OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REVISED REPORT OF REVIEW

I have reviewed the Monthly Reports of:

Comb[illegible]etals Reduction Company
P. O. Box 150
Salt Lake City, Utah

a party to the Southpaw Joint Venture, pertaining to Exploration Project Contract Idm-E1161, DMEA No. 4813, including Amendments Nos. 1, 2, 3, 4, and 5, for May 1958 to May 1959, inclusive, covering a manganese project on the Southpaw Claims, Lincoln County, Nevada.

My review included an examination of the Monthly Reports (Forms MF-104) and supporting documents, comparison of the claimed costs with the contract and pertinent schedules, confirmation of work performed by reference to Field Team reports and correspondence, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the reason that:

> All of the acceptable costs were under a contract provision for contribution by the Government on the basis of fixed unit costs of work performed.

The findings of this review are stated in the following summary:

Total cost billed by Operator		$7,870.00
Exemptions:		
Prior to this review	$ -0-	
Herewith	-0-	-0-
Total acceptable cost		$7,870.00

The contract calls for a 75 percent contribution of the allowable costs by the Government. Therefore, if the project is otherwise accepted as having met the terms of the contract, payments as follows are valid and proper:

Payable on audited claim	$5,902.50
Paid to date	5,547.50
Balance due Operator	$ 355.00

EXPLORATION PROJECT CONTRACT
SOUTH PAW JOINT VENTURE
DOCKET NO. DMEA-4813

AMENDMENT NO. 5 AND TERMINATION AGREEMENT

WHEREAS, the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter called the "Government," and Southpaw Joint Venture, hereinafter referred to as the "Operator," entered into a certain Exploration Project Contract No. Idm-E1161, (Docket No. DMEA-4813), dated December 27, 1957, as amended, hereinafter referred to as the "Contract," and

WHEREAS, the parties executed Amendment No. 3 to the said contract, dated November 14, 1958, but by mutual mistake did not provide therein for the payment of the costs for percussion drilling; and

WHEREAS, the Operator has satisfactorily completed certain exploratory drilling by percussion drill;

NOW THEREFORE, it is agreed that:

(1) The third paragraph of Exhibit "A," as revised by Amendment No. 3, dated November 14, 1958, is further amended to include percussion drilling under the same terms and conditions as provided in Amendment No. 3.

(2) The Termination Agreement dated August 28, 1959, is hereby revoked.

(3) The Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated effective July 1, 1959.

(4) The Government will contribute only to the fixed unit costs of work performed prior to said effective date.

(5) The Operator shall promptly perform all winding up and settlement actions provided for in the Contract, including the rendering of the final report and final account.

(6) All rights of the Government concerning certification of discovery or development, percentage royalty and liens to secure the payment thereof, reports (including preservation of Operator's records), accounts, audits, and the right to recover any overpayment, are hereby preserved.

It is agreed this 28th day of August, 1959, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government", and Southpaw Joint Venture, hereinafter referred to as the "Operator", that Exploration Project Contract No. Idm-E1161 (Docket No. DMEA-4813), dated December 27, 1957, as amended, hereinafter referred to as the "Contract", that:

1. Effective July 1, 1959, the Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

2. The Government shall contribute only to the fixed unit costs of work performed prior to said effective date.

3. The Operator shall promptly perform all winding-up and settlement actions provided for in the Contract, including the rendering of the final report and final account.

4. The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of said Contract, except as otherwise provided for in this termination agreement.

5. All rights of the Government provided for in this Contract with respect to audits, maintenance of records, certification of discovery or development, percentage royalty and liens for its payment, and recovery of any overpayment, are preserved.

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA-4813

TERMINATION AGREEMENT

Justification

The Operator, by letter of May 23, 1959, requested an amendment to the contract changing the balance of exploration from drilling to underground drifting. The Field Team, in its memorandum of June 10, 1959, agreed with the recommendation of its examiner, H. K. Stager, and recommended that the Operator's request for a change from drilling to underground work be denied, and that the contract be terminated.

This Division, considering the unsatisfactory results of exploratory drilling around three sides of the project area, and the likelihood that no discovery of a significant reserve of manganese ore can be expected from completion of drilling authorized under the contract, or by the drifting proposed by the Operator to explore the remaining fourth side of the area, concurs with the recommendation of the Field Team, and has prepared a Mutual Termination Agreement to the contract.

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA-4813

AMENDMENT NO. 4

It is agreed this 6th day of January, 1959, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government," and Southpaw Joint Venture, hereinafter referred to as the "Operator," that Exploration Project Contract No. Idm-E1161 (Docket No. DMEA-4813), dated December 27, 1957, as amended, hereinafter referred to as the "Contract," is further amended effective November 27, 1958, as follows:

1. (a) Work under the Contract shall be suspended during the period beginning November 27, 1958, and ending not later than April 27, 1959.

(b) The Government will not contribute to any costs incurred by the Operator during the period of suspension or to any costs of rehabilitation or repair which in its opinion would not have occurred if there had been no suspension of work.

(c) The Operator at its own cost and expense, without contribution by the Government, during the period of suspension shall preserve and protect the project work.

2. The date fixed in Amendment No. 2 for completion of the work is extended from November 27, 1958, to September 27, 1959.

3. The maximum period for royalty payments and the lien to secure the payment thereof, provided for in the Contract, is further extended from eleven (11) years to twelve (12) years from the date of Contract.

4. It is the essence of this Contract that the work be resumed before the termination of the period here fixed for suspension and be completed before the termination of the period here fixed for completion; and if not so resumed and completed in the manner required by the Contract, the following provisions shall thereupon become effective:

(a) The Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated as follows:

(i) effective November 27, 1958, if the work has not been resumed on or before April 27, 1959.

(ii) effective September 27, 1959, if the work is resumed on or before April 27, 1959, but is not completed on or before September 27, 1959.

(b) The Government shall contribute only to the fixed unit costs of work performed prior to the relevant effective date set forth in 4(a) above.

(c) The Operator shall promptly perform all winding up and settlement actions provided for in the Contract including the rendering of the final report and final account.

(d) The Operator, as principal if the Operator is the producer, or as surety if the Operator is not the producer, shall pay to the Government the royalty on production provided for in the Contract, in the same manner and amount, for the full period of time provided for in the Contract (as amended herein), as if certification of discovery or development had been made, such certification being hereby waived by the Operator. In addition, all rights of the Government provided for in the Contract with respect to certification of discovery or development, percentage royalty and liens to secure payment thereof, reports (including preservation of Operator's records), accounts, audits, and the right to recover any overpayment, are hereby preserved.

(e) The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of the Contract, except as otherwise provided in this Amendment No. 4.

This Amendment shall not be construed to increase the estimated total cost of the project, the aggregate amount which the Government may be required to contribute, nor the fixed unit cost of any item of work.

JUSTIFICATION — For Amendment No. 4

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA 4813
Amend No. 4

The Operator by letter of November 14, 1958, requested a recess in contract work for a period beginning November 27, 1958, and ending April 27, 1959, and also requested that the completion period for contract work be extended to September 30, 1959. The request was based on the difficulty of keeping roads open during the season of deep snow.

The Field Team memorandum of November 17, 1958, transmitted the Operator's request, noted that the mine had been a good producer (17,334 tons, averaging 32 to 40 % Mn, value $630, 312 at railroad shipping point prior to the date of the contract) estimated that the remainder of the exploration work authorized by the contract has a good possibility of again putting the mine on a productive basis and recommended that the Operator's request be granted.

Evidence in the docket confirms the conclusions of the Operator regarding operating conditions in winter, and supports the Field Team's belief in the geologic possibilities of the remaining exploration work.

Amendment No. 4 has, therefore, been prepared to grant a recess or suspension in project work from November 27, 1958, to April 27, 1959, to extend the completion date to September 27, 1959, and to extend the royalty repayment period from 11 years to 12 years.

A "pseudo-certification" has been included, to become effective if work is not resumed before the end of the recess, or if resumed but not completed before the completion date as extended.

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA-4813

AMENDMENT NO. 3

It is agreed this 14th day of November, 1958, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government", and Southpaw Joint Venture, hereinafter referred to as the "Operator", that Exploration Project Contract No. Idm-E1161 (Docket No. DMEA-4813), dated December 27, 1957, as amended, is further amended effective September 30, 1958, as follows:

1. In Annex I, the area described as "EXCEPTED LAND" (shown on Figure 2 as "Excluded Land") and excepted from the land and royalty provisions of the contract, is hereby added to the land referred to in Article 2 of the Contract and made subject to the land and royalty provisions of the Contract.

2. The third paragraph of Exhibit A is revised to read:

> "Drill 12 holes, with churn, rotary, or diamond drill, an average depth of 150 feet each, not exceeding an aggregate of 1,800 feet. Churn drill holes shall be started at not less than 8-inch diameters and shall be finished at not less than 4-inch diameters. Diamond drill holes shall be not less than AX size. Holes shall be reamed and cased or cemented and redrilled as necessary.

3. In Exhibit A, page 2, footnote 2, third line, the words "inside or" are deleted; and in Figures 2 and 3 the words "Excluded Area" and the boundary lines designating that area are deleted.

This amendment shall not be construed to increase the estimated total cost of the project, the

which is the subject of a proposed exploration project contract, hereinafter called the "contract," with the United States of America, hereinafter called the "Government;" in consideration of the contract and as an inducement to the Government to enter into it, the undersigned hereby--

1. Undertakes and agrees that property in which the Government may acquire an interest or equity under the contract may be dismantled, severed from the land, and removed, as may be provided in the contract; and the Government's interest and equity in such property shall be prior and superior to any adverse right or claim of the undersigned;

2. Grants to the Government a lien upon all of the undersigned's right, title, and interest in the land and upon any production of minerals therefrom, to secure the payment to the Government of a percentage royalty on production as may be provided for by the Contract;

3. Subordinates the undersigned's right, title, claim, or interest in or against the land and in any production therefrom to the rights of the Government under the contract with respect to royalty on production and liens to secure same;

4. Represents and undertakes that there is no claim, lien, or encumbrance upon the undersigned's right, title, claim, or interest in or against the land other than the following: (If "none" insert the word "none." Do not leave lines blank.)

None

1/ Mining or production from the land is not required, and in the absence of production there is no obligation to pay royalty to the Government.

2/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated _____, and recorded in Book _____, Page _____, official records of said county." If (b) is used, the book and page of recordation cannot be dispensed with. If the space provided is insufficient, use an Annex, and refer to the Annex in the space.

5. Undertakes and agrees (a) neither to commit any act nor assert any claim in conflict with the provisions of this Agreement; and (b) to give advance notice of the Government's rights under this Agreement to any subsequent transferee, mortgagee, encumbrancer, or lessee of any of the undersigned's right, title, claim, or interest in or against the land, or any production therefrom furnishing the Government with two copies of such notice; and

6. Consents to all amendments (including an agreement of termination) and assignments of the contract without notice thereof, and undertakes and agrees that this Agreement shall extend and apply thereto.

7. Added provision: _____ (State "None" or "See Annex No.____")

Dated this 9 day of Sept, 1958.

Docket Number 4812

Exploration Project Contract
Southpaw Joint Venture
Docket No. DMEA 4813

Amendment No. 3

Justification

The Operator, by letter of September 19, 1958, requested and the Field Team, in its letter of September 24 transmitting the Operator's request recommended, that authorization be granted to substitute rotary and/or diamond core drilling, at the same price per foot, for the churn drilling provided for in the contract.

The Operator also requested and the Field Team recommended that a portion of the funds allocated for drilling be diverted to permit drifting and crosscutting on the lower level of the mine, followed by underground diamond drilling from the new face of the drift or crosscut, for the purpose of exploring possible southeasterly extensions of the mineralized zone.

This Division considers that on the basis of present knowledge, the possible extensions of the mineralized area can be explored more quickly, and at less cost to the Government, by drilling from the surface. Results of such drilling may be used to determine whether or not crosscutting and underground drilling is then justified.

The Operator also offered to add the land formerly excluded from the land and royalty terms of the contract to that covered by Article 2 and Annex I.

This Amendment No. 3 authorizes the substitution of rotary and/or diamond core drilling for the churn drilling provided in the contract, and adds the area formerly excluded from the contract to the lands covered by Article 2 and Annex I of the contract.

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA-4813

AMENDMENT NO. 2

It is agreed this 18th day of July, 1958, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and the Southpaw Joint Venture, that Exploration Project Contract No. Idm-E1161 (Docket No. DMEA-4813), dated December 27, 1957, as amended, is further amended as follows:

1. In Article 3 the date fixed for completion of the work is further extended from July 27, 1958 (Amendment No. 1) to November 27, 1958.

2. In Article 6(b)(2) the maximum period for payment of royalty and the liens to secure the payment thereof is extended from ten (10) years to eleven (11) years from the date of the Contract.

This Amendment shall not be construed to increase the estimated total cost of the project, the aggregate amount which the Government may be required to contribute, nor the fixed unit cost of any item of work.

Executed in quintuplicate the day and year first above written.

Dated December 27, 1957
DOCKET NO. DMEA-4813
between
THE UNITED STATES OF AMERICA
and
THE SOUTHPAW JOINT VENTURE, A Joint Venture comprised of Combined Metals Reduction Company, a Utah Corporation, and P. W. Duffin, Sr., an individual.

It is agreed this 26th day of March, 1958 that the contract be amended as follows:

1. Under Article 1, the words "The Operator shall begin the work on or before April 15, 1958, and, subject to the provisions of Article 7 and Exhibit A, shall complete the work within 6 months from the date of the contract" shall be changed to read:

"The Operator shall begin the work on or before May 15, 1958, and, subject to the provisions of Article 7 and Exhibit A, shall complete the work within 7 months from the date of the contract."

This amendment shall not be construed to increase the estimated cost of the project, the aggregate amount which the Government may be required to contribute, nor the fixed unit cost of any item of work.

EXPLORATION PROJECT CONTRACT
(Short Form)

DMEA No.	*Commodity*	*Contract No. Idm-E*	*County*	*State*
4813	Manganese	1161	Lincoln	Nevada

It is agreed 27 DEC 1957, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and Southpaw Joint Venture, a joint venture comprised of Combined Metals Reduction Company, a Utah Corporation, and P. W. Duffin, Sr., an individual

whose mailing address is Care of Combined Metals Reduction Company 218 Felt Building, Salt Lake City 10, Utah hereinafter called the "Operator," as follows:

ARTICLE 1. *Authority and project.*—(a) This contract is entered into under the authority of the Defense Production Act of 1950, as amended. It consists of this form (MF-200A), the attached Annex I (land description), Exhibit A (work and costs), and the maps and documents listed therein. The project work is a search for indicated or undeveloped deposits of the commodity designated above. The Operator shall begin the work on or before April 15-1958, and, subject to the provisions of Article 7 and Exhibit A, shall complete the work within 6 months from the date of the contract.

(b) The description of the work and the fixed cost for each unit of work to be performed (per foot of drilling, per foot of drifting, per hour of operations, etc.) are hereby agreed upon as specified in Exhibit A. The estimated total cost of the project work is $12,852.00. The Government will contribute 75 percent of the fixed unit cost of the work performed, not exceeding $9,639.00, in accordance with the provisions of Articles 4 and 5.

(c) The Operator shall not transfer or assign this contract or any right or obligation thereunder without the written consent of the Government.

ARTICLE 2. *Operator's property rights.*—(a) The Operator represents and undertakes that Annex I correctly describes the land which is the subject of this contract and the nature of the Operator's rights of property and possession therein (whether as owner, lessee, or otherwise), and that such right, title, or interest is subject only to the following claims, liens, or encumbrances: Interests of lessors

(b) The Subordination Agreement of the holder of any claim, lien, or encumbrance listed above and (if the Operator does not hold the legal title) the Consent to Lien of any holder of the legal title of the land (lessor, seller, optionor, etc.) are attached, as follows: Consents to Lien and Subordination Agreements of lessors

(c) The Operator shall preserve and maintain his right, title, and interest in the land and his right to the possession thereof for the purposes of this contract, and shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of this contract. The Operator shall neither transfer, convey, nor surrender the land nor any right, title, or interest therein, nor permit nor suffer any claim, lien, or encumbrance thereon, without expressly referring to and providing

in the instrument of conveyance, lien, or encumbrance for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof. Two copies of such instrument shall be furnished to the Government. If the Government's rights to royalty as provided in Article 6 have been terminated, the provisions of this paragraph (c) shall become inapplicable.

ARTICLE 3. *Performance of the work.*—(a) Operator's responsibility.—The work shall be performed diligently, efficiently, expertly, in a workmanlike manner, and in accordance with good mining standards and State regulations governing health, safety, and liability insurance covering employment. The Operator shall provide suitable and adequate equipment, facilities, materials, supplies, and labor to complete the work, as specified in Article 1 (a).

(b) *Government may inspect.*—The Operator shall consult with and inform the Government on all phases of the work as it progresses. The Government may enter at all reasonable times to inspect the work under the contract, and also after certification of discovery or development, to inspect production operations and underground workings. The Operator shall provide the Government with all reasonable means of access for such inspections.

ARTICLE 4. *Contribution by the Government.*—The Government will make its contribution on the basis of the monthly vouchers referred to in Article 5 (b); but all payments by the Government are provisional only, subject to audit, and until the account between the Operator and the Government is finally audited and settled and the Operator's final report has been rendered, the Government may withhold such sums as it sees fit but not in excess of 10 percent of the estimated total cost of the work. To the extent that excesses over fixed unit costs or any excess over the estimated total cost may be necessary for the performance of the work, the Operator shall incur and pay such excesses for his own account without contribution by the Government. The Government will not contribute to the cost of any work performed prior to the date of this contract. The Government may make payments for the account of the Operator directly to independent contractors and suppliers rather than to the Operator.

ARTICLE 5. *Reports, accounts, audits.*—(a) Operator's records.—The Operator shall keep suitable records and accounts of the units of work performed and of any production in which the Government may have an interest; and shall preserve those with respect to work performed for at least three years after final payment by the Government, and those with respect to production for at least three years after any obligation to pay royalties to the Government has terminated. The Government may inspect and audit said records and accounts at any time, either by itself or by a certified public accountant. The Comptroller General of the United States or his representative, until the expiration of said three-year periods, shall have access to and the right to examine all pertinent books, documents, papers, and records of the Operator.

(b) *Progress reports and vouchers.*—The Operator shall provide the Government with five copies of monthly progress reports in three sections as follows: (1) Operator's Monthly Report and Voucher showing a detailed statement of units of work performed during the reporting period; (2) Operator's Unit Cost and Progress Report showing the various types of work performed during the reporting period and the fixed unit costs incurred for each type of work; and (3) a Narrative Report of the work performed during the reporting period including adequate engineering-geological maps or sketches, drill hole logs and locations, and assay reports on samples taken concurrently with advance in mineralized ground. (Forms for reporting under (1) and (2) above will be provided by the Government.)

(c) *Final report.*—Upon completion of the work or termination of the Government's obligation to contribute to costs, the Operator shall furnish the Government with five copies of a final report (in addition to the final progress report and voucher). This final report shall include a geological and engineering evaluation of the results of the work performed under the contract with an estimate of the ore reserves resulting from such work, complete assay data, adequate geological and engineering maps or sketches, and a summary of the work performed and the unit costs thereof.

(d) *Report of sales.*—The Operator shall provide the Government with suitable accounting and documentary evidence covering all production to which the Government's percentage royalty relates, such as copies of smelter or concentrator settlement sheets, and certified accounts of production and sale or other disposition of production.

(e) *Compliance with requirements.*—If in the opinion of the Government any of the Operator's reports, records, or accounts are insufficient or incomplete, or if the Operator fails to make them, the Government may procure the making or completion of such with suitable attachments as an expense of the work to which the Operator shall contribute. The Government may withhold approval and payment of any vouchers relating to insufficient or incomplete reports, records, or accounts.

ARTICLE 6. *Repayment by Operator.*—(a) *Certification.*—If the Government considers that a discovery or development from which production may be made has resulted from the work, the Government, at any time not later than six months after the Operator has rendered a sufficient final report (see Article 5), may so certify in writing to the Operator. Such certification shall describe broadly or indicate the nature of the discovery or development.

(b) *Royalty on production.*—The Operator, as principal if the Operator is the producer or as surety if the Operator is not the producer (for example, if the Operator either transfers or fails to retain his interest in the land), shall pay to the Government a royalty on all minerals mined or produced from the land, as follows: (1) regardless of any certification of discovery or development, from the date of the contract until the lapse of the time within which the Government may make such certification or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first; or (2) if the Government makes a certification of discovery or development, for a period of ten years from the date of the contract or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first.

(c) *Basis for computation.*—The Government's royalty shall be a percentage of the gross proceeds (including any bonuses, premiums, allowances, or other benefits) from the production sold, in the form sold (ore, concentrates, metal, or equivalent), at the point of delivery (the f. o. b. point); *except,* that charges of *the buyer* arising in the regular course of business, and shown as deductions on the buyer's settlement sheets, on account of the cost of treatment processes performed by *the buyer,* sampling and assaying to determine the value of the production sold, and freight paid by *the buyer* to a carrier (not the Operator), shall be allowed as deductions in arriving at the "gross proceeds" as that term is used herein. Any costs of treatment processes, sampling, assaying, or transportation performed or paid by the Operator or by anyone other than the buyer are not deductible in arriving at the "gross proceeds" as that term is here used. The term "treatment processes," as here used, means those processes (such as milling, concentrating, smelting, refining, or equivalent, but excluding fabricating or manufacturing) applied to the crude ore or other production after it is extracted from the ground to put it into a commercially marketable form.

(d) *Unsold production.*—If any production (ore, concentrates, metal, or equivalent) after the lapse of six months from the date the ore was extracted from the ground remains neither sold nor used by the Operator in integrated manufacturing or fabricating operations (for instance, if it is stockpiled), the Government, at its option, as long as it so remains, may require the computation and payment of its royalty on the value of such production in the form (ore, concentrates, metal, or equivalent) it is in when the Government elects to require computation and payment. If any production is used by the Operator in integrated manufacturing or fabricating operations before the Government makes its election, the Government's royalty on such production shall be computed on the value thereof in the form in which and at the time it is so used. "Value" as here used means what is or would be gross income from mining operations for percentage depletion purposes in Federal income tax determination, or the market value, whichever is greater.

(e) *Percentages of royalty.*—The percentages of the Government's royalty shall be as follows:

One and one-half (1½) percent of amounts ("gross proceeds" or "value") not in excess of eight dollars ($8.00) per ton of production in the form in which sold, held, or used, plus one-half (½) percent for each additional full fifty cents ($0.50) by which such amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such amounts.

(For instance: the royalty on an amount of five dollars ($5.00) per ton would be one and one-half (1½) percent; on an amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(f) *Time for computation and payment.*—The Government's royalty shall be computed and paid currently upon each lot sold, held, or used in integrated operations, as the case may be, as above provided in this Article.

(g) *Lien for payment.*—To secure the payment of its percentage royalty, there is hereby granted to the Government a lien upon the land or the Operator's interest in the land and upon any production of minerals therefrom until the royalty claim is extinguished by lapse of time or is fully paid.

(h) *Notice to purchasers.*—The Operator shall give notice of the Government's claim for royalty to any purchaser of the production, and shall authorize and direct such purchaser to pay the royalty directly to the Government and to furnish the Government with copies of the settlement sheets. If the records of any production and sales or other disposition of production, whether the production is by the Operator or by others, are not made available to the Government, the amount of the royalty may be estimated by the Administrator, Defense Minerals Exploration Administration, or his successor, and his estimate thereof shall be final and binding upon the Operator.

(i) *No obligation to produce.*—Nothing in this contract is to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any production operations.

(j) *Government not obligated to buy.*—Nothing in this contract shall be construed as imposing any obligation on the Government to purchase any minerals mined or produced from the land.

ARTICLE 7. *Termination of the Government's obligations.*—(a) If in the opinion of the Government operations at any time have failed to achieve anticipated results that indicate the probability of making a worthwhile discovery and in the opinion of the Government further operations are not justified, the Government may give the Operator written notice thereof, and thereupon the Government shall be free of all obligation to pay on account of units of work not then performed, and the Operator shall be free of all further obligation to prosecute the work other than such as may be necessary and incidental to winding up, reporting, and accounting.

(b) If in the opinion of the Government the Operator is in any manner in default under the terms of the contract, the Government may give the Operator written notice of such default with a specification of reasonable time within which the default must be cured; and if the Operator fails to cure such default as required, thereupon the Government shall be relieved of all obligation to pay on account of units of work not performed when the notice was given, and the Operator shall be free of all obligation to prosecute the work other than such as may be necessary and incidental to winding up, reporting, and accounting. The Government may also avail itself of any other remedy the law may provide for breach of contract, including the right to rescind the contract and to demand repayment of all moneys contributed by the Government under the contract.

(c) The giving of any notice by the Government under the provisions of this Article 7 shall not affect the Government's rights as provided for in the contract with respect to a percentage royalty, and liens to secure the payment thereof, and such rights shall be fully preserved.

ARTICLE 8. *Notices to be given by the Government* may be delivered to the Operator or may be sent by registered mail addressed to the Operator at the mailing address stated in this contract. If mailed, notices are deemed to have been delivered five days after the date of mailing.

ARTICLE 9. *Officials not to benefit.*—No member of or delegate to Congress or resident commissioner shall be admitted to any share or part of this contract or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

ARTICLE 10. *Changes and added provisions.*—

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA-4813

ANNEX I

The land referred to in Article 2 of the Contract form, and outlined on the attached Figure 2, consists of three unpatented lode mining claims, the notices of location of which are filed in the official records of Lincoln County, Nevada, as follows:

Claim name	Book No.	Page No.
South Paw No. 2	M-1	64
South Paw No. 3	M-1	143
South Paw No. 4	M-1	9

The claims are located in the Irish Mountain Mining District, Lincoln County, Nevada, and the descriptions in said Notices of Location are incorporated herein by reference.

The following described area, shown on Figure 2, is excepted from the land and the royalty provisions of the Contract:

EXCEPTED LAND

Beginning at corner No. 1, coordinates 10,100N - 10,100E, thence due west 200 feet to corner No. 2 at coordinates 10,100N - 9,900E, thence south 45 degrees west, 285 feet to corner No. 3 at coordinates 9,900N - 9,700E, thence due south 100 feet along coordinate 9,700E to coordinate 9,800N to corner 4, thence due east 400 feet along coordinate 9,800N to coordinate 10,100E to corner No. 5, thence due north 300 feet along coordinate 10,100E to corner No. 1, the point of beginning.

* * * * * * * * * * * * * * * * * * * *

The Operator represents and undertakes that it is in possession with the right to possession for the purposes of this Contract pursuant to an Agreement dated August 9, 1950, between the owners, Ray Arnold, Ora Stewart Tuttle, and La Vern Stewart, and A. W. Bush and P. W. Duffin, Sr. A. W. Bush assigned his rights to P. W. Duffin, Sr., and in a "Supplemental Agreement" dated September 12, 1951, the owners acknowledged the assignment and excused P. W. Duffin, Sr., from the purchase option provisions of the Agreement.

Contract Date 27 DEC 1957

CONSENT TO LIEN
and
SUBORDINATION AGREEMENT 1/

To the United States of America:

Referring to that certain land in the County of Lincoln, State of Nevada, described as follows: 2/

Unpatented contiguous lode mining claims as follows: Southpaw No. 2 recorded in Book M-1, Page 64, Southpaw No. 3 recorded in Book M-1, Page 143, Southpaw No. 4 recorded in Book N-1, Page 9, official records of said county. Excluding present mine workings as shown on Map D-1240 on Southpaw No. 3.

which is the subject of a proposed exploration project contract, hereinafter called the "contract," with the United States of America, hereinafter called the "Government;" in consideration of the contract and as an inducement to the Government to enter into it, the undersigned hereby--

1. Undertakes and agrees that property in which the Government may acquire an interest or equity under the contract may be dismantled, severed from the land, and removed, as may be provided in the contract; and the Government's interest and equity in such property shall be prior and superior to any adverse right or claim of the undersigned;

2. Grants to the Government a lien upon all of the undersigned's right, title, and interest in the land and upon any production of minerals therefrom, to secure the payment to the Government of a percentage royalty on production as may be provided for by the Contract;

3. Subordinates the undersigned's right, title, claim, or interest in or against the land and in any production therefrom to the rights of the Government under the contract with respect to royalty on production and liens to secure same;

4. Represents and undertakes that there is no claim, lien, or encumbrance upon the undersigned's right, title, claim, or interest in or against the land other than the following: (If "none" insert the word "none." Do not leave lines blank.)

None

1/ Mining or production from the land is not required, and in the absence of production there is no obligation to pay royalty to the Government.

2/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated _____, and recorded in Book _____, Page _____, official records of said county." If (b) is used, the book and page of recordation cannot be dispensed with. If the space provided is insufficient, use an Annex, and refer to the Annex in the space.

5. Undertakes and agrees (a) neither to commit any act nor assert any claim in conflict with the provisions of this Agreement; and (b) to give advance notice of the Government's rights under this Agreement to any subsequent transferee, mortgagee, encumbrancer, or lessee of any of the undersigned's right, title, claim, or interest in or against the land, or any production therefrom furnishing the Government with two copies of such notice; and

6. Consents to all amendments (including an agreement of termination) and assignments of the contract without notice thereof, and undertakes and agrees that this Agreement shall extend and apply thereto.

7. Added provision: None (State "None" or "See Annex No.____")

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA-4813

EXHIBIT A

Attached maps are as follows:

Figure 1, Index Map of Lincoln County, Nevada.

Figure 2, Claim Map, Southpaw Group, Irish Mountain, Lincoln County, Nevada.

Figure 3, Geologic Sketch Map of Southpaw Manganese Mine, Lincoln County, Nevada.

Bulldoze, with a D-8 Caterpillar or equivalent size unit of another make, approximately 1,200 feet of access roads to 12 churn drill sites and clear the drill sites.

Drill 12 churn drill holes, an average depth of 150 feet each, not exceeding an aggregate of 1,800 feet. Holes shall be started at not less than 8-inch diameters and shall be finished at not less than 4-inch diameters. Holes shall be cased as necessary.2/

All mineralized zones shall be sampled and the samples assayed for manganese.

All costs of supervision, equipment, and supplies are included in the estimated costs of bulldozing and drilling.

ESTIMATED COST OF THE PROJECT

Fixed Unit Costs

Bulldoze access roads and drill sites, 14 hours for each hole (total 168 hours) at $14.00/hr.	$2,352.00
Drill 1,800 feet at $5.00/ft.	9,000.00

Casing, 600 feet @ $2.00/ft.	$1,200.00	
Lost casing, 200 feet at $1.00/ ft. 1/	200.00	
50 samples assayed for manganese at $2.00 each sample	100.00	
Estimated total cost of project		$12,852.00
Government participation, 75 percent		$9,639.00

1/ Costs of casing left in holes at request of Operator are not allowable.

2/ Locations of proposed drill holes, indicated on maps, Figures 2 and 3, are approximate only. No hole shall be drilled within 100 feet of the inside or outside boundary of the DMEA area as indicated on map, Figure 2, and in part on Figure 3, unless geologically justified, and approved by the Government.

Dear Mr. Ricker:

Enclosed please find the required five copies of a D.M.E.A. application in name of the Southpaw Joint Venture, operated under a management agreement by Combined Metals Reduction Company.

Your field team inspected the property sometime ago, but considerable delay in filing the application resulted from difficulty in obtaining signatures for the subordination agreement.

Yours very truly,

Paul Gemmill

Docket No. 4813
Metal or Mineral Manganese
Date Received 8/16/57
Estimated Cost $15,600
Participation (Government %)

RECEIVED AUG 16 1957 D.M.E.A.

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: 1. Combined Metals Reduction Company
218 Felt Building
Salt Lake City, Utah
and 2. P. W. Duffin, Sr.

Doing Business as:
Southpaw Joint Venture

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract
See attached data.

(*b*) State any mine name by which the property is known.

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise
See attached data.

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property.

(*e*) If you own the land, describe any liens or encumbrances on it
See attached data.

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore _____

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within 60 days and be completed within 6 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

[X] Money [X] Use of equipment owned by you [ ] Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

TO ACCOMPANY FORM 103

1. (a) Southpaw Joint Venture
c/o Combined Metals Reduction Company
218 Felt Building
Salt Lake City, Utah

(b) The Southpaw Joint Venture is operated 50/50 by P. W. Duffin Sr. and Combined Metals Reduction Company, the latter being the manager of the Joint Venture.

(c) P. W. Duffin Sr. is an individual. Combined Metals Reduction Co. is a Utah Corporation, duly qualified to do business in the State of Nevada, officers are as follows:

E. H. Snyder	President	2109 Bertkeley St., Salt Lake
Allan Hoover	Director	30 Rockefeller Plaza, New York
Jeremiah Milbank, Jr.	Director	44 Wall Street, New York
George W. Snyder	Director	1361 Butler Ave., Salt Lake
C. M. Christensen	Secretary	2377 Stringham Ave., Salt Lake
O. F. Burton	Treasurer	2170 Rosevelt Ave., Salt Lake

Business address for all officers is 218 Felt Building, Salt Lake City, Utah.

(d) Listed under (c).

2. Read and noted.

3. (a) The land we wish to explore includes the following unpatented lode mining claims:

Name of Claim	Location Date	Recording Date	Book	Page
Southpaw #2	June 24, 1938	Dec. 17, 1938	M-1	64
Southpaw #3	June 24, 1938	July 17, 1939	M-1	143
Southpaw #4	July 3, 1940	July 25, 1941	N-1	9

(b) Southpaw Manganese Mine.

(c) Lessee

(d) Copies of "Lease Agreement" are attached.

(e) Does not apply.

(f) Stated in #3 (a) above.

4. (a) Except for some early day prospecting, mining operation started in 1950 and has been active since that time.

The Southpaw Mine is an underground mine, entered by an adit, two winzes and one working level connecting the two winzes.

Production facilities and equipment includes surface plant containing electric generating unit, air compressor, surface ore bins, track, camp buildings, and water storage tank. Underground equipment includes slushers, hoists, fans, mine cars, electric power cable, pipe lines for compressed air and water.

The Southpaw Joint Venture as lessee own or rent from Combined Metals Reduction Company all equipment and installations.

All mine workings are accessible.

(b) Production is listed below:

Year	Dry Short Tons	Approximate Assay Value	Value at Rail Point $
1950	301	40% Avg. for year	15,503
1951	386	32% Avg. for year	9,517
1952	742	33% Avg. for year	18,816
1953	1,173	34% Avg. for year	49,235
1954	6,373	38% Avg. for year	103,325
1955	4,258	40% Avg. for year	239,569
1956	4,101	36% Avg. for year	194,347
Total	17,334		$ 630,312

Over 80% of the production has been purchased by the Government through G.S.A. at Wenden, Arizona, Deming, New Mexico, Butte, Montana and the G.S.A. Car Lot Program.

There is only a few hundred tons of indicated ore with average assay value of 33% manganese.

Inferred ore tonnage should exceed past production.

(c) The Southpaw Mine is located near the head of Timber Canyon in Irish Mountain, about 15 airline miles northwest of Hiko, Lincoln County, Nevada. Elevation at the mine is slightly under 7,000 feet but the nearby Irish Mountain attains an elevation of 8,741 feet.

The manganese ore deposit occur at or near the contact of the Eureka Quartzite and the overlying Ely Spring Dolomite. The Eureka Quartzite is of middle Ordovician age.

Steeply dipping eastwest normal faulting, probably premineral, are of structural importance in relation to ore deposition.

Section "A", "B", and "C" illustrates the general relationship of structure to ore.

The predominent mineral in the manganese oxide is pyrolusite. Only traces of copper, lead and zinc are found. Iron is very low and phosphorus around 0.10%.

The Joint Venture wishes to explore the area immediately south and west of the mine workings by surface drilling.

(d) From U.S. Highway 93, about 42 miles west of Caliente, a paved road extends to Hiko, a distance of 4 miles. From Hiko a fair gravel road leads to the Southpaw Mine, a distance of 22 miles.

The mine is accessible the year around. Distance to nearest shipping point is Caliente which is about 68 miles. Pioche and Caselton are 90 miles by road from Southpaw Mine.

(e) Ample man power is available in the Pioche and Caliente districts.

Material, supplies and equipment are available as needed from Combined Metals Reduction Co. at Caselton, near Pioche.

Water is available from a spring near the mine or from Hiko. However the water must be hauled in tank.

Sufficient electric, gas or diesel power is available for present mining operation.

5. (a) Manganese Oxide.

(b) Core drilling and/or churn drilling. Surface locations as shown on attached Map D-1240.

(c) The work will start within 40 days after date of contract and be completed within 6 months.

(d) Combined Metals Reduction Co. has, during the last 30 years explored, developed and operated mining properties in Utah, Idaho, Nevada and other western states, their supervision and engineers are well qualified.

6. (a) As this project only envolves drilling, a unit cost per foot of drill hole is here proposed. Road work connecting the various drill holes is estimated at $250.00 per drill hole location.

The topography is steep with little overburden, some blasting will be required for drill locations.

Core drilling will have a definite advantage in the rough topography locations where it is impractical to locate a churn drill hole over the target. The disadvantage of core drilling is the

coring itself through the granular and soft manganese oxide ore, whereas representative samples can be obtained by churn drilling.

Both types of drilling may be required to obtain the best results.

The average depth of the drill holes will be 150 feet.

Cost per foot of drilling is estimated at $7.00 for holes up to 350 feet deep. This cost would apply to churn drilling or core drilling.

Due to open cavities and broken formations, loss of circulation in core drilling will require cementing or casing. Water requirements will be considerably large for core drilling.

An independent core drill contractor has indicated a price of $4.75 per foot for A.X. size hole for drilling only. The cost of cementing, casing and lost time beyond his control would be added to the unit cost.

Combined Metals Reduction Co. would be able to contract the churn drilling for $7.00 per foot total cost.

Estimated Cost of Proposed Project

1,800' of exploration drilling	@ $ 7.00	=	$ 12,600
Road & site for 12 drill stations	@ $250.00	=	3,000
Total Cost of Project			$ 15,600

(b) (c) (d) (e) (f) (g) (h) - This cost is included in unit cost of $7.00 per foot.

7. (a) We are prepared to furnish our share of the cost of this project.

(b) Our share will be furnished in cash.

Respectfully submitted,

Reginald G. Lee

APPROVED:

Paul Gummell PG

MINING LEASE AND OPTION

THIS AGREEMENT, made August 9, 1950 by and between Ray (Dick) Arnold, Ora Stewart Tuttle and LaVern Stewart, hereinafter called Owners, and A. W. Bush and P. W. Duffin, Sr., hereinafter called Lessees, Witnesseth:

WHEREAS said Owners are in possession and entitled to the possession (subject to the paramount title of the United States of America) of the following twelve unpatented lode mining claims, situate in Timber Canyon on the north end of Irish Mountain, in the Irish Mountain Mining District, in the County of Lincoln, State of Nevada, namely the South Paw, South Paw No. 1, South Paw No. 2, South Paw No. 3 and South Paw No. 4 and South Paw Extension, South Paw Extension No. 1, South Paw Extension No. 2, South Paw Extension No. 3, South Paw Extension No. 4, South Paw Extension No. 5 and South Paw Extension No. 6, hereinafter called the South Paw Group; and

WHEREAS, a lease was given under date of May 27, 1950 to A. W. Bush and Fay Stewart, covering said twelve claims known as the South Paw Group, for a term of twenty-five years, but the interest of Fay Stewart therein has been transferred and assigned to P. W. Duffin, Sr., and said A. W. Bush and P. W. Duffin, Sr. desire to correct, modify and amplify said lease, and the Owners have agreed thereto.

NOW, THEREFORE, Owners and Lessees agree that said Lease of May 27, 1950 shall be superseded by the following Lease and Option.

1. The said Owners, for and in consideration of the covenants and agreements hereinafter contained, by said Lessees to be kept and performed, hereby lease unto said Lessees and to their heirs and assigns, for a term of twenty five years from the date hereof (unless sooner terminated for cause as hereinafter provided), all of those twelve claims known as the South Paw Group, upon the terms and conditions hereinafter stated.

2. Said Lessees are to take immediate possession of the demised premises, and develop and operate same in good, minerlike fashion, with the view of producing and shipping all marketable ores on said premises, but preserving the property as a workable mine. Workings are to be timbered wherever and whenever necessary, and all waste shall be removed from the workings and disposed of on the surface; provided any ore not now marketable but which might become valuable at a later date shall be kept separate from waste.

3. Lessees, unless prevented by weather or other circumstances beyond their control, shall perform at least 70 eight-hour shifts of labor on the demised premises during each calendar month beginning with the month of September, 1950.

4. Lessees shall accept and comply with the provisions of the Nevada Industrial Insurance Act and the Nevada Occupational Diseases Act, with the act to relieve Owners from liability for labor and material liens, and with all Federal and State laws and regulations applicable to operations hereunder.

5. Merchantable ore of any mineral developed on the premises shall be promptly extracted, and shipped in the name of Owners, at the best prices obtainable, subject to the approval of the Owners, the said Owners to approve both the transportation charges and the sale price, and out of the net settlement the said Owners shall retain 10% and the balance shall be payable to the Lessees, and the Owners shall likewise be entitled to the same percentage of any bonus payments on ore shipped, but Lessees shall be entitled to any incentive payments that may be offered for development work. Net settlement shall be the amount paid for the shipment after treatment, transportation and assay charges are deducted.

6. In the event Lessees shall default in any of the covenants or obligations herein expressed, on their part to be kept and performed, then and in that event the Owners shall have the right to declare a forfeiture of this lease and of all rights and privileges thereunder, by giving written notice to the Lessees, or either of them, to cure such default within 30 days, and upon their failure to do so the Owners shall have the right, with or without legal process, to reenter and repossess the demised premises; and the waiver by Owners of any provision binding Lessees shall not effect a waiver of that or any other provision binding them, nor constitute a waiver of any subsequent default in the same or any other obligation.

7. Lessees shall have the right to relinquish this lease on the first day of any month not later than June 1 of any year, upon giving the Owners written notice not later than the first day of the month preceding such contemplated relinquishment. From and after the date of such relinquishment, Lessees shall be relieved of all further obligation hereunder except payment of agreed royalty on all ore shipments made, and shall have the right for a period of not more than 30 days after such relinquishment to remove from the demised premises any and all structures, equipment and tools which Lessees may have placed thereon, (excepting timber, track and pipe.)

8. In consideration of the acceptance of this Lease and the covenants and agreements recited herein, Lessees are hereby given the exclusive right and option to purchase the said South Paw Group for $120,000.00, to be paid to Owners in instalments as follows: not less than $4,000.00 within one year from the date hereof, not less than $5,000.00 additional within two years, not less than $6,000.00 within three years, not less than $10,000.00 within four years, and the balance of $95,000.00 within five years from the date hereof; any deficiency in earned royalty payments to be made up with advance royalty payments; provided, all royalty payments made shall be applicable on purchase price instalments; subject however at all times to the continued performance by Lessees of the covenants herein recited.

9. Time is of the essence of this instrument, and it shall extend to and bind the heirs and assigns of the respective parties. Upon failure of Lessees to perform, or commence in good faith to perform, any of their covenants herein within a period of 30 days after notice of default, the lease shall at the option of the Owners thereupon terminate, and the option shall concurrently terminate, and Lessees agree that any such default shall effect not only a cancelation of the lease and option but also a forfeiture to Owners of any and all payments made by Lessees to Owners hereunder, as rental for the demised premises and not as a penalty. It is further agreed that no provision in this instrument shall be construed to limit the right of Owners to demand and enforce the payment of earned royalty.

10. Notice when given hereunder shall be given by registered letter, postpaid, addressed if by Owners to P. W. Duffin, Sr., Caliente, Nevada, and if by Lessees to Mrs. Ora S. Tuttle, Alamo, Nevada; and shall be deemed complete upon the date of mailing shown by registry receipt. Notice of change of address shall be given in like manner.

11. It is agreed that Owners shall have the right at any and all reasonable times, in person or by agent to inspect the demised premises and any and all records and data affecting the interests of Owners hereunder.

On August 26, 1950, the Lessees A. W. Bush and P. W. Duffin, Sr., requested the following change in paragraph 5 of the Mining Lease and Option executed on August 9, 1950, covering the South Paw Group of unpatented lode mining claims:

5. Merchantable ore of any mineral developed on the premises shall be promptly extracted, and shipped, in the name of Lessees ~~Owners~~, at the best prices obtainable, ~~subject to the approval of the Owners, the said Owners to approve both the transportation charges and the sale price,~~ and out of the net settlement the said Owners shall ~~retain~~ be entitled to 10% and the balance shall be payable to the Lessees, and the Owners shall likewise be entitled to the same percentage of any bonus payments on ore shipped, but Lessees shall be entitled to any incentive payments that may be offered for development work. Net settlement shall be the amount paid for the shipment after treatment, transportation and assay charges are deducted.

The foregoing amendment is hereby consented to and approved by the undersigned Owners, as of August 26, 1950.

MEMORANDUM OF AGREEMENT.

This Memorandum of Agreement, made October 30, 1950, by and between A. W. Bush, P. W. Duffin, Sr., and Lory M. Free, First Parties, and Combined Metals Reduction Company, a corporation of the State of Utah, doing business in the State of Nevada, Second Party, WITNESSETH:

WHEREAS, said A. W. Bush and P. W. Duffin, Sr., are lessees named in that certain Lease and Option dated August 9, 1950, as amended August 26, 1950, given them by Ray (Dick) Arnold, Ora Stewart Tuttle and LaVern Stewart, covering the unpatented South Paw Group of twelve lode mining claims situate in Timber Canyon, in the Irish Mountain Mining District, in the County of Lincoln, State of Nevada, and have associated Lory M. Free with them in operations thereunder; and

WHEREAS, after preliminary discussions and further examination of the said South Paw Group, Second Party has agreed to take an option on the rights of First Parties under their said Lease and Option, upon conditions which are not fully expressed herein but which have been orally agreed upon between the parties hereto and which will be more fully expressed as soon as time is available to record same in a supplementary agreement.

NOW, THEREFORE, in consideration of the sum of Four Thousand Dollars ($4,000.00), of which $2500 is to be paid to A. W. Bush, $1200 is to be paid to P. W. Duffin, Sr., and $300 is to be paid to Lory M. Free, First Parties hereby agree to give Second Party an exclusive option on all their rights in said Lease and Option from the owners of said South Paw Group, for a period of two months or until January 2, 1951, upon the payment of an additional sum of approximately Four Thousand Dollars not later than January 2, 1951, upon the following terms and conditions, among others orally expressed:

First Parties agree to secure from said Owners a new lease and option, containing substantially the same provisions as in the existing Lease and Option, but ~~running to the three First Parties herein,~~ changing the work requirements and extending the right of purchase to a period of ten years from the date thereof; further to incorporate under the laws of the State of Nevada for the principal purpose of doing business under said new lease and option and this proposed assignment thereof.

Second Parties agree to taketemporary possession of said South Paw Group, and for a two months' period develop same and extract marketable ore therefrom and stockpile same at or near Hiko. If within two months it decides to exercise said option, it will pay to First Parties on or before January 2, 1951, a sum of approximately $4,000 for a full assignment of said Lease and Option, the exact amount payable to be determined by actual costs of acquisition and operation by First Parties said to be approximately $8,000 and the actual amount thereof to be evidenced by itemized statement to be furnished to Second Party by First Parties.

It is further agreed that the ore stockpiled prior to January 2, 1951, shall be the property of Second Party, subject to royalty provisions, and the value thereof, when disposed of, shall be credited first on the $4,000 payment made to First Parties and the costs of royalties, extraction, development and stockpiling incurred by Second Party. Any excess over said $4,000 payment and said costs, will be payable to First Parties if said option is not exercised. If the option be exercised by the payment of $4,000 (approximately) on

A. L. SCOTT
ATTORNEY-AT-LAW
PIOCHE, NEVADA

January 2, 1951, the net proceeds of the stockpiled ore shall be divided in accordance with the proposed supplementary operating agreement.

Second Party, if it decides not to exercise said option, shall have the privilege of removing any and all equipment it may have placed on or near said mining claims.

IN WITNESS WHEREOF First Parties have hereunto subscribed their names, and the name of Second Party has been hereunto subscribed by its officer thereunto duly authorized, on the date herein first written.

SUPPLEMENTAL AGREEMENT.

THIS AGREEMENT, made as of September 12, 1951, by and between May (Dick) Arnold, Ora Stewart Tuttle and Lavern Stewart, hereinafter called Owners, and P. W. Duffin, Sr. (individually and as assignee of A. W. Bush), hereinafter called Lessee,

WITNESSETH: that WHEREAS said Lessee is now the record holder of that certain Lease and Option Agreement made August 9, 1950, by and between said Owners and A. W. Bush and P. W. Duffin, Sr. which, together with an Amendment thereof under date of August 24, 1950, is recorded in Book "B" of Miscellaneous at page 343, Lincoln County, Nevada, records and to which reference is hereby made; and

WHEREAS, said Lease and Option Agreement required that in order to exercise the option to purchase therein granted, payment of $4,000.00 must be made in earned royalty or advanced royalty not later than August 9, 1951, but if the Lessees decided not to exercise said option clause (paragraph 8) on August 9, 1951, the lease provisions would remain in effect so long as Lessees complied therewith; and

WHEREAS, through no fault of Lessee the payment of earned royalty was delayed until the date hereof by the failure of the Government to remit for ore delivered in May, 1951.

NOW, THEREFORE, THIS AGREEMENT WITNESSETH that in consideration of the payment by Lessee to Owners of advanced royalty in excess of earned royalty, in an amount sufficient to make payments aggregate $4,000.00, the said option clause shall remain in full force and effect (notwithstanding delay in making first payment), and Lessee will not be required to make any further payments of earned royalty under the lease provisions of said Lease and Option Agreement until the total amount of said earned royalty shall equal the $4,000.00 actually paid, provided, in the meantime, Lessee must comply fully with all other lease requirements set out in said Lease and Option Agreement. And the fact that Lessee shall be temporarily relieved of the requirement to pay earned royalty, shall not relieve Lessee of the requirement to furnish promptly to Owners reports of all ore settlements and amount of royalty earned thereon.

It is further agreed that paragraph 10 of said Lease and Option Agreement shall be modified by changing the address of Mrs. Ora S. Tuttle to 2013 Franklin Avenue, Las Vegas, Nevada, and the address of P. W. Duffin, Sr., to 1145 South Westwood Drive, Las Vegas, Nevada.

This Supplemental Agreement shall not alter any provision of said Lease and Option Agreement which is not herein expressly modified.

IN WITNESS WHEREOF the said parties, Owners and Lessee, have hereunto subscribed their names as of the date herein first written.

JOINT ADVENTURE AGREEMENT.

THIS AGREEMENT, made as of July 3, 1951, by and between P. W. Duffin, Sr., of Caliente, Nevada, First Party, and COMBINED METALS REDUCTION COMPANY, a corporation of the State of Utah, Second Party, WITNESSETH:

WHEREAS First Party has acquired all the right, title and interest of A. W. Bush in that certain Mining Lease and Option given under date of August 9, 1950, by Ray (Dick) Arnold, Ora Stewart Tuttle and LaVern Stewart to A. W. Bush and P. W. Duffin, Sr., covering twelve unpatented lode mining claims generally known as the South Jaw Group, situate in the Irish Mountain Mining District, in the County of Lincoln, State of Nevada, and said First Party is now the sole owner of said Lease and Option which, together with amendment thereof under date of August 26, 1950, will be found of record in the office of the County Recorder of said Lincoln County, in Book "N" of Miscellaneous, at pages 335 and 343 respectively, and are hereby referred to for further particulars; and

WHEREAS, the parties hereto are willing, upon the terms and conditions stated below to undertake a Joint Adventure for the purpose of developing and operating or disposing of their joint interest in the demised premises at a profit to be shared equally by the parties hereto, said Joint Adventure being in the nature of a limited partnership - not limited in the statutory sense as to the liability of the parties, but as to its scope and duration - without any actual partnership or corporate designation.

NOW, THEREFORE, this Joint Adventure Agreement WITNESSETH:

Second Party will assume and be chargeable with none of the obligations assumed by First Party prior to July 3, 1951, other than those required by said Lease and Option as amended to be performed subsequent to July 1, 1951; but if said Option be exercised by making initial payment on August 9, 1951, it is agreed that both parties shall share equally any and all credits given for accrued royalties on ore heretofore extracted, and only the actual cash payments in the amounts contributed by each party hereto shall be chargeable as expenditures hereunder.

All mining operations and ore marketing shall be under the supervision and direction of Second Party. At the end of each calendar month the parties shall exchange statements showing their respective expenditures during the month, chargeable to this Adventure. Either party may, within ten days after receipt of such statement, object in writing to any item or any charge in such statement, but in the absence of written objection served on the other party, the amounts specified in such statement shall be deemed to be finally allowed and accepted as correct, and the party who has advanced any amount in excess of 50% of the total expenditures for the month as so determined, shall be promptly reimbursed by the other party in the amount of such excess. Any item or amount objected to, if it cannot be compromised by the parties, shall be submitted to arbitrators for final determination. Semiannually, on January 1 and July 1 of each year, upon request of either party, a settlement shall be made on the basis of said monthly statements for the preceding six months, so that both parties will have shared equally in the payment of applicable expenditures, and also in the net profits, if any.

A. L. SCOTT
ATTORNEY-AT-LAW
PIOCHE, NEVADA

This Agreement shall be and continue in full force and effect so long as the said Lease and Option, or the lease provisions thereof, remain in effect, unless sooner terminated by mutual agreement; but either party may, by written notice given to the other on January 1 or July 1 of any year hereafter, terminate the Adventure by assigning to the other party all of its right, title and interest in the said Mining Lease and Option.

This agreement shall bind and extend to the heirs and assigns of First Party and to the successors and assigns of Second Party.

IN WITNESS WHEREOF this Agreement has been signed by First Party and executed on behalf of Second Party by its General Superintendent thereunto duly authorized, as of the date herein first written.

O. W. Duffin Sr.

PROJECT SUMMARY REPORT

Docket copy

By Stephen P. Holt April 27, 1960

1. DMEA 4813 (Manganese)
Contract No. Idm-E1161

Property: Southpaw Claims
Lincoln County, Nevada

Operator: Southpaw Joint Venture, a joint venture comprised of Combined Metals Reduction Company, a Utah Corporation, and P. W. Duffin, Senior, an individual.
c/o Combined Metals Reduction Company
218 Felt Building
Salt Lake City 10, Utah

Operator's Property Rights:

The Operator controls, by lease agreement dated August 9, 1950, and a supplemental agreement dated September 12, 1951, three unpatented lode mining claims, situated in the Irish Mountain Mining District, Lincoln County, Nevada. A Consent to Lien and Subordination Agreement, dated December 27, 1957, signed by Ora Stewart Tuttle, La Vern J. Stewart, and Ray (Dick) Arnold, is attached to the contract.

An area including the present mine workings was excluded from the lands covered by the contract, but was later added to the lands of the contract by the terms of Amendment No. 3, and Consents to Lien and Subordination Agreements dated September 8, and 9, 1958, and an Agreement dated September 3, 1958, signed by the same owners, added the land previously excluded to the lands of the contract.

2. Contract dated December 27, 1957, on Short Form MF-200A (Rev. April 1956).

Work authorized:

Bulldoze approximately 1,200 feet of access roads to churn drill sites and clear the drill sites.
Drill 12 churn drill holes, average depth 150 feet each, not to exceed 1,800 feet total aggregate length. Holes to be started not less than 8 inches diameter, finished not less than four inches diameter. All mineralized holes to be sampled and samples assayed for manganese.

Estimated total cost of the project	$12,852.00
Government participation @ 75%	9,639.00

Amendments:

No. 1, dated March 26, 1958, changed the date for starting the work from on or before April 15, 1958, to on or before May 15, 1958, and extended the completion period from six months to seven months from the date of the contract.

No. 2, dated July 18, 1958, further extended the date of completion of the work from July 27, 1958 (seven months from the date of the contract) to November 27, 1958, and extended the royalty payment period from 10 to 11 years.

No. 3, dated November 14, 1958, authorized substitution of rotary and/or diamond core drilling for the churn drilling authorized in the contract, and added to the lands of the contract the area surrounding the mine workings, formerly excluded.

No. 4, dated January 6, 1959, authorized suspension of project work for a period beginning November 27, 1958, and ending not later than April 27, 1959; extended the date for completion of the work from November 27, 1958 to September 27, 1959; extended the period for royalty payments from 11 years to 12 years from the date of the contract; and added a "pseudo certification" clause, to become effective if work were not resumed before the end of the suspension period, April 27, 1959, or, if so resumed, were not completed before September 27, 1959.

No. 5, and Termination Agreement, dated December 15, 1959 revised Amendment No. 3 to include authorization for percussion drilling as well as rotary, churn and diamond drilling, revoked the Termination Agreement dated August 28, 1959, and terminated the contract, effective July 1, 1959.

Work completed:

Bulldozing access roads to drill sites, 168 hours @ $14.00/hr.	$2,352.00
Drilling diamond, rotary, churn and percussion drill holes, 997 feet @ $5.00/ft.	4,985.00
Casing, 225 feet @ $2.00/ft.	450.00
Casing lost, 45 feet @ $1.00/ft.	45.00
Assays, 19 for Mn @ $2.00/ea.	38.00
Total accepted cost of the contract	$7,870.00
Government participation @ 75%	5,902.50

Work under the contract began May 1, 1958, and was terminated by mutual agreement dated December 1, 1959, effective July 1, 1959, before completion of the drilling program.

3. Revised Report of Review, in lieu of Final Audit, dated April 25, 1960, showed:

Total cost as billed by Operator	$7,870.00
Exceptions, none	0.00
Total accepted cost	$7,870.00
Government contribution @ 75%	5,902.50

3-A Reports: The Operator's Final Report, dated December 1, 1959, was received by the Field Team December 4, 1959, and in this office December 10, 1959. The Final Report of the Field Team, dated October 1959, was received October 30, 1959.

4. Certification:

As no significant manganese-bearing material was discovered by project work, certification was not recommended by the Field Team. No certification of discovery or development will be issued, but instead the contract will be closed by a "closing letter" sent to the Operator.

5. Comments:

The work was well done and is satisfactory to the Government. The project was established for the purpose of exploring areas east, west, and south of the Southpaw mine, for faulted continuations of the manganese ore bodies, which occur as soft

earthy masses and finely crystalline layers of pyrolusite in gently-dipping layers of brecciated limestone in bedding plane faults along and near a contact between limestone and the Eureka quartzite of Ordovician age.

Although a deposit about 300 feet long, 200 feet wide, with an average width of 8 feet, had been developed and mined in the Southpaw mine, yielding approximately 17,500 tons of ore, averaging about 36% manganese, none of 11 test holes drilled on the north, east, and south sides of the mine workings, disclosed any material that could be classed as manganese ore discovered by the DMEA exploration. The area remaining unexplored, to the southwest of mine workings, is so small that the probability of discovering significant reserves of manganese ore is considered remote. Therefore, it is recommended that no certification be issued, and that, unless new and conclusive evidence is presented, no further exploration assistance by the Government is warranted.

Re: DMEA - 4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E-1161

Dear Mr. Selfrdige:

Thank you for your letter of June 7, 1960 with reference to terminated exploration contract with the Government on the above subject.

We regret the work performed did not result in a certification of discovery or development under provisions of the contract. We note also, that the Government, in the absence of such certification, retains no claim or lien against the property subject to the contract or any future production therefrom. According to the provisions of the contract, we shall keep and preserve all records for the specified time.

We appreciate the Department's participation and cooperation in the DMEA program.

Copies of your letter have been mailed to those interested and listed below.

Very truly yours,

COMBINED METALS REDUCTION COMPANY

Contract No. Idm-21161

Gentlemen:

Reference is made to your terminated exploration contract with the Government.

We sincerely regret that the work performed did not result in a certification of discovery or development under the provisions of the contract. In the absence of such certification, the Government retains no claim or lien against the property subject to the contract or any future production therefrom. We, therefore, are closing our books and records on this project. Your attention, however, is called to the provisions of the contract which require the operator to keep and preserve certain records for the period indicated.

We appreciate your interest and participation in the IMEA exploration program.

Sincerely yours,

George C. Selfridge

Lincoln County, Nevada
Contract No. Idm-E 1161

Dear Mr. Merrill:

Reference is made to our letter of April 18, 1960 enclosing a Report of Review in lieu of a final audit of the subject contract.

However, the review amounts noted as paid to the operator and due the operator were later found by the OME auditor to be in error.

Therefore, the original review has been corrected by the enclosed "Revised Report of Review", dated April 25, 1960, in which the Field Team concurs with the facts stated therein.

We hope that you have not been inconvenienced by our error.

Very truly yours,

Glenn G. Gentry
Acting OME Field Officer

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $[illegible]. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the original of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under Item (1) of Form MF-104 by deleting as stated above the word "[illegible]" and by showing the number of feet or other units [illegible] after the appropriate descriptive [illegible] during [illegible] "Total" amount data. "Total [illegible]" "Total to Date" columns should [illegible]

COMBINED METALS REDUCTION CO.

INTER-OFFICE CORRESPONDENCE

Subject DMEA Drilling Project - Southpaw Mine DMEA #4813 - Manganese

Date June 1, 1959

To Mr. Paul Gemmill, General Manager

From Reginald G. Lee

Dear Paul:

Core drilling in DMEA drill hole No. 11 at the Southpaw Manganese Mine was resumed on April 27th, 1959.

This drill hole was down to 95.0 feet of depth in latter part of November, 1958 when all available water supply froze up.

No diffiduity was experienced to reach the bottom of the drill hole. The core from 95 feet to 122 feet was a light gray dolomitic limestone showing a little coating of manganese in fractures at 12[illegible] feet. The Eureka Quartzite was encountered at 122 feet and extended to 123 feet in the quartzite. Attached is print of log and location of drill hole No. 11.

Very truly yours,

Reginald G. Lee.

Subject: Docket No. DMEA-4813 (Manganese)
Combined Metals Reduction Company
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E1161

The Department's Fiscal Section has called this Division's attention to certain erroneous statements in the April 8, 1960, Report of Review on the subject contract. The amount paid to date was overstated, and the balance due the Operator was understated, by $250.00, the amount of a suspense account holdback on the September-October 1958 MF-104.

Attached are two copies of a Revised Report of Review dated April 25, 1960. Please forward one copy to the Operator. The other copy is for your files. The original has been forwarded to the Fiscal Section.

This error on the part of this Division is sincerely regretted.

Subject: Docket No. DMEA-4813 (Manganese)
Combined Metals Reduction Company
Southpaw Joint Venture - Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

Work under the subject contract was terminated effective July 1, 1959 by an agreement dated December 15, 1959.

The number of units of work completed by the operator and accepted by the Field Team as confirming to contract specifications were:

Bulldozing access roads	168 hours
Churn drilling	665 feet
Percussion drilling	255 "
Diamond drilling	51 "
Rotary drilling	26 "
Casing of drill holes	225 "
Lost casing in drill holes	45 "
Samples assayed for Mn.	19

An acceptable final engineering and geological report was received from the operator on December 1, 1959.

A Report of Review, in lieu of a final audit, is in order and requested. For this purpose, the original copies of the final (April-May 1959) MF104 and MF104A, together with the supporting documentation are attached.

Memorandum

To: Executive Officer, OME Field Team, Region II

From: /s/ C. E. Fisher for
E. D. Talbert, Acting Chief
Contract Administration and Audit Division

Subject: Proposed visit of C. E. Fisher to Region II

Thanks for your memorandum dated March 23, 1960. Mr. Fisher will contact Mr. Walker Monday morning April 18, 1960, for the purpose of performing the cost audit.

If, in your opinion, the salvage offer by Shasta Minerals & Chemical Company, Contract Idm-E1006, Docket DMEA-4092, is acceptable to the Government, it is suggested that you proceed in the manner outlined in DMEA Circular 30, January 28, 1955, as supplemented. Section 2(e) of Acting Secretary of the Interior Order No. 2934, September 22, 1958, as promulgated by OME Operating Committee Memorandum No. 1, dated September 30, 1958, delegates to Executive Officers authority to "approve in writing of the sale and join in the sale for the joint account of the Operator and the Government" within limitations not exceeded in this instance.

An amount sufficient to cover the Government's share of the value of salvage, possible audit disallowances, and value of engineering reports and maps required under the terms of the contract should have been withheld from payment. (See Questions and Answers Nos. 20 and 21 of Memorandum No. 8, June 25, 1952, and Special Notice in Minutes of Operating Committee, No. 219, May 22, 1953.) Apparently, the balance due to Shasta Minerals as the Government's share of exploration costs will be found by the audit to be substantially less than the offer for the salvage so that the net result will be a determination of a balance due to the Government.

There are returned herewith the original and three copies of the MF-104 and original and two copies of the MF-104A, together with attachments, relating to February 1960 exploration work by Shasta Minerals which you sent to the Fiscal Section with memorandum dated March 15, 1960. One copy of the MF-104A has been retained in line with provisions of Special Notice in Minutes of Operating Committee No. 192, dated March 20, 1955. Upon receipt of Mr. Fisher's audit report and certificate forms MF-104 and MF-104A should be submitted to the Fiscal Section for handling in accordance with the procedure prescribed by OME Circular 1 and Section 4 of OME Circular 2.

43683

I have also secured from the Fiscal Section and am returning herewith the forms MF-104 and MF-104A (except for one copy of form MF-104A) pertaining to the following contracts:

Southern Joint Venture

Combined Metals Reduction Co. - April/May 1959, Idm-E1161, DMEA-4813

Hamilton Corporation - February 1960, Idm-E1212, DMEA-4824

These vouchers should be handled in the manner prescribed in OME Circular 2; that is, if the work is terminated or completed request for cost review should be made in the manner provided.

Mr. Fisher's time in San Francisco will be limited. He will complete the cost audit report pertaining to Shasta Minerals, arrange for disposition of audit work-paper files now in the custody of the Authorized Certifying Officer, and make royalty reviews as deemed appropriate. It is not intended that he should make cost reviews. Thus, he will not review the contracts with New Idria Mining and Chemical Company, Idm-E1137, DMEA-4654, and John H. Uhalde, Idm-E1085, DMEA-4425, which should be handled in accordance with the procedure set forth in OME Circulars 1 and 2.

Memorandum

To: Chairman, Operating Committee, OME, Washington, D. C.

From: Executive Officer, OME Field Team, Region II

Subject: Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

Reference is made to your letter of January 5, 1960, regarding the subject contract.

Under the title of "Conclusions and Recommendations", the Final Report by the Field Team states:

1. Three sides of the previously productive mine area have been explored by drilling for faulted continuations of the ore bodies without success.

2. Because the potential is now reduced to about one-fourth of the original estimate, the possibility of making a significant discovery is now remote.

3. Based upon geological information obtained from the logs of the drill holes, additional exploration is not justified and further Government assistance, if requested, is not recommended.

The inferred reserves of 5,000 tons, constitute a possible tonnage, provided the faulted down-thrown segments retain a similar pattern as that encountered in the old underground workings.

However, the completed drill holes showed only slight evidences of manganese, in the greater part were barren and did not indicate continuation of mineralization.

Therefore, based upon the results obtained from the DMEA exploration, the members of the Field Team, Glenn G. Gentry, Mining Engineer, and H. K. Stager, Geologist, do not recommend certification of the project.

After a review of the Field Team reports and a further study of the mine maps, I conclude that other ore bodies, if found, would be of small or moderate tonnage, and would not justify the expenditure necessary to conduct mining operations from the present underground workings nor the capital requirements necessary to sink a new working shaft.

I concur with the recommendation of the Field Team that certification of a discovery on this project is not justified.

AMENDMENT NO. 5 AND TERMINATION AGREEMENT

WHEREAS, the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter called the "Government," and Southpaw Joint Venture, hereinafter referred to as the "Operator," entered into a certain Exploration Project Contract No. Idm-E1161, (Docket No. DMEA-4813), dated December 27, 1957, as amended, hereinafter referred to as the "Contract," and

WHEREAS, the parties executed Amendment No. 3 to the said contract, dated November 14, 1958, but by mutual mistake ~~on the part of the Government~~ did not provide therein for the payment of the costs for percussion drilling; and

WHEREAS, the Operator has satisfactorily completed certain exploratory drilling by percussion drill;

NOW, THEREFORE, it is agreed that:

(1) The third paragraph of Exhibit "A," as revised by Amendment No. 3, dated November 14, 1958, is further amended to include percussion drilling under the same terms and conditions as provided in Amendment No. 3.

(2) The Termination Agreement dated August 28, 1959, is hereby revoked.

(3) The Cont
under, except as

any overpayment,

Mr. Selfridge -

Mistake must be mutual as basis for amendment according to previous legal ruling which has been consistently followed thoughout program.

Churn drilling was approved in Amendment No. 3 on request of operator. Although he recognized approval was necessary for changing types of drilling and mentioned his ~~xxxxxxxxxx~~ changeover to percussion drilling, he did not request it. Perhaps it is an oversight. Mistake is certainly that of both parties and not just Government.

Re: Docket No. DMEA-4813(Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

Dear Mr. Dietrich:

In compliance with 5.(c) of the above referred contract, the following is the final report upon termination of DMEA Project No. DMEA 4813.

A. Exploration Project Contract: On the 27th of December 1957, the Southpaw Joint Venture comprised of Combined Metals Reduction Company, a Utah Corporation, and P. W. Duffin, Sr., an individual, entered into an Exploration Project Contract No. Idm-E 1161 with the Defense Mineral Exploration Administration acting through the Department of the Interior of the United States of America.

The purpose of this contract was to obtain aid from the Defense Mineral Exploration Administration to execute a drilling program at the Southpaw Manganese Mine.

B. Location of Project: The Southpaw Manganese Mine is located about 15 airline miles northwest of Hiko, Lincoln County, Nevada. Hiko is the nearest Post Office. A dirt road that leaves the paved highway at Hiko leads to the Southpaw Mine, near Irish Mountain, a distance of 21 miles from Hiko.

C. Work Completed and Evaluation Thereof:

(1) Geological Evaluation: All Manganese ores and mineralization at the Southpaw Mine occurs at or near the contact of the Eureka Quartzite and the overlaying Ely Spring Dolomite. The higher grade ore bodies mined were found at this stratigraptic location near steeply dipping east-west normal faults. The Eureka Quartzite and Ely Spring Dolomite dip in a northerly direction at about 20 degrees.

The individual drill holes under the DMEA Project were located with the above geological relation as a guidance throughout the drilling program. All drill holes intersected the contact and were extended into the Eureka Quartzite for a few feet to make certain that the contact had been drilled through.

OPERATOR'S FINAL REPT

The four churn drill holes, drilled on the south and east side of the mine, were located from 250 feet to 500 feet from the nearest mine workings onfavorable fault structures. All of these holes showed traces of manganese mineralization at the contact of the dolomite and quartzite. The contact is marked with a fault gouge ranging in thickness from a few inches to over a foot, and usually show some manganese mineralization.

Samples were taken from the churn drill cuttings every five feet of advance, and less if some manganese showed in the cuttings. Sample recovery was excellent.

The five shallower percussion holes drilled on the north and west side of the mine workings cut the contact of quartzite and dolomite at depth expected. Drill cuttings recovery was very good, but little mineralization of manganese was noted.

Near the mine workings, one rotary drill hole and one core drill hole were drilled down to check on possible extension of mined ore bodies. However, the results were negative.

Geologic evaluation of the drilling under the DMEA Program may be summerized as follows:

(a) No ore was found in any of the drill holes, indicating that the manganese mineralization of commercial value is not wide spread, but limited to isolated bodies.

(b) Low grade siliceous manganese outcrops at the surface, 100 to 200 feet above the contact of the quartzite and limestone proved to be equally barren of manganese at the contact where cut by drill holes.

(c) Steeply dipping normal faults are common in and near the mine area. No intrusive rocks were encountered in drill holes.

(2) <u>Engineering Evaluation:</u> Evaluation of the Project Work from an engineering standpoint can be summarized as follows:

(a) Water was encountered at 165 feet in drill hole No. 1 and at 135 feet in drill hole No. 3. The amount of water that could be developed for milling and domestic purposes is inknown.

(b) Physical properties of rock section drilled through is known or can be determined from drill cuttings.

(c) Access road to drill sites can be extended and used for further exploration.

D. <u>Estimate of Ore Reserves as a Result of Work Performed Under the Contract:</u>

(1) No discovery of ore, and no ore reserves resulted from any of

the work under the contract.

(2) Assays of samples in drill holes that showed some manganese mineralization are tabulated below:

Drill Hole	Description of Sample	Feet From - To	% Mn.
C.D.Hole #3	Washed Drill Cuttings	135 - 140	0.20
"	" " "	140 - 145	0.15
"	" " "	145 - 150	0.15
"	" " "	150-155	Tr.
"	" " "	155 - 160	Tr.
"	" " "	157 - 162	Tr.
"	Unwashed clay	160 - 162	0.40
C.D.Hole #11	Drill Cuttings - dry	40 - 45	Nil
"	" " "	45 - 50	Nil
"	" " "	50 - 55	Tr.

"	" " "	65 - 70	Tr.
"	" " "	70 - 72	Tr.
"	Sludge - wet	72 - 75	0.6
"	" "	75 - 80	0.4
"	" "	80 - 85	0.5
"	" "	85 - 90	Tr.
"	" "	90 - 95	Nil

See attached geologic map and sketches as to location of drill holes And log of same.

E. Summary of Work Performed Under Contract and the Unit Cost Thereof:

Total contract amount $12,852.00 of which 75% was for DMEA Contract Account and 25% for Southpaw Joint Venture Account.

Units	Type of Work	Unit Cost	Total Units	Cost Total
Hours	Road Building-Bull Dozer	$ 14.00	168.0	$2,352.00
Feet	Churn Drilling	5.00	665.0	3,325.00
Feet	Percussion Drilling	5.00	255.0	1,275.00
Feet	Core Drilling	5.00	51.0	255.00
Feet	Rotary Drilling	5.00	26.0	130.00
Feet	Casing of Drill Holes	2.00	225.0	450.00
Feet	Lost Casing in Drill Holes	1.00	45.0	45.00
Each	Assaying for Manganese	2.00	19.0	38.00
		Total		$7,870.00

The Contract was terminated at the request of the Government.

Respectfully Submitted,

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA-4813

AMENDMENT NO. 5

It is agreed this _____ day of _____, 1959, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government," and Southpaw Joint Venture, hereinafter referred to as the "Operator," that Exploration Project Contract No. Idm-E1161 (Docket No. DMEA-4813), dated December 27, 1957, as amended, is further amended effective September 30, 1958, as follows:

1. The third paragraph of Exhibit "A," as revised by Amendment No. 3, is further revised to read:

"Drill 12 holes, with churn, rotary, percussion, or diamond drill, an average depth of 150 feet each, not exceeding an agreegate of 1,800 feet. Churn drill holes shall be started at not less than 8-inch diameters and shall be finished at not less than 4-inch diameters. Diamond drill holes shall be not less than AX size. Holes shall be reamed and cased or cemented and re-drilled as necessary."

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate amount which the Government may be required to contribute, nor the fixed unit cost of any item of work.

Executed in quintuplicate the day and year first above written.

S.P.H

December 3, 1959

Memorandum

To: Chairman, Operating Committee, OME, Washington, D. C.

From: Executive Officer, OME Field Team, Region II

Subject: Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

In reply to your memorandum of November 10, 1959 relative to percussion drilling on the subject contract, the following explanation and copy of memorandum from Mr. H. K. Stager, Geologist, U.S.G.S. are submitted:

Because of the difficulties in obtaining satisfactory samples from the rotary drill used in drill hole No. 5, the drilling contractor's refusal to continue drilling for less than $11.60 per foot and as a diamond drill rig was not available, the Operator was given verbal approval in the Field to explore a part of the northwest area of the Southpaw No. 3 claim by use of a large percussion wagon drill, using sectional drill rods and tungsten carbide bit.

This type of drilling totaling 256 feet in drill holes Nos. 6, 7, 7A, 8, 9, and 10 and 72 feet in No. 11, was particularly successful in exploring the extensively fractured dolomite to the intersection with the Eureka quartzite.

The drill holes were relatively shallow, reliable sample information was obtained and the method was considered to be in the best interests of the Government.

The drilling costs of $5.00 per foot were comparable as the Operator had to supply the equipment, install an air compressor and compressed air lines to the drill locations.

Apparently through an oversight, the addition of "percussion drilling" was not included when Amendment No. 3 was proposed by the

Reno, Nevada office of OME on November 4, 1958. Therefore, it is recommended that the total of 256 feet of exploratory drilling by a percussion drill be approved, in lieu of same footage by one of the methods specified in Amendment No. 3.

Memorandum

December 1, 1959

To: W. F. Dietrich, Executive Officer, OME Field Team, Region II

From: H. K. Stager, U. S. Geological Survey

Subject: Use of Percussion-type drill at the Southpaw mine, DMEA-4813, Contract Idm-81161, Lincoln County, Nevada

Of the 997 feet of exploratory drilling at the Southpaw mine 256 feet was done with a percussion-type drill. The Operator resorted to this type of drill only after experiencing considerable difficulty and expense in attempting to drill the badly fractured dolomite with a churn drill and a rotary drill. As I pointed out in the Final Report on the project, of the four types of drills used, the percussion-type drill was the best suited to the job and yielded the best results although it was limited to holes of less than 100 feet in depth and was only used in the north part of the area where drilling depths were relatively shallow.

I was not aware, at the time of the drilling, that the contract as amended specified "churn, rotary, or diamond-drilling". I did not authorize the use of the percussion drill but had the matter come up I would have recommended its use as the best available type of drill for the shallow drilling area where it was used.

Contract No. Ids-E 1161

Gentlemen:

Reference is made to the Termination of the subject contract as of August 28, 1959 and to Mr. R. G. Lee's letter of October 13,1959 which in the last sentence states:

"We will prepare a final geological and engineering report on the project as soon as time permits".

In order that we may complete the reports, accounting and audits of the contract, noted in Article 5 and Article 5 (C) of the contract, we will appreciate receiving the Operator's Final Report as soon as possible.

Thank you for your cooperation in this matter.

Very truly yours,

W. F. Dietrich

REVIEW OF EXAMINATION REPORT

State Nevada ✓ County Lincoln Mineral products Manganese

Name of property Southpaw Joint Venture: Southpaw Claims

Owner Ray (Dick) Arnold, Ora Stewart Tuttle, La Vern Stewart Address Alamo, Nevada

Lessee or Operator Combined Metals Reduction Co., Southpaw Joint Venture, P. W. Duffin, Sr. Address 218 Felt Bldg., Salt Lake City, Utah

Location The Southpaw mine is near the head of Timber Canyon on the northern slopes of Irish Mountain, at an altitude of about 7,000 feet in the unsurveyed Irish Mountain mining district of west-central Lincoln County. It is about 68 miles northwest of Caliente, Nevada

Examined by G. G. Gentry, U.S.B.M. & H. K. Stager, U.S.G.S. Date April 25, 1959

Apparent quality of examination and report Good

Discussion and review: The manganese ore bodies that had been previously mined were gently dipping, pyrolusite-rich lenses of brecciated limestone in bedding-plane faults along and near the limestone-quartzite contact.

Other ore bodies of similar size and character were inferred east, west and south of the mined-out area. Drilling has now explored this area for faulted continuations of the ore body without success. The remaining unexplored area southwest of the mine is so reduced in size that the probability of making a significant discovery is now remote.

Measured and indicated ore reserves total about 200 tons averaging about 33 percent manganese, exposed in the old workings. The unexplored area southwest of the old workings are inferred to contain about 5,000 tons of ore averaging about 36 percent manganese. A pseudo certification was embodied in Paragraph 4 (d) of Amendment No. 4. ? N.G. ?

I concur with the examiners' report.

See Dietrich, memo of Jan. 18, 1960 for recommendations against certification

INTRODUCTION

The Southpaw Group of mining claims, Lincoln County, Nevada, was explored by the Southpaw Joint Venture, a partnership consisting of P. W. Duffin, Sr., Las Vegas, Nevada and Combined Metals Reduction Company, P. O. Box 150, Salt Lake City, Utah.

Part of the exploration work was done in cooperation with the Defense Minerals Exploration Administration, Docket No. DMEA-4813, Contract No. Idm-E 1161, dated December 27, 1959.

The cost of the project was $7,870.00 of which the Government's share at 75 percent was $5,902.50 (subject to audit).

The work was begun on May 1, 1958 and was terminated by mutual agreement on August 28, 1959, before completion of the drilling program.

An examination to evaluate the completed work was made on April 25, 1959 by Glenn G. Gentry, U. S. Bureau of Mines, accompanied by Mr. R. G. Lee, representing the operator.

SUMMARY

The purpose of the project was to explore areas east, west and south of the Southpaw mine, for faulted continuations of the ore bodies.

Work completed under the contract consisted of:

1. 168 hours of bulldozing access roads to drill sites.
2. 997 feet of drill hole.
3. 225 feet of drill-hole casing installed.
4. 19 samples were assayed.

No significant manganese-bearing material was disclosed by the drilling and therefore no ore reserves are estimated as a result of the DMEA work.

CONCLUSIONS AND RECOMMENDATIONS

Three sides of the previously productive mine area have been explored by drilling for faulted continuations of the ore bodies without success.

Because the potential is now reduced to about one-fourth of the original estimate, the probability of making a significant discovery is remote.

Based upon geological information obtained from the logs of the drill holes, additional exploration is not justified and further Government assistance, if requested, is not recommended.

A pseudo certification is contained in paragraph 4 (d) of Amendment No. 4.

see Dubrich memo of 8/18/60

LOCATION, ACCESSIBILITY AND LOCAL FACILITIES

The Southpaw mine is in the Irish Mountain mining district, near the head of Timber Canyon on the northern slopes of Irish Mountain, at an altitude of about 7,000 feet, in an unsurveyed district of west-central Lincoln County, Nevada and about 68 miles northwest of Caliente, Nevada.

From Caliente the mine is reached by traveling westerly 42 miles on paved U. S. Highway No. 93, then north 4 miles on paved Nevada State Highway No. 38, then continue northwesterly 22 miles on the graded and graveled continuation of Highway No. 38.

A small cabin adjacent to the mine was used to accommodate the exploration crew of two to three men.

Labor, supplies and equipment are available in Caliente, Nevada and Pioche, Nevada.

Water is available during part of the year from springs about one mile north of the mine. Power is supplied by diesel and gasoline engines.

Air-compressor capacity is about 260 c.f.m.

THE PROPERTY

History and ownership:

Prospecting in the district for high-grade silver ores probably began in the 1860's. However, the exploration and development of the mine and the production of manganese ores started during 1950 and was continuous to October, 1957.

Twelve unpatented mining claims are owned by Ray (Dick) Arnold, Ora Stewart Tuttle and La Vern Stewart.

On August 9, 1950, a mining lease and option to purchase was granted by the owners to A. W. Bush and P. W. Duffin, Sr. for a period of 25 years, which superceded a mining lease dated May 27, 1950 granted to A. W. Bush and Fay Stewart. The interest of Fay Stewart was transferred and assigned to P. W. Duffin, Sr.

On October 30, 1950, a memorandum of agreement between the owners and Combined Metals Reduction Company granted that company an exclusive option, pursuant to certain conditions and payments, which expired on January 2, 1951 if the option was not exercised.

On July 3, 1951, a Joint Adventure agreement was made between P. W. Duffin, Sr. and Combined Metals Reduction Company inasmuch as Mr. Duffin had acquired all of the right, title and interest of A. W. Bush in the mining lease and option dated August 9, 1950.

On September 12, 1951, a supplemental agreement was made between the owners and P. W. Duffin, Sr. individually and as assignee of A. W. Bush, relative to royalty payments.

The twelve unpatented mining claims, recorded in the Office of the Lincoln County Recorder at Pioche Nevada, are: Southpaw, Southpaw Nos. 1 - 4, inclusive, Southpaw Extension, Southpaw Extension Nos. 1 - 6, inclusive. The DMEA contract was confined to the Southpaw Nos. 2, 3 and 4 claims (Fig. 2).

The DMEA exploration drilling was done on the Southpaw Nos. 2 and 3 mining claims.

In the DMEA contract, as originally executed, a certain area termed the "Excluded Area" was excluded from the exploration project. This area contained the surface and underground workings of the mine.

Amendment No. 3, dated November 14, 1958, added the above "Excluded Land" to the land included in the contract and subject to royalty provisions of the contract.

Development:

The mine workings consist of an adit at elevation 6992.75 feet, extended 140 feet westerly to the collar of a winze inclined 65° south and extended 70 feet. From stopes adjacent to the bottom of the winze about 400 feet of cross cutting and drifting has been done.

The stopes above the adit have a strike length of 150 feet and below the adit a strike length of 250 feet. Stope widths range from 15 feet to 40 feet. The area above the adit has been stoped to the surface and below the adit the average stope height is about 40 feet.

Mining has been done in open, stulled stopes, using roof bolts where applicable and leaving pillars for additional support where necessary.

The mine workings were all in good condition and accessible at the time the DMEA contract was terminated.

Production:

Depletion of manganese ore of economic grade occurred prior to the execution of the DMEA contract. Therefore, the mine was idle and no production made during that period. Production of ore prior to the contract was reported to be 17,334 dry short tons, averaging 32 to 40 percent manganese and valued at $630,312.00

THE DMEA PROJECT

The work authorized by the contract consisted of bulldozing access roads to the drill sites, drilling 12 churn-drill holes and sampling and assaying the mineralized zones.

The completed work is itemized as follows:

Item	Authorized	Completed	Remainder
Bulldozing roads	168 hrs.	168 hrs.	0.0 hrs.
Drilling	1,800 Ft.	997 Ft.	803 Ft.
Casing	600 "	225 "	375 "
Lost Casing	200 "	45 "	155 "
Samples	50	19	31

Four amendments were issued during the period of the contract:

No. 1, dated March 26, 1958, authorizing beginning of the work on or before May 15, 1958 and completion of the work within 7 months from the date of the contract.

No. 2, dated July 18, 1958, extended the date fixed for completion of the work from July 27, 1958 (Amendment No. 1) to November 27, 1958.

No. 3, dated November 14, 1958, authorized drilling by either churn, rotary or diamond drill. The previously excepted land was added to the land referred to in Article 2 of the contract and made subject to the land and royalty provisions of the contract.

No. 4, dated January 6, 1959, suspended work under the contract during the period beginning November 27, 1958 and ending not later than April 27, 1959.

The date fixed in Amendment No. 2 for completion of the work was extended from November 27, 1958 to September, 1958, and provided for a pseudo certification of the project. (Nullified by termination agreement)

The maximum period for royalty payments and the lien to secure the payments thereof was further extended from eleven (11) years to twelve (12) years from the date of the contract.

Exploration procedure:

The drilling was done with churn, rotary, percussion and diamond drills. — not authorized

Because of the fractured and brecciated nature of the dolomite and limestone near the quartzite contact most of the holes were completed with difficulty and much time was lost because of broken and stuck tools. Of the four types of drills used, the percussion-type drill was the best suited to the job, but was limited to holes of less than 100 feet in depth and could only be used in the north part of the area where drilling depths were relatively shallow.

Drill sample sludges were retained by the operator, in adequate properly-marked containers and stored at the Combined Metals Reduction Company milling plant near Pioche, Nevada.

The work was well done and is satisfactory to the Government. The operator's Final Report has not yet been submitted.

EXPENDITURES

Total approved cost of the project $12,852.00

Units, Unit Costs and Total Expenditures:

Access roads to drill sites	168 hrs. at $14.00/hr	$ 2,352.00
997 feet of drill hole	at 5.00/per ft.	4,985.00
225 feet of casing installed	at 2.00/per ft.	450.00
45 feet of lost casing	at 1.00/per ft.	45.00
19 samples assayed for Mn.	at 2.00/each	38.00
Total expended (subject to audit)		$ 7,870.00
Government's share of total expenditures at 75%		5,902.50
Unexpended funds		4,982.00
Government's share of unexpended funds at 75%		3,736.50
Value of production during the contract		None
Royalty paid to the Government		None
Royalty due the Government		None

The lien on the property will expire on December 27, 1969.

EQUIPMENT

Work performed under the contract was on a unit basis and the Government has no interest in equipment, materials or supplies.

GEOLOGY

Geologic Setting:

The South Paw claims are in an area of high relief on the north flank of Irish Mountain, and the rock exposures are good. The only rocks in the vicinity of the mine are limestone and quartzite of Ordovician age.

The oldest rock in the mine area is the Eureka quartzite, a white to pink, vitreous, nearly pure silica quartzite about 200 feet thick that occurs in beds from six inches to six feet thick. It crops out in bold white cliffs and steep-sided ridges. Overlying the quartzite is the Ely Springs dolomite, a dark-gray to blue-black, finely crystalline, cherty, dolomitic limestone that occurs in beds about two feet thick. The Ely Springs dolomite is 500 to 800 feet thick in the nearby Pioche district and is several hundred feet thick in the mine area but the top is not exposed. The quartzite and limestone, in general, strike west and dip 20° to 25° N.

The most prominent structure in the mine area is an east-striking graben about one thousand feet wide and several thousand feet long. Within the graben the rocks are cut by a series of step faults that strike east and dip 65° to 85° S. Displacement along the faults is 50 to 100 feet. Movement on bedding-plane faults along and near the quartzite-limestone contact between the step faults has caused brecciation of the limestone and it is within this brecciated material that the manganese ore bodies occur.

Ore Deposits:

The manganese ore bodies that have been mined are gently-dipping, pyrolusite-rich lenses of brecciated limestone in bedding-plane faults along and near the limestone-quartzite contact.

Pyrolusite, the only manganese mineral that was identified, occurs in soft earthy masses and as finely crystalline layers in brecciated dolomitic limestone. Gangue minerals are calcite, quartz as quartzite and chert fragments, limonite, and small pods of light-brown montmorillonite clay. Traces of copper, lead, zinc, and phosphorus are present in the ore but no minerals of these metals were seen and they do not exceed the maximum allowable amounts for metallurgical-grade manganese ore.

The deposit that has been mined was about 300 feet long, 200 feet wide, from 2 to 50 feet thick and averaged 8 feet thick (Fig. 3). It has yielded about 17,500 tons of ore that averaged about 36 percent manganese. Normal faulting along two faults, about 100 feet apart and having displacements of about 60 feet each, has separated the deposit into three segments. Other faulted segments are present in the mineralized area and undiscovered ore shoots in similar geologic settings contained in these fault flocks were the targets of the DMEA exploration.

The eleven test holes drilled under the DMEA contract (fig. 3) were all drilled through the ore horizon and into the Eureka quartzite that assayed a trace to 0.5 percent manganese and hole No. 5 cut 8 feet of low-grade material that assayed from 1 to 4 percent manganese but none of the holes cut material that could be classed as ore-grade.

Ore Reserves:

Measured and indicated reserves total about 200 tons of ore that averages about 33 percent manganese. These reserves are exposed in the old mine workings as pillars and as thin layers of ore around the margins of the old stopes.

Inferred reserves are about 5,000 tons of ore having an average grade of about 36 percent manganese. These reserves are contained in one or more downfaulted segments of the deposit southwest of the mined area and in small ore shoots along the strike of the deposit east of the mine workings.

Logs of DMEA drill holes

Hole No. 1

Coordinates: 9,630 N and 10,250 E
Elevation: 7,017 feet
Location: Southpaw No. 2 claim
Started: May 1, 1958
Finished: June 5, 1958
Hole Size: 8" at collar - (churn-drill hole)
Depth: 197 feet
Driller: M. J. Fullerton

From	To	Description
0	4	Wash
4	18	Blue limestone, thick bedded, massive
18	22	Fault, limestone
22	50	Blue dark limestone, hard, massive
50	55	Fault, limestone
55	125	Dark limestone, softer, massive, hard rib at 85'
125	165	Dark dolomite, water at 165'
165	190	Dark dolomite, fractured, medium hard
199	192	Dolomite and clay, contact
192	197	Quartzite, Eureka Quartzite

Hole No. 2

Coordinates: 9,980 N and 10,296 E
Elevation: 7,000 feet
Location: Southpaw No. 2 claim
Started: June 6, 1958
Finished: June 13, 1958
Depth: 84 feet (churn-drill hole)
Driller: M. J. Fullerton

From	To	Description
0	20	Dark-gray dolomite and limestone
20	40	Dark-gray dolomite
40	60	Silicified dolomite, hard
60	75	Dark dolomite, some manganese stain
75	84	Quartzite, Eureka Quartzite

Hole No. 3

Coordinates: 9,547 N and 10, 330 E
Elevation: 7,019 feet
Location: Southpaw No. 2 claim
Started: June 18, 1958
Finished: July 29, 1958
Depth: 169 feet (churn-drill hole)
Driller: M. J. Fullerton

From	To	Description
0	20	Wash
20	50	Dark-gray dolomite and limestone
50	65	Gray dolomite
65	75	Dark dolomite
75	105	Dark-gray dolomitic limestone
105	115	Light-gray limestone and calcite
115	145	Dark-gray dolomitic limestone and some calcite
145	155	Gray dolomitic limestone containing manganese
155	165	Clay and gouge at contact of limestone and Eureka Quartzite, manganese stain throughout
165	169	Mostly quartzite, dark-brown to white

Hole No. 4

Coordinates: 9,432 N and 10,125 E
Elevation: 7,069 feet
Location: Southpaw No. 3 claim
Started: August 4, 1958
Finished: November 21, 1958
Depth: 215 feet (churn-drill hole)
Driller: M. J. Fullerton

From	To	Description
0	8	Overburden
8	45	Blue dolomite and limestone
45	90	Dark fractured dolomite, hard to medium hard
90	110	Hard fractured dolomite, hard slickenside
110	135	Dolomitic limestone, softer, lighter color
135	165	Dolomitic limestone, harder, darker
165	205	Dolomitic limestone, softer, quartzite contact
205	215	Eureka quartzite

Hole No. 5

Re: Docket No. BMRA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

Dear Mr. Lee:

We note on the operator's Monthly Report and Voucher for November 1958 that twelve (12) samples from the subject contract were analyzed for manganese. As we are preparing a Final Report on the project, will you please furnish this office with the following information:

Drill hole number from which the 12 samples were obtained, and the sample interval and percent of manganese.

Please use the same procedure as that in your report dated August 10, 1958.

Very truly yours,

EXPLORATION PROJECT CONTRACT
SOUTHERN JOINT VENTURE
DOCKET NO. [illegible]

TERMINATION AGREEMENT

It is agreed this _____ day of _____, 1959, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government", and Southern Joint Venture, hereinafter referred to as the "Operator", that Exploration Project Contract No. Idm-X1161 (Docket No. [illegible]), dated December 27, 1957, as amended, hereinafter referred to as the "Contract", that:

1. Effective July 1, 1959, the Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

2. The Government shall contribute only to the fixed unit costs of work performed prior to said effective date.

3. The Operator shall promptly perform all winding-up and settlement actions provided for in the Contract, including the rendering of the final report and final account.

4. The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of said Contract, except as otherwise provided for in this termination agreement.

5. All rights of the Government provided for in this Contract with respect to audits, maintenance of records, certification of

discovery or development, percentage royalty and liens for its payment, and recovery of any overpayment, are preserved.

IN WITNESS WHEREOF, the parties have executed this agreement as of the day and year first above written.

Subject: Docket No. DMEA-4813 (Manganese)
Contract No. 1161
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada

On May 23, 1959, after completing drill hole No. 11 and obtaining no mineralization, the operator requested an amendment to change the exploration from drilling to underground drifting.

This request was denied and the operator was duly notified on June 26, 1959.

By memorandum of June 19, 1959, the Operating Committee advised: "We will prepare here a Termination Agreement for the above-referenced contract".

This office has no record of completion of the Termination Agreement. Please advise us of the present status of this docket.

From: Acting Executive Officer, OME Field Team, Region II

Subject: Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

Enclosed are two copies of request for an amendment to the referenced contract, and a memorandum by H. K. Stager recommending that the request be denied and that a termination agreement be prepared. Mr. Dietrich and I concur in the recommendation.

Three sides of the mine have been explored for faulted continuations of the ore body without success, and the possibilities for a discovery are limited to the remaining southwest side where the operator proposes to explore. Because the possibilities are reduced to about one-fourth of those originally predicicated, the possibility of a significant discovery is now remote.

Although roads have already been bulldozed to two of the five remaining sites as a part of the contract work, it would appear to be in the best interest of the Government to sacrifice this amount rather than spend more money (at 75 percent participation) on drilling that is expected to be technically unsatisfactory.

Memorandum

To: Acting Executive Officer, OME Field Team, Region II

From: H. K. Stager, geologist, U. S. Geological Survey

Subject: Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

The Operator, by letter dated May 23, 1959, has requested an amendment to the DMEA contract to authorize driving an exploratory drift to the west from the lower level of the Southpaw mine in lieu of the remaining authorized drilling from surface sites. This request was made because of anticipated difficulties in drilling the planned test holes in the southwest part of the property.

I recommend that the request be denied for the following reasons:

1. Driving of the drift will test only a small part of the remaining untested area thereby substituting the exploration of a small area for exploration of the larger target originally intended.

2. The size of the ore body that can be inferred in the area to be tested by the proposed drift does not justify the expense of the drift.

Although the entire area that was to be drilled under the DMEA contract has not been explored a large part has been sufficiently tested to indicate that the deposit is much smaller than was inferred. For this reason, I recommend that if the operator is not willing to drill, or for reasons of inaccessibility or difficult conditions cannot drill, the few remaining holes in the approximate locations specified in the contract that a mutual termination agreement be prepared.

DMEA Drilling Project - Southpaw Mine DMEA #4813 - Manganese

June 1, 1959

Mr. Paul Gemmill, General Manager

Reginald G. Lee

Dear Paul:

Core drilling in DMEA drill hole No. 11 at the Southpaw Manganese Mine was resumed on April 27th, 1959.

This drill hole was down to 95.0 feet of depth in latter part of November, 1958 when all available water supply froze up.

No diffidulty was experienced to reach the bottom of the drill hole. The core from 95 feet to 122 feet was a light gray dolomitic limestone showing a little coating of manganese in fractures at 120 feet. The Eureka Quartzite was encountered at 122 feet and extended to 123 feet in the quartzite. Attached is print of log and location of drill hole No. 11.

Re: Docket No. DMEA - 4813
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

Dear Mr. Smith:

Drill Hole No. 11 was completed on May 6, 1959 at 123 feet of depth. The Eureka Quartzite was encountered at 122 feet. No manganese was found in this drill hole.

Information obtained from the eleven drill holes indicate that the manganese mineralization is not wide-spread at the contact of Eureka Quartzite and the Ely Spring Dolomite, but is more or less confined to small bodies along certain fault structures.

The attached map C-1125 suggests a south west trend of the ore zone. Drilling from the surface to the quartzite contact at Coordinates 9860 N and 9625 E would involve 275 feet of drilling in faulted, brecciated and silicified dolomitic limestone, with strong possibilities that the drill hole would be abandoned before completion.

A much more practical way of obtaining information as to the south-westerly extension of the manganese mineralization is to drift as shown in orange color on the attached map C-1125.

It is here proposed that the balance of the fund under the Contract of $4,982.00 be applied to drifting, beginning at face of present s.w. drift, drifting and extending in a northwesterly direction for 122.0 feet. The unit drifting cost is estimated at $40.84 per foot. This drift will be at or near the contact.

INTERIM REPORT

Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E1161

Accompanied by Mr. R. G. Lee, representing the Operator, this project was visited on April 25, 1959.

Due to weather conditions and freezing temperatures, work was discontinued early in December, 1958. Therefore, there has been no change in the status reported in the interim report of December 29, 1958.

Pursuant to Amendment No. 4, the Operator will resume work on April 27, 1959 and expects to complete Drill Hole No. 11 on or about May 15. Upon completion of this drill hole, the Operator will submit a report of the results of the drilling and probably will request some type of additional exploration.

Gentlemen:

Enclosed are the original and four copies of proposed Amendment No. 4 to the above-referenced contract, signed by the Acting Director for the Government.

If the terms and conditions of the proposed amendment are satisfactory to you, all five copies should be signed by your firm. The "Operator's copy" should be retained by you and the original and remaining three copies should be returned to this office.

If any part of the proposed amendment does not have your approval, the original and all copies should be returned, together with your suggested changes.

Very truly yours,

S. RICKER

Docket No. DMEA-4813 (Manganese)
Contract No. Idm-E 1161
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada

Accompanied by Mr. R. G. Lee, representing the Operator, the project was inspected on December 9, 1958.

Drill Hole No. 4 was extended a total of 215 feet, encountering the Eureka quartzite at 205 feet. No manganese mineralization was found. Drill Hole No. 5 encountered low grade manganese from eight feet to sixteen feet below the collar. The grade is non-commercial and six adjacent nonmineralized drill holes indicate slight probability of making a significant discovery in that area.

Four samples from Drill Hole No. 5, reported on October 22, 1958, were analyzed as follows:

Sample No.	Percent Mn.
BM 2538	2.4
2539	3.9
2540	1.1
2541	2.0

Drill holes Nos. 6, 7, 7-A, 8, 9, 10, explored an area west and north of the formerly excluded land and were unsuccessful. Drill hole No. 11 (refer to attached map) was located to explore an area near the southeast corner of the formerly excluded area and has not been completed. The base of the cliff and steep terrain precluded reaching this area from other, except underground, locations.

Progress to date:

Item	Allowed	Completed	Remainder
Bulldoze access roads	168 hours	168 hours	0
Drilling	1800 ft.	970 ft.	830 ft.
Casing	600 "	150 "	450 "
Lost casing	200 "	10 "	190 "
Samples assayed	50	7	43

Resume of drilling:

Drill Hole No.	Depth Feet	Inclined	Coordinates	Collar Elev.	Remarks
1	197	Vertical	9630 N 10250 E	7017 ft.	Intersected quartzite contact.
2	84	"	9980 N 10296 E	7000	"
3	169	"	9547 N 10330 E	7019	"
4	215	"	9432 N 10125 E	7069	"
5	26	"	10053 N 9886 E	7054	"

Drilling, cont'd.:

Drill Hole No.	Depth Feet	Inclined	Coordinates	Collar Elev.	Remarks
6	72	Vertical	10019 N 9722E	7138	Intersected quartzite contact.
7	26	"	10083 N 9742 E	7129	"
7 A	52	"	10083 N 9742 E	7129	"
8	15	"	10184 N 9825 E	7110	"
9	14	"	10220 N 9875 E	7102	"
10	5	"	10252 N 9910 E	7095	"
11	95	-60°	9780 N 10055 E	6994	Not Completed.

Drill Hole No. 11 was extended through nonmineralized limestone and at 95 feet had encountered softer, black dolomite. The Operator estimates drilling an additional 40 feet will be required to reach the quartzite contact.

Freezing temperatures have eliminated the only source of water in the area and the Operator has discontinued work until about May, 1959. On November 17, 1958, the Operator requested a recess and an extension of time, beginning November 27, 1958 and ending September 30, 1959 because of the difficulty and

additional expense of operations during the winter months.

I recommend the necessary extension of time for completion of Drill Hole No. 11 and termination of the project at that time if no significant mineralization is encountered.

Financial:

Expenditures allowed	$12,852.00
Expended as of Oct. 31, 1958	6,896.00
Unexpended	$ 5,956.00

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. IMEA 4813

AMENDMENT NO. 4

It is agreed this _____ day of _____ 195___, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration, hereinafter referred to as the "Government", and Southpaw Joint Venture, hereinafter referred to as the "Operator", that Exploration Project Contract No. Idm-E1161 (Docket No. IMEA 4813), dated December 27, 1957, as amended, is further amended effective November 27, 1958, as follows:

1.(a) Work under the contract shall be suspended during the period beginning November 27, 1958, and ending not later than April 27, 1959.

(b) No costs incurred by the Operator during the period of suspension shall be allowable for contribution by the Government.

(c) The Government shall not contribute to any costs of rehabilitation or repair which in its opinion would not have occurred if there had been no suspension of work.

(d) The Operator, at its own cost and expense, without contribution by the Government, during the period of suspension shall preserve and protect the project work.

2. In Article 1 of the contract the period for completion is further extended from November 27, 1958, to September 27, 1959.

3. The maximum period for royalty payments and lien to secure the payment thereof, provided for in the contract, is further extended from eleven (11) years to twelve (12) years.

4. It is of the essence of this contract that the work be resumed before the termination of the period here fixed for suspension; and if it is not resumed within the time designated, in a manner required to bring the project to completion as required the following provisions shall thereupon become effective:

(a) Effective April 27, 1959, the contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

(b) The Government shall contribute only to the fixed unit costs of work performed prior to said effective date.

(c) The Operator, as principal if the Operator is the producer or as surety if the Operator is not the producer, shall pay to the Government the royalty on production provided for in the contract in the same manner and amount, for the same period, and subject to the same conditions as if a certification of discovery or development had been made, such certification being hereby waived.

(d) The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of the contract, except as otherwise provided in this Amendment No. 4.

5. It is of the essence of this contract that the work be completed by September 27, 1959, and if it is not so completed, in a manner required to bring the project to completion as required, the following provisions shall thereupon become effective:

(a) The Government shall contribute only to the fixed unit costs of work performed prior to said effective date.

(b) The Operator, as principal if the Operator is the producer or as surety if the Operator is not the producer, shall pay

to the Government the royalty on production provided for in the contract in the same manner and amount, for the same period, and subject to the same conditions as if a certification of discovery or development had been made, such certification being hereby waived.

(c) The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of the contract, except as otherwise provided in this Amendment No. 4.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, nor the agreed unit cost of any item of work.

Executed in quintuplicate the day and year first above written.

Title_____

JUSTIFICATION

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA 4513

The Operator by letter of November 14, 1958, requested a recess in contract work for a period beginning November 27, 1958, and ending April 27, 1959, and also requested that the completion period for contract work be extended to September 30, 1959. The request was based on the difficulty of keeping roads open during the season of deep snow.

The Field Team memorandum of November 17, 1958, transmitted the Operator's request, noted that the mine had been a good producer (17,334 tons, averaging 32 to 40 % Mn, value $630,312 at railroad shipping point prior to the date of the contract) estimated that the remainder of the exploration work authorized by the contract has a good possibility of again putting the mine on a productive basis and recommended that the Operator's request be granted.

Evidence in the docket confirms the conclusions of the Operator regarding operating conditions in winter, and supports the Field Team's belief in the geologic possibilities of the remaining exploration work.

Amendment No. 4 has, therefore, been prepared to grant a recess or suspension in project work from November 27, 1958, to April 27, 1959, to extend the completion date to September 27, 1959, and to extend the royalty repayment period from 11 years to 12 years.

A "pseudo-certification" has been included, to become effective if work is not resumed before the end of the recess, or if resumed but not completed before the completion date as extended.

APPROVAL BY DMEA EXECUTIVE OFFICER OR ALTERNATE:

Signature S. Ricker Title Executive Officer Date Jan. 12, 1959

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

COMBINED METALS REDUCTION COMPANY

D. M. E. A. Drilling Program - Southpaw Mine -DMEA Project 4813- month of November, 1958
December 23, 1958

Mr. Paul Gemmill, General Manager

Reginald G. Lee

Dear Paul:

The DMEA Exploration Drilling Project at Southpaw Manganese mine made and advance of 125 feet during the first 27 days of the month.

No. 4 Churn Drill Hole was completed at 215 feet of depth. The Eureka Quartzite was encountered at 204 feet. No manganese mineralization was found in this drill hole. The contact of the Ely Spring Dolomite and the Eureka Quartzite was abrupt, no alteration or manganese mineralization was noted.

Drill Hole No. 11, location shown on Map C-1125, was started with a large percussion wagon drill rig. At 72 feet of depth the drill cuttings showed a considerable amount of moisture present. At this point the percussion drilling was stopped in favor of core drilling, using AX bit. The drill hole was extended to 95 feet of depth when all available water supply froze up. Compressed air was tried as a substitute for water in removing the fine cutting from the core bit, but this did not work, due to the moist condition of the ground.

The nearest supply of water is Hiko, about 21 miles away, and all upgrade haul on rough dirt road.

A supply of water near the mine will not be available before spring, at which time No. 11 Drill Hole will be completed to the quartzite contact. Drilling during the winter months is not practical due to cold weather and deep snow in the canyon where the Southpaw Mine is located.

Very truly yours,

Reginald G. Lee

Gentlemen:

Enclosed are the original and four copies of Amendment No. 3 to the above-referenced contract, signed by the Acting Director for the Government.

If the terms and conditions of the proposed amendment are satisfactory to you, all five copies should be signed by your firm. The "Operator's copy" should be retained by you and the original and remaining three copies should be returned to this office. The amendment confirms the work you are now doing.

The recess and extension of completion time requested by Mr. Lee has been forwarded to our Washington office for consideration.

Very truly yours,

S. Ricker

Re: Docket No. D.M.E.A.
4813 (Manganese)
Southpaw Joint Venture
Southpaw Mine
Lincoln County, Nevada
Contract No. IBM-E 1161

Dear Mr. Ricker:

We hereby request a recess in the above referred contract for five months, beginning November 27, 1958 and ending April 27, 1959. Extension of time to complete contract to September 30, 1959 is needed.

About one half of the drilling has been completed to date. The Project has been active since last half of April of this year. However, the recess time requested above is for season of deep snow and difficulty in keeping roads open in the Project area during the winter months.

We wish to complete the Project at the earliest date economically possible, and ask that a recess in time and extension of time be granted.

Very truly yours,

Reginald G. Lee
General Supt. of Mines

Contract No. Idm-E1161

Dear Mr. Ricker:

In accordance with the request of the Operator of September 19, transmitted with your recommendation of September 24, 1958, enclosed are the original and four copies of Amendment No. 3 to the above-referenced contract, signed by the Acting Director for the Government. Two extra copies are enclosed for the use of the Field Team.

If the terms and conditions of the proposed amendment are satisfactory to you and the Operator, all five copies should be signed by the Operator and the usual distribution made.

If any part of the proposed amendment does not have your approval or that of the Operator and cannot be altered within your delegated authority, the original and all copies are to be returned to this office, together with the proposed changes for consideration.

Sincerely yours,

George C. Selfridge

Memorandum

To: Operating Committee, OME, Interior Building
Washington 25, D. C.

From: Executive Officer, OME Field Team, Region II

Subject: Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claim
Lincoln County, Nevada
Contract No. Idm=E 1161

Enclosed are two copies of a memorandum dated October 29 from H. K. Stager, Geological Survey, relative to your letter of October 29, 1958.

In view of this memorandum and consultation with Roscoe Smith and Glenn Gentry, we would suggest that you prepare an amendment authorizing substitution of rotary or diamond drilling for churn drilling. This would be in accordance with your telegram of September 24.

Our last information indicates that Hole No. 4 has not been completed. Hole No. 5 was started in the vicinity of proposed Hole No. 8, as suggested in your letter. Field inspection will be made soon to decide on the location of any additional drilling.

S. Ricker

Contract Idm-E1161

The following comments are in reference to the questions raised by the Chairman of the Operating Committee in his letter to you of October 15, 1958.

Churn drill holes 3 and 4 were drilled at sites not specifically designated in the contract for two reasons: (1) the contract prohibited drilling within 100 feet of the excluded area, thereby eliminating sites 2, 3, 5, 6, 7, and 8, and (2) any of the faulted segments of the ore zone may contain ore bodies for the reasons outlined in the next paragraph. Manganese-stained outcrops indicate a reasonable possibility of ore bodies in the area of holes 3 and 4.

There is an apparent rake of the deposit to the southwest and certainly several holes should be drilled in this sector before drilling is stopped. The mining and exploration to date has not

indicated the source, or origin, of the deposit. The faults are probably pre-mineral and may have served as channels for metal-bearing solutions as there is more manganese-rich material along the fault planes than could be accounted for by drag but there is also evidence of post-mineral movement so the problem is not a simple one of finding faulted segments of a once-continuous ore body.

I am reluctant to recommend approval of any drifting or crosscutting at this time because this would explore only a small area instead of the much larger area originally planned to be tested by drilling.

I do not believe that rotary drilling will be any faster or more successful than the churn-drilling has been in obtaining the desired information. Although the unit cost would probably be considerably higher than that allowed by the contract, it may be necessary to utilize a diamond drill capable of taking an NX size core before satisfactory results can be obtained.

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA 4813

AMENDMENT NO. 3

It is agreed this _____ day of _____, 1958, between the United States of America, acting through the Department of the Interior, Office of Minerals Exploration (hereinafter referred to as the "Government" and the Southpaw Joint Venture, hereinafter referred to as the "Operator" that Exploration Project Contract No. Idn-E1161 (Docket No. DMEA 4813), dated December 27, 1957, as amended, is further amended as follows:

1. In Annex I, the area described as "EXCEPTED LAND", and shown on map, Figure 2, stated to be excepted from the land and royalty provisions of the contract, is hereby added to the lands referred to in Article 2 of the contract, and made subject to the land and royalty provisions of the contract.

2. In Exhibit A, third paragraph, change "churn drill holes" to "churn, rotary, and/or diamond core drill holes." (*)

3. In Exhibit A, page 2, footnote 2, third line, delete the words "inside or", and in Figures 2 and 3 delete the words "Excluded Area" and the boundary lines drawn to designate that area.

This Amendment shall not be construed to increase the estimated total cost of the project, the aggregate amount which the Government may be required to contribute, nor the fixed unit cost of any item of work.

Executed in quintuplicate the day and year first above written.

THE UNITED STATES OF AMERICA

By _____
Acting Director, Office of Minerals Exploration

SOUTHPAW JOINT VENTURE

BY _____

Title _____

(*) Diamond core drill holes shall be not less than size AX, and the price paid for such shall include the cost of reaming and casing, and/or cementing and redrilling

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA 4818

AMENDMENT NO. 3

Justification

The Operator, by letter of September 19, 1958, requested, and the Field Team, in its letter of September 24 transmitting the Operator's request recommended, that authorization be granted to substitute rotary and/or diamond core drilling, at the same price per foot, for the churn drilling provided for in the contract.

The Operator also requested and the Field Team recommended that a portion of the funds allocated for drilling be diverted to permit drifting and crosscutting on the lower level of the mine, followed by underground diamond drilling from the new face of the drift or crosscut, for the purpose of exploring possible southeasterly extensions of the mineralized zone.

The Division considers that on the basis of present knowledge, the possible extensions of the mineralized area can be explored more quickly, and at less cost to the Government, by drilling from the surface. Results of such drilling may be used to determine whether or not crosscutting and underground drilling is then justified.

The Operator also offered to add the land formerly excluded from the land and royalty terms of the contract to that covered by Article 2 and Annex I.

This Amendment No. 3 authorizes the substitution of rotary and/or diamond core drilling for the churn drilling provided in the contract, and adds the area formerly excluded from the contract to the lands covered by Article 2 and Annex I of the contract.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

Glenn F. Gundy

(For Government use only)

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

COMBINED METALS REDUCTION COMPANY

D.[illegible] Drilling Program - Southpaw Mine - DMA Project 4-13

November 14, 1938

Mr. Paul Gemmill, General Manager

Reginald D. Lee

Dear Paul:

During the month of September, all road building was completed and the D-8 Bull-dozer returned to Castleton.

Churn Drilling showed no advance during September. Churn drill hole No. 4 encountered a shear or fault zone at 90 feet of depth. The Churn Drill Tools deflected off to the side following a crack at the bottom of the hole and hung up. All efforts to jar the tools loose failed.

After breaking the drill cable and using a second set of tools, to drill by the lost tools, the drill hole was straightened and the lost tools recovered. During the month of October this drill hole was advanced from 90 feet to 185 feet, all in a dark dolomite limestone.

A favorable responce to a request that other types of drilling be approved by the Government, prompted us to hire a rotary drill rig with experienced driller. After one week of drilling, it was found that the dolomitic limestone formation at Southpaw is much too hard for rotary drilling using a tri-cone bit.

A large percussion wagon drill with sectional drill rods and tungsten carbide bit was tried on shorter drill holes and found to be successful in drilling this formation as well as recovering cuttings for samples every five feet. The limitation of depth with this type of drilling is the removal of cuttings. The deepest hole drilled was 72 feet, when quartzite was encountered, but probably 80 to 100 feet would be the maximum. However, a small core drill using AX rods would be able to continue the drill hole to much greater depth.

No Manganese ore was encountered in any of the drill holes completed during this period.

Very truly yours,

Reginald D. Lee

INTERIM REPORT

October ~~22, 1958~~

Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

This project was inspected October 17, 1958, in company with Mr. R. G. Lee, representing the operator.

Churn drill hole No. 4, situated on the Southpaw No. 2 Claims at coordinates 9,432 N - 10,125 E, was collared on August 1 and has reached a depth of 105 feet. The formation is interbedded, dolomite limestone. No mineralization was observed.

Authority to substitute rotary or diamond drilling for churn drilling was received and the operator was duly notified. Therefore, rotary drill hole No. 5, situated on the Southpaw No. 3 Claim at coordinates 10,060N - 9,890E, was collared on October 15 and has reached a depth of 26 feet.

Slight indications of manganese mineralization were noted and the following samples obtained:

Sample No.	Increment, feet
BM 2538	8-10
BM 2539	10-12
BM 2540	12-14
BM 2541	14-16

Analyses of above samples will be included in the next interim report.

The analyses of samples obtained on July 28 are as follows:

Sample No.	% Mn Increment, feet
BM 2517	0.1
BM 2518	0.1
BM 2519	0.1
BM 2520	0.1 *
BM 2521	0.1*
BM 2522	0.1

On report of Aug. 2, 1958

* Less than.

Both types of drilling rigs have experienced considerable trouble in drilling the limestone formation, resulting in decreased progress.

It appears doubtful that the project will be completed prior to the advent of winter storms.

Approximately 2,200 linear feet of access roads to the drilling sites have been completed.

Progress:

	Feet
Drilling approved	1,800.00
" completed	581.00
" not completed	1,219.00

Financial:

Expenditures allowed	$12,852.00
Expended as of 8/31/58	4,944.00
Unexpended	$ 7,908.00

Contract Period:

Expiration date:	November 27, 1958
Unexpended time:	1-1/3 months.

Re: Docket No. DMEA 4813 - Manganese
Southpaw Joint Venture
Southpaw claims
Lincoln County, Nevada
Contract No. Idm-E1161

Dear Mr. Ricker:

By letter to you of September 19, transmitted with your memorandum of September 24, 1958, the Operator requested an amendment to the above-captioned contract authorizing the substitution of rotary and/or diamond core drilling for churn drilling, and the diversion of part of the funds authorized for drilling to drifting and crosscutting.

We wired you on September 30 that we would prepare an amendment authorizing the change to rotary or core drilling, but did not have justification here for authorizing drifting and crosscutting.

Review of Interim and Operator's reports available to us indicates that for reasons not apparent from information here, churn drill hole CDH-3 was drilled too far from the site proposed in the contract, and was not clearly justified by the drilling results of hole CDH-1, and that hole CDH-4 was located more than 150 feet southerly from the nearest approximate drill hole location approved under the contract. We have not received word of the completion of that hole, nor the results of any drilling in it below 90 feet.

We would like to see more of the drilling, whether by rotary or core drilling methods, completed as outlined in the contract, before we consider diversion of funds to crosscutting or drifting. We note, however, the statement in your memorandum

that mineralization does not extend toward the west.

As we study sections A-A', B-B' and C-C' it looks as if the upper part of the deposit is faulted down in steps to the south by normal faults, so a drill hole near the position of proposed hole No. 6, or one north of the open cut, might be of considerable interest. The three cross-sections do not plainly show whether the ore body has a rake to the southwest, but hint that such might be the case. One or more drill holes in the vicinity of proposed numbers 5 or 6 might be informative.

Has exploration to date indicated the source, or the feeders, of this orebody? Are the faults shown on the maps and sections pre-mineral, or is the mineralization shown drag-ore along post-mineral faults?

From examination of the maps and sections attached to your memorandum and the Operator's letter it appears that rotary or diamond core drilling from surface could be planned to attain the same geological objectives sooner, and with less cost, than the Operator's proposal for 140 feet of crosscutting, followed by drilling inclined diamond drill holes from the end of the new crosscut.

Your comments and opinion on these suggestions will be appreciated, as well as the results of drilling hole GM-4, with any assay returns that may have been received.

(*) and the plan

Sincerely yours,

George C. Selfridge

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

GPO 872894

DMEA Churn Drilling Program - Southpaw Mine - DMEA Project # 4813 - Manganese

September 9, 1958

Mr. Paul Jemmill, General Manager

Reginald G. Lee

Dear Paul:

Churn Drilling and Road Building under DMEA Project #4813 at the Southpaw Manganese Mine was active during the entire month of August.

Churn Drill Hole No. 4, located about 225 feet westerly of D.D.H. No. 3, was started and advanced 90 feet during the month. All of this advance was in a dark fractured dolomite. At 90 feet of depth the tools stuck. In attempting to free them the cable broke.

If the tools are not recovered in two or three shifts, an attempt will be made to drill down alongside them.

The D-8 Cat and Dozer was at the Mine during the entire month. Sufficient roads and drill sites have been built and cleared off, to accomodate nearly all drill locations expected to be drilled during the life of the Project.

Very truly yours,

Reginald G. Lee

From: Executive Officer, OME Field Team, Region II

Subject: Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

Enclosed are three copies of a letter dated September 19 requesting an Amendment No. 3 to subject contract.

Upon completion of Hole No. 4, approximately 540 feet of churn drilling will have been completed. It is requested that balance of churn drilling, or about 1,260 feet, be converted to 140 feet of crosscutting and/or drifting at $25.00 per foot and the remainder converted to either surface or underground drilling at $5.00 per foot. Either churn or diamond drilling will be allowed depending on suitability of formation. Our breakdown of crosscutting or drifting cost is as follows:

Supervision, labor, and taxes	$22.50 per foot.
Powder-caps - fuse	2.75 " "
Drill steel and bits	3.50 " "
Miscellaneous - oil, grease	.40 " "
Equipment rental	1.12 " "
	$30.27

We recommend that the request be granted on the basis of reasons in operator's letter. In addition, drifting as shown on attached map disclosed the mineralization did not extend toward the west. Churn Drill Hole No. 3 indicated mineralization to the southeast.

Contract No. Idm-E 1161 Manganese
Southpaw Joint Venture
Lincoln County, Nevada

Dear Mr. Ricker:

Attached are a sketch A-1719 and section A-1720 of the Southpaw Manganese mine showing proposed underground work under the present DMEA Program.

It is hereby requested that 700 feet of churn drilling at $5.00/ft. be converted to 140 feet of crosscutting (x-cutting) at $25.00/ft., and that the remaining drill footage be used for surface and underground drilling. The type of drilling to be used is that which is most adaptable to the particular drill location and ground to be drilled, as requested in my letter of August 30, 1958.

As of September 1, 1958 the following distribution of funds approved for the referred project and contract were:

(1)	Approved for Churn Drilling	$9,000.00
	Spent on Churn Drilling to 9-1-58	2,700.00
	Churn drilling fund as of 9-1-58	6,300.00
(2)	Approved for casing	1,200.00
	Spent for casing to 9-1-58	120.00
	Casing fund as of 9-1-58	1,080.00
(3)	Approved for lost casing	200.00
	Spent for lost casing to 9-1-58	10.00
	Lost casing fund as of 9-1-58	190.00
(4)	Approved for access road and sites	2,352.00
	Spent for access roads and sites to 9-1-58	2,100.00
	Access roads and sites fund as of 9-1-58	252.00
(5)	Approved for assaying	100.00
	Spent for assaying to 9-1-58	14.00
	Assaying fund as of 9-1-58	86.00

Of Item (1) above 140 feet of cross cutting at $25.00 is $3,500.00 to be deducted from $6,300.00 leaves $2,800.00 for drilling on surface or underground.

COMBINED METALS REDUCTION COMPANY

SHEET 2 DATE 9-19-58 TO S. Ricker

Considerable difficulty has been experienced in churn drilling at Southpaw. Very little progress will be made in Churn Drill Hole No. 4 during this month due to the hard and fractured dolomite at this location. A core drill would drill this ground without any difficulty.

Underground cross cutting and core drilling to explore the various fault blocks south of the mine area is now definitely the best exploration method, since Churn Drill Holes Nos. 1 and 3 have established the dolomite-quartzite contact.

We sincerely request that an early approval of the above request be granted.

Very truly yours

COMBINED METALS REDUCTION COMPANY

August 30, 1958

Mr. S. Ricker, Executive Officer
DMEA Field Team, Region II
1605 Evans Avenue
Reno, Nevada

Docket DMEA 4813
Contract No. IDM-E 1161 Manganese
Southpaw Joint Venture

Dear Mr. Ricker:

Reference is made to the subject contract under Exhibit A, first page, second paragraph that reads as follow:

"Drill 12 churn drill holes, an average depth of 150 feet each, not exceeding an aggregate of 1,800 feet. Holes shall be started at not less than 8 inches diameter and shall be finished at not less than 4 inches diameter. Holes shall be cased as necessary. 2/"

We have found that churn drilling is not practical at some locations due to hard slips dipping at steep angles; however, rotary or core drilling would be more suitable. Therefore, we request that at least 500 feet of the 1,800 feet of drilling may be drilled with rotary or core drills, starting with at least AX size hole.

As soon as this request is granted we would be able to make much more progress with a rotary drill or a core drill in addition to the churn drill.

Time is running short, as we would like to complete the drilling project before snow flies.

Very truly yours

Reginald G. Lee

Gentlemen:

We have today received a telephoned request from Mr. R. G. Lee to include in the referenced contract the excluded area located on the Southpaw mining claim.

We are mailing to Mr. Lee three sets of Owner's Consent to Lien Forms for the signature of the owners of the excluded area. These should accompany the request for inclusion of the area into the contract, as well as the request for other amendments Mr. Lee may have in mind.

Very truly yours,

Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

This project was inspected on July 28, 1958, accompanied by Mr. R. G. Lee, representing the operator.

Churn Drill Hole No. 3 was started on July 16 and on July 28 had reached a depth of 167 feet. The drill hole was collared south 44° E., 140 feet from CDH No. 1.

Drill Log CDH No. 3:

Increment, Ft.	Description
0-15	Gray limestone
15-25	Dark gray "
25-40	Dark blue "
40-50	Dolomite, a few fragments of Mn.
50-90	Blue limestone
90-100	Dolomite
100-150	" (Water at 135 ft.)
150-167	Gray to brown limestone, shows some fragments of Mn. and quartzite.

DMEA sludge samples:

Sample No.	Increment, Ft.	Assay % Mn
BM 2517	135-140	0.1
2518	140-145	0.1
2519	145-150	0.1
2520	150-155	0.1 ⊗
2521	155-160	0.1 ⊗
2522	160-165	0.1

See Interim Report of 10.22.58

⊗ Less than

The analyses of the samples will be included in the next interim report.

The agreed site of Churn Drill Hole No. 4 is approximately south 75°-80° west, 200 feet from CDH No. 3 and construction of the necessary road to drill site was immediately started.

On July 7, the operator requested an extension of time and, pursuant to this request, Amendment No. 2, dated July 18, 1958 extending completion date to November 27, 1958, was prepared and has been duly executed.

Progress:

	Feet
Drilling approved	1,800.00
" completed	449.50
Not completed	1,350.50

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(*a*) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(*b*) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(*c*) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

[signature]

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

COMBINED METALS REDUCTION CO.

INTER-OFFICE CORRESPONDENCE

Subject DMEA Churn Drilling Program - Southpaw Mine - DMEA Project No. 4813 Manganese

Date August 10, 1958

To Paul Gemmill, General Manager

From Reginald G. Lee

Month of June 1958

Churn Drilling under DMEA Project Docket No. DMEA 4813 was active on one shift during the entire month of June.

Churn Drill Hole No. 2 was completed at 84 feet of depth, the Eureka Quartzite being cut at 75 feet. A small amount of manganese stain was noted in the drill cuttings at 65 to 70 feet of depth.

Churn Drill HoleNo. 3, down 75 feet as of July 1st, was located 140 feet southeast of Churn Drill Hole No. 1, specifically to obtain information as to the width of the downfaulted block located by No. 1 drill hole. Dark gray to black dolomite is the predominant rock in the drill holes to date.

During the month of July a D-8 Cat and dozer will be available for road building to drill sites west and north of the mine workings. It is expected that some of these holes will be about 350 feet deep.

Hard slick fault surfaces dipping at steep angles have caused considerable slow-down in drilling footage.

Three days were lost during the month due to breakdown of water pump on drilling engine and breaking of drill jars.

Month of July 1958

During the month of July, the Southpaw DMEA Churn Drilling Project went forward with average drilling progess of 5.6 feet per 8 hour shift, including moving and down time.

Churn Drill Hole No. 3 was completed at 169 feet of depth. Drill footage advance for the month was 94 feet, from 75 to 169 feet.

18.6 drill shifts @ 5.6

Dark dolomite limestone was drilled through from 20 feet to 135 feet. At 135 feet manganese stain was noted in the cuttings. From 145 feet to 155 feet low grade stringers of manganese were cut. From 155 feet to 162 feet the contact (may be a fault contact) of Ely Spring dolomite and Eureka Quartzite containing considerable clay and fault gouge was drilled through.

COMBINED METALS REDUCTION COMPANY

SHEET 2 DATE 8-10-58 TO Paul Gemmill

This clay and gouge material showed manganese. However, the assay results were not encouraging.

C.D.H.	Sample	Feet from-to	% Mn
No. 3	Washed cuttings	135 - 140	0.20
"	" "	140 - 145	0.15
"	" "	145 - 150	0.15
"	" "	150 - 155	Tr
"	" "	155 - 160	Tr
"	" "	157 - 162	Tr
"	Unwashed clay	160 - 162	0.40

The poor assay results indicate that the Manganese is only a stain or colorizer at the contact.

A D-8 bulldozer was transported to the mine during the last half of the month. Roads and drillsites have been prepared South-West and North-West of the mine area, but 100 feet out of the excluded area, as specified in the DMEA contract.

Drill Hole No. 4 is located at approximate coordinates N 9442, E 10130.

The Eureka Quartzite sould be cut at about 200 feet.

Very truly yours

Reginald G. Lee

Gentlemen:

Enclosed are the original and four copies of a proposed Amendment No. 2 to the above-referenced contract, signed by the Administrator for the Government.

If the terms and conditions of the proposed amendment are satisfactory to you, all five copies should be signed by your firm. The "Operator's copy" should be retained by you and the original and remaining three copies should be returned to this office.

If any part of the amendment does not meet with your approval, the original and all copies should be returned together with your suggested changes.

Very truly yours,

S. RICKER

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA-4813

AMENDMENT NO. 2

It is agreed this _____ day of _____, 1958, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and the Southpaw Joint Venture, that Exploration Project Contract No. Idm-E1161 (Docket No. DMEA-4813), dated December 27, 1957, as amended, is further amended as follows:

The date fixed for completion of the work as extended by Amendment No. 1 to seven months from the date of the contract, is further extended to November 27, 1958.

The maximum period for royalty payments and the liens to secure the payments thereof; as specified in Article 6 (b)(2) of the Contract, is extended from ten (10) years to eleven (11) years from the date of the Contract.

This Amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, nor the agreed unit cost of any item of work.

Executed in quintuplicate the day and year first above written.

Dear Mr. Ricker:

Work on the subject contract was started May 1, 1958. The delay in starting the project was due to late Spring snow and impassable roads to the project site.

We respectfully request that an extension of time from July 27, 1958 to November 27, 1958 be granted to complete the project.

About one quarter of the project's work is completed at this date.

Very truly yours

INTERIM REPORT June 19, 1958

Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

This project was inspected on June 11, 1958. Mr. R. G. Lee, the operator's representative, was unable to be present during the inspection.

Churn Drill Hole No. 1 was completed on June 3 at a depth of 197.5 feet. The hole was drilled through limestone from the collar to 192 feet where the quartzite was encountered. The quartzite formation continued to the bottom of the hole. No manganese ore was found.

Churn Drill Hole No. 2 was started on June 5 and had been extended through 55 feet of limestone. Some quartzite was noted at that depth. On June 16, the operator's representative advised by telephone that the drill hole had been completed in quartzite and at a depth of 85 feet on June 15. No manganese ore was encountered.

Churn Drill Hole No. 3 was proposed to be collared south 30° East, 120 feet from CDH No. 1.

Progress:

Drilling approved	1800.0 feet
Drilling completed	282.5 "
Not completed	1517.5 feet

Financial:

The operator has not reported expenditures for the work completed.

Contract period:

Expiration date under Amendment No. 1 was July 27, 1958. Unexpended time: 37 working days.

One churn drill rig is operated six days per week by one driller and a helper. Considerable difficulty was encountered in drilling CDH No. 1.

Additional work not yet started consists of constructing roads to drill sites and preparing these places for the drill rig setup. Due to the amount of work to be completed, it is evident that a further extension of time will be required to complete the contract.

I recommend that the date of completion, therefore, be extended from July 27, 1958 to September 30, 1958.

Glenn G. Gentry,
Mining Engineer

U. S. Geological Survey

Subject: DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw mine
Lincoln County, Nevada
Contract Idm-E1161

The project was inspected on June 26, 1958 by H. K. Stager and R. M. Smith, U. S. Geological Survey.

Two churn drill holes have been completed and a third one started, all of them southeast of the mine workings (fig. 1). The first hole was drilled through barren dolomite for 192 feet and bottomed in Eureka quartzite at a depth of 197.5 feet. Hole No. 2 was drilled 45 feet in gray dolomite, from 45 to 75 feet in interbedded dolomite and gray quartzite, and from 75 to 85 feet in white quartzite. Fragments of manganese oxide were found in the cuttings between 70 and 80 feet. Drilling is now in progress on churn drill hole 3 at a depth of 45 feet in dolomite.

According to the driller the operator plans to continue drilling but as there are 1,472 feet of drilling yet to complete under

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

COMBINED METALS REDUCTION COMPANY

DMEA Churn Drilling Program - Southpaw Mine - DMEA Project No. 4813 Manganese

August 10, 1958

Paul Gemmill, General Manager

Reginald G. Lee

Month of June 1958

Churn Drilling under DMEA Project Docket No. DMEA 4813 was active on one shift during the entire month of June.

Churn Drill Hole No. 2 was completed at 84 feet of depth, the Eureka Quartzite being cut at 75 feet. A small amount of manganese stain was noted in the drill cuttings at 65 to 70 feet of depth.

Churn Drill HoleNo. 3, down 75 feet as of July 1st, was located 140 feet southeast of Churn Drill Hole No. 1, specifically to obtain information as to the width of the downfaulted block located by No. 1 drill hole. Dark gray to black dolomite is the predominant rock in the drill holes to date.

During the month of July a D-8 Cat and dozer will be available for road building to drill sites west and north of the mine workings. It is expected that some of these holes will be about 250 feet deep.

Hard slick fault surfaces dipping at steep angles have caused considerable slow-down in drilling footage.

Three days were lost during the month due to breakdown of water pump on drilling engine and breaking of drill jars.

Month of July 1958

During the month of July, the Southpaw DMEA Churn Drilling Project went forward with average drilling progess of 5.6 feet per 8 hour shift, including moving and down time.

Churn Drill Hole No. 3 was completed at 169 feet of depth. Drill footage advance for the month was 94 feet, from 75 to 169 feet.

Dark dolomite limestone was drilled through from 20 feet to 135 feet. At 135 feet manganese stain was noted in the cuttings. From 145 feet to 155 feet low grade stringers of manganese were cut. From 155 feet to 163 feet the contact (may be a fault contact) of Ely Spring dolomite and Eureka Quartzite containing considerable clay and fault gouge was drilled through.

COMBINED METALS REDUCTION COMPANY

2 8-10-58 Paul Gemmill

SHEET DATE TO

This clay and gouge material showed manganese. However, the assay results were not encouraging.

C.D.H.	Sample	Feet from-to	% Mn
No. 3	Washed cuttings	135 - 140	0.20
"	" "	140 - 145	0.15
"	" "	145 - 150	0.15
"	" "	150 - 155	Tr
"	" "	155 - 160	Tr
"	" "	157 - 162	Tr
"	Unwashed clay	160 - 162	0.40

The poor assay results indicate that the Manganese is only a stain or colorizer at the contact.

A D-8 bulldozer was transported to the mine during the last half of the month. Roads and drillsites have been prepared South-West and North-West of the mine area, but 100 feet out of the excluded area, as specified in the DMEA contract.

Drill Hole No. 4 is located at approximate coordinates N 9442, E 10130.

The Eureka Quartzite could be cut at about 200 feet.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF-104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF-104A has been designed to tie in with Form MF-104 for both monthly and cumulative costs. The "Total Costs" on Form MF-104A for each month should equal the monthly "Total Costs" as reported on Form MF-104. This is also true of the "Total Costs To Date".

In preparing Form MF-104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

COMBINED METALS REDUCTION COMPANY

Southpaw Mine Churn Drilling

June 13, 1958

Mr. Paul Gemmill, General Manager

Reginald G. Lee

Churn Drilling under DMEA Project Docket No. DMEA 4813, Contract No. Idm-E 1151, was commenced on May 1, 1958 and continued throughout the entire month.

DMEA Churn Drill Hole No. 1, located at Coordinates 9,630N 10,250E, was advanced 190.0 feet during the month. The first 125 feet of this advance was through massive limestone, the last 65 feet was in a massive dark dolomite. Some faulting and hard slick walls was encountered at 20 and 55 feet of depth.

At this writing the drill hole is completed. The Eureka Quartzite was encountered at 192 feet, the hole was continued to 197 feet, or 5 feet into the quartzite.

No manganese mineralization was found in this drill hole, but some valuable information was obtained relative to faulting and a down-thrown block in this area. Additional drill holes will delineate the various fault blocks.

INTERIM REPORT

May 12, 1958

Docket No. DMEA-4813 (Manganese)
Southpaw Joint Venture
Southpaw Claims
Lincoln County, Nevada
Contract No. Idm-E 1161

This project was inspected on May 6, 1958, accompanied by Mr. R. G. Lee representing the operator.

Due to snow and weather conditions the operator, March 22, 1958, had requested an extension of time. On March 26, 1958, Amendment No. 1 was issued which extended the starting date from April 15 to May 15, 1958 and completion to within seven months from the date of contract.

The operator started churn drilling on April 28, 1958 and on May 6, CDH No. 1 had reached a depth of 25 feet. An 8-inch diameter casing was installed from the collar to a depth of 17 feet.

The drill hole has been extended through black to gray limestone and no manganese minerals observed.

Locations of CDH No. 1 and the proposed CDH No. 2 are designated on the enclosed map.

Expenditures for the work conducted during April will be included by the operator in his report for the month of May.

Glenn G. Gentry,
mining engineer.

Gentlemen:

As requested by Reginald G. Lee in letter dated March 22, 1958, we are enclosing the original and four copies of a proposed Amendment No.1 to referenced contract, signed by the Executive Officer, DMEA Field Team, Region II.

If the proposed amendment is satisfactory to you, please sign all copies, retain the copy marked "Operator's copy" and return the original and other three to this office.

Very truly yours,

S. Ricker

The project was visited on March 10, 1958 and a conference held with R. G. Lee, representing the Operator.

Snow conditions still prevent travel by automobile over the last one-half mile of the mine access road. Due to the amount of snow, it appears probable that the Operator will be forced to request that the starting date be advanced to the first of May and I recommend approval of the request.

Gentlemen:

Enclosed are the original and four copies of a proposed short-form Contract for an exploration program at the above-referenced property, signed by the Administrator for the Government, together with Annexl (2 pages), Exhibit A (2 pages), and 3 maps.

If the proposed contract is satisfactory to you, all five copies should be signed by your firm and Mr. P. W. Duffin, Sr. The copy marked "Operator's copy" should be retained by you and the original and other three copies should be returned to this office.

If any part of the terms and conditions of the proposed contract does not meet with your approval, the original and all copies should be returned together with your suggested changes.

Very truly yours,

S. Ricker
Executive Officer

Re: Docket No. DMEA 4813 - Manganese
Southpaw Joint Venture
Southpaw claims
Lincoln County, Nevada

Dear Mr. Ricker:

In accordance with the recommendation of the Field Team of October 31, 1957, enclosed are the original and four copies of a proposed short-form Contract for an exploration program at the above-referenced property, signed by the Administrator for the Government, together with Annex I (2 pages), Exhibit A (2 pages), and 3 maps. Two extra copies of Exhibit A and the annex and maps are enclosed for the use of the Field Team.

If the terms and conditions of this proposed contract are satisfactory to you and the operator, all five copies should be signed and the usual distribution made.

If any part of this proposed contract does not have either your approval or that of the operator and cannot be amended within your delegated authority, the original and all copies of the proposed contract are to be returned to this office, together with the proposed changes for consideration.

Under Article 1, the starting date has been left blank and is to be filled in when the contract is signed by the operator.

Sincerely yours,

See added footnote #2 WSM

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA - 4813

ANNEX NO. 1

The land referred to in Article 2 of the contract form and outlined on attached Figure 2, comprises a portion of the property held by the Applicant through the following documents:

On August 9, 1950, a mining lease for 12 unpatented lode mining claims owned by Ray Arnold, Ora Stewart Tuttle and La Vern Stewart, was granted to A. W. Bush and P. W. Duffin, Sr. for a period of 25 years, superseding a mining lease dated May 27, 1950, granted to A. W. Bush and Fay Stewart. The interest of Fay Stewart was assigned to P. W. Duffin, Sr.

On October 30, 1950, a Memorandum of Agreement between the owners and Combined Metals Reduction Company granted that company, pursuant to certain conditions and payments, an exclusive option, to expire on January 2, 1951, if the option was not exercised.

On July 3, 1951, a Joint Adventure Agreement was made between P. W. Duffin, Sr. and Combined Metals Reduction Company inasmuch as P. W. Duffin, Sr. had acquired all the right title, and interest of A. W. Bush in the mining lease and option of August 9, 1950. On September 12, 1951, a supplemental agreement was made between the owners and P. W. Duffin, Sr., individually and as assignee of A. W. Bush, relative to royalty payments.

The land to be explored consists of three of the above-noted 12 unpatented lode mining claims as follows (Figure 2):

Claim Name	Book No.	Page No.
South Paw No. 2	M-1	64
South Paw No. 3	M-1	143
South Paw No. 4	M-1	9

Located in the Irish Mountain Mining District, Lincoln County, Nevada.

All the land within the boundaries of the above claims will be subject to Government royalty as specified on the contract form except the following unless any ore from this area is extracted through DMEA workings: (Figure 3)

Beginning at corner No. 1, coordinate 10,100N-10,100E, thence due west 200 feet to corner No. 2 at coordinates 10,100N-9,900E, thence south 45 degrees west, 285 feet to corner No. 3 at coordinates 9,900N-9,700E, thence due south 100 feet along coordinate 9,700E to coordinate 9,800N to corner 4, thence due east 400 feet along coordinate 9,800N to coordinate 10,100E to corner No. 5, thence due north 300 feet along coordinate 10,100E to corner 1 the point of beginning.

EXPLORATION PROJECT CONTRACT
SOUTHPAW JOINT VENTURE
DOCKET NO. DMEA -4813

EXHIBIT A

Attached maps are as follows:

Figure 1, Index Map of Lincoln County, Nevada.

Figure 2, Claim Map, Southpaw Group, Irish Mountain, Lincoln County, Nevada.

Figure 3, Geologic Sketch Map of Southpaw Manganese Mine, Lincoln County, Nevada.

The work on this project shall consist of bulldozing approximately 1,200 feet of access roads to 12 drill sites and clearing 12 churn drill sites.

Drill 12 churn drill holes for a total not to exceed 1,800 feet. Holes shall start at not less than 8 inches and shall be finished at not less than 4 inches. Holes shall be cased as necessary.

Mineralized zones shall be sampled and assayed for manganese.

All work shall be carried out by and under the supervision of the Combined Metals Reduction Company. All supervision costs, equipment and supplies are to be included in the bulldozing and drilling costs.

ESTIMATED COST OF THE PROJECT
Fixed Unit Costs

Bulldoze access roads and drill sites with a D8 Caterpillar or equivalent size of another make, 14 hours for each hole (total 168 hours) at $14.00/hr.	$2,352.00

Drill 12 churn drill holes to an average depth of 150 feet, total not to exceed 1,800 feet at $5.00/ft.	$9,000.00	
Casing 600 feet at $2.00/ft.	1,200.00	
Lost casing 200 feet at $1.00/ft.	200.00	
50 samples to be assayed for manganese at $2.00 each	100.00	
Total estimated cost of project		$12,852.00
Government participation, 75 percent		$9,639.00

(Rev. April 1956)

UNITED STATES OF AMERICA
DEPARTMENT OF THE INTERIOR
DEFENSE MINERALS EXPLORATION ADMINISTRATION
EXPLORATION PROJECT CONTRACT
(Short Form)

Draft

DMEA No.	*Commodity*	*Contract No.*	*County*	*State*
4813	Manganese	*Idm–E*	Lincoln	Nevada

It is agreed ....., between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and Southpaw Joint Venture

Care Combined Metals Reduction Company

whose mailing address is 218 Felt Building, Salt Lake 10, Utah

hereinafter called the "Operator," as follows:

ARTICLE 1. *Authority and project.*—(a) This contract is entered into under the authority of the Defense Production Act of 1950, as amended. It consists of this form (MF–200A), the attached Annex I (land description), Exhibit A (work and costs), and the maps and documents listed therein. The project work is a search for indicated or undeveloped deposits of the commodity designated above. The Operator shall begin the work on or before ....., and, subject to the provisions of Article 7 and Exhibit A, shall complete the work within six months from the date of the contract.

(b) The description of the work and the fixed cost for each unit of work to be performed (per foot of drilling, per foot of drifting, per hour of operations, etc.) are hereby agreed upon as specified in Exhibit A. The estimated total cost of the project work is $12,852.00. The Government will contribute 75 percent of the fixed unit cost of the work performed, not exceeding $9,639.00, in accordance with the provisions of Articles 4 and 5.

(c) The Operator shall not transfer or assign this contract or any right or obligation thereunder without the written consent of the Government.

ARTICLE 2. *Operator's property rights.*—(a) The Operator represents and undertakes that Annex I correctly describes the land which is the subject of this contract and the nature of the Operator's rights of property and possession therein (whether as owner, lessee, or otherwise), and that such right, title, or interest is subject only to the following claims, liens, or encumbrances: Interests of Lessors

(b) The Subordination Agreement of the holder of any claim, lien, or encumbrance listed above and (if the Operator does not hold the legal title) the Consent to Lien of any holder of the legal title of the land (lessor, seller, optionor, etc.) are attached, as follows: Consent to Lien and Subordination Agreement.

(c) The Operator shall preserve and maintain his right, title, and interest in the land and his right to the possession thereof for the purposes of this contract, and shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of this contract. The Operator shall neither transfer, convey, nor surrender the land nor any right, title, or interest therein, nor permit nor suffer any claim, lien, or encumbrance thereon, without expressly referring to and providing

in the instrument of conveyance, lien, or encumbrance for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof. Two copies of such instrument shall be furnished to the Government. If the Government's rights to royalty as provided in Article 6 have been terminated, the provisions of this paragraph (c) shall become inapplicable.

ARTICLE 3. *Performance of the work.*—(a) Operator's responsibility.—The work shall be performed diligently, efficiently, expertly, in a workmanlike manner, and in accordance with good mining standards and State regulations governing health, safety, and liability insurance covering employment. The Operator shall provide suitable and adequate equipment, facilities, materials, supplies, and labor to complete the work, as specified in Article 1 (a).

(b) *Government may inspect.*—The Operator shall consult with and inform the Government on all phases of the work as it progresses. The Government may enter at all reasonable times to inspect the work under the contract, and also after certification of discovery or development, to inspect production operations and underground workings. The Operator shall provide the Government with all reasonable means of access for such inspections.

ARTICLE 4. *Contribution by the Government.*—The Government will make its contribution on the basis of the monthly vouchers referred to in Article 5 (b); but all payments by the Government are provisional only, subject to audit, and until the account between the Operator and the Government is finally audited and settled and the Operator's final report has been rendered, the Government may withhold such sums as it sees fit but not in excess of 10 percent of the estimated total cost of the work. To the extent that excesses over fixed unit costs or any excess over the estimated total cost may be necessary for the performance of the work, the Operator shall incur and pay such excesses for his own account without contribution by the Government. The Government will not contribute to the cost of any work performed prior to the date of this contract. The Government may make payments for the account of the Operator directly to independent contractors and suppliers rather than to the Operator.

ARTICLE 5. *Reports, accounts, audits.*—(a) Operator's records.—The Operator shall keep suitable records and accounts of the units of work performed and of any production in which the Government may have an interest; and shall preserve those with respect to work performed for at least three years after final payment by the Government, and those with respect to production for at least three years after any obligation to pay royalties to the Government has terminated. The Government may inspect and audit said records and accounts at any time, either by itself or by a certified public accountant. The Comptroller General of the United States or his representative, until the expiration of said three-year periods, shall have access to and the right to examine all pertinent books, documents, papers, and records of the Operator.

(b) *Progress reports and vouchers.*—The Operator shall provide the Government with five copies of monthly progress reports in three sections as follows: (1) Operator's Monthly Report and Voucher showing a detailed statement of units of work performed during the reporting period; (2) Operator's Unit Cost and Progress Report showing the various types of work performed during the reporting period and the fixed unit costs incurred for each type of work; and (3) a Narrative Report of the work performed during the reporting period including adequate engineering-geological maps or sketches, drill hole logs and locations, and assay reports on samples taken concurrently with advance in mineralized ground. (Forms for reporting under (1) and (2) above will be provided by the Government.)

(c) *Final report.*—Upon completion of the work or termination of the Government's obligation to contribute to costs, the Operator shall furnish the Government with five copies of a final report (in addition to the final progress report and voucher). This final report shall include a geological and engineering evaluation of the results of the work performed under the contract with an estimate of the ore reserves resulting from such work, complete assay data, adequate geological and engineering maps or sketches, and a summary of the work performed and the unit costs thereof.

(d) *Report of sales.*—The Operator shall provide the Government with suitable accounting and documentary evidence covering all production to which the Government's percentage royalty relates, such as copies of smelter or concentrator settlement sheets, and certified accounts of production and sale or other disposition of production.

(e) *Compliance with requirements.*—If in the opinion of the Government any of the Operator's reports, records, or accounts are insufficient or incomplete, or if the Operator fails to make them, the Government may procure the making or completion of such with suitable attachments as an expense of the work to which the Operator shall contribute. The Government may withhold approval and payment of any vouchers relating to insufficient or incomplete reports, records, or accounts.

ARTICLE 6. *Repayment by Operator.*—(a) *Certification.*—If the Government considers that a discovery or development from which production may be made has resulted from the work, the Government, at any time not later than six months after the Operator has rendered a sufficient final report (see Article 5), may so certify in writing to the Operator. Such certification shall describe broadly or indicate the nature of the discovery or development.

(b) *Royalty on production.*—The Operator, as principal if the Operator is the producer or as surety if the Operator is not the producer (for example, if the Operator either transfers or fails to retain his interest in the land), shall pay to the Government a royalty on all minerals mined or produced from the land, as follows: (1) regardless of any certification of discovery or development, from the date of the contract until the lapse of the time within which the Government may make such certification or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first; or (2) if the Government makes a certification of discovery or development, for a period of ten years from the date of the contract or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first.

(c) *Basis for computation.*—The Government's royalty shall be a percentage of the gross proceeds (including any bonuses, premiums, allowances, or other benefits) from the production sold, in the form sold (ore, concentrates, metal, or equivalent), at the point of delivery (the f. o. b. point); *except,* that charges of *the buyer* arising in the regular course of business, and shown as deductions on the buyer's settlement sheets, on account of the cost of treatment processes performed by *the buyer,* sampling and assaying to determine the value of the production sold, and freight paid by *the buyer* to a carrier (not the Operator), shall be allowed as deductions in arriving at the "gross proceeds" as that term is used herein. Any costs of treatment processes, sampling, assaying, or transportation performed or paid by the Operator or by anyone other than the buyer are not deductible in arriving at the "gross proceeds" as that term is here used. The term "treatment processes," as here used, means those processes (such as milling, concentrating, smelting, refining, or equivalent, but excluding fabricating or manufacturing) applied to the crude ore or other production after it is extracted from the ground to put it into a commercially marketable form.

(d) *Unsold production.*—If any production (ore, concentrates, metal, or equivalent) after the lapse of six months from the date the ore was extracted from the ground remains neither sold nor used by the Operator in integrated manufacturing or fabricating operations (for instance, if it is stockpiled), the Government, at its option, as long as it so remains, may require the computation and payment of its royalty on the value of such production in the form (ore, concentrates, metal, or equivalent) it is in when the Government elects to require computation and payment. If any production is used by the Operator in integrated manufacturing or fabricating operations before the Government makes its election, the Government's royalty on such production shall be computed on the value thereof in the form in which and at the time it is so used. "Value" as here used means what is or would be gross income from mining operations for percentage depletion purposes in Federal income tax determination, or the market value, whichever is greater.

(e) *Percentages of royalty.*—The percentages of the Government's royalty shall be as follows:

One and one-half (1½) percent of amounts ("gross proceeds" or "value") not in excess of eight dollars ($8.00) per ton of production in the form in which sold, held, or used, plus one-half (½) percent for each additional full fifty cents ($0.50) by which such amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such amounts.

(For instance: the royalty on an amount of five dollars ($5.00) per ton would be one and one-half (1½) percent; on an amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(f) *Time for computation and payment.*—The Government's royalty shall be computed and paid currently upon each lot sold, held, or used in integrated operations, as the case may be, as above provided in this Article.

(g) *Lien for payment.*—To secure the payment of its percentage royalty, there is hereby granted to the Government a lien upon the land or the Operator's interest in the land and upon any production of minerals therefrom until the royalty claim is extinguished by lapse of time or is fully paid.

(h) *Notice to purchasers.*—The Operator shall give notice of the Government's claim for royalty to any purchaser of the production, and shall authorize and direct such purchaser to pay the royalty directly to the Government and to furnish the Government with copies of the settlement sheets. If the records of any production and sales or other disposition of production, whether the production is by the Operator or by others, are not made available to the Government, the amount of the royalty may be estimated by the Administrator, Defense Minerals Exploration Administration, or his successor, and his estimate thereof shall be final and binding upon the Operator.

(i) *No obligation to produce.*—Nothing in this contract is to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any production operations.

(j) *Government not obligated to buy.*—Nothing in this contract shall be construed as imposing any obligation on the Government to purchase any minerals mined or produced from the land.

ARTICLE 7. *Termination of the Government's obligations.*—(a) If in the opinion of the Government operations at any time have failed to achieve anticipated results that indicate the probability of making a worthwhile discovery and in the opinion of the Government further operations are not justified, the Government may give the Operator written notice thereof, and thereupon the Government shall be free of all obligation to pay on account of units of work not then performed, and the Operator shall be free of all further obligation to prosecute the work other than such as may be necessary and incidental to winding up, reporting, and accounting.

(b) If in the opinion of the Government the Operator is in any manner in default under the terms of the contract, the Government may give the Operator written notice of such default with a specification of reasonable time within which the default must be cured; and if the Operator fails to cure such default as required, thereupon the Government shall be relieved of all obligation to pay on account of units of work not performed when the notice was given, and the Operator shall be free of all obligation to prosecute the work other than such as may be necessary and incidental to winding up, reporting, and accounting. The Government may also avail itself of any other remedy the law may provide for breach of contract, including the right to rescind the contract and to demand repayment of all moneys contributed by the Government under the contract.

(c) The giving of any notice by the Government under the provisions of this Article 7 shall not affect the Government's rights as provided for in the contract with respect to a percentage royalty, and liens to secure the payment thereof, and such rights shall be fully preserved.

ARTICLE 8. *Notices to be given by the Government* may be delivered to the Operator or may be sent by registered mail addressed to the Operator at the mailing address stated in this contract. If mailed, notices are deemed to have been delivered five days after the date of mailing.

ARTICLE 9. *Officials not to benefit.*—No member of or delegate to Congress or resident commissioner shall be admitted to any share or part of this contract or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

ARTICLE 10. *Changes and added provisions.*—

Memorandum

To: W. S. Martin, Defense Minerals Exploration Administration

From: W. P. Williams, U. S. Geological Survey

Subject: Review of field examination report, DMEA 4813 (manganese) Southpaw Joint Venture, Southpaw Claims, Lincoln, Co.,Nev.

The examining team report that geologic conditions on the applicant's property are favorable for the presence of manganese ore deposits. The ore is found in a strong, well-developed geologic structure consisting of a brecciated zone along bedding-plane faults.

A nearby deposit has been mined and it yielded about 17,500 tons of ore that averaged about 36 percent manganese. Further exploration would seek for downfaulted segments of the ore body, south of the mined area in shoots along the strike of the deposit.

The examiners recommend approval of a DMEA project consisting of a total of 12 drill holes, a total of 1,800 feet of drilling, at a total estimated cost of $15,052. I agree with the recommendations of the examining team because the proposed work seems to have a good chance for success.

INTRODUCTION

The Combined Metals Reduction Company, 218 Felt Building, Salt Lake City, Utah, and P. W. Duffin, Sr., Las Vegas, Nevada, conducting business as the Southpaw Joint Venture, applied on August 7, 1957 for Government assistance under the Defense Minerals Exploration Administration, docket DMEA-4813, to explore for manganese in an area adjacent to the South Paw mine, Lincoln County, Nevada.

A field examination was requested by the Operating Committee and was made by Glenn G. Gentry, U. S. Bureau of Mines, and H. K. Stager, U. S. Geological Survey, on September 27, 1957, accompanied by Mr. R. G. Lee, representing the applicant.

A small tonnage of indicated ore is exposed in the mine workings and nine samples were taken.

CONCLUSIONS AND RECOMMENDATIONS

Past production of manganese ore from the mine and a favorable geologic setting indicate that significant ore reserves may be found by the proposed exploration. Ore bodies containing reserves of about 20,000 tons averaging 36 percent manganese are inferred to occur in the area to be explored.

The applicant proposes to explore the area by churn drilling, or a combination of churn and diamond drilling, and will provide adequate facilities and competent personnel for conducting the work.

The proposed exploration will require six months to complete at a cost of $15,052, of which the Government's share would be $11,289.

The drilling costs are comparable to churn drilling costs established in the nearby Pioche district and we recommend that the Government enter into an exploration contract with the applicant to do the proposed work.

To facilitate administration of the contract we recommend that all work be based on unit costs rather than actual costs, and that the applicant be required to furnish adequate reports, maps, and conduct the sampling.

LOCATION, ACCESSIBILITY, AND LOCAL FACILITIES

The South Paw mine is near the head of Timber Canyon on the northern slopes of Irish Mountain, at an altitude of about 7,000 feet, in the unsurveyed Irish Mountain mining district of west-central Lincoln County, Nevada. It is approximately 68 miles northwest of Caliente, Nevada, a shipping point on the Union Pacific Railroad (fig. 1).

The mine is reached by traveling westerly from Caliente on U. S. Highway No. 93, an all-weather road, for a distance of 42 miles, thence turn right (north) and follow Nevada State Highway No. 38, an

all-weather road, for a distance of 4 miles to Hiko, Nevada, thence continue northwesterly on an unimproved road 22 miles. The trip requires approximately two hours.

The usual desert climate may be expected, although considerable snowfalls occur during the winter months. Equipment for removal of snow and clearing roads is required during a normal winter.

Experienced mine labor is available in Pioche. Mining supplies and equipment can be furnished by the Combined Metals Reduction Company from their warehouses at Caselton, about 90 miles northeast of the mine.

The source of water is approximately 20 miles southeast of the mine and water is usually transported by tank truck.

No electric power is available and operating equipment will use diesel or gasoline engines.

Telephone, telegraph, mail, railroad and trucking services are available in Caliente.

HISTORY AND PRODUCTION

Prospecting for high-grade silver ores in the district probably started in the 1860's. Mine development and production of manganese ores began during 1950 and has been continuous to date.

The operators report the production and sale of 17,334 dry short tons of ore averaging 32 percent to 40 percent manganese and valued at $630,312 at the railroad shipping point.

Over 80 percent of the production has been purchased by the Government through the General Services Administration at Wenden, Arizona; Deming, New Mexico; Butte, Montana; and the GSA carlot program. Measured and indicated reserves total only a few hundred tons of ore that averages about 33 percent manganese. Two sub-lessees are engaged in mining and development work and production is estimated to be about 50 tons per week.

PROPERTY AND OWNERSHIP

The following unpatented mining claims (fig. 2) are owned by Ray (Dick) Arnold, Ora Stewart Tuttle, and LaVern Stewart:

South Paw	South Paw Extension
South Paw No. 1	South Paw Extension No. 1
South Paw No. 2	South Paw Extension No. 2
South Paw No. 3	South Paw Extension No. 3
South Paw No. 4	South Paw Extension No. 4
	South Paw Extension No. 5
	South Paw Extension No. 6

On August 9, 1950 a mining lease and option was granted by the owners to A. W. Bush and P. W. Duffin, Sr. for a period of 25 years which superseded a mining lease dated May 27, 1950 granted to A. W. Bush and Fay Stewart. The interest of Fay Stewart was transferred and assigned to P. W. Duffin, Sr.

On October 30, 1950 a memorandum of agreement between the owners and Combined Metals Reduction Company granted that company an exclusive option, pursuant to certain conditions and payments, to expire on January 2, 1951, if the option was not exercised.

On July 3, 1951, a Joint Adventure Agreement was made between P. W. Duffin, Sr. and Combined Metals Reduction Company inasmuch as Mr. Duffin had acquired all the right, title, and interest of A. W. Bush in the mining lease and option of August 9, 1950. On September 12, 1951 a supplemental agreement was made between the owners and P. W. Duffin, Sr., individually and as assignee of A. W. Bush, relative to royalty payments.

Copies of the foregoing instruments are attached to the application.

The land to be explored includes the following unpatented lode mining claims:

Claim name	Location date	Recording date	Book	Page
South Paw No. 2	6/24/38	12/17/38	M-1	64
South Paw No. 3	6/24/38	7/17/39	M-1	143
South Paw No. 4	7/3/40	7/25/41	N-1	9

These claims are recorded in the office of the Lincoln County Recorder.

All of the land within the boundaries of the above claims will be subject to the exploration project with the exception of the area containing the present mine workings on the South Paw No. 3 claim. The excluded area (fig. 3) is designated as follows: Beginning at corner No. 1, coordinates 10,100N - 10,100E, thence due west

200 feet to corner No. 2 at coordinates 10,100N - 9,900E, thence south 45 degrees west, 285 feet to corner No. 3 at coordinates 9,900N - 9,700E, thence due south 100 feet along coordinate 9,700E to coordinate 9,800N to corner 4, thence due east 400 feet along coordinate 9,800N to coordinate 10,100E to corner No. 5, thence due north 300 feet along coordinate 10,100E to corner No. 1, the point of beginning. The Consent-to-Lien and Subordination Agreement signed by the owners and attached to the application excludes the above area.

Other reasons for excluding the area are:

(1) Two sub-lessees are presently working in the mine and have nearly exhausted the minable ore.

(2) New ore occurrences are expected to be found at a lower elevation which will require a new shaft entry.

(3) The estimated depth indicates that it would not be economic to attempt exploration from the present mine workings which would, therefore, not be benefitted by the proposed exploration.

DEVELOPMENT

The present mine workings are included in an area about 300 feet by 200 feet and have been extended from the surface to a depth of about 70 feet.

No development work has been conducted in the area proposed for exploration and prospecting has been limited. Approximately 260 feet south 17 degrees east from the portal of the adit the applicant has sunk a churn drill hole to a depth of 133 feet but did not intersect ore. Two diamond drill holes totaling 119 feet were extended from underground locations, with minor showings of ore. Copies of the drill logs are attached to this report (Appendices A, B, and C).

GEOLOGIC SETTING

The South Paw claims are in an area of high relief and the rock exposures are good. The only rocks in the vicinity of the mine are limestone and quartzite of Ordovician age.

The oldest rock in the mine area is the Eureka quartzite, a white to pink, vitreous, nearly pure silica quartzite about 200 feet thick that occurs in beds from six inches to six feet thick. It crops out in bold white cliffs and steep-sided ridges. Overlying the quartzite is the Ely Springs dolomite, a dark-gray to blue-black, finely crystalline, cherty, dolomitic limestone that occurs in beds about two feet thick. The Ely Springs dolomite is 500 to 800 feet thick in the nearby Pioche district and is several hundred feet thick in the mine area but the top is not exposed. The quartzite and limestone, in general, strike west and dip 20° to 25° N.

The most prominent structure in the mine area is an east-striking graben about one thousand feet wide and several thousand feet long. Within the graben the rocks are cut by a series of step faults that strike east and dip 65° to 85° S. Displacement along the faults is 50 to 100 feet. Movement on bedding-plane faults along and near the quartzite-limestone contact between the step faults has caused brecciation of the limestone and it is within this brecciated material that the manganese ore bodies occur.

ORE DEPOSITS

The manganese ore bodies that have been mined are gently-dipping, pyrolusite-rich lenses of brecciated limestone in bedding-plane faults along and near the limestone-quartzite contact.

Pyrolusite, the only manganese mineral that was identified, occurs in soft earthy masses and as finely crystalline layers in brecciated dolomitic limestone. Gangue minerals are calcite, quartz as quartzite and chert fragments, limonite, and small pods of light-brown montmorillonite clay. Traces of copper, lead, zinc, and phosphorous are present in the ore but no minerals of these metals were seen and they do not exceed the maximum allowable amounts for metallurgical-grade manganese ore.

The deposit that has been mined was about 300 feet long, 200 feet wide, from 2 to 50 feet thick and averaged 8 feet thick (fig. 3). It has yielded about 17,500 tons of ore that averaged about 36 percent manganese. Normal faulting along two faults, about 100 feet apart and having displacements of about 60 feet each, has separated the deposit into three segments. Other faulted segments are present in the mineralized area and undiscovered ore shoots in similar geologic settings contained in these fault blocks are the target of the proposed exploration.

SAMPLING

Nine samples were taken from ore faces in the bottom level of the mine (fig. 3) and the following analyses were obtained:

BM Sample No.	Width, feet	Percent Mn	Ozs./T. Ag
2052	4.0	25.1	0.2
2053	3.2	50.2	0.4
2054	1.5	53.3	0.2
2055	5.0	32.2	0.3
2056	8.0	40.2	0.3
2363	2.4	27.5	(not assayed)
2364	1.1	50.4	(not assayed)
2365	2.4	32.1	(not assayed)
2366	1.6	16.7	(not assayed)

ORE RESERVES

Measured and indicated reserves total about two hundred tons of ore that averages about 33 percent manganese. These reserves are exposed in the old mine workings as pillars and as thin layers of ore

around the margins of old stopes.

Inferred reserves are 20,000 tons of ore having an average grade of about 36 percent manganese. These reserves are contained in one or more downfaulted segments of the deposit south of the mined area and in ore shoots along the strike of the deposit east and west of the mine workings.

PROPOSED EXPLORATION

The applicant proposed 12 churn and/or diamond drill holes totaling 1,800 feet at a cost of $7.00 per foot, or a total of $12,600.00, and road construction and drill rig sites at $250.00 each, or a total of $3,000.00. These costs are comparable with the current costs of churn drilling in the Pioche district, as approved in contract Idm-E767, docket DMEA-3629.

Inspection of the proposed locations for the drill holes indicated that it will be possible to construct roads and drilling sites and utilize a churn drill rig which is considered to be the most reliable method for the exploration. We, therefore, recommend the following program:

Road construction and preparation of drill sites for churn drill rig (D-8 Caterpillar or equivalent to be used), 14 hrs. @ $14.00/hr., each hole, =$196.00, 12 holes @ $196.00/ea. $2,352.00

Churn drilling 1,800 ft. (12 holes averaging about 150 ft. each) @ $7.00/ft.	$12,600.00
50 samples to be analyzed for manganese, @ $2.00/ea.	100.00
Independent contracts -- None	0.00
Rehabilitation -- None	0.00
New buildings and installations -- None	0.00
Total estimated cost of the project	$15,052.00
Government participation at 75 percent	$11,289.00

The applicant expects to begin the work within 40 days after approval of a contract and to complete the work in six months.

The locations of the drill holes should be flexible to take advantage of information obtained in drilling previous holes, and should be agreed upon as the project progresses.

COMBINED METALS REDUCTION COMPANY

CASELTON PLANT — PIOCHE, NEVADA

ANSWERED		

Mr. Glen Gentry
U.S.B.A. Field Team, Region II
[illegible] Dunes Avenue
Reno, Nevada

Dear Glen:

We did not make up a log sheet of the above drill hole at Southpaw. However, I have the driller's report and the drill cuttings which show the following:

0' - 15'	Wash (alluvium)
15' - 19'	Limestone, blue, medium hard, hard fault surface at 18 feet dipping about 60° West.
19' - 57'	Limestone & Dolomite, gray to blue medium hard. Hard fault surface at 57 feet.
57' - 135'	Limestone & Dolomite, at 120 feet gray. Some black discoloration.
135' - 150'	Quartzite - hard.

Date started May 14, 1956
Date finished May 29, 1956
Driller: J. M. Fullerton

I believe you have the location of this hole on one of our sketches of Southpaw shown as G.D.H. No. 1.

I hope this will be of some help to you, and should there be anything else that I may do to help, please do not hesitate to drop us a line or give us a ring.

Very truly yours

Reginald G. Lee

Re: Docket No. DMEA 4813 - Manganese
Southpaw claims
Lincoln County, Nevada

Gentlemen:

The above-referenced application for exploration assistance for manganese ores has been reviewed by the Division of Iron and Ferro-Alloys, of the Defense Minerals Exploration Administration, and referred to Mr. Spangler Ricker, Executive Officer, DMEA Field Team, Region II, 1605 Evans Avenue, Reno, Nevada, for review and recommendations.

Mr. Paul Gemmill, general manager, Combined Metals Reduction Company, in his letter of August 8, 1957, to Mr. Spangler Ricker, mentioned that an examination of the property had already been made by the members of the Field Team, but any further assistance you may give them will be appreciated.

Sincerely yours,

C. O. Mittendorf (fw)

Dear Mr. Ricker:

The above-docketed application for exploration assistance is being referred to your office for your report and recommendations. Mr. Paul Gemmill, in his letter to you of August 8, 1957, advises that the property has been examined by members of the Field Team, and possibly no further examination is necessary.

Copies of memoranda dated August 20 and 23, 1957, by W. P. Williams, Geological Survey, and Gilbert DeHuff, Jr., Bureau of Mines, respectively, relating to the project are enclosed. Also enclosed is an extra copy of the application for the use of the Field Team.

Sincerely yours,

George C. Selfridge

10. Remarks: (Use back of page if necessary) This appears to be a worthy exploration project. The biggest question to be answered by the Field Team is the best method for obtaining the desired information. I recommend that the application be referred to the Field Team for an examination of the property.

G L DeHuff Jr

IN REPLY REFER TO:

UNITED STATES
DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY
WASHINGTON 25, D. C.

August 20, 1957

Memorandum

To: W. S. Martin, Defense Minerals Exploration Administration

From: W. P. Williams, U. S. Geological Survey

Subject: Review of application, DMEA 4813, (manganese), Southpaw Joint Venture, (Combined Metals Reduction Company), Southpaw Mine, Lincoln County, Nevada

The applicant proposes to explore for new manganese ore reserves on three mining claims. One of the claims contains the Southpaw mine which, according to the applicant, has produced 17,334 tons of ore since 1950.

The proposed work would consist of 1,800 feet of drilling, in 12 holes, at a total estimated cost of $15,600. The holes would be drilled from surface and, through necessity, might require both core and churn drilling.

After examining the applicant's maps and production record, it appears that the proposed work might have a good deal of merit. From the maps it is not possible to determine if the proposed holes are located in the most advantageous positions. I recommend that the application be referred to the Field Team for field examination if necessary and report.

It would be well for the Field Team to consider the best means of excluding the present mine workings from the area under a possible contract.

Gentlemen:

Your application for exploration assistance, dated August 7, 1957 submitted to our office at Reno, Nevada has been assigned Docket Number 4813 and referred to the Division of Iron & Ferro-Alloys in the Washington office. Kindly identify all future correspondence relating to your application by this Docket Number.

Sincerely yours,

Allen S. Dakan, Director
Operations Control and
Statistics Division
