December 2, 1964

Mrs. Jessie M. Lindblad
1493 Santa Cruz Street
San Pedro, California 90731

Dear Mrs. Lindblad:

We regret that your undated application for OME assistance is too incomplete to be accepted and we are returning it herewith, along with your letter, a copy of a letter dated August 7, 1962, from Eugene E. Kettenhall, and the section of the Idaho Bureau of Mines and Geology Bulletin No. 14.

Your attention is directed to the General Instructions on the front of the application form. Idaho Bureau of Mines and Geology Bulletin No. 14 gives a description of the geology of the area and of the Silver Hills mine which was located about 1880. As you state in your letter that your claims were located in 1928, they are a different property.

While it would be of interest to know where your claims lie with respect to the Silver Hills property, of greater importance would be a map showing your claims and a list giving the book and page on which the locations are recorded.

Copies of letters you have written to two banks requesting the terms and conditions under which they would lend you a sum equal to that which you are requesting of the Government for exploring on your claims, and copies of the banks' replies are a legal requirement which we cannot omit. Also, you have given no indication as to how you propose to furnish your share of the costs; no information or sketch showing what work has been done and where on the property. If you have assay reports of samples, they should be included. In fact, it is necessary that you give us fully as you can the data requested on the back of the form before we can do much for you.

We are also enclosing new application forms and urge you to read the Title 30 and the booklet we sent you on August 28, 1964, as well as the General Instructions on the application for.

Sincerely yours,

D. R. MacLaren

Dear Sirs:-

Regarding the 7 lengthy questions asked on the reverse side of application, for the Financial assistance in putting down a rotary drill hole test.

I believe it would only take 2 or 3 test holes to tell the story not more than 4.

It is important to learn how much the ore increases in value at a greater depth.

It is very important to know what the values are under the big clorn? capping on Claim #one. on War Eagle Peak.

No company has ever been formed on my property.

No stock has ever been sold on my property.

My Father located the claims in 1928. He died in 1934.

I have protected the mine since then. The Roads are good. I own 1 hundred and 20 acres of the big vein.

/s/ JESSIE N. LINDBLAD

Dear Sirs I am sole owner of one Hundred and twenty acres of the Silver Hills vein. Located on War Eagle Peak
The vein structure is over one-hundred feet in width
I need to have a drill test made to learn about the values at depth.
The Silver Hills owners are fortunate enough to have a report listed in Bulletin #14 Idaho Bureau of mines and geology at Moscow Idaho.
My claims cover most of the Corn out crops. We are both on same vein
I am a Widow and am on the Old Age Security.
I am sure there is some how I can find help.
Please help me some-way?

Jessie N. Lindblad
