Socioeconomic Impacts of Outer Continental
Shelf Oil and Gas Development
A Bibliography

By Malka Pattison

INTRODUCTION

In 1975 the Resource and Land Investigations (RALI) Program entered into an agreement with the New England River Basins Commission (NERBC) to develop and apply a methodology for siting onshore facilities associated with outer continental shelf (OCS) development. The search for information during the development of the methodology revealed the need for better access to reports that address the socioeconomic impacts of OCS oil and gas development. This annotated bibliography has been prepared to help meet that need.

The bibliography lists reports which are concerned primarily with the socioeconomic impacts of OCS oil and gas development or which, although not primarily concerned with such impacts, include sections that contain significant discussions of them. Several of the cited reports do not address socioeconomic issues directly, but have been included because of their value in providing a broad picture of OCS oil and gas development and the associated terminology and/or technical aspects.

All of the reports listed were available as of February 1977.

ARRANGEMENT

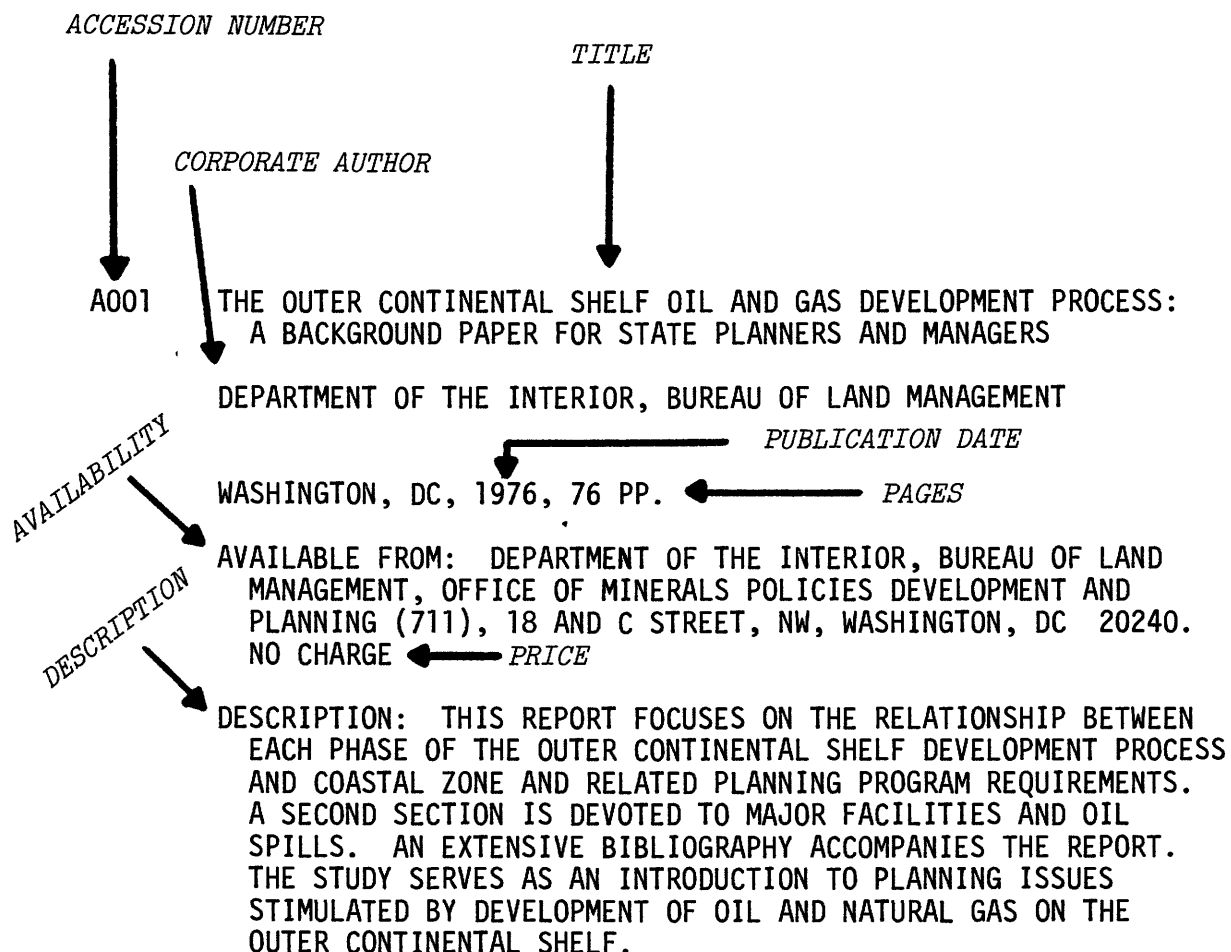

Each of the citations has been placed in one of the following parts of the bibliography:

- A. Introductory Literature - Reports, which give a general picture and serve as an introduction to OCS oil and gas development issues for an audience that is unfamiliar with such issues.
- B. General Studies - Non-introductory reports which survey a broad range of socioeconomic impacts of OCS development.
- C. Facility-related Studies - Reports which describe the socioeconomic impacts of specific petroleum-related facilities (refineries, petrochemical plants, platform fabrication yards, etc.) associated with OCS development.
- D. Regional Studies - Reports which focus on region-specific socioeconomic impacts of OCS development. Not all reports which might be considered regional are included in this section. If a report includes a substantial survey of general socioeconomic impacts applicable to other regions it is included in the General Studies section (B); if it develops a methodology, it is included in the Relevant Methodologies section (F).
- E. North Sea Experience - Reports describing existing offshore operations in the North Sea and the associated onshore impacts.
- F. Relevant Methodologies - This section includes both methodologies developed for regional economic analysis of industrial development, and methodologies developed specifically for the study of OCS socioeconomic impacts.

Each report was placed in the section which most clearly identifies its focus, even though it could qualify for inclusion under one or more of the other sections. Reports are listed in the order in which they were obtained, at which time they were given an accession number. For those

studies which resulted in multi-volume reports, each volume is cited separately if the volumes are available individually. If available only as a set, the report is cited as a single entry. Primary entry to the bibliography is through one of three indexes, although the division into six sections provides a degree of "browse" capability.

A sample entry illustrates the format used in the citations found in the bibliography:

INDEXES

The three indexes to the bibliography are as follows:

- 1) Key Word in Context (KWIC) Index - The title of each bibliographic citation is used to supply index terms. Only the significant (key) words are used. The KWIC index format lists the keywords alphabetically in the center of the page. The remaining words in the title are printed to the right of the keyword in their original order. If there is insufficient space on the line for the words to the right of the keyword in the title, the title is continued at the left margin of the same line. The keyword appears in the context in which it is used in the title. Slashes are used to indicate the first word of the title, which is the word immediately to the right of the slash.
- 2) Author Index - All authors are indexed alphabetically by their last name.
- 3) Corporate Author Index - This index identifies the corporate source of the reports. Sources are listed alphabetically using the first significant word in the corporate name.

Each of the three indexes uses the accession number to guide the user to the appropriate citation in the bibliography. For example, the accession number E006 refers the user to the sixth entry in Part E (North Sea Experience).

ACKNOWLEDGEMENTS

The editor is particularly grateful to Dr. Jeffrey Zinn, Senior Associate with the Conservation Foundation, who helped organize the bibliography, screen reports suggested for inclusion, and prepare descriptions of reports. He also provided valuable review comments during the preparation of the manuscript.

CG11 THE ECONOMIC IMPACT ON MISSISSIPPI OF OFFSHORE OIL ACTIVITIES AND OF A PROPOSED TERMINAL FOR SUPERTANKERS

WILLIAMSON, JAMES R. AND WADE, F. JOHN

MISSISSIPPI RESEARCH AND DEVELOPMENT CENTER, JACKSON, MS, 1976, 22 PP.

AVAILABLE FROM: MISSISSIPPI MARINE RESOURCES COUNCIL, P.O. DRAWER 959, LONG BEACH, MS 39560. NO CHARGE

DESCRIPTION: BASED ON THE POSSIBLE DISCOVERY OF 10 BILLION BARRELS OF OIL AND 15 TRILLION CUBIC FEET OF NATURAL GAS IN THE EASTERN GULF, THE AUTHORS ESTIMATE THE INCOME GENERATED BY OFFSHORE OIL AND NATURAL GAS PRODUCTION, A DEEPWATER PORT FOR SUPERTANKERS, AND AN OIL REFINERY. THE AUTHORS EVALUATE THE EXTRA COSTS FOR STATE AND LOCAL GOVERNMENT GENERATED BY THE OCS ACTIVITIES. THE AUTHORS CONCLUDE THAT THOUGH THE COSTS OF PUBLIC SERVICES WOULD BE PARTIALLY OFFSET BY INCREASED PERSONAL INCOME, SALES AND OTHER TAXES, THERE WOULD STILL REMAIN A \$15 MILLION DEFICIT. FURTHERMORE, BECAUSE THE RESERVES ARE IN FEDERAL WATERS AND CANNOT BE TAXED BY THE STATE, MISSISSIPPI WOULD FOREGO CLOSE TO \$90 MILLION IN TAXES ANNUALLY.

F013 ENVIRONMENTAL CONSEQUENCES OF ON-SHORE ACTIVITY IN FOUR NEW JERSEY COASTAL COUNTIES RESULTING FROM OFF-SHORE OIL DEVELOPMENT

NARKUS-KRAMER, MARC, RATICK, SAM, WATSON, ANDREA

ENVIRONMENTAL PROTECTION AGENCY, WASHINGTON, DC, 1975, 41 PP.

AVAILABLE FROM: NATIONAL TECHNICAL INFORMATION SERVICE, 5285 PORT ROYAL ROAD, SPRINGFIELD, VA 22151, AS PB 249-349, \$4.00

DESCRIPTION: INCREASES IN ONSHORE AIR AND WATER POLLUTION LEVELS FOR FOUR NEW JERSEY COASTAL COUNTIES RESULTING FROM THE PROPOSED MID-ATLANTIC OIL AND GAS LEASE SALE NO. 40 WERE ESTIMATED BASED ON THE PROJECTIONS OF ECONOMIC ACTIVITY FOR 1975, 1980, 1985, AND 1990. IT WAS FOUND THAT THE SULFUR OXIDE EMISSIONS COULD INCREASE TO LEVELS THAT WOULD RESULT IN A SIGNIFICANT DETERIORATION OF AIR QUALITY IF STRINGENT SULFUR REMOVAL CONTROLS WERE NOT ENFORCED FOR THE REQUIRED GAS PROCESSING PLANTS. OTHER AIR POLLUTANTS WERE FOUND TO INCREASE ONLY SLIGHTLY. POINT SOURCE WATER EMISSIONS WERE FOUND TO INCREASE SLIGHTLY ALTHOUGH NON-POINT SOURCE RUNOFF COULD BE EXPECTED TO INCREASE SIGNIFICANTLY. THE STRATEGIC ENVIRONMENTAL ASSESSMENT SYSTEM DEVELOPED BY EPA WAS USED AS THE BASIS FOR THIS ANALYSIS.

THE AREAS SELECTED--YAKUTAT, DILLINGHAM-NAKNEK, AND KOTZEBUE--ARE LOCATED IN REGIONS THAT HAVE BEEN IDENTIFIED AS HAVING POTENTIALLY LARGE HYDROCARBON RESERVES. THE REPORT INCLUDES DETAILED COST AND MANPOWER INFORMATION FOR FIVE SECTORS RELATED TO THE EXPLORATION, SHORE FACILITY CONSTRUCTION, PIPELINE CONSTRUCTION, PLATFORM INSTALLATION, AND DEVELOPMENT DRILLING. THE MODEL TRANSLATES THE DIRECT IMPACTS OF THESE PETROLEUM-RELATED SECTORS INTO INDIRECT AND INDUCED IMPACTS ON THE ALASKAN ECONOMY.
