Dear Mr. Grosso:

The above-referenced application for exploration assistance lacks certain essential information required by this agency in order to process it.

We require proof that you have rights to the subject land for sufficient time for the purpose of a contract. In accordance with Item 3 of the instrument attached to the sublease you submitted, exploration work must start within 60 days of the agreement date of October 16, 1959, and Item 4 provides that the moratorium mentioned in Item 1 concerning monthly rental payments shall cease in case of default. Will you kindly submit evidence that you have conformed with the terms of the above-mentioned agreement or that the owners have extended, or will extend, the period to cover the time necessary to complete the proposed exploration work. Also, five copies of Lien and Subordination Agreements executed by the owners of the land and the sublessor must be submitted. Enclosed are two sets of such agreements prepared for their signatures. Included are extra copies of the agreements that may be retained by the signers.

The bank letters you submitted do not meet the requirements listed under Item 1(a), "Financial Eligibility," of the application MME Form 40, in that no copies of your requests were included. It is suggested that you reapply to the banks, furnishing financial statements and asking the terms on which the exploration loan would be granted. Copies of such correspondence, including financial statements and replies from the banks, should be submitted directly to this office.

We will hold your application in abeyance pending receipt of the above-mentioned additional information.

Sincerely yours,

W. R. Griswold, Chief
Division of Minerals
