August 2, 1951

Ref: Ticket DMA-1457

Mr. Charles Palmer
Box 1461
Yuma, Arizona

Dear Mr. Palmer:

The Lead-Zinc Branch of the Defense Minerals Administration has reviewed the General Technical Data sheet (Form DF-100) which you submitted.

Although you do not so state, we assume that you may be requesting Federal aid in the form of a direct mining loan in order to bring your property into production. To qualify for a loan of this type the applicant must show that the property for which the monies are to be used contains a sufficient proven reserve of strategic minerals to amortize the loan. Because the information submitted by you does not indicate that your property contains any proven reserves of ore, we regret that we are not able to justify an expenditure of public funds to develop your property.

At the present time, however, there is a Government program designed for encouraging exploration of strategic minerals. The regulations governing this program call for participation on the part of the applicant. In the case of lead or zinc deposits it is necessary for the applicant to match the Government funds on an equal basis. Funds advanced by the Government are considered a loan, to be repaid if the exploration is profitable, but to be cancelled if unsuccessful. The Government's share of the cost of the project is repaid to the operator at the end of each full calendar month for the work performed and the cost incurred during the preceding month. Further information regarding details of the program is enclosed.

Check & replied on made

No decision as to whether or not you are eligible for participation in this exploration program can be made until you submit further information. If you are interested in participating, please fill out and return four copies of the enclosed Form NF-103. All of the information requested should be given in as great detail as possible, especially for those items pertaining to the work you wish to do and the estimated costs of the project. A map showing the present workings as well as the work you wish to undertake also should be submitted.

Very truly yours,

TKB

T. K. Billings, Chief
Lead-Zinc Branch
