Attention: A. E. Weissenborn, Executive Officer, ~~Field Team, Region 1.~~

Gentlemen:

The following photo copies of documents pertinent to the two checks mentioned in your letter of January 13, 1958 are enclosed for your file:

1. Invoice No. C-694, W. T. Barham, (Mica) shows deduction of $27.16 for which you have Check No. 12,225,911.

2. Acceptance No. 964, Mystery Mines, c/o Mrs. Jennie Moore, (Manganese) and our Administrative Difference Statement explain deduction of $118.38 covered by Check No. 12,229,472 which you are holding.

As stated in our letter of January 14, 1958, we will send you a copy of the acceptance and suspension statement with each royalty check. This was done with Mystery Mines and we do not understand why the papers were not received with the check. We neglected, inadvertently, to send a copy of Barham's invoice with the check. There is no suspension statement with this transaction since the deduction was taken on the invoice by the producer.

A copy of Mr. Bradeen's letter of March 5, 1956 is also enclosed as requested.

Sincerely yours

M. C. JOHNSON

TO: DOMESTIC MANGANESE CERTIFICATE HOLDERS March 5, 1956
BUTTE PHILIPSBURG MANGANESE PROGRAM

To expedite final and conclusive payment for manganese oxide ores without having to test each lot, the following procedure will become effective at the Butte Manganese Purchase Depot on March 15, 1956.

1. Beneficiation tests will be performed on initial shipments of 5 to 50 Long Dry Tons. The producer shall not make further shipments until advised by the Government that his ore is acceptable under the Program. A partial payment will be made in accordance with the firm price schedule of the Regulation. The supplemental, and final, payment will be made in conformance with Section 8(b) of the Regulations, unless the ore does not meet the minimum specifications set forth in Section 9. Ores not meeting minimum specifications may be rejected.

2. Beneficiation tests will be made on each of five (5) succeeding lots. Partial and supplemental payments will be made for each lot in conformance with Section 8 of the Regulation.

   A weighted average recovery and a weighted average price per L.D.T. unit of manganese will be computed from the test data on the six (6) lots. These averages will be used in calculating settlements on future shipments until new averages have been calculated for succeeding 1,000 L.D.T. of ore purchased.

3. Samples taken from each shipment comprising the 1,000 ton lot will be made into a weighted composite sample for beneficiation testing. The results of this test will then be composited with the previously established weighted averages to obtain averages for use in settlement for the succeeding lot. Weighted averages will be established as outlined above for each additional 1,000 ton lot.

4. Settlement with a producer on the basis of weighted averages will be discontinued whenever the Government determines his ore is not of the type on which the averages were established.

5. The name of the mine from which the ore was produced must be shown on Notice of Shipment and on all shipping documents.

6. Beneficiation tests, other than the initial test, will not be made on any lot aggregating less than 50 L.D.T.

7. Payment for lots aggregating less than 200 L.D.T. in any thirty (30) day period will be made in accordance with the firm price schedule of the Regulation, unless the producer notifies the Government in writing that he desires settlement in accordance with Section 8(b) of the Regulation.

8. Weighted averages will be computed from current data for producers who have delivered 5 or more lots of acceptable ore.

Very truly yours,

O. C. BRADKEN

Dear Sir:-

I am herewith enclosing my report of ores shipped from June 1 to October 17- 1957 from the Mystery Manganese mine in Granite County, Montana, together with my check for the sum of $2,801.81 , being the 5% royalty on the total sum of $56,036.19.

I would appreciate being allowed to make this royalty payment directly as any withholding made by some disinterested clerk along the route of procedure does not give me either record or receipt of such transaction and such withholding is not complete until the transportation charges are deducted. It is my understanding that transportation or shipping costs are deductable on all net ore returns.

As I am the sole owner I am responsible to the government for this royalty I am very [illegible] see that this is properly paid to the government [illegible] get the proper receipts for such payments. I have [illegible] making such payments annually but I can make them quarterly or monthly if you wish. I am very particular of the records of the shipments and the amounts received for same and my books are open for inspection at any and all times.

The work on the contract exploration has been slow in starting due to the difficulty in getting good miners on the job, but I believe that difficulty has been overcome and good progress will be made. There has been enough work done in the drifting to date to make a report for the month of October worth while but a report for November will show good progress.

Trusting the enclosed report and check will meet with your approval , I am

Very truly,

Philipsburg, Montana. Nov. 2- 1957
