract to allow 10 months instead of 7 months for completion of the work.

Justification: The work was delayed by illness of the personnel and winter weather conditions.

Recommendation: The Nonmetallic Minerals Division concurs with the Field Team and recommends approval of the amendment as executed in the field March 27, 1953

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA REGION VII Date APR 16 1953

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, North Carolina

LOCATION: 2.7 miles airline N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek.

Work continues slowly on this adit, which has been driven 23 feet within a two months period. No pegmatite material has been picked up as yet and 28 feet remains to be driven under contract. Drilling is still being accomplished with dry heads and the importance of drilling wet was again brought to the attention of the foreman. Material encountered is biotite schist with scattered quartz lenses; some schist observed contained finely disseminated pyrite throughout the mass. No appreciable change in the material has been noted recently.

Mr. W. A. Beck, a member of the DMEA Field Team, Region VII, accompanied the Field Examiner on this visit to the mine.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

SAFETY INSPECTION REPORT
D. H. STEVENS MINE (MICA)
(NEAR) EAST LAPORT, JACKSON COUNTY, NORTH CAROLINA

January 8, 1953

By

Roy G. Stott
Mining Health and Safety Engineer

INTRODUCTION

This report is based on an inspection made at the request of the Defense Minerals Exploration Administration to determine conditions and practices relating to health and safety and to propose recommendations for correcting hazards. The inspection party consisted of Roy G. Stott, mining health and safety engineer, Bureau of Mines, William A. Beck and Laurence E. Shirley, mining engineers, Defense Minerals Exploration Administration and H. A. Lawhead, mine manager.

GENERAL INFORMATION

The D. H. Stevens mine is operated by H. A. Lawhead of Sylva, North Carolina. A DMEA prospecting loan has been granted under Docket No. 2293, Contract Idm E-393.

The mine is located 2.7 airline miles N40°E of East LaPort, Jackson County, North Carolina. It is 300 feet northwest of Moses Creek.

The mine prospect consists of an adit driven 45 feet northeasterly into the hillside about 50 feet vertically below old workings. The abandoned workings lie about 300 feet laterally ahead of the present prospect. The pegmatite vein strikes N35°W and dips 80° to the northeast. The mine is accessible by a dozed roadway.

A Chicago-Pneumatic gasoline engine-powered 160 cfm portable compressor is used for drilling. To date no water has been used in drilling. The three miners are supplied with two dust respirators.

Two to four cases of dynamite are stored in an unsupported but locked hole in the hillside about 50 feet above the mine entrance.

The prospect adit is timbered as follows: Timber sets of 10-inch round oak placed 12 to 14 feet apart with the caps side-notched 4 inches into the side-noted posts. Timber sets are lagged with 4-inch round oak.

Three men work at the mine. All three wear hard hats. Muck is hauled by wheelbarrow to the dump.

SAFETY RECOMMENDATIONS

1. Additional timber sets should be installed between the existing sets. As the work advances, timber sets should not be spaced more than 6 feet apart. Furthermore, it is recommended the timber cap pieces be spragged tightly between each set to prevent dislodgement off the posts.

2. At least two 6-foot scaling bars should be provided and the loose roof and sides should be more thoroughly barred down before men work under the unsupported roof at the face. Timbering should be kept within 6 feet of the face.

3. Water should be provided for drilling and all drilling should be done wet.

4. The dynamite magazine should have the loose unsupported roof timbered and lagged.

5. Electric detonator caps, tools, and other articles should not be kept in the dynamite magazine. A separate detached magazine should be provided for detonator caps.

6. The blasting machine should be kept in a dry place where not exposed to damp air.

7. The blasting wire should not be coiled and kept outside where exposed to the weather. The end wires should be kept twisted together or shunted at all times except when ready to blast.

ACKNOWLEDGMENT

The cooperation of Mr. Lawhead and his men during this inspection is gratefully acknowledged.

Respectfully submitted,

/s/ Roy G. Stott
Roy G. Stott
Mining Health and Safety Engineer

Signature Robert A. Lawrence Title EXECUTIVE OFFICER DMEA REGION VII Date FEB 5 - 1953

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment, should be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INTERIM REPORT

DMRA-2293 Idm-2393 (mica) D. N. STEPHENS UPPER MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 miles airline N 40° E of East Laport, Jackson County, North Carolina. It is about 300' north of Moses Creek.

This adit, being driven in an E - W direction to pick up the pegmatite, is now at 49'. The contract is set up for 100' of drifting and is approximately 50% completed. Progress has been generally slow for no apparent reason. Previous drilling has been with dry heads and operator stated that a water system would be installed in the very near future. Suggestions made at time of safety inspection on January 8, 1953 had not been complied with entirely up to date of this visit. Mineralization is absent and adit is still being driven in biotite schist. Operators monthly reports are satisfactory.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

PROGRESS REPORT FOR MONTH OF DECEMBER

DMEA-2293 Idm-E393 D. H. STEPHENS UPPER MINE

Dec.

1 - Mucked

2 - Did not work, but discussed project with Field Eng.

3 - Drilled and repaired compressor.

4,5- Drilled, blasted and mucked.

8,9- Cut timber and timbered and repaired entrance to comply with request of Mine Inspector.

10,11,12 - Drilled, blasted and mucked, hard rock encountered.

15 - Bad weather, did not work.

16 - Drilled.

17 - Finished round and blasted, also discussed project with Field Eng.

18,19 - Mucked and started drilling.

22,23 - Drilled and blasted.

29 - Mucked.

No more work the balance of the month, cold and rainy.

INTERIM REPORT

IMEA-2293 Idm-E393 (mica) D. H. STEPHENS UPPER MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 airline miles N 40° E of East Laport, Jackson County, North Carolina. It is about 300' north of Moses Creek.

Present heading in tunnel is at 35' and is being driven in an east-west direction. This entire footage has required timbering and lofting to hold weathered material. Some suggestions as to additional timbering were made during this visit. Material encountered consists principally of biotite schist, scattered quartz stringers and a small pegmatite stringer in left wall and near the face of the tunnel. A few small pieces of mica, of good color but badly bent, was recovered. This project is progressing satisfactorily.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

IMEA No. 2293

NARRATIVE REPORT FOR MONTH
OF NOVEMBER

DAILY NOTES
November

5,4,and 5 - Placed compressor and put same in condition. Received supplies - gas, oil, etc., and discussed Project with Field Team Engineers.

6 and 7 - Weather bad. Did not work.

10th - Started drilling. Face all rock.

11 th - Drilled, blasted and mucked.

12th - Finished mucking and started drilling.

13th - Cut timber and timbered.

14th - Finished drilling the round and blasted.

17th - Mucked and set timber and started powder magazine.

18th, 19th and 20th - Heavy rains. No work.

21st - Drilled.

24th - Finished drilling round and blasted.

25th - Mucked and timbered.

No further work done in November.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS UPPER MINE

OPERATOR: Dixie Minerals Company, c/o Mr. H. A. Lawhead, Sylva, North Carolina.

LOCATION: 2.7 miles airline N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet north of Moses Creek and is the No. 1 mainworking of U. S. G. S. Map dated January 5, 1945.

The tunnel specified in Stage II of the contract is being driven from the lower open cut in an essentially westward direction. This tunnel had advanced about 10' and most of the material to this point was weathered biotite schist with a few scattered quartz stringers. An air compressor was moved to the mine site on the date of visit. Drilling and shooting of fresh rock should progress faster than initial work up to present. The portal has been timbered properly. Progress on this project is satisfactory.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature Robert A. Lemmon Title Executive Officer Region VII Date 11/10/52

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

OPERATORS MONTHLY PROGRESS REPORT.

For the Month of October 1952

DMEA-2293 (mica)

Work Accomplished.

Cleared Right of Way, also site for trenches, had bull-dozier cut two trenches according to contract, and started drift at point specified by Gov't Agent advancing ten feet then the face was properly timbered. Rock was encountered almost immediately and after advancing ten feet we were forced to wait for compressor which we have now received.

For the month of November we will give you daily notes as our Operators Monthly Progress Report specimen wasnot received until the end of October.

D. H. Stephens Upper Mine (mica)

APPLICANT: Dixie Minerals Company
131 Main Street
Waynesville, North Carolina

Contract - Idm-E393

LOCATION: The D. H. Stephens mine is located 2.7 miles airline N 40° E of East Laport, Jackson County, North Carolina. It is about 300 feet northwest of Moses Creek and is the No. 1, mainworkings of U.S.G.S. Map, January 5, 1945.

Progress is satisfactory on this project. It was proposed in the original contract that Stage I would consist of two trenches made by bulldozer cuts. At the time this property was visited approximately one-half of Stage I had been completed, which consisted of work on the upper trench. Work for the lower trench was outlined for the operator and will begin immediately.

Name of property: D. H. Stephens Upper Mine.
Location of property: Jackson County, North Carolina.
Date of field team report: May 20, 1952.
Authorship of field team report: A. L. Peyton and K. H. Teague.
Field team's recommendation: An exploration contract, to include construction of two bulldozer trenches and an adit, total cost to be $4,400.
Comments: None.
ACTION SUGGESTED: Follow field team's recommendation.

Report of Field Team Examination
on
DMEA-2293, D. H. Stephens Upper Mine
(mica) Jackson County, North Carolina

The D. H. Stephens Upper Mine is located 2.7 miles airline N.40° E. of East Laport, Jackson County, N. C. It is about 300 feet northwest of Moses Creek and is the No.1, Main Workings of the U.S.G.S. map, January 5, 1945.

Now work has been done at this place since the U.S.G.S. map was prepared and all openings are now caved. The openings consist of an open cut 40 feet long and down-dip stopes therefrom. These stopes are connected with a lower adit. The workings have explored the pegmatite body over a strike length of 75 feet and a vertical distance of 55 feet.

The pegmatite strikes N. 35°W., dipping 80° NE. It cuts across the foliation of the biotite gneiss which strikes northeast and dips 60-70° NW. The thickness ranges from 2 to 5 feet.

Mica found in the old dump is mostly of good quality. According to the U.S.G.S. report, both brown or ruby, and green mica occur. Reports indicate that some large books were obtained from the deposit. The mica examined was clear, hard and free splitting.

The Field Team believes that strategic grade mica can be obtained from this deposit and exploration assistance is justified. The deposit is sufficiently removed from property lines, thus no problems of working and dumping area are involved.

It is recommended that two bulldozer trenches, as indicated on the attached map, be cut along the probable southeast extension of the pegmatite to expose it for examination. After the trenches are completed it is proposed to drive an adit from the lowest cut northwestward for approximately 100 feet. This adit should be at least 40 feet vertically below the lowest drift shown on the attached map.

Estimated Cost of Project

Fixtures and Improvements

10 x 12 Tool House	$150.00

Operating Equipment

To be rented:

1 - 105 Air Compressor, 2 mos. @ $175/mo.	350.00

To be rented (cont'd)

1 - Jackhamer drill, 2 mos. @ $60/mo.	$ 120.00
1 - Bulldozer -w/blade, 40 hrs.@ $10/hr.	400.00

To be Purchased:

200 ft. 2" pipe @ .50¢ per ft.	100.00
200 ft. mine rail @ $1.15/ft.	230.00
Mine Car	150.00
Timber	200.00
Dynamite & Exploders	250.00
Hand Tools	100.00
Miscellaneous supplies	150.00

Labor and Supervision

1 - Working foreman, 50 shifts @ $1.50 per hour	600.00
1 - Miner, 50 shifts @ $1.50/hr	600.00
2 - Laborers, 50 shifts, @ $1/hr	800.00
Insurance, social security, etc.	200.00

Rehabilitation and Repairs

None

Estimated Total Cost..... $4,400.00

Estimated Time- 2 1/2 months

Subject: Docket No. DMEA-2293 - Mica
L. H. Stevens Upper Mine
Jackson County, North Carolina

Dear Mr. Laurence:

The above application dated December 5, 1951, concerns a mica exploration program in your Region. It is believed that your files contain a copy of the original application as well as the amendment dated February 6, 1952. This latter refers to the L. H. Stevens Upper Mine which yielded $2,800 worth of strategic mica in 60 days during 1944-45. If any of this material is lacking, please advise us.

An examination of this property should be made when it suits your convenience. If the property has sufficient merit to warrant assistance, a program should be submitted. The field report should include a statement identifying the location of the work on the property under lease.

For your further information, we include a copy of legal description, Bureau of Mines memo, two Geological Survey memos, and DMEA memo.

Sincerely yours,

(signed) FRANK M. JOHNSON

Memorandum

To: Chairman, Operating Committee, DMEA

From: Nonmetallic Minerals Division, DMEA

Subject: Docket No. DMEA-2293 - Mica
Dixie Minerals, Inc.
L. H. Stevens Upper Mine
Jackson County, North Carolina

Applicant proposes to drive an adit to explore the pegmatite below the old workings.

This property may merit assistance.

1. The pegmatite where previously mined was 6 to 10 feet wide.

2. During 1944-45 a three man crew produced $2,800 worth of strategic mica in 60 days, according to the application.

3. Colonial Mica purchased $2,795.00 of sheet and punch mica.

4. The mine produced ruby mica according to copies of Colonial Mica vouchers submitted by applicant.

Conclusion:

Field examination is needed.

Stanley A. Feitler
Nonmetallic Minerals Division

Subject: Docket No. DMEA-2293-Mica; D. H. Stephens Upper Mine
Jackson County, North Carolina

Dear Mr. Houk:

Per request of Mr. H. A. Lawhead of Dixie Minerals, Inc., I am submitting this letter in answer to your letter of February 12, 1952.

You will note that on the supplemental information submitted February 6th regarding this mine, a part of the tunnel and cut has caved in; this has so covered up the old vein that it is not possible to get for you a good sample of mica per your request from this vein without considerable excavation. The piece submitted was a piece Mr. Lawhead had kept at home left over from previous operation and was the best he had. No 1/4" thick pieces are available.

This being so, and since you desire evidence of quality of mica, we are submitting, in lieu of samples, copies of all the old sales invoices of sales to Colonial Mica Co. that we could find covering mica from this mine left over from previous operations. I regret that more of these cannot be found. The originals are in my hands which you are welcome to see, if that be essential. However, inasmuch as the three originals are all Mr. Lawhead has been able to find we dislike to turn them loose in light of their increased importance and aptness at getting misplaced or destroyed. Thence I hope you will accept the copies submitted as evidence of the invoices and in lieu of samples. This is the best we can do at the present.

Sincerely yours,

James H Howell Jr.

James H. Howell, Jr.

JHH:LL

Enclosure

P.S. Should you absolutely require the originals of the invoices, we will of course submit.

RECEIVED
FEB 20 1952

February 19, 1952

Memorandum

To: L. G. Houk, Non-metallic Mineral Deposits, DMEA.

From: Donald H. Kupfer, U. S. Geological Survey.

Subject: Dixie Minerals Inc., application DMEA-2293 for aid in exploring the D. H. Stephens prospect for pegmatite minerals.

Location of prospect: 16 miles SE of Sylva, Jackson County, North Carolina.

Recommendation: Deny the application.

Reasons for recommendation:

1. The application was reviewed by this office on Dec. 27, 1951. The data submitted by the applicant at that time indicated that the deposit did not warrant a field examination.
2. The new material submitted by the applicant is insufficient to warrant considering the application any further.

Comments:

1. The "upper mine" of the applicant corresponds to the main or No. 1 workings of Heinrich (1945).
2. Colonial mica records confirm that $2,795.40 worth of mica was sold (460 pounds).
3. The workings have explored the pegmatite body over a strike length of 75 feet and a vertical distance of 55 feet.
4. The pegmatite is poorly differentiated (not of the zoned type that has yielded the large mica production in this area).
5. The mica is medium brown and green in color.

[illegible]
[illegible], D-250, GS [illegible]

E. W. Heinrich of the U. S. Geological Survey examined this property in January 1945 and writes of the D. H. Stephens No. 1:

"The northwest pegmatite body contains too little mica to be of economic importance. The main body contains concentrations of mica of large size, but the concentrations are widely scattered."

Heinrich describes the adjacent mine on the same property, the D. H. Stephens No. 2, as chiefly electric mica (this is non-strategic). He notes:

"the fact that the several operations have been conducted at a loss indicates that the mine deserves no further attention.

INTERIM REPORT

DMEA-2293 Idm-E393 (mica) D. H. STEPHENS UPPER MINE

OPERATOR: Dixie Minerals, Inc., 131 Main Street, Waynesville, N. C.

LOCATION: 2.7 miles airline N 40° E of East Laport, Jackson County, North Carolina. It is about 300' north of Moses Creek.

This adit, being driven in an E - W direction to pick up the pegmatite, is now at 49'. The contract is set up for 100' of drifting and is approximately 50% completed. Progress has been generally slow for no apparent reason. Previous drilling has been with dry heads and operator stated that a water system would be installed in the very near future. Suggestions made at time of safety inspection on January 8, 1953 had not been complied with entirely up to date of this visit. Mineralization is absent and adit is still being driven in biotite schist. Operators monthly reports are satisfactory.

Re: DMEA 2293 - Mica, Dixie Minerals Inc., D. H. Stephens Mine
Supplement to Original Application

Dear Mr. Houk:

You will recall conversations of Mr. H. A. Lawhead of Dixie Minerals, Inc., and myself with you in early January with reference to the application for aid in exploration on the project designated above. At that time you expressed the opinion that in view of the grade of mica known to exist on the floor of Moses Creek you did not believe the project could be approved in connection with our application, which was for an exploration project 35 ft. off of Moses Creek road and 50 ft. or so from the creek. It was at that time that Mr. Lawhead pointed out to you that 450 ft. up the mountain was a mine which was a good producer during world war two, and because of it having been a producer we had not understood that that mine could be put in for an exploration project.

The original project was for the exploration of an old working which is described in the original application. However, as a result of our conference with you it has been decided to amend our application for the D. H. Stephens Mine to include this mine 450 ft. above the road at the same location and to concentrate our application for exploration aid upon that mine which we shall for clarity of designation hereinafter designate as the D. H. Stephens Upper Mine. You will recall that in order to do this we requested you to hold in suspense that application until we could furnish you with full information regarding the Upper Mine.

Pertaining to the D. H. Stephens Upper Mine I will endeavor to answer the questions set out on form MF-103 (April 1951) in the same order as follows, except where information furnished upon the original application will remain the same.

Items 1 through 8 remain the same as upon the original application.

Item 9: Dixie Minerals, Inc. will furnish their 10% part of the cost or the use of service and equipment, or a combination of both, sufficient to make up their 10% of the cost of the proposed project.

Item 10: I am submitting hereto attached an over-lay taken from geographical survey maps of 1946 (Tuckaseigee Quadrangle, Jackson County, N. C.) showing location of the D. H. Stephens upper mine outlined in red.

Mr. Lawrence G. Houk

I am also submitting copies of the legal description with reference to the book and page in which the same is recorded in Jackson County, N. C., Register of Deeds office.

Item 11: The present name of the owner of the property is D. H. Stephens.

Item 12: The D. H. Stephens Upper Mine is located approximately 16 miles southeast of Sylva in Caney Fork Township, Jackson County, N. C., and is in mining destrict "Region VII". Of the 16 miles, 12-3/10 miles are paved highway being highway No. 107 running south from Sylva to Cullowhee and upon leaving the highway and turning up Caney Fork to Moses Creek for a distance of 3-7/10 miles to the D. H. Stephens property on the left hand side of Moses Creek, a good gravel road. From the Moses Creek road up to the D. H. Stephens Mine is an old logging road which will require some work with a bulldozer after which transportation could go to the mine site 450 ft. above Moses Creek road. The nearest railroad shipping point is Sylva, N. C.

Item 13: Water for operation is available from Moses Creek and stream heads around the side of the mountain five to six hundred yards from the mine. The water is sufficient at all seasons. The source of power to be used will be gasoline powered machinery. However, the Moses Creek area is served by R.E.A. should electrically operated equipment be used.

Item 14: There are no existing usual facilities, building and equipment at the site of the upper mine now.

Item 15: Mica and its by-products would be trucked to Sylva from the mine, the nearest shipping point.

Item 16 : History: The D. H. Stephens Upper Mine was originally worked by William Seay, about 1944. Mr. Seay not being a practical miner operated the mine in such a way as to make mining conditions unsafe except one portion which Mr. H. A. Lawhead of Sylva worked after obtaining the lease from Mr. Seay in early 1944. After Mr. Lawhead took over operations of this mine, using three men he produced $2800 worth of high quality good ruby mica running in size, after being trimmed, from 1 x 1 to 4 x 6, the majority being 2 x 3. This is located 450 ft. above the Moses Creek road on Parker Knob Ridge. No spotted or electric mica was encountered at any time. The pegmatite is from 6 to 10 ft. in width and was worked to a depth of 35 ft., and while it rolls upward and then dips downward into the mountain there is no sign of pinching out. The majority of the mica mined by Mr. Lawhead was along the south wall. The sand stone and blue granite walls are clearly visible from the present opening as is also evidence of feldspar and quartz vein. Mr. Lawhead reports that in the rolls at places the mica shifted to center and opposite side with streaks of quartz doing the same. The old tunnel ran directly into the mountain, dipped upward, opened, widening out,

and then dipped sharply downward at a slant into the mountain. The mine is a dry mine. Water was not encountered when previously worked. The old opening did not have to be timbered except near the surface.

I have attached a sketch showing a cross section of the mine. The slope of the mountain, you will note, is very steep and carries approximately one-half way up the mountain. It will be noted further that a portion of this mine has caved in since 1945 as there has been no work in it since that time.

The plan for a new operation would call for coming around the side of the mountain to the northeast from the old tunnel opening and perhaps dropping down some from the level of the old tunnel opening and drilling a new tunnel; an estimated 50 ft. in length and 5 x 7 in height and width, hitting the vein near the end of the previous operation or at a point below that and then work the vein both ways. A specimen of mica taken from this mine is attached.

Item 17: Production: The mine produced for H. A. Lawhead in 1944-45, $2800 worth of good ruby mica aside from by-product of feldspar and scrap in a period of sixty days, using three men.

Item 18: Mineral Reserves: Unknown but believed to be extensive.

Item 19: Condition and circumstances regarding the mine are set out in paragraph 16 above and in cross section sketch.

Item 20: Exploration will be conducted for sheet mica with punch mica, scrap mica, and feldspar by-products.

Item 21: The exploration work will be divided into approximately three phases, the first phase of which will consist of improvement of the logging road leading to the mine, cleaning and clearing up the site and leveling for the installation of equipment and necessary structures consisting of compressor house, combination storage shed and tool house, and mica storage house, and the cutting of a power magazine in the hill; installation of rails and mine car for the establishment of a dump. It is estimated that this will require approximately three months or sixty working days to obtain equipment and prepare the site and install equipment.

The second phase of operations will consist primarily of the drilling of a tunnel estimated now for a distance of 50 ft., said tunnel to be 5 x 7 in size and would be well away from the cut and tunnel shown on cross section, at approximately right angles to the old tunnel which it is estimated will require approximately five months or sixty working days.

February 6, 1952

Mr. Lawrence G. Houk

The third phase of operation will consist of exploring the pegmatite for the vein of mica.

Item 22: A geogological basis of the project and factors leading the operator to expect to find commercial mica is based upon the following: The pegmatite within which mica is found is clearly visible and mica has been produced in recent years. The mine is evidently in the same general lead and in the near vicinity of the Cedar Cliff mine to the north; Sheep Mountain mine, to the northeast; and Judaculla Rock to the southeast. Some distance to the northwest is the Grassy Ridge mine now in operation by the Bradley Mineral Products Company. Further high incident of mica out-cropping in the general area is another factor to be considered.

Item 23: Estimated requirements and cost remain the same as set forth in the original application, inasmuch as it is deemed that the cost estimate there given is sufficient to cover the cost of this project.

Item 24: Time schedule for the project would be the same as is stated in item 21 above. It is expected that the first phase of operation outlined in item 21 above will cover 25% of the cost and that the tunneling and other operations contemplated in the second and third phases will consume the balance.

Again it is requested that this letter be taken as a supplement to the original application designated, but that the exploration project contemplated be concentrated on what we have designated as the D. H. Stephens Upper Mine.

Your kind attention to this matter will be appreciated.

Very truly yours,

James H. Howell Jr.

J. H. Howell, Jr.

EXPLORATION

Subject: DMEA-2293
Re: Exploration Loan
D. H. Stephens Mine

Mr. H. A. Lawhead
Dixie Minerals, Inc.
131 Main Street
Waynesville, North Carolina

My dear Mr. Lawhead:

This will acknowledge receipt of your application dated December 5, 1951 for a loan under the Defense Production Act of 1950.

Your application was assigned Docket Number DMEA-2293 and referred to the Non-Metallics Division.

Kindly refer to DMEA-2293 in any future correspondence relating to your application.

Sincerely yours,

ROBERT E. ADAMS

Robert E. Adams
