Re: Docket No. DMEA-4062 (Copper)
Lloyd F. King & Fred Cuderjohn,
A Partnership
Iron Lode mine
Lemhi County, Idaho

Dear Mr. King:

Your application for aid for an exploration project at the above-cited mine has been reviewed in Washington by the Base Metals Division of Defense Minerals Exploration Administration.

Careful study of the application shows that the included information concerning the property is entirely inadequate and that the proposed project consists solely of rehabilitating a caved adit. It is not the policy of DMEA to participate in rehabilitation projects as such. Under the circumstances we regret to inform you that your application is denied.

Should you complete the rehabilitation of the adit in which you are now working and care to submit a new application, please be assured that it will be given due consideration by DMEA. If you file a new application please refer to this docket number and give more detailed information relating to Items 4, 5, and 6 of the application form. As noted, the present application makes no mention of rock types, assays, width of vein, size of stopes, or breakdown of costs.

We thank you for your interest in the Defense Minerals Program and for bringing your property to our attention.

Sincerely yours,

By ESF

Re: Docket No. DMEA-4062 (Copper)
Lloyd F. King & Fred Guderjohn,
A Partnership
Iron Lode
Lemhi County, Idaho

Dear Mr. King:

Your application for aid for an exploration project and other reports available to us in Washington concerning your application have been reviewed.

Careful study of all our information indicates to us that your proposed program is solely one of rehabilitation and not one of exploration. We regret to advise you that the Defense Minerals Exploration Administration does not participate in a program of that nature, and that your application is therefore denied.

If at some future time you should open the adit and propose a definite exploration program, you could then submit another application for Government exploration assistance which we would be glad to consider.

We wish to thank you for your interest in the Defense Minerals Program and for bringing your property to our attention.

Sincerely yours,

Administrator

November 28, 1955

Memorandum

To: The Administrator

From: Chief, Base Metals Division

Subject: Denial of Application, Docket No. DMEA-4062 (Copper), Lloyd F. King and Fred Guderjohn, A Partnership, Iron Lode, Lemhi County, Idaho

The cited application, dated November 2, 1955, was forwarded by the Executive Officer, Region I, Northwest District and was received by this office on November 14.

The Applicant proposed to open 70 feet of an adit and construct a tool shed, and estimated that the work would cost $6,400.00.

The Executive Officer, in his letter of transmittal, stated: "This application is inadequate, and the Applicants have no other objective than reopening a caved adit. We do not believe this to be exploration. We have no information on this property in our files, and we would not recommend any revised program for exploration at the property until the lower adit, which the applicants wish to reopen, is accessible for examination. If the vein has been stoped in the upper drift, it seems probable that the vein has also been stoped from the lower adit, and it would be up to the applicants to make the lower adit accessible for our examination."

The application is solely one of rehabilitating an adit and is definitely not exploration.

We concur with the recommendations of the Field Team and the Commodity members of the USGS and USBM that this application be denied.

Re: DMEA 4062
Lloyd F. King and Fred Cuderjohn
Iron Lode
Lemhi County, Idaho
$6,400 - Copper-gold

Memorandum

To: W. R. Griswold, Defense Minerals Exploration Administration

From: N. E. Nelson, U. S. Geological Survey

Subject: Review of application.

As noted in the Field Team memorandum the application is inadequate and the work proposed cannot in itself be considered exploration. However, no line has been drawn on doing similar work in order to get to places where exploratory work could be done.

An examination of the upper 700-foot level, if still open for inspection, a rough measurement of the dump, if any, at the lower level and historical information gathered on the ground should permit reasonable deductions to be made as to the probable existence of ore between the levels now or in the past.

I concur with the recommendation of the Field Team that the application in its present form be denied, but I would not refuse to consider another application until the lower level is opened up.

Re: Transmittal of Application for
Aid in an Exploration Contract
Lloyd F. King and Fred Guderjohn,
A Partnership
Iron Lode Mine
Lemhi County, Idaho

Dear Mr. Selfridge:

Enclosed are three copies of an application submitted by Lloyd F. King and Fred Guderjohn, a partnership, Box 12, Gibbonsville, Idaho, for the exploration of copper and gold.

The application is inadequate, and the applicants have no objective other than reopening a caved adit. We do not believe this to be exploration. We have no information on this property in our files, and we would not recommend any revised program for exploration at the property until the lower adit, which the applicants wish to reopen, is accessible for examination. If the vein has been stoped in the upper drift, it seems probable that the vein has also been stoped from the lower adit, and it would be up to the applicants to make the lower adit accessible for our examination.

We therefore recommend that the application in this form be denied.

Gibbonsville, Idaho
Nov. 3, 1955

Wing G. Agnew
Member DMEA Field Team:
Region 1 Northwest District:

Dear Sir:

I hope the inclosed forms are filled out satisfactory.

We have been working on this property all this summer.

Cleaned out 700 ft. of drift approximately 400 ft. above where we are now working. & have a fair vain showing on this level: The ore has been mostly mined out: however all indications shows the ore goes down:

We would either have to sink a shaft or come in below.

There is an old tunnel where we are working now with the portal caved in which should come very close to the ore:

We are in approximately 30 ft. & from all indications there is 70 ft. more of slide rock before we will hit hard rock:

It is necessary to drive spilling for this 70 ft.

Yours truly,

Lloyd F. King

Participation (Government %) .....

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Lloyd F. King and Fred Guderjohn, a partnership, of Idaho, Box 12, Gibbonsville, Idaho

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract .....

(*b*) State any mine name by which the property is known. Iron Lode

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise Owner, subject to paramount title of United States

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property.

(*e*) If you own the land, describe any liens or encumbrances on it None

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes. Work now being done.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. No current production

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you. Copper and gold in veins.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points. A road runs to property or can be trucker from it.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power. There is an adequate supply of manpower, materials, supplies, equipment, water and power available.

16—66551-1

RECEIVED
NOV 14 1955

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore Copper and gold

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within one days and be completed within three months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations. Many years of experience

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)? Yes

(*b*) How do you propose to furnish your share of the costs? In money

[X] Money [ ] Use of equipment owned by you [ ] Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

Dated November 2, 1955
