

## 2 Estuarine Bed-Sediment-Quality Data Collected in New Jersey and New York after Hurricane Sandy, 2013

**Table 17.** Concentrations of organochlorine pesticide compounds in environmental and replicate bed-sediment samples collected from the harbors and bays in New Jersey and New York during the Hurricane Sandy reconnaissance study, June–October 2013.—Continued

[Map location number refers to figures 2 and 3. Samples analyzed at the Institute for Integrated Research in Materials, Environments and Society (IIRMES) laboratory in Long Beach, California, and archived in the U.S. Environmental Protection Agency STORage and RETrieval (STORET) Data Warehouse. BHC, benzene hexachloride; DDD, Dichlorodiphenyldichloroethane; DDE, Dichlorodiphenyldichloroethylene; DDT, Dichlorodiphenyltrichloroethane. Concentrations are in micrograms per kilogram, dry weight. Reporting level is 5 micrograms per kilogram, except for perthane, for which it is 10 micrograms per kilogram. ND, not detected above reporting limit; E, estimated value]
