Docket No. 11-3

Mr. Norman M. Smith
General Manager
Clayton Silver Mines
P. O. Box 890
Wallace, Idaho

Dear Mr. Smith:

It is with regret that we must inform you that the Clayton Silver Mines no longer qualifies as a "small domestic producer" as defined in Section 501.2 paragraph (c) of the Rules and Regulations applicable to the Lead and Zinc Mining Stabilization Program, as amended following enactment of Public Law 88-75, 77 Statute 92. Failure to meet current qualification requirements results from the fact that the calculated value of silver, copper and gold produced during the twelve month period of January 1962 through December 1962 exceeds the value of the lead and zinc produced during that same period when both have been determined in accordance with Section 501.2, paragraph (1) of the amended Rules and Regulations.

Settlement sheets which you recently sent to us will be returned early in the week of January 13 to 17.

We recognize the financial inconvenience and disappointment this determination may be to you and your firm. We appreciate your interest in the program and are sorry your participation cannot be continued.

Sincerely yours,

G. J. Jameson

Mr. Norman M. Smith
General Manager
Clayton Silver Mines
P. O. Box 890

Dear Mr. Smith:

Thank you for your letter of December 5 with which you enclosed your new Application for Participation in the Lead and Zinc Mining Stabilization Program, as well as a monthly listing of sales and production of lead and zinc from January 1956 to the present time.

The yearly listing of metals other than lead and zinc, however, is insufficient and it is necessary for you to submit that data on a monthly basis beginning with January 1956. From the information now at hand, it appears that you may no longer be eligible for participation in the program. It may also be necessary for you to reimburse the Government in the amount of $835.24, representing the stabilization payment made to your company for August sale of lead.

We shall appreciate your prompt submission of the monthly sales data above requested in order that a full review of your eligibility may be made.

A corrected certification covering smelter Lot No. 1096/901 of your August sales has been received from the American Smelting and Refining Company.

Sincerely yours,

Bob Ross

IN REPLY REFER TO: [illegible]
Docket No. 11-3

Mr. Norman M. Smith
General Manager
Clayton Silver Mines
P. O. Box 890
Wallace, Idaho

Dear Mr. Smith:

Receipt of your December 30, 1963, letter and enclosed copies of settlement sheets for metal sales are acknowledged.

We recognize the position into which enactment of Public Law 88-75 has placed Clayton Silver Mines with regard to the Lead and Zinc Mining Stabilization Program. We sympathize with you as its manager. However, the altered Rules and Regulations applicable to the program must be adhered to.

Your attention is invited to Section 501.2, paragraph (c) as it exists in Amendment No. 1 of the Rules and Regulations. Not only must a participant not have produced and sold lead and zinc combined in excess of 3,000 short tons during any twelve month period during the qualifying period of January 1, 1956, and the first day of the first period for which he seeks payment; but he must have maintained a production and sale of either lead or zinc or a combination of lead and zinc as his principal product or products. The latter is defined by the added paragraph (1) also contained in Amendment No. 1.

You are correct in stating Clayton Silver Mines qualified as a small domestic lead and/or zinc producer under the program up to July 25, 1963. Whether or not your firm continues to be qualified for participation depends upon its eligibility determined in conformance with the now existing Rules and Regulations including Amendment No. 1, which has resulted from enactment of Public Law 88-75. It is necessary to have the production data by month as previously requested.

If your firm continues to be qualified for participation in the program, including meeting the requirements of Amendment No. 1, full payment of stabilization payment for August and subsequent months will be authorized. If it fails to qualify, the prompt return of $833.24 will be in order.

2

[illegible] Clayton Silver Mines is [illegible] for continued participation in the program, it is necessary for you to furnish the tabulated data previously sought by this office.

The settlement sheets for your metal sales will be returned under separate cover following our review of your existing docket.

Sincerely yours,

Royalty Payment for August, 1963

Payment No. 48

Docket No. 4659
Contract No. Idm. E-1108

Tons produced above 500 level	729
Tons produced below 500 level	753
Total Tons	1,482

753 tons = 50.810% of total

Value of Concentrate Produced

Lot #901	40.254 tons or 66.807%	$ 7,792.10
*Bonus	$835.24 less $554.49 paid in July	280.75
Lot #902	~~45~~ tons or 76.585% should be 46 tons	9,321.31
	Total Value	$17,394.16
	50.810% of $17,394.16 =	$8,837.97
	5% of $8,837.97 =	$441.90

Royalty check in the amount of $441.90 is here enclosed along with copies of smelter settlement sheets for Lot No. 902.

*Clayton Silver Mines is in a dispute with the GSA over bonus payments. As stated in our report for July (Payment No. 47), we received one-half bonus payment on Lot No. 901 which amounted to $835.24. To date GSA has refused to pay the remaining half and has indicated that we may be required to return the $835.24. Because of probable further delay caused by the dispute, we are paying royalty on smelter settlements. If and when bonuses are paid, we will amend our reporting and pay the royalty then due.

Paid with this correction		$ 1.29

See Payment No. 41 for remarks.

* Stabilization was estimated as $1,550.74 and original royalty payment was based on such amount, apparently this estimate was based on 48,798.77 pounds of lead "Pay Content" of mine lot No. 890 instead of 55,822.32 pounds of lead in "Total Content". The actual stabilization payment was $1,760.07 per USBM records

Re: Docket No. DMM 4659
Contract No. Idm. E-1108
Royalty payments

Dear Sir;

Clayton Silver Mines pay royalty on certain ores from its Clayton Mine under above captioned exploration contract. The ores on which royalty is due are reduced to a percentage of the total ores mined each month and royalty payments made on a monthly basis (see Royalty payments through September 1962, No.55) according to the percentage calculated.

Recently this Company received from the government, under the lead-zinc stabilization program, certain bonuses for its ore sold in 1962. Production of these ores covered a period beginning in December 1961 with mine Lot No. 870.

Royalties through September 1962 have, or are being paid, on ores produced during that period, but does not include the bonuses.

Payment of royalty on the bonuses of ores produced through September 1962 is here made, which totals $1,457.05.

Supporting copies of papers and documents from the G.S.A. and our calculation sheet are enclosed in triplicate.

Henceforth, the bonus will be included in every month's production, and royalty paid in the usual manner.

Very truly yours,

CLAYTON SILVER MINE

From: Acting Field Officer, Region I, GSE

Subject: Royalty payments
BMMA-4699 (Lead-Zinc)
Clayton Silver Mines
Clayton Silver Mine
Custer County, Idaho
Contract Ida-X1108
Appropriation Symbol: BMMA-14x8401

On the copy of our memorandum dated November 9, 1960, which you return to us the receipt shows royalty payments to date as $2,130.18, with which sum our records agree.

With our memorandum dated November 23, 1960, we enclosed a check from the Operator in the amount of $555.11. However, the receipt on the copy returned to us shows royalty payments to date as being only $1,930.18. It appears that this latter figure should be $2,485.29.

Clarification of the total royalty paid to this account will be appreciated.

D. R. MacLaren

Dear Mr. MacLaren:
Royalty payments as of this date 12/16/60 on Contract No. 1108 total $2,485.29. The receipt sent showing 1,930.18 was in error. Sorry.
