CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF REVIEW

I have reviewed the Monthly Reports of:

Joe C. Vance

Flintkrea, North Carolina

pertaining to Exploration Project Contract No. Idm-E704, Docket No. DMEA 3391, for the month of September 1954, covering a project for the exploration of mica on property, known as the Joe Mines, located in Avery County, North Carolina.

My review included an examination of the Monthly Reports (Forms MF-104) and supporting documents attached thereto, comparison of the costs claimed with the contract and pertinent schedules, verification of work performed by reference to Field Team's Final Report, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the following reason:

all of the costs incurred were under a contract provision for payment by the Government on the basis of agreed estimated costs of units of work actually performed.

The review disclosed the following facts in regard to the amount paid or to be paid the contractor:

Total cost as billed by Contractor		$400.00
Exceptions:		
By DMEA Finance Officer	$ -0-	
Herewith	-0-	-0-
Total Accepted Cost		$400.00

The contract calls for a 75 percent participation of exploratio expenses by the United States Government. Therefore, payment to the con tractor by the Government in the amount of Three hundred and no/100 Doll

"$300.00"

is considered valid and proper, provided that the Regional Executive the Administrator, or other competent official has accepted or will the project as having otherwise met the terms of the contract.

TERMINATION AGREEMENT

It is agreed this 28th day of November, 1954, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and Joe C. Vance, hereinafter called the "Operator," parties to that certain Exploration Project Contract Idm-E704, Docket No. DMEA-3391, dated September 9, 1954, hereinafter called the "Contract," that:

1. Effective October 21, 1954, the Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

2. The Government shall contribute only to the fixed unit costs of work performed prior to said effective date.

3. The Operator shall promptly perform all winding-up and settlement actions provided for in the Contract, including the rendering of the final report and final account.

4. The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of said Contract, except as otherwise provided in this termination agreement.

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

EXPLORATION PROJECT CONTRACT[1]

(Short Form)

IT IS AGREED this 9th day of September, 1954 between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and[2] Joe C. Vance
Plumtree, North Carolina

hereinafter called the "Operator," as ~~follows:~~ set forth in Annexes I and II, attached hereto and made a part hereof, and as follows:

ARTICLE 1. *Authority for contract.*—This agreement is entered into under the authority of the Defense Production Act of 1950, as amended, pursuant to DMEA Order 1 entitled "Government Aid in Defense Exploration Projects."

ARTICLE 2. *Operator's property rights.*—With respect to that certain land situated in the State of North Carolina, County of Avery, described as ~~follows:~~[3] set forth in Annex I

the Operator represents and undertakes:[4]

(*a*) ~~That the Operator is the owner, in possession and entitled to possession, and that the property is subject only to the following claims, liens or encumbrances as to each of which the subordination agreement of the holder is attached:~~

(*b*) That the Operator is a lessee, in possession and entitled to possession, and the Owner's Consent to Lien is attached.

The Operator shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of the exploration project without any allowance for the use, rental value, depreciation, depletion, or other cost of acquiring, owning, or holding possession thereof.

ARTICLE 3. *Exploration project.*—The Operator, within 30 days from the date of this contract shall commence work on a project of exploration for[5] Mica

in or upon the described land; and shall bring the project to completion within a period of Four (4) Months from the date of this contract. The work to be performed is more fully described in Exhibit "A" attached hereto, which, with any maps or drawings thereto attached, are made a part of this contract. The Government will contribute to the cost of this work as hereafter provided. The work shall be performed by the Operator or by independent contractor or contractors efficiently, expertly, in a workmanlike manner, in accordance with good mining standards and State regulations for health and safety and for workmen's compensation and employers' liability insurance, with suitable and adequate equipment, materials, and labor, to bring the project to completion within the time fixed. The Government shall have the right to enter and observe and inspect the work at all reasonable times, and the Operator shall provide the Government with all available means for doing so. The Government may consult with and advise the Operator on all phases of the work.

ARTICLE 4. *Costs of the project.*—The agreed, estimated costs of performing the work, expressed in terms of units of work to be performed (per foot of drifting, per foot of drilling, per cubic yard of material to be moved, etc.) are set forth in Exhibit "A," attached hereto. The Government will pay 75 percent of these agreed, estimated costs, as they accrue, for units of work actually performed that conform with the description or specifications for the work set forth in this contract, in an aggregate total amount not in excess of $2,709.75, which is 75 percent of $3,613.00 the agreed, estimated total cost of the project in which the Government will participate: *Provided,* That until the Operator's final report and final accounting have been rendered to the Government and any final check or auditing required by the Government has been made, and a final settlement of the contract has been made, the Government may withhold from the last voucher or vouchers such sums as it sees fit not in excess of ten (10) percent of the maximum total which the Government might have been called upon to pay under the terms of the contract. The Government may, as it sees fit, make payments direct to the Operator's independent contractors, if any, for the account of the Operator, rather than to the Operator.

ARTICLE 5. *Reports, accounts, audits.*—(*a*) *Progress reports.* The Operator shall provide the Government with monthly reports of units of work performed under the contract, in quintuplicate (five copies), upon forms provided by the Government. These progress reports shall be certified by the Operator, and shall constitute both the Operator's invoice of units of work performed on the project during the period covered by the report and his voucher for repayment by the Government, unless the Government requires the use of a standard voucher form with invoice attached. Progress reports shall include surface and/or underground engineering-geological maps or sketches showing the progress of the exploration, with assay-reports on samples taken concurrently with the advance in mineralized ground.

[1] If sufficient space is not provided in any blank, use an extra sheet of paper and refer to it in the blank.
[2] State name, address, and nature of organization if any.
[3] Give legal description or enough to identify the property, particularly excluding any land or interest therein to which the Government's lien is not to attach or the production from which is not to be subject to the Government's percentage royalty.
[4] Strike out the provision not applicable.
[5] Name of mineral or minerals.

(*b*) *Final report.*—Upon completion of the exploration work or termination of the contract the Operator shall provide the Government with an adequate geological and engineering report, in quintuplicate (five copies), including an estimate of ore reserves resulting from the exploration work.

(*c*) *Compliance with requirements.*—If, in the opinion of the Government, any of the Operator's reports are insufficient or incomplete, the Government may procure the making or completion of such reports and attachments as an expense of the exploration work; and the Government may withhold approval and payment of any vouchers depending upon insufficient or incomplete reports.

(*d*) *Accounts and audits.*—The Operator shall keep suitable records and accounts of the units of work performed, which the Government may inspect and audit at any time. The Government may at any time require a check of the work performed and an audit of the Operator's records and accounts, by a certified public accountant or otherwise, the cost thereof to be treated as a cost of the project. The Operator shall keep and preserve said records and accounts for at least 3 years after the completion of the project or the termination of this contract. Upon the completion of the project or termination of the contract the Operator shall render a final account and statement of work performed to accompany his final report.

ARTICLE 6. *Repayment by Operator.*—(*a*) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than 6 months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) percent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) percent of any such net amounts, plus one-half (½) percent of such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such net amounts.

(For instance: The percentage royalty on a net amount of five dollars ($5.00) per ton, would be one and one-half (1½) percent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(*b*) As here used, "net smelter returns," "net concentrator returns," and "other net amounts realized from the sale or other disposition," mean gross revenue from sales, or if not sold, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be the gross income from mining operations for percentage depletion purposes in income-tax determination.

(*c*) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(*d*) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations. **See Annex II, substituted for Article 6.**

ARTICLE 7. *Assignment, transfer, or loss of Operator's interest.*—Without the written consent of the Government, the Operator shall not assign or otherwise transfer or hypothecate this contract or any rights thereunder. The Operator shall not make any voluntary nor permit any involuntary transfer or conveyance of the Operator's rights in the land described in Article 2, without making suitable provision for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof; *Provided*, that mere failure by the Operator to maintain the Operator's rights in the land, without any consideration running to the Operator other than relief from the cost of maintaining such rights (as by surrender of a leasehold, failure to perform assessment work, or failure to exercise an option), coupled with complete abandonment by the Operator of all interest in or operations on the land for a period of 10 years from the date of this contract, shall not constitute such a transfer or conveyance. Should the Operator make or permit any transfer or conveyance in violation of this provision, the Operator shall be and remain liable for payment to the Government of the same amounts, at the same times, as would have been paid under the terms of the percentage royalty on production. If for any reason the net smelter returns, net concentrator returns, or other net amounts realized from the sale or other disposition of such production are not available as a means of measuring the amount of the Operator's liability, the amount thereof shall be estimated as well as may be, and in the event of dispute as to such estimates, the determination thereof by the Administrator of Defense Minerals Exploration Administration or by his successor shall be final and binding upon the Operator.

ARTICLE 8. *Termination and completion.*—The Government may, at any time, by written notice to the Operator, terminate this contract: (*a*) If the Operator fails to provide his share of the money necessary to prosecute operations pursuant to the terms of the contract; (*b*) if the Operator, in the opinion of the Government, fails to prosecute operations pursuant to the terms of the contract; or (*c*) if, in the opinion of the Government, operations up to the time of the notice have not indicated the probability of making any worth while discovery and in the opinion of the Government further operations are not justified.

ARTICLE 9. *Changes and added provisions* **That part of the second sentence in Article 7 beginning with the word "Provided" is deleted.**

Executed in sextuplicate the day and year first above written.

EXPLORATION PROJECT CONTRACT
JOE C. VANCE
DOCKET NO. DMEA-3391

ANNEX I

The land referred to in Article 2 of the contract form and in Annex II was leased for mining purposes to Joe C. Vance for a period of three years by W. W. Avery heirs, by an instrument dated March 8, 1954. It is located on the south side of Razorback Ridge, 3.8 airline miles N. 43° W. of Plumtree, Avery County, North Carolina, and is described in the lease as follows:

> The Joe Mines on the Avery Property known as the Powder Mill Boundary in Roaring Creek Township, Avery County, N. C.: Beginning at a big chestnut oak on the bank of Oaks Knob Road on the Dave Pitman and Avery boundary line about 100 feet north of mines and running east 400 feet with said line to a stake; thence, south down ridge 400 feet to stake; thence, west 800 feet around ridge to a stake; thence, north up ridge 400 feet to the same Pitman and Avery boundary line; thence east 400 feet with said line to the beginning, thus situating the Joe Mine in a north central position of the herein-described tract of land.

EXPLORATION PROJECT CONTRACT
JOE C. VANCE
DOCKET NO. DMEA-3391

Department of the Interior
Defense Minerals Administration
RECEIVED
OCT 11 1954

ANNEX II

The following provisions are in lieu of Article 6 :

Repayment by Operator.--a. Certification.--If the Government considers that a discovery or development from which production may be made has resulted from the work, the Government, at any time not later than six months after the Operator has rendered the final report and final account, may so certify in writing to the Operator. Such certification shall describe broadly or indicate the nature of the discovery or development.

b. Royalty on production.--The Operator, as principal, if the Operator is the producer, or as surety, if the Operator is not the producer, shall pay to the Government a royalty on all minerals mined or produced from the land, as follows: (1) regardless of any certification of discovery or development, from the date of the contract until the lapse of the time within which the Government may make such certification, or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first; or (2) if the Government makes a certification of discovery or development, for a period of ten years from the date of the contract, or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first.

c. Basis for computation.--The Government's royalty shall be a percentage of the gross proceeds (including any bonuses, premiums, allowances, or other benefits) from the production sold, in the form sold (ore, concentrates, metal, or equivalent), at the point of delivery (the f.o.b. point); except, that charges of the buyer arising in the regular course of business, and shown as deductions on the buyer's settlement sheets, on account of the cost of treatment processes performed by the buyer, sampling and assaying to determine the value of the production sold, and freight paid by the buyer to a carrier (not the Operator), shall be allowed as deductions in arriving at the "gross proceeds" as that term is used herein. Any costs of treatment processes, sampling or assaying, or transportation, performed or paid by the

Operator or by anyone other than the buyer, are not deductible in arriving at the "gross proceeds" as that term is here used. The term "treatment processes," as here used, means those processes (such as milling, concentrating, smelting, refining, or equivalent) applied to the raw ore or other production after it is extracted from the ground, to put it into a commercially marketable form; excluding fabricating or manufacturing.

d. Unsold production.--If any production (ore, concentrates, metal, or equivalent), after the lapse of six months from the date the ore was extracted from the ground, remains neither sold nor used by the Operator in integrated manufacturing or fabricating operations (for instance, if it is stockpiled), the Government, at its option, as long as it so remains, may require the computation and payment of its royalty on the value of such production in the form (ore, concentrates, metal, or equivalent) it is in when the Government elects to require computation and payment. If any production is used by the Operator in integrated manufacturing or fabricating operations before the Government makes its election, the Government's royalty on such production shall be computed on the value thereof in the form in which and at the time when it is so used. "Value" as here used means what is or would be gross income from mining operations for percentage depletion purposes in Federal income tax determination, or the market value, whichever is greater.

e. Percentages of royalty.--The percentages of the Government's royalty shall be as follows:

> One and one-half ($1\frac{1}{2}$) percent of amounts ("gross proceeds" or "value") not in excess of eight dollars ($8.00) per ton of production in the form in which sold, held, or used, plus one-half ($\frac{1}{2}$) percent for each additional full fifty cents ($0.50) by which such amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such amounts.
>
> (For instance: the royalty on an amount of five dollars ($5.00) per ton, would be one and one-half ($1\frac{1}{2}$) percent; on an amount of ten dollars ($10.00) per ton, three and one-half ($3\frac{1}{2}$) percent.)

f. Lien for payment.--To secure the payment of its percentage royalty, there is hereby granted to the Government a lien upon the land or the Operator's interest in the land and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

g. Notice to purchasers.--The Operator shall give notice of the Government's claim for royalty to any purchaser of the production, and shall authorize and direct such purchaser to pay the royalty directly to the Government and to furnish the Government with copies of the settlement sheets. If the records of any production and sales or other disposition of production, whether the production is by the Operator or by others, are not made available to the Government, the amount of the royalty may be estimated by the Administrator, Defense Minerals Exploration Administration, or his successor, and his estimate thereof shall be final and binding upon the Operator.

h. No obligation to produce.--Nothing in this contract is to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

i. Government not obligated to buy.--Nothing in this contract shall be construed as imposing any obligation on the Government to purchase any minerals mined or produced from the land.

EXPLORATION PROJECT CONTRACT
JOE C. VANCE
DOCKET NO. DMEA-3391

EXHIBIT "A"

Description of the Work

Exploration for concentrations of strategic mica shall be accomplished in the area indicated on the attached map entitled "Sketch of Joe Mine, Avery Co., N. C., DMEA-3391 (mica)," as follows:

1. Prepare site for incline by stripping the pegmatite with bulldozer and cutting a diversion and drainage ditch.

2. Construct a toolhouse, 10 feet by 12 feet, a powder magazine, and an exploder magazine.

3. Sink a two-compartment, inclined shaft on the pegmatite to a depth not to exceed 40 feet.

4. From the bottom of the incline, explore the pegmatite by driving not more than 50 feet of drift and/or crosscut.

The incline and the drifts and/or crosscuts shall be timbered where necessary and shall have cross-sectional dimensions of not less than 5 feet by 7 feet in the clear of timber.

The location, inclination, direction, and extent of all work are subject to the approval of the Government.

Agreed Unit Costs

1. Preparing site for incline 1/		$400.00
2. Constructing:	Toolhouse 1/	75.00
	Powder magazine 1/	25.00
	Exploder magazine 1/	13.00

1/ The completed work constitutes the unit.

3. Sinking 40 feet of incline shaft @ $40.00/ft.	$1,600.00	
4. Driving 50 feet of drift and/or crosscut @ $30.00/ft.	1,500.00	
Agreed Estimated Total Cost of Project		$3,613.00
Government Participation @ 75%		$2,709.75

MF-203
(Revised July 1, 1954)

OWNER'S CONSENT TO LIEN

WHEREAS, the undersigned, as owner, co-owner, lessor, or seller has an interest in certain property in the State of NORTH CAROLINA, County of AVERY, described as follows:1/ The Joe mines on the Avery Property known as the Powder Hill Boundry in Roaring Creek Township, Avery County, N. C.: Beginning at a big chestnut oak on the bank of Oakk knob Road on the Dave Pitman and Avery Boundry line about 100 foot north of mines and running east 400 foot with said line to a stake; thence, south down ridge 400 foot to a stake; thence, west 800 foot around ridge to a stake; thence, north up ridge 400 foot to the same Pitman & Avery boundry line; thence east 400 foot with said line to the begining, thus situating the Joe Mine in a north central position of the herein described tract of land.

which is the subject of a proposed exploration project contract, hereinafter called the "contract", between the United States of America, hereinafter called the "Government", and

2/ Joe C. Vance , Plumtree, N . C.

hereinafter called the "Operator"; and

WHEREAS, under the provisions of said contract the Government is entitled to a percentage royalty on production and to other rights and equities which do or may conflict with or be adverse to the rights of the undersigned:

NOW THEREFORE, the undersigned, in consideration of said contract and as an inducement to the Government to enter into same, undertakes and agrees as follows:

1. The Government's equity in and right to dismantle, sever, take possession of, and remove and dispose of facilities, buildings, fixtures, equipment, or other items as provided in the contract or any amendment thereof shall prevail over and be prior and superior to any conflicting or adverse rights of the undersigned, and the Government is authorized to enter upon the land for such purposes.

2. To secure the payment to the Government of the percentage royalty on production3/ provided for under the terms of said exploration project contract or any amendment thereof there is hereby granted to the Government a lien upon the land above referred to and upon any production of minerals therefrom until said royalty is fully paid or ten years have elapsed from the date of the contract, whichever occurs first.

1/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated _____, and recorded in book _____ page _____ official records of said county." If (b) is used, the book and page of recordation cannot be dispensed with. If the space provided is insufficient, use an Annex, and refer to the Annex in the space.

2/ Insert the name of the Operator as it will appear in the exploration project contract.

3/ Mining or production from the land is not required, and in the absence of production there is no obligation to repay the Government.

(OVER)

3. The undersigned shall commit no act nor assert any claim that may contravene or conflict with the lien, claim, or rights of the Government under the provisions of said contract. This agreement shall be binding upon the heirs, executors, administrators, successors, and assigns of the undersigned.

Re: Docket No. DMA-3391 - Mica
Joe C. Vance
Joe Mine
Avery County, North Carolina
Contract No. IAE-E734

Dear Mr. Vance:

Reference is made to your terminated exploration contract with the Government.

We sincerely regret that the work performed did not result in a certification of discovery or development under the provisions of the contract. In the absence of such certification, the Government retains no claim or lien against the property subject to the contract or any future production therefrom. We, therefore, are closing our books and records on this project. Your attention, however, is called to the provisions of the contract which require the operator to keep and preserve certain records for the period indicated.

Your interest in the DMA exploration program and participation therein are fully appreciated.

Sincerely yours,

Frank E. Johnson

Re: DMEA-3391, Idm-E704 (mica)
Joe Mine, Avery County

Please find enclosed check $1.03 for 5% repayment on mica dozed out at the Joe Mine.

Mr. Laurence, I recovered 354 lbs. block mica of poor quality which was processed and sold. As I did not have enough of any size or grade, it was sold with other mica.

Sold to U. S. Government Depot 1½ lbs. of sizes 5½ and 6 which averaged $10.00 per lb. I recovered 15 lbs. of washer mica sold to washer buyer for 10¢ per lb. Balance of 325 lbs. of scrap mica at 1¼¢ per lb, or $25.00 per ton.

Itemized as follows:	To U. S. Depot	$15.00
	" Punch Buyer	1.50
	" Scraps	4.06
		$20.56
		5%
		$102.80 Due DMEA$1.03

Hope this will clear up everything as I had no way of getting sales tickets.

Very truly yours,

s/ Joe C. Vance

Re: DMEA-3391, Idm-E70h (mica)
Joe Mine, Avery County, N. C.

Dear Mr. Vance:

On July 6 we wrote to you regarding payment of royalties due on sales of mica from the Joe Mine, Avery County, N. C., which was explored under the subject contract.

As we have had no answer to our letter this is to remind you that payment of royalties are over due.

Please forward a check or money order in the amount of 5 percent of all mica sold as a result of the exploration performed under the contract, made payable to Defense Minerals Exploration Administration.

Your immediate attention to this matter is requested.

Very truly yours,

Robert A. Laurence

Dear Mr. Lawrence:

Reference is made to our letter of June 27, 1955, relative to six uncertified projects which have been completed or terminated but no closing letters have been written because of the unsettled situation with regard to royalties.

We have received reports on three of these projects. We have not had reports on the following projects:

Docket No.	Contract No.	Value of termination
DMEA-3339	Idm-2714	$70.00
DMEA-3391	Idm-2704	$40.00
DMEA-3402	Idm-2702	Unknown

If you will clear up this matter it will be appreciated as we wish to close out the contracts as soon as possible.

Sincerely yours,

George C. Selfridge

Mr. Joe C. Vance

Plumtree, North Carolina

Re: DMEA-3391, Idm-8704 (mica)
Joe Mine, Avery County, N.C.

Dear Mr. Vance:

Under item (b) of Annex II of the subject contract you are obligated to pay the Government a royalty on all minerals mined or produced from the land "regardless of any certification of discovery or development from the date of the contract until the lapse of time within which the Government may make such certification or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first". According to your progress report which accompanied your voucher, you produced 300 to 400 pounds of block mica by bulldozing.

In order to close our records on this contract, it would be appreciated if you would send this office a check for the Government's royalty on this and any other production. In the case of mica it wold be 5 percent. The check should be made payable to the Defense Minerals Exploration Administration, and should be accompanied by certified copies of the sale slips.

Very truly yours,

Robert A. Laurence

Mr. Robert A. Laurence
Executive Officer, DMEA
Field Team, Region V
Room 13, Post Office Bldg.
Knoxville 2, Tennessee

Dear Mr. Laurence:

Reference is made to a number of uncertified projects which have been completed or terminated, but no closing letters have been written because of the unsettled situation with regard to royalties.

Under the following contracts, having royalty provisions regardless of certification, the Field Team reported production, either of known or unknown values:

Docket No.	Contract No.	Value of production during project
DMEA-2909	Idm-E524	Unknown
DMEA-3248	Idm-E705	Unknown
DMEA-3329	Idm-E714	$70.00
DMEA-3356	Idm-E711	Unknown
DMEA-3391	Idm-E704	$40.00
DMEA-3402	Idm-E702	Unknown

In order to close out these contracts it will be appreciated if you will take whatever action you deem appropriate for collection of these royalties. It is suggested in the case of unknown values of production during the project that an estimate be made agreeable to the Government and the Operators.

Sincerely yours,

George C. Selfridge

(Joe Mine)
Avery Co., N. C.
$400 - Mica

Memorandum

To: L. G. Rouk, Defense Minerals Exploration Administration

From: E. L. Newcomb, U. S. Geological Survey

Subject: Review of Final Field Team report

The Field Team has recommended a certificate of discovery not be issued.

The contract was terminated at the conclusion of Stage I, which consisted of 40 hours of bulldozing to better expose a favorable pegmatite.

Results of dozing indicated a second stage of shaft sinking and drifting was not warranted.

Although 400 pounds of mine-run mica was recovered, most of this mica was non-strategic and of very poor quality.

No reserves were indicated by the completed work.

I recommend concurrence with the Field Team's recommendation against the issuance of a certificate of discovery.

Project Summary Report

By: Walter C. Anderson June 6, 1955

1. Docket No. DMEA-3391 - Mica
Contract No. Idm-E704
Joe Mine
Avery County, North Carolina

Operator: Joe C. Vance
Plumtree, North Carolina

Application: Form MF-103 (April 1952) received June 14, 1954
Work proposed: Bulldoze drainage ditch and shaft site, sink 25 feet of shaft and drive 50 feet of drift.
Amount requested - $4,500.00

Operator's property rights:
Lease for 3 years, dated March 8, 1954.
Owner's Consent to Lien dated September 15, 1954.

2. Contract - Form MF-200A (February, 1952) dated September 9, 1954
Work authorized:

Preparing site for incline	$ 400.00
Construction-Toolhouse, powder and exploder magazine	113.00
40 feet of incline @ $40.00/ft	1,600.00
50 feet of drift and/or crosscut @ $30.00/ft	1,500.00
Total agreed unit costs	$ 3,613.00
Government participation @ 75%	$ 2,709.75

Amendments - None

Work completed:

Bulldozed site for incline	$ 400.00
Total accepted cost	$ 400.00
Government participation @ 75%	$ 300.00

Work began on September 27, 1954 and completed on October 1, 1954.
The contract was terminated by mutual agreement on November 29, 1954.
Field Team Final Report received December 10, 1954.
Operator's progress report covers all money expended and is therefore accepted as final report.
Value of mica production during project estimated at $40.00, but not yet marketed.
No equipment purchased under contract.

3. Audit - Report of Review issued January 6, 1954.

Accepted cost	$ 400.00
Government participation	$ 300.00

4. Certification of discovery - None issued.

5. Comments:

How conducted - All of the work in which the Government participated was acceptable. Through cooperation between Government and Operator enough work was done to determine worth of the deposit.

Operation - Good

Engineering - Only one report made by Operator, which is acceptable as final report.

Geological premise - Bulldozer work exposed a pegmatite much smaller than anticipated and containing mica which yielded very little of a strategic quality. This was sufficient evidence to disprove the premise of a continuance of surface indications and therefore the contract was terminated.

Geological Criteria upon which work was based:

1. Unzoned, unweathered, conformable pegmatite 4 to 5 feet thick.
2. Mica occurrence on both foot and hanging walk.
3. Mica, hard and free splitting. Books weighing up to 100 pounds, yielding trimmed sheet 4 to 6 inches.

Criteria developed during project:

1. Conformable pegmatite - 2 to 5 feet thick.
2. Mica recovered yielded very little of strategic quality.

Future possibilities - very remote for development of a paying mica producer.

Recommendations: The Nonmetallic Minerals Division concurs in Field Team's recommendation that no further work is warranted and that a certification of discovery should not be issued. The Commodity Specialists of the Bureau of Mines and Geological Survey agree.

From: Field Team, DMEA - Region VII - Knoxville, Tennessee

Subject: Final Field Team Report - DMEA-3391, Idm-E 704 (mica)
Joe C. Vance, Plumtree, N. C. Joe Mine

Enclosed are four copies of the subject final report. As the work lasted only a few days, the Operator's one monthly report and narrative received on October 12, is acceptable as a final engineering and geologic report.

Termination agreement forms were sent to the Operator for signature on November 29, 1954, but we have not yet received them from him.

We agree that the project should not be certified.

FINAL REPORT

DMEA-3391, JOE MINE (mica)

Operator: Joe C. Vance, Plumtree, North Carolina

The Joe Mine is on the south side of Roseqback Ridge, 3.8 airline miles N. 43° W. of Plumtree, Avery County, North Carolina.

Work completed under the contract consisted of stripping a pegmatite and cutting a diversion and drainage ditch with a bulldozer. As the mica recovered by this work yielded only a small proportion which was of strategic quality, the contract was terminated by mutual agreement effective October 21, 1954. No additional exploratory work is warranted.

Work on this contract began September 27, 1954 and was completed October 1, 1954. About 40 hours of bulldozer work in addition to spot drilling and blasting were required to strip the pegmatite and cut a drainage and diversion ditch.

A conformable pegmatite 2-5 feet thick was exposed by the dozing. It strikes about N. 70° E. and dips 45° to the southeast. The body consists of perthite, quartz, plagioclase, muscovite, biotite, and garnet. Muscovite tends to be concentrated along both contacts and perthite and quartz in the central portion of the pegmatite. The prevailing country rock is hornblende gneiss but adjacent to the pegmatite it has been altered to biotite gneiss which is in part vermiculitic.

About 400 pounds of "mine-run" mica was recovered from the dozing. Most was very heavily mineral-stained and when processed yielded only about 1½ pounds of strategic mica worth about 20-25 dollars, and approximately $15-20 worth of scrap and punch.

No significant reserves of strategic mica were discovered by the work performed.

Expenditures:	(a)	Total approved	$3,613.00
	(b)	Total cost of project	400.00
	(c)	Government's share of cost	300.00
	(d)	Government's share unexpended	2,409.75
	(e)	Value of production during opr. Esti.	40.00

The work done on this project was conducted in an efficient and satisfactory manner. No equipment was purchased under the contract.

December 7, 1954.

INTERIM REPORT

DMRA-3891 Idg-3704 (mica) JOE MINE

OPERATOR: Joe S. Vance, Plumtree, North Carolina

LOCATION: On the south side of Bannebeck Ridge, 3.8 miles N 48° W of Plumtree, Avery County, N. C.

After examination of processed mica recovered during preparation of the incline site by bulldozer, the Field Examiners share the opinion that no additional work is warranted at this prospect. The mica is very badly stained and much of it is "tied" or "leaky". The operator was notified and was agreeable with the decision.

Work completed consisted of that outlined under Item 1 of Exhibit "A" of the contract which constituted the unit.

INTERIM REPORT

DMMA-3391 Idm-2704 (mica) JOE MINE

OPERATOR: Joe G. Vance, Plumtree, N. C.

LOCATION: On the south side of Bazerback Ridge, 3.8 miles N 45° W of Plumtree, Avery County, N. C.

Starting date on this contract is September 27, 1954. Bulldozing for incline site preparation has been completed and incline sinking will begin after a report is made by the operator on quality as derived from sale of mica recovered during bulldozing. Incline preparation consisted of deepening the existing cut, as shown on sketch map accompanying the examination report, about 20 feet. The work followed roughly the outline of the cut and width and slope are favorable, for future work. Pegmatite was exposed in the southeast side of the cut and varies in thickness from 14" to 24". The body is composed of kaolinized feldspar containing scattered quartz, biotite and muscovite mica, most of which was badly stained. About 300 pounds of mica was recovered in variable sizes. The operator was asked to process this mica and furnish the examiners with a report of the sale, before starting any incline work. After examining this report a decision on any additional exploration will be made.

Mr. W. A. Bank, member of the Field Team, Region VII, accompanied the examiners on this visit to the mine.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Progress Report

Sept.- 25-27-28-29-30-- We had the Bulldozer for five days Bulldozed surface, shot up some slate and bulldozed it off down to pegmatite, and bulldozed drainage ditch. Mine is now ready to start incline. In the pricess of bulldozing we obtained around 3 or 4 hundred pounds of mica in the block but we have not processed the mica for market yet so I cannot make any report as to the quality of it.

NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

REMARKS: Bulldozed Site for Incline and stripped pegmatite.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Subject: Docket No. DMEA-3391 - Mica
Joe C. Vance
Joe Mine
Avery County, North Carolina

Dear Mr. Laurence:

Reference is made to the field examination report, dated July 21, 1954, on the subject mine, which is the basis for the contract transmitted to your office today.

It has been called to our attention that specifications are required for item 1, namely, preparing site for incline. Accordingly, it is suggested that in future reports where such work is proposed, the approximate yardage or dimensions of cut required for shaft site and the size and approximate length of diversion or drainage ditches be given.

This will also apply to trenching for other purposes, as well as building construction such as toolhouses, powder and exploder magazines, or any other item in a short form contract where the completed work constitutes the unit.

Sincerely yours,

George C. Selfridge

Dear Mr. Laurence:

Please find herewith the original and five copies of a contract covering the subject exploration project which have been signed by the Government with register number and effective date as shown. It is subject to the attachment of Owner's Consent to Lien on the form revised July 1, 1954. A copy of a memorandum from the Legal Division, dated August 25, 1954, is enclosed.

If the contract meets with your approval present it to the Operator for approval and signature. Please explain to the Operator that the contract, when executed, is a firm commitment under the terms of which it is obligated to complete the work outlined at the agreed unit cost. If any part of this contract does not have either your approval or that of the Operator and cannot be amended within your delegated authority, then the original and all copies of the contract are to be returned to this office, together with the proposed changes for consideration.

After execution of the contract, the copies are to be distributed in the usual manner. Copies of memoranda from the Geological Survey, dated August 3, 1954, and from the Bureau of Mines, dated July 30, 1954, are enclosed.

Sincerely yours,

George C. Selfridge

REVIEW OF FIELD TEAM REPORT ON APPLICATION DMEA-3391 (mica)

To: Lawrence G. Houk, Defense Minerals Exploration Administration
From: R. D. Trace, U. S. Geological Survey
Applicant: Joe C. Vance, Plumtree, North Carolina
Name of property: Joe Mine
Location of property: Avery County, North Carolina
Date of Field Team Report: July 21, 1954
Authorship of Field Team Report: Teague, Amos, and Shirley
Field Team recommendation:

1) Strip pegmatite for incline site.
2) Cut drainage and diversion ditches.
3) Sink incline 40 ft. on pegmatite.
4) 50 feet of drift at bottom of incline.

(Field Team suggests that work be done in 2 stages, but does not specify what the stages are. I presume Stage 1 includes stripping, ditching, and sinking, and Stage 2 is drifting. Does the Field Team imply that Stage 2 be contingent upon the results of Stage 1?)

Comments: An unweathered pegmatite, 4-5 feet wide, trending NE and dipping 45° SE, occurs in hornblende gneiss. Mica is present on both hanging and foot walls of the peg. The grade and quantity of mica that the applicant has recently taken from the property suggest that further exploration is warranted.

ACTION RECOMMENDED: Follow Field Team's recommendation.

Subject: DMEA-3391 (mica)

Applicant: Joe C. Vance

Name and Location of Property: Joe Mine
Avery County, North Carolina

Date of Field Team Report: July 21, 1954

Date Rec'd. by Ceramic & Fert. Mtls. Br.: July 29, 1954

Field Team Recommendation:

1. Approval of contract for exploration assistance by sinking a 40-foot inclined shaft and drifting 50 feet along the vein.

2. Estimated cost - $3,688.

Comments:

1. In 4 hours, with a bulldozer and two laborers, the applicant recovered $400 worth of mica.

2. The examiners report that mica occurs along both the hanging and foot walls, and that the available evidence indicates that the deposit may contain sufficient mica of strategic grade to warrant exploration.

Recommendation:

I concur in the field team's recommendation for exploration assistance, and suggest that the contract be written on a unit-cost basis for the shaft sinking and drifting.

Signed

W. F. Dietrich

FIELD EXAMINATION REPORT
ON
DMEA-3391, JOE MINE
(mica)

Applicant: Joe C. Vance, Plumtree, North Carolina

Work conducted to date has been little more than prospecting. By the use of a bulldozer for 4 hours and two laborers for two days, about $400 worth of mica was recently obtained from the deposit. Evidence available for inspection suggests that the deposit may contain sufficient mica of stratogic grade to warrant exploration. Exploration assistance is recommended - to be conducted in two stages.

The deposit was examined on July 1, 1954. Mr. Joe Vance accompanied the examiners on the inspection which required three hours.

The Hoe Mine is on the south side of Razorback Ridge, 3.8 airline miles N. 43° W. of Plumtree, Avery County, North Carolina. Access is by three miles of good jeep or truck road that extends up Powdermill Creek to the mine. Access is possible by jeep at all times.

Mr. Vance has had considerable mica mining experience and is capable to conduct the proposed project.

The applicant leases the property. Area covered by the lease is adequate for the proposed project.

Some prospecting has been done recently by the applicant at the deposit. Openings consist of a circular cut about 50 feet in maximum diameter, and 15 feet deep. A shallow 100-foot entrance cut extends to the circular cut from the southeast. A caved adit extends under the entrance cut and is 10-15 feet below it. There are no surface buildings or facilities at the deposit.

These openings expose an east-west trending pegmatite which dips about 45° south. It is conformable to the thinly-layered hornblende gneiss country rock. Adjacent to the pegmatite, the hornblende gneiss has been altered to biotite gneiss. Later weathering has converted part of the biotite to vermiculite. The pegmatite is 4-5 feet thick. No apparent zoning is present, although irregular lenses of quartz and perthite occasionally occupy the central portion of the pegmatite. In addition to the quartz and perthite, the pegmatite contains soda feldspar, muscovite, biotite, and red garnet.

The pegmatite is unweathered, but the wall rock adjacent to the foot-wall contact is partly weathered.

Mica occurs along both the hanging and foot wall sides of the pegmatite.

That along the hanging wall is somewhat mineral-stained (50%); however, the footwall zone is free of stain. The mica is hard and splits well. Some is ruled, cracked and curved. Books which weighed up to 100 pounds and would trim 4" x 6" are reported to have been recovered during the applicant's recent work.

History of work from the caved adit is not known. Recent work conducted by the applicant consisted of stripping with a bulldozer for one-half day and a crew of two laborers using picks and shovels, resulted in the production of about $400 worth of mica.

All necessary labor, mining equipment and supplies are available locally.

The examiners are essentially in agreement with the applicant in his proposed exploration. We believe that the proper approach for exploration is to strip the weathered surface from the pegmatite, cut a drainage ditch to the open cut, and construct a diversion drainage ditch around the cut to prevent the small stream which is present from flowing into the cut. Almost all this work can be accomplished by using a bulldozer. After the bulldozing is completed, a 40-foot incline should be sunk on the pegmatite and 50 feet of drift driven from the incline.

Estimated Costs:

<u>Incline site preparation</u> (to consist of stripping the pegmatite and cutting a diversion and drainage ditch).

Bulldozer - 30 hrs. @ $10/hr.	$300.00	
2 - Laborers (3shifts) @ $1/hr.	48.00	
Small tools	17.00	
Compressor and accessories rental (2 days) @ $240/Mo.	24.00	
Supplies, Miscellaneous	11.00	$ 400.00

<u>40 foot incline (20 shifts)</u>

Labor:

1 - Miners @ $1.50/hr.	240.00	
1 - Hoistman @ $1.25/hr.	200.00	
2 - Laborers @ $1.00/hr.	320.00	
Hoist- rental @ $50/Mo.	50.00	
Compressor, drill, hose, pump (rental) @ $240/Mo.	240.00	
Explosives	130.00	
Drill steel	70.00	
Timber, 2M @ $65/M	130.00	
Supplies	125.00	
Miscellaneous	95.00	$ 1,600.00

Thus 40' @ $40/ft.

50 feet of drift from incline (20 shifts)

Labor:

1 - Miner @ $1.50/hr.	$240.00	
1 - Hoistman @ $1.25/hr	200.00	
2 - Laborers @ $1.00/hr.	320.00	
Hoist rental @ $150/Mo.	50.00	
Compressor and accessories @ $240/Mo.	240.00	
Explosives	130.00	
Drill steel	70.00	
Supplies	125.00	
Miscellaneous	125.00	$1500.00

Thus 50' @ $30.00/ft.

Tool house	150.00
Powder Magazine	25.00
Exploder Magazine	13.00
Estimated Total Cost.....	$3,688.00

July 1, 1954.

Dear Mr. Vance:

Your application for assistance in exploring the subject property has been reviewed by the Nonmetallic Minerals Division of the Defense Minerals Exploration Administration and has been referred to Mr. Robert A. Laurence, Executive Officer, DMEA Field Team, Region VII, Room 13, Post Office Building, Knoxville 2, Tennessee, for further consideration and possibly a field examination.

Please advise this office in writing if you desire to have your application processed under the new Government participation rate which is 75 percent of the approved cost.

The Regional Office will contact you at an early date if an examination is to be made. Any assistance that you may give the members of the field team during the examination will be appreciated.

Sincerely yours,

C. O. Mittendorf

Administrator

REVIEW OF APPLICATION DMEA-3391 (MICA)

To: L. G. Hook, Defense Minerals Exploration Administration
From: D. A. Brobst, U. S. Geological Survey
Applicant's name and address: Joe Vance, Flintree, North Carolina.
Name of property: Joe Mine.
Location of property: 40 minute drive north of Flintree, North Carolina.
Summary of applicant's proposal:

1. Bulldoze a cut 100' x 20' x 30' for drainage and muck removal.

2. Strip the pegmatite for 50' with dozer.

3. Drift with the pegmatite for 50'.

4. If warranted, sink a shaft 25 feet deep.

Cost: $4,500

Sources of information on applicant's property: None.
Comments: This plan may not be the best approach to the exploration of the pegmatite. Because we have not data on the property, it had better be checked.
RECOMMENDATION: Have the field team examine the property.
