Memorandum

To: Reports and Records Unit, DMA

From: Chief, Industrial Minerals Branch, DMA

Subject: DMA-388; loan of $120,000; Mica
The Cooperative Mines Inc.
La Madera, New Mexico

It is recommended that subject application be denied on the grounds that:

The principal produce would be scrap mica which is not classified as strategic at this time. It is not believed that the strategic material would be produced in significant quantities.

We are forwarding the entire docket which includes the following:

1) Three copies of Form MF-103
2) Report from U.S.G.S.
3) Two letters from applicant
4) Memo to James Barr from J. J. Norton
5) Memo to J. A. Barr from Coordinating Committee

My dear ~~Senator Anderson:~~ Clint

We have your letter of July 6 in regard to the application of Mr. A. C. Bohrnstedt, La Madera, New Mexico, docketed DMA-388.

This application has been very carefully investigated by D.M.A. and checked with the United States Geological Survey, who found that the proposition did not qualify. The applicant has been notified of the denial with the proviso that the case may be reopened if new information is submitted.

If we can be of any further assistance, please call on us.

Sincerely yours,

Administrator

In Re: DMA-388

Dear Mr. Lyon:

Supplementing the information previously given to you in connection with the above numbered application, will say that we have fully completed, and yesterday filed, the Proof's of Labor in connection with all of the claims covered by the application.

The work done was principally upon access roads to, and upon, all of the properties, and while we had the large Dozer to do it with, we did fully $2,000.00 of work which we had hoped to do with the Cooperation and assistance applied for in the above named application. It was so vital to that work and needs, that we hope that it may be considered favorably as a part of our 10% of the program in contemplation. We sincerely hope that very soon we may be working under the full program.

Sincerely yours,

The Cooperative Mines, Inc.

A. C. Bohrnstedt, President.

Dear Mr. Bohrnstedt:

This is in answer to your letter of May 30 addressed to the Administrator.

I have checked on your applications and find that they are now in the process of study and should be out any day. You may expect to hear from us soon regarding application DMA-388.

Regarding your difficulty with the Army, I wish to say that we have not been very successful in having the boundaries of the proving grounds changed on account of undeveloped mines. However, after an examination of your property the picture might be changed.

Very truly yours,

Tom Lyon

La Madera, N.M., May 30, 1951

Honorable James Boyd, Administrator,
Defense Minerals Administration,
Department of the Interior, Washington, D.C.

Subject: DMA - 388 to type
DMA - 604 withdrawn

Dear Mr. Boyd:

Senator Clinton P. Anderson has forwarded to me a copy of your letter to him, dated May 1, 1951, relative to the above mentioned applications. Your personal interest in these applications are appreciated very much. We are advised that at the office of Region 1V, they had not received instructions for the Field Team, as yet, but we did hear from Mr. James A. Barr, Sr., Chief, Industrial Minerals Branch, by letter dated May 11,1951, so undoubtedly the work is being given attention. We are most seriously interested in getting started, so that the work may be well advanced yet this year, and that it may be far enough advanced, that we can be prepared to operate, at least upon some of the properties duringthe winter season.

In the late after-noon of January 3rd, in Denver, after I had filed both applications, the Hostess of a down-town Cafe, said to me - "do you mind having a gentleman share your table?" She brought to me a very fine young man - probably in his thirties. We exchanged greetings and confidences, he being interested in Oil - I in mining. I told him of filing our applications, and saying - "I hope that we do not have to go through what we and other Mica men had to go through in our District, during World War 11", and we talked about that a little, then it was that he said - "I know Dr. James Boyd intimately - he is as fine a man as I have ever known - he and I have worked together. You can depend upon it that he has the interests of the people at heart. If you should have a problem, tell it to him personally. He will give it careful consideration." I am sorry that I did not write down the young man's name.

Irrespective of our own interests, because under a lease with the Government, if we get fair treatment, we may be as well, or better off, than to operate, but in the Government interest, from the standpoint of defense, and the preparation for defense, I sincerely believe that the modest exploration program that we asked for, should be carried out. Last week, and again yesterday, I had a talk with the son of one of the owners from whom we purchased, who is a graduate Engineer and Geologist, with practical mining experience. He agreed with me in that and I have not talked with a single party who knows that property, who does not. And I think that the Army, itself, is blind to its own interests, in demanding that the property be taken over before knowing as nearly as can be ascertained, what is in the property.

We have had assay after assay of the Fluorspar. The lowest being 96.16, and from that up to 99.60, and it was not picked sampling. One of the great Engineer's and Geologists of this, or any other country, said when visiting me there - "my company sends me all over the world. In all of my travels, I have never seen anything like it before." He advised further development and exploration in order to try to get the extent of it.

A Geologist sent out by one of the largest consumers of barite in the United States, advised core drilling and exploration, and carefully explained how he would do it.

In the next to the last paragraph of the Report that we filed with our application, made by Donn M. Clippinger, Field Engineer, and Philip F McKinlay,

RECEIVED
JUN 1 - 1951
DEFENSE MINERALS ADMINISTRATION
OFFICE OF ADMINISTRATOR

Geologist, for the New Mexico Bureau of Mines and Mineral Resources, recommended that "Barite lenses and bodies along the fault should be further prospected for pure barite and for possible concentration of galena. The presence of such a quantity of galena crystals and casts as disseminated through the lowerpart of the fault zone, indicates excellent possibilities for lead ore in minable quantities." The Engineer who was here last week and again yesterday, agrees with them perfectly.

At the suggestion of Mr. Clippinger, following their examination, we had the whole area prospected with geophysic instruments - three of them all in one day. The results were even better than we had imagined.

As to the Copper prospect, I would not have advised that exploration, if full equipment for core drilling and prospecting had to be purchased, but it is within about two miles of the Fluorspar, so it can be done with the same equipment, with only the labor cost. An Arizona Mining man said to me - a friend and I more than twenty-five years ago located a prospect not as promising as that one, which has been mined almost continuously since. Our assays were much lower than yours, yet ore up into the millions have been taken out.

Our properties are close to the west edge -(northwest) of the White Sands Proving Grounds, where up to this time, nothing has been done by the army in it. We are advised that as promised, Sierra County has made a rodd into and down Sulphur Canyon, so that the road work would undoubtedly cost less than our estimate.

It seems to me that it is just as important, if not more important, for the Army and our Government, to know where and how much minerals are available for the propelling of our Jet Missels and Jet Planes, as are the Jet Missils and Jet Planes, for without just that kind of material, those planes and missils cannot get off of the ground. And if great Geologists and Engineer's cannot say, without exploration, how much of such minerals there are there, they have no basis for a fair appraisal, nor more important than that, they have no basis upon which to evaluate the possibilities for use of a potential, essential war and construction, mineral, or/and/ minerals.

I am sending you this information, because as the Head of the Defense Administration, I feel that you should be informed. Our Bureau of Land Management of the Interior Department, Albuquerque, N.M., has already certified some of our properties to the Army division, as mineral claims. The fore part of July, their Engineer and Geologist are to meet me at the properties to examine some of the others for certification. Then all that are certified are to be appraised by a Government appraiser, before a lease is entered into. I will not sign any lease until I am advised by you, our Defense Minerals Administrator, that such action is approved by you.

Sincerely yours,

A. C. Bohrnstedt, President,

Dear Mr. Bohrnstedt:

Your letter of April 14, 1951, addressed to Mr. J. N. East, has been forwarded to this office for information and reply.

The program recently approved for encouragement of exploration of strategic minerals calls for participation on the part of the applicant, as shown in Section 9(a), (b), and (c) of the attached Regulation MO-5.

The details of the plan, explaining the projects that will be eligible for assistance, the terms and schedules of financing, repayment, and other pertinent information are enclosed.

If you wish to participate in the exploration program, please complete the enclosed Forms MF-103 and return four copies so that we can give further consideration to your application, which may or may not require a field examination.

Sincerely yours,

James Barr

DMA-604

Dear ~~Mr. Anderson~~ Clint:

We have your letters of January 29, and March 18, in regard to the applications of Mr. Bohrnstedt.

Application of the Cooperative Mines docketed as DMA-388 is being referred to the Field Team, Region IV for examination, having been delayed pending formulation of a pegmatite program.

Application of the American Fluorspar Group Inc., docketed as DMA-604 is considered withdrawn in compliance with request of Mr. J. H. East, Region Director at Denver, Colorado, in a letter dated March 21, 1951 which states "You will note that he has been unable to have his land withdrawn from the bombing range and that his application may be considred as withdrawn."

Exploration participation forms are being mailed to Mr. Bohrnstedt in response to his later inquiry of April 4, 1951.

Sincerely,

JAMES BOYD

Mr. James Boyd, Administrator,
Defense Minerals Administration,
Bureau of Mines,
Department of the Interior,
Washington 25, D.C.

Dear Doctor Boyd: In re: Application January 3, 1951 to John A. East, Jr., Regional Director, Region IV, Denver 2, Colorado.

Subject - Copper.

Supplementing the above mentioned application, which I am advised by Mr. East has been forwarded to the Defense Administration, will say that upon the last page of the application, wherein I quoted various assays, there was at the bottom of that page, five assays of Copper quoted. In rereading the application, I discovered that I had not made any other referance to them, or where they came from. I wish to make that explanation now.

The Claim is known as "COPPER #1", situated also in the Sulphur Canyon District of the San Andreas Mountains, about 1½ miles from The AMERICAN Fluorspar Group, Inc., Group of Claims, and owned by the Minerals Developers, A partnership, made up principally of a few of us who financed quite extensive prospecting within that District, but the Management, Supervision and direction of it is by our Corporation, therefore made a part of our application , because we think it worthy of quite extensive core drilling and further investigation. This for the benefit of our Government, as much or more than ourselves, unless we are permitted to make further filings adjoining our claim. We understand that that area is not now open for filings.

I am not sure of the exact location as to where #1, #2 and #3 of the A. A. Bently assays were taken, altho I do know that they were obtained in that immediate neighborhood, but as to the others, they came from our claims and were the result of my own sampling, with the aid of others.

The samplings are from two small open cuts near the bottom of the side of the mountain in Sulphur Canyon. in [illegible] formation. We [illegible]

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.
*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.
*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.
*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.
15. State in detail how the ore could be shipped and how and where milled.
*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.
*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.
19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?
21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.
22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.
24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

Subject DMA-388 X

Dear Mr. Barr:

Thank you for your letter of the eleventh, enclosing Forms MF-103. These forms have been completed and four of them enclosed herein.

Our application of January 2, 1951 contains all of the information asked for I think, except for the following additions, and/or/changes:

(a) The outstanding Capital Stock now stands at $96,485.oo, instead of $87,125.oo. $8,840.00 addition was made possible by a transfer of a like amount of stock for a Contract of purchase covering five Mineral Fluorite-Barite Claims, purchased by the American Fluorspar Group, Inc., in which we already had acquired a $4,410.00 interest. We also hold clear title to the claims, which we consider very valuable. The Stock of The American Fluorspar Group, Inc., is held very largely by the stockholders of this Corporation, and it has the same Board of Directors and Officers.

(b) We do not have the cash to put up for our one-tenth contribution, but on the properties under consideration, mined ore in dumps of more than estimated 3,000 tons, which under laboratory tests shown in our application, contain 38% or more of mica, for which we have a ready market of $30.00 a ton, f.o.b. cars Santa Fe, N.M. This will be available as fast as it can be run when the Plant applied for in "Step 1" is completed.

(c) The five largest stockholders are as follows:
A. C. Bohrnstedt, La Madera, N.M.
Ethel M. Bohrnstedt, La Madera, N.M.
Lewis A. Cleveland, Beuna Park, California
Vilma Kathrine Tietjen, Columbia, Mo.
Mona L. Schmoker, Santa Fe, New Mexico.

(d) Mr. Joe M. Maestas, La Madera, New Mexico, considered and acknowledged by those who know him, to be the best experienced miner of mica in the Petaca Mining District, will be our Production foreman. A salary has not been agreed upon, but it will be reasonable and subject to Defense Minerals Administration approval, if our application is approved.

(e) Our project need not take more than two years for its completion. In fact, if we can get going promptly, we should be able to complete it much within the two year period.

We are proud of our properties, and we are always proud to show them to Engineer's , Geologists, or others. but on account of the time element and of our anxiety to get started at the earliest possible time, I was gratified by your statement in your letter in refereance to our application - "which may or may not require a field examination."

In substantiation of our application, we tried to give you the most recent, authentic information available upon our properties and upon the District, as well as the most conservative, when we sent you Bulletin #25 of our New Mexico Bureau of Mines and Mineral Resources, of which the Director was Mr. E. C. Anderson, and the eminent Geologist in charge, Mr. Richard H. Jahns, now with the California Institute of Technology, Pasadena, California. It was prepared by the Geological Survey of your own U. S. Department of the Interior, and supported with complete maps of the mines surveyed and Geologized. The survey team took the better part of two working seasons in its preparation, and consulted with miners, Geologists and Engineers. Our properties, with the exception of the Black Fang, are described in it. One Geologist of note said to me - "that does not show up well at the surface on account of the overburden, but look at the quality of the mica (pulling some out of his pocket which he had picked off of the dump) - that may prove as good, or better, for the production of plate and punch mica of any of your properties, or of any in the district that I have seen."

Mr. Gabino Alire, mentioned by Mr. Jahns as one with whom he consulted, gives the local color and estimate of the mines, from a life long acquaintance with them, and during his life time, considered to be one of the most successful and reliable mica men in the district. He it was who gave me the courage to go on in our darkest days.

There must also be reportsavailable in Washington by others, because at the beginning of World War 11, I, myself, carried around two of the Engineer's sent out to investigate the possibilities of production, which were used as a basis for the Government's road building program within the mining district, and which are still a credit to the district.

If more information is necessary, we will gladly assist the Department in getting it, but if not, we will be glad to get going, account for every penny and try to use it wisely, and do everything that we know how to do, to cooperate with the Government and other producers within the district, in getting out the mica and other much needed strategic minerals which our War emergency now demands.

Sincerely yours,

A. C. Bohrnstedt

A. C. Bohrnstedt, President

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four signed copies of the application to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive officer thereof, with your name and address on each sheet of the application and all accompanying papers. If any question is inapplicable, or if you cannot answer it, so state on the form. Where the space provided for answer is insufficient, answer on a separate sheet, annex it to the application form, and refer to it in space for answer. If the application is approved, you will be presented with an exploration project contract on Form MF-200, for your signature.

THE APPLICANT

*1. Is applicant an individual, partnership, or corporation?
*2. If a partnership, state names and addresses of partners.
*3. If a corporation, state names and addresses of officers, directors, and five largest stockholders.
*4. Describe the mining and general business experience of (*a*) the applicant, and (*b*) the person or persons who will manage the project.
*5. Are you the owner or the lessee of the property?
6. If owner, state what claims, liens, or encumbrances, if any, are against the property.
7. If lessee, attach a copy of the lease and state if it is in good standing.

NOTE.—It will be necessary to procure and attach to the exploration project contract agreements of claimants, lienors, encumbrances and lessors subordinating their interests in the property to the interest of the Government under the contract.

8. Furnish current financial statement, showing assets and liabilities, and a profit and loss statement.
9. How much money is applicant prepared to invest in proposed project? Is it sufficient to pay your part of the cost of the project as detailed in question 23 of this application form, in accordance with the regulations on Government participation (Section 9 of Mineral Order 5)?

*If you have already answered these questions on MF-100, you are not required to answer the questions for this application.

16—64067-1

THE PROPERTY

10. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.
    (*b*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

    NOTE.—If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*b*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

*11. State the present and former names of the property, if any.
*12. State, in detail, the location of the property with reference to towns, railroads, roads, shipping points, including distances and directions and kinds and conditions of roads.
*13. State source and quantity of water available for operations and its sufficiency at all seasons.
State amount of power to be used, rate per hour or other cost, and source.
*14. Describe any existing useable facilities, equipment, buildings, or structure now on the property that will be devoted to the exploration work.
15. State in detail how the ore could be shipped and how and where milled.
*16. History:
    (*a*) Give a statement, as complete as possible, of previous exploration, development, operation, and production of property, with reasons for any past suspensions of operations.
    (*b*) State briefly the known history and production of adjoining and neighboring properties.
    (*c*) Furnish any available (private) reports that may apply to this application, including results of mine examinations, recommended exploration and development, and metallurgical investigations.
*17. Production:
    (*a*) If mine is in production, furnish the following information:

	Tons per day	*Grade or analysis*	*Cost per ton*	*Net value per ton*
(1) Mining				
(2) Milling				
(3) Shipped or sold				

*18. Ore or mineral reserves: (If property is or has been operating.)
    (*a*) Describe the ore or mineral deposits briefly.
    (*b*) Submit available maps and assay data.
    (*c*) Give estimated tonnage and grade of each class of ore reserves.
19. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

THE EXPLORATION

20. For what mineral or minerals and for what types of deposits and ores will the exploration be conducted?
21. Describe briefly, but concisely, the proposed work and the estimated time required to complete it.

    NOTE.—The Government will not participate in a project that will require more than 2 years to complete.

22. Furnish statement of the geological basis of the project with particular emphasis on factors leading the operator to expect the finding of commercial ore bodies. This statement should be accompanied by supporting maps such as geological maps, maps of the proposed openings and assay maps, sample lists, and other pertinent data.

THE REQUIREMENTS AND COSTS

23. Tabulate in the form of an itemized statement with a sum for each item the estimated requirements and costs of the project so that the total will give the estimated cost of the project in which the Government will participate, as follows:
    (*a*) Labor, by numbers and classes (miners, muckers, millmen, etc.), with wages of each.
    (*b*) Supervisors, by numbers and positions, with salaries of each.
    (*c*) Cost of necessary repairs to existing facilities, structures, and buildings.
    (*d*) Cost of necessary installation or construction of additional facilities, structures, and buildings.
    (*e*) Cost of items of equipment, not now owned by the applicant which must be purchased for operations at a cost of $50 or more each.
    (*f*) Cost of rental for equipment which the operator proposes to rent.
    (*g*) Rental value of items of equipment which the operator now owns and which will be devoted to the work.
    (*h*) Cost of materials and supplies, including items of equipment costing less than $50 each.
    (*i*) Cost of power, water, utilities, and any other items not provided for above.
24. Furnish a time schedule of the project, stated in terms of months after project is approved, showing progress expected to be accomplished and the money expected to be spent.

We believe that all of the foregoing information is covered in full in our application of January 2,1951.(DMA-388)

Memorandum

To: Mr. Landon Strobel, Executive Secretary, DMA

From: [illegible], DMA, Region IV

Subject: DMA Docket 604 - American Fluorspar Group, Inc., LaMadera, New Mexico.

Herewith is a letter from Mr. A. C. Bohrnstedt containing additional information regarding the above application. You may want to consider this information along with the other submitted at an earlier date.

J. H. East, Jr.

J. H. East, Jr.

Enclosure 1

The Cooperative Mines, Inc.,

LaMadera, New Mexico.

April 14, 1951

Mr. J. H. East, Regional Director,
Bureau of Mines,
Department of the Interior,
224 New Customhouse,
Denver 2, Colorado.

In re: Application filed January 3, 1951

Dear Mr. East:

We have just received a Bulletin from the Secretary of our New Mexico Miners and Prospectors Association relative to the allotment $10,000,000 made available by the Defense Production Administration, for "assistance to the mining industry in seeking new ore reserves as authorized by the Defense Production Act, 1950."

We do not want to disturb our application as filed, unless you think that it is wise to do so, because that was well planned and fits our needs, and we think, fits into the Defense program admirably. However, two things in our Secretary's Bulletin, made me feel that I should write to you, because time is passing - going onto four months already, and we are ready and anxious to get going. Those two things were, the following:

"Government contribution, 90 %, for asbestos (spinning grade), beryl, cobalt, columbium-tantalum, corundum, cryolite, industrial diamonds, kyanite (strategic), mica(strategic, monazite and rare earth ores, nickel, platinum group metals, quartz crystals (piezo-electric) talc (seatite) , and tin."

Our main production is of course, mica, but along with it, there will be some of the minerals underscored, except cobalt. That was a mistake.

And much of the first work in the mines will be cleaning, exploring and uncovering, the ore that we know is there. If our whole program is allowed as outlined, we can easily pay our 10% out of the proceeds of sale of the mined mica already in the dumps. And, too, we absolutely know, that the Plant will stimulate production and make production possible for several small mines in the district, so that much more than our own mines, will be benefitted, because it is our purpose and desire, to assist in the whole Defense Minerals program, and to build up our district.

You will know whether it is best to advise Washington of this letter, because you are familiar with the program. I am enclosing an extra copy, should you wish to do so.

Sincerely yours,

A. C. Bohrnstedt,
President

P.S. Item 2, was:
"Applications that have been filed prior to the issuance of this regulation will be treated as though they were on the prescribed form.

Dear Jim:

In the early part of January of this year, Mr. A. C. Bohrnstedt, La Madera, New Mexico, President of The Cooperative Mines, Inc., and The American Fluorspar Group, Inc., filed applications for assistance under the Defense Act of 1950 for both corporations.

I have a letter from Mr. Borhnstedt which indicates no action has as yet been taken on these applications. He states that last week he had a letter from Mr. J. H. East, Jr., the Regional Director at Denver, saying no word had been received from Washington concerning these applications.

Of course Mr. Borhnstedt is anxious to get into operation as quickly as possible and would appreciate immediate action being taken on his applications. I am sure you will be glad to look into this and do what you can to be of assistance. A report from you in this regard will be appreciated.

Sincerely yours,

Clinton

Dear ~~Dr. Boyd:~~ Jim

From Mr. A. C. Bohrnstedt, President, The Cooperative Mines, Inc., La Madera, New Mexico, and The American Fluospar Group, Inc., Hot Springs, New Mexico, I have received the attached copy of letter concerning his application for assistance under the Defense Act.

DMA 60Y

I am glad to recommend Mr. Bohrnstedt to you as being thoroughly reliable in every regard and I shall appreciate anything you may do to see that favorable action is taken on the applications referred to in his communication.

Sincerely yours,

Clint

Washington, D. C.

Dear Mr. Anderson:

Referring you to my letter of November 20th, and your reply thereto November 28th, regarding Government assistance under the Defense Act of September 1950, will say I have just returned from Denver, where I filed with the Regional Director, Mr. John H. East, Jr., applications for assistance both upon the Mica and the Fluorspar. They received me very cordially, made no criticism of our applications and promised that they would go forward at once. Your name was given as a reference in the application for each Corporation. Any assistance that you may occasion to give, will be very much appreciated, and probably an aid to what this state can do in the way of helping the defense program.

Sincerely yours,

/Sgd./ A. C. BOHRNSTEDT
/T./ A. C. Bohrnstedt.
