OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed all Finance Office copies of settlement statements with the Executive Officer, OME Field Team, Region II, Reno, Nevada, pertaining to Contract No. Idm-E379, Docket No. DMEA-2455 (Mercury) dated July 31, 1952, including Amendment Nos. 1 to 8, inclusive, with:

Aubrey Minney
119 Cayuga Street
Salinas, California

for the purpose of determining the amount of royalties due the U. S. Government on sales of mercury from property known as the McAdoo Mine, located in Humboldt County, Nevada, during the period August 1, 1955 to April 14, 1959.

A certification of discovery or development was issued February 4, 1955, and in accordance with Annex I of Amendment No. 8 of the Contract, royalty is payable on all production from the land described in Article 2 of the contract for a maximum period of 11 years from the date of the contract. A Report of Review in lieu of final audit dated November 19, 1954, indicated accepted costs under the exploration contract amounting to $15,804.02 with the Government's contribution, on a 75 percent basis, being $11,853.02. The scope of review and reasons therefor are stated in the attachment to this report.

My review established the total sales of mercury for this period to be $275.33. Royalty due the U. S. Government at the contract rate of 5 percent is $13.77. A prior review made by this auditor for the period July 31, 1952 to July 31, 1955, found the sales as of the last date to be $3,116.77, which added to the sales for this period make a total of $3,392.10 as of April 14, 1959. The royalty account as of July 31, 1955, was

Total Royalties Due	$155.84
Total Royalties Paid	155.84
Balance Royalties Due	$ - 0 -

As of April 14, 1959, the royalty account of this project was found to be

Total Royalties Due	$169.61
Total Royalties Paid	169.61
Balance Royalties Due	$ - 0 -

April 17, 1959

George Mavor
George Mavor, OME Auditor

DESCRIPTION OF THE REVIEW
AND STATEMENT OF JUSTIFICATION

Idm-E379 | Aubrey Minney | Docket No. DMEA-2455

My review included a tabulation and recompution of all mercury sales as shown in settlement statements, and a conference with the engineer who had made periodical inspections of the project.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(a) The production involved was incidental to exploration operations.

(b) The mine was idle when last visited by the Examining Engineer on November 6, 1958.

(c) The Examining Engineer is of the opinion that all sales of mercury produced during the period July 31, 1952 to March 31, 1959 for which settlement sheets have been released, have been properly accounted for.

(d) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to possible additional royalty which might be disclosed.

Check Sheet of Examining Engineer

Operator's Name Aubrey Minney

Address 511 Archer Street

Salinas, California

Exploration Contract No. Idm-E 379 Docket No. DMEA-2455

	Check One Yes	No
1. (a) Does the Operator stockpile ore subject to royalty repayment?		X
(b) If so, is segregation and identification procedure adequate?		
2. (a) Does Operator commingle production subject to DMEA royalties with exempt production?		X
(b) If so, do you consider the allocation of the commingled production equitable?		
3. (a) Does the Operator stockpile mine or mill rejects (low grade ore, tailing, middlings, etc.) that may have potential value within the royalty payment period?		X
(b) If so, are adequate records maintained on such material to protect the Government's interest?		
4. Do you consider the assay controls in effect are adequate?	X	
5. Do you consider that the manner of disposing of production gives the Government its fair royalty returns?	X	
6. Do your periodic examinations of operations indicate the Operator is properly reporting his production of ores subject to DMEA royalties?	X	
7. Does the Operator buy from or sell to other Operators?		X

8. Comment on any item 2 (b) to 6 if answer is No.

On November 6, 1958, the mine was idle.
