No. 1 Crome Dome
Josephine County, Oregon

Dear Mr. Royer:

Your letter of July 11, 1955, addressed to Mr. John S. Vhay at Spokane, Washington, has been referred to this office for attention.

We are pleased to return the several assay reports which you submitted to the Defense Minerals Exploration Administration with the above-noted application.

Sincerely yours,

C. O. Mittendorf

Re: Docket No. DMEA 3185 - Chromium
Grover C. Royer & E. S. Leep
No. 1 Crome Dome
Josephine County, Oregon

Dear Mr. Royer:

This will acknowledge your letter of October 27, 1954, which was received with samples of chromite-bearing material and concentrates from Josephine County, Oregon. These samples are inferred to have originated from the No. 1 Crome Dome prospect.

Your application for exploration assistance at the No. 1 Crome Dome claim, our Docket No. DMEA 3185, was denied by letter of December 21, 1953, after a field examination of the property and review of all pertinent information. The property was reexamined on August 25, 1954, at your request because additional work was said to have exposed more chromite ore. By letter of October 4, 1954, our denial of the referenced application was reaffirmed as a result of the reexamination and review of all available data on the property.

The Defense Minerals Exploration Administration has no facilities for making metallurgical analyses, and we are unable to give you the information requested on the samples submitted. It is suggested that you submit your samples to a recognized commercial laboratory. For your information, we are enclosing a copy of Bureau of Mines Information Circular 7523, which lists by states some of the laboratories making analyses such as you desire.

We wish to thank you again for your interest in the Defense Minerals Exploration Program and for bringing your property to our attention.

Sincerely yours,

C. O. Mittendorf

218 Maple St.

Dear Sir:

Of Oct. 4 will say that I don't aim to give up hopes or proving my theory of minerals. I am not holding any grudge to any one so far and appreciate the help the department has given me so far. As I expect to ask for assistance later on, so at this time I am enclosing sample of concentrates from Josephine County, Ore. Also an average of the rock was milled which I'm sure you can send to a U. S. laboratory for full examination of same and determine all valuable minerals in it. I have sent several samples off already, showing besides chromite, tungsten, platinum, titanium, chromium.

Some men from Los Angeles, Cal., saw this at the chrome mill at Grants Pass and are very interested in it. I have between 7 and 8 tons of concentrates, so if you can give me the information on such samples, it will be appreciated.

Your resp.

OCT 4 1954

Hon. Harris Ellsworth
House of Representatives
Washington 25, D. C.

My dear Mr. Ellsworth:

Reference is made to your letter of March 4, 1954, requesting information as to the status of the application of Mr. Grover C. Royer and Mr. E. S. Leep of Myrtle Point, Oregon, for exploration assistance at the No. 1 Crome Dome property, Josephine County, Oregon (our docket No. OMbA 3165-Chromium).

In our reply of March 11, we informed you that the above-mentioned application had been denied; that a reexamination of the property would be made to evaluate showing found by work completed after our field examination; and that you would be advised of our future action with respect to your constituents' application.

The report covering the new examination of the property has been received here. Careful study of all the information now available indicates to us that Government participation in the proposed exploration program is not justified.

Accordingly, we enclose copies of our letters of today to Mr. Royer and to Mr. Leep, advising them that we regret our previous denial of their application is reaffirmed.

Sincerely yours,

Frank E. Johnson

Re: Docket No. DMEA 3169-Chromium
Grover C. Royer & E. S. Leep
No. 1 Crome Dome
Josephine County, Oregon

Dear Mr. Royer:

Reference is made to our letter of December 21, 1953, denying your application for exploration assistance at the subject property, and to our letter of March 11, 1954, confirming that an engineer would be sent to make a field inspection of work completed there by you since our previous examination.

The reexamination was made on August 25, 1954. Careful study of all the information now available indicates to us that the probability of disclosing significant ore reserves by your proposed program is not sufficiently promising to justify Government participation. Under these circumstances, we regret to advise you that our previous denial of your application for exploration assistance is reaffirmed.

We wish to thank you again for your interest in the Defense Minerals Exploration Program and for bringing your property to our attention.

Sincerely yours,

Frank E. Johnson

Re: Docket No. DMEA-3185 (chromium)
Grover C. Royer and E. S. Leep
No. 1 Chrome Dome
Josephine County, Oregon

Dear Mr. Selfridge:

Enclosed are the original and 3 copies of a memorandum from Willard P. Puffett, Geological Survey, regarding a re-examination of the Chrome Dome claims in Josephine County, Oregon. This re-examination indicates that the small amount of work done since the original examination by Appling of the Bureau of Mines in November 1953 has disclosed no new information; in fact, Puffett reports that the outlook for the property is equally or more discouraging than it was at the time of the original Field Team examination.

The Field Team recommends that no further consideration be given the application.

August 31, 1954

Memorandum

To: DMEA Field Team, Region II

From: Willard P. Puffett, Geologist, U. S. Geological Survey

Subject: Re-examination, Docket No. DMEA-3185 (chromium), Grover C. Royer and E. S. Leep, Partners, No. 1 Chrome Dome, Josephine County, Oregon.

In a letter dated July 27, 1954, from the DMEA Operating Committee, we were requested to re-examine the Royer and Leep chromium property, Josephine County, Oregon. On Wednesday afternoon, August 25, 1954, Don Kellum, Geological Survey, and I examined this property. Mr. Leep and Mr. W. E. Higgins were at the property. Mr. Royer is no longer associated with the operation.

On July 13 - Royer's letter said he had bought out Leep.

The Chrome Dome Claim No. 1 was first examined on Friday, November 6, 1953, by R. N. Appling, engineer, Bureau of Mines, and W. P. Puffett, geologist, Geological Survey. At that time the applicant had a very small open pit in which was exposed a very narrow band of dunite containing disseminated chromite. The maximum width of this dunite band was slightly more than eight inches and it probably was about 20 feet long. As a result of the meager showings exposed in the open pit the examiners recommended the application be denied. On December 21, 1953, Mr. Mittendorf, Administrator of the DMEA, wrote the applicant stating that their application was denied. On February 3, 1954, Mr. Royer and Mr. Leep requested a new examination of the property. The reason for the request for this new examination was that they had done a little more work in this open pit and had exposed a little more chromite ore. The applicants were advised in a letter from the DMEA Field Team, Region II, on March 2, 1954, that a new examination would be made. No new examination of the property was made until Mr. Kellum and I examined it on August 25, 1954.

The new work, which Mr. Leep had completed since the original examination in November 1953, included deepening and lengthening a small open pit. In addition to this work, a road had been built around the hill to the south where a small open pit had been excavated. Mr. Leep reported that nearly two weeks of bulldozing with a D-7 dozer had accomplished this work.

Copy retained

In the open pit, which was open for inspection last November, no chromite was exposed. This pit had been deepened about 10 feet and the bottom of it is obscured with many boulders. The new open pit around the hill to the south had no chromium ore exposed in it.

Mr. Leep reports that he has shipped about 5 tons of chromium ore to a mill in Grants Pass. He states that this ore was not of sufficient grade to be sold directly to the Government buying station there. These 5 tons of ore are composed mainly of surface material and some high-grade lenses of chromite ore which he was able to find in his pit.

No map was made of the new work. Apparently Mr. Leep mistakenly believed the small short narrow stringers of chromium ore which he found will widen with depth. The evidence exposed in the wall rock of the two open pits does not justify this hope.

The outlook for this property as a chromium producer is equally or more discouraging than it was at the time of the original examination. It is recommended that no further consideration be given this property as a possible chrome producer or as a site for a DMEA project. It is also recommended that Mr. Leep be discouraged, if at all possible, from submitting further applications for DMEA assistance for exploration for chrome. Although he is a well-meaning individual, he is apparently the typical overly optimistic prospector who has little useful knowledge concerning ore deposits in general.

Dear Mr. Weissenborn:

Reference is made to the subject docket.

We are enclosing copies of the data submitted by Mr. Royer by letter of July 13, 1954, to substantiate the requested exploration on DMEA-3308 in Coos County, Oregon, but which pertain to the subject docket.

1. Escrow Instructions and Agreement from Leep Logging Company.

2. Analyses from Crome Dome #1 claim by State Department of Geology and Mineral Industries.

3. Analyses and mineral identification by George Gibbons Hayes.

4. Sketch map of Crome Dome area.

It would be appreciated if you would inform us when we may expect the report on the re-examination of the subject property, tentatively scheduled in Mr. Agnew's letter of March 2, 1954, to Messrs. Royer and Leep, as we have had Congressional inquiries concerning this application.

Copies of applicant's letter, dated July 13, 1954, reference DMEA docket 3308, are also enclosed for your information.

Sincerely yours,

George C. Selfridge

Re: Docket No. DMEA 3308 --Chromium North Bend, Myrtle Point, and Coquille groups of claims (18 claims)
Coos County, Oregon

Dear Mr. Mittendorf:

I have your letter of July 7, 1954, and following is an attempt to give you all of the information you request. If any of such should prove inadequate, kindly request additional information.

A reason for my delay is that one of the owners of the Coos County claims has failed to sign, although he has promised to do so. I am able, however, if acceptable to you, to include forty acres of oil royalty which I own in my home State of Oklahoma, which forty is further described as the Northeast Quarter of Section Eighteen, Township Fourteen, Range Six, East of the Indian Meridian.

Mr. E. S. Leep has quit claimed the interest of the Leeps to me and these deeds are on escrow as you will note by the enclosed escrow agreement.

Enclosed you will find a map and sketches of the eight claims in Josephine County, Oregon, showing some $3,000.00 cash and labor expended.

The reason that exploration is needed is to locate the main ore body of the lower dip so as to arrange for drainage of the water.

Notice that the map has markings of location of nickel, copper and chrome. Six to seven tons of chrome has been taken from two vents on the surface. This was the highest grade chrome ever brought in from the stock pile as you will note from the newspaper report attached. For more information on the Oklahoma property, you will find two letters regarding its leasing. There is oil on three sides up to one-fourth mile. I refused an offer of $500.00 per acre. I will be willing to give the government a lien on this oil rights in place of the Coos County mining claims.

If this oil property will be acceptable, please send me the lien papers to sign. Will it be necessary to have E. S. Leep's signature in view of the escrow?

If you need references for myself you may contact the Farm Department Administration of Chandler, Oklahoma, Lincoln County, or the Federal Land Bank of Wichita, Kansas, or the Security Bank of Myrtle Point, Oregon.

Very truly yours,

/s/ Grover C. Royer

Grover C. Royer

Encls.

P. S. I estimate the cost of the exploring to be from $15,000.00 to $20,000.00.

ROCK AND MINERAL ANALYTICAL ASSAY REPORT BY GEORGE GIBBONS HAYES

4452 Raleigh Street Denver 12, Colorado

NOTE: All tests are Chemical and Acid assays, and are approximate. For Gold, alone, a Fire Assay is recommended. All rocks checked with microscope, magnified 50x. Every rock checked with a Mineralight for fluorescent reactions. Rocks pulverized to 30 mesh, and tested with blowpipe to a temperature of 1400 degrees C. Every rock checked with a Geiger Counter and an Alpha Gamma Ray Counter to determine uranium, thorium, and other rare minerals. A Geiger count of 70-80 "clicks" per minute is evidence of uranium traces, and a steady Geiger count of about 186 "clicks," plus 19 gamma ray counts per minute, indicates an approximate 4% uranium. Should your sample show a "good count," I will give you the address of the nearest Chief, Metallurgical Division, U S. Bureau of Mines Branch, so you can send a like sample for their examination and reactions. This service is free—make use of it! *The Old Rockhound of The Rockies.*

SAMPLE NO. -1- DATE March--13-1954 FOR G.C.Royer,O'Brine,Oregon..should be a good place to go--March--17!...

Name of Rock Slickentite ,Banded or Sstratified" Cupriferous Quartz--

Rock Type Igneous;inwhich folding and faulting has produced a slickentite texture.

Streak Plate Color Dark red to brown--slightly greenish from augite and malachite..

Mineralight Reaction X

Geiger Counter 49 "clicks" per minute Slightly above average--see NOTE above..

Alpha Gamma Ray Counter X "counts" per minute *(negative unless traces and more in rare minerals)*

Microscope Check Gold-copper pyrites much darker than the worthless,pale tin-white iron pyrite;and most of the copper is a green copper carbonate(malachite)..

Blowpipe Reactions (flame color, etc.) With Hcl acid--a deep blue flame color from copper reactions--and when well fused the pyrite and iron oxides becomes magnetic...

HARD ROCK COMMENTS: Rock has a "greasy" feel when rubbed between the fingers--hence is a slickentite--and often is found in massive "slickentite walls in many mines and prospects--due to slipping along a major fault fracture or "fault slip"...look up page 96--beginning on faults--applies to this sample...if the magnetic iron should begin to perk up--some titanium could be expected,for magnetic iron and titanium are as closely related together as the Truman Demcorats are with the "I hate McCarthy" group of pseudonym(false) Americans--half pink--and half blue--and mostly red--and like specularite which fools so many pebble pups to thinking this ~~sparkling type of iron~~ is platinum or some rare mineral--they fool too many that they are the only true Americans.And in prospecting for titanium--have a magnet handy--if the iron is very magnetic--is certain to have some titanium with the magnetic iron(ilmenite)

Re: Escrow Instructions and Agreement

Gentlemen:

Enclosed herewith please find five quitclaim deeds covering certain mining claims in Coos and Josephine Counties in Oregon.

Upon receipt of payment by you of the sum of $1520.00 by G. C. Royer you are requested and instructed to release said deeds to G. C. Royer. In the event such sums have not been paid in full within one year of this date you are requested to release said deeds to Leep Logging Company unless other directions our given in writing and signed by all parties hereto, their heirs, executors, administrators, successors or assigns.

Kindly credit all sums received hereunder to Leep Logging Company.

We and each of us agree to the following instructions.

Dated this 28th day of June, 1954.

LEEP LOGGING COMPANY

Re: Docket No. DMEA 3185 - Chromium
No. 1 Crome Dome
Josephine County, Oregon

Gentlemen:

This will acknowledge receipt of your letter of March 18, 1954, concerning your recent production from the subject property, and also concerning work done on claims in Coos County, Oregon, in which you have an interest.

It was noted that you wish to include the claims in Coos County and the claims in Josephine County all under one application. If the two groups of claims for which you propose an exploration project, although in different counties, were contiguous or very close to each other, we could consider all of them under one application. However, as they are not, we cannot consider them under one application. Therefore, if you will furnish the information for the additional 20 claims in Coos County by filling in the enclosed forms MF-103, Application for Aid in an Exploration Project, we shall consider that application separately.

Sincerely yours,

C. O. Mittendorf

Re: Docket No. DMEA 3185 - Chromium
No. 1 Cross Down
Josephine County, Oregon

Gentlemen:

This will acknowledge receipt of your letter of March 18, 1954, on the recent production from the referenced property.

It was also noted that you wished to include, with the property covered by the subject application, certain claims in Coos County, Oregon. Because the claims in Coos County are not adjacent to the No. 1 Cross Down and will not benefit by any work on that claim, such claims may not be included in the subject application. We are, therefore, enclosing copies of MF-103, Application for Aid in an Exploration Project, for your use in submitting a request for assistance in exploring these claims.

Sincerely yours,

Administrator

C. O. Mittendorf

Dear Sir:

Rec'd your answer today. Will say that since the first exploration of No. 1 Crome claim that we have spent over $1,500.00 here and taken out some $400.00 of milling crome, and it looks much better now -- the highest grade crome that has been turned in to the Depot at Grants Pass in the last 5 years so they report.

We have done other exploring here on this group lately and hit a vein of copper, assayed 826, and I am taking in a sample to the U. S. Bur. Mines tomorrow.

Also you straighten out our holdings. We expect this loan, if made, to cover all our holdings--7 claims here in this group and 1/4 to 2/3 interest of 20 claims in Coos County with several vital minerals, as well as other minerals. I sent the assays of such with my application. On these Coos County claims we have spent in cash and labor better than $20,000, and all Legal work is up to date.

Hoping this will give a better bearing of application.

Yours,

Signed: G. C. ROYER

Hon. Harris Ellsworth
House of Representatives
Washington 25, D. C.

My dear Mr. Ellsworth:

This will acknowledge receipt of your letter of March 4, 1954, asking about the status of the application submitted on October 5, 1953, for exploration assistance by Messrs. Grover C. Royer and E. S. Leep of Myrtle Point, Oregon. Their application covered the No. 1 Crome Dome claim, Josephine County, Oregon, and was filed here as Docket No. DMEA 3185 - Chromium.

On December 21, 1953, the above-noted application for exploration assistance was denied. The applicants were advised that careful study of all our information, although noting a small amount of marginal chrome ore on their property, indicated to us that the probability of disclosing minable ore reserves by their proposed program was not sufficiently promising to justify Government participation.

We have recently received and reviewed a request that we reexamine the same property to evaluate the showings found by work completed since our field examination was made. As indicated in the attached copy of our reply, we are obtaining further information to assist us to determine whether our denial should be reconsidered.

Because of the interest you have shown, we will advise you of our future action regarding your constituents' application.

Sincerely yours,

C. O. Mittendorf (fw)

My dear Mr. Ellsworth:

This will acknowledge receipt of your letter of March 4, 1954, asking about the status of the application submitted on October 5, 1953, for exploration assistance by Messrs. Grover C. Royer and H. S. Leep of Myrtle Point, Oregon. Their application covered the No. 1 Creme Dome claim, Josephine County, Oregon, and was filed here as Docket No. DMRA 3185 - Chromium.

On December 21, 1953, the above-noted application for exploration assistance was denied. The applicants were advised that careful study of all our information, although noting a small amount of marginal chrome ore on their property, indicated to us that the probability of disclosing minable ore reserves by their proposed program was not sufficiently promising to justify Government participation.

We have recently received and reviewed a request that we reexamine the same property to evaluate the showings found by work completed since our field examination was made. As indicated in the attached copy of our reply, we have asked for further information that could assist us to determine whether the property should be inspected again.

Because of the interest you have shown, you will be kept advised of our future action regarding the request for reexamination as soon as we receive the necessary data from the applicants.

Sincerely yours,

Administrator

Re: Docket No. DMEA 3185 - Chromium
No. 1 Crome Dome
Josephine County, Oregon

Gentlemen:

This will acknowledge receipt of your letter of February 25, 1954, requesting that we reexamine the subject property. Your application for exploration assistance was denied by our letter of December 21, 1953, because our investigations found insufficient favorable evidence to justify Government participation. Your request for reconsideration is based on the results of a comparatively small amount of work completed at your property since our field examination.

In accordance with a similar letter sent by you direct to the Executive Officer, Region II, our Field Team has arranged a visit to your property by an engineer.

Consequently, we will hold your request in abeyance until we receive the Field Team report covering the new inspection.

Sincerely yours,

C. O. Mittendorf

Re: Docket No. DMRR 5185 - Chromium
No. 1 Crome Dome
Josephine County, Oregon

Gentlemen:

This will acknowledge receipt of your letter of February 25, 1954, requesting that we reexamine the subject property. Your application for exploration assistance was denied by our letter of December 21, 1953, because our investigations found insufficient favorable evidence to justify Government participation.

The above request for reconsideration is based on the results of a comparatively small amount of work completed at your property since our field examination. Before sending our field team to make a reexamination for you, we should have satisfactory evidence that the showings now visible are appreciably richer in grade, as well as substantially larger, than anything previously available for inspection.

We should be glad to give consideration to making a reexamination if you would first submit a sketch map of the area where your new work was completed. The sketch map should show width and length of ore body exposed. Please attach assay reports for whatever samples you have taken since our last examination. If you have sold any of the ore which you recently mined, we should also be interested in seeing copies of the settlement sheets for the shipment, with any available milling data in case that ore was milled.

Your reference to the manganese and copper assays shown in your application is not entirely clear to us, but our study of the sample data submitted leads to the belief that the manganese is present in insignificant traces only; and, although there may be enough copper present to react qualitatively to a flame test, we would prefer to depend on assays based on quantitative methods.

If your nickel prospect seems to have strong possibilities of providing nickel ore of good grade, you may wish to complete and return the enclosed application forms. It is our understanding, however, that a number of metallurgical problems connected with the treatment of the nickel-bearing material found in Coos County are still unsolved, and you may wish to investigate further before filing an application.

Sincerely yours,

Administrator

March 2, 1954

Memorandum

WSM

To: W. S. Martin, D.M.E.A.

From: P. W. Guild, U. S. Geological Survey

Subject: DMEA 3185 - Chromium
Royer and Leep prospect
Josephine County, Oregon
Request for re-examination

Comments:- The applicants do not supply sufficient evidence to justify a re-examination. They have a market for any ore they can produce, and no better way exists to explore a small chromite body of this sort than to mine it out and sell it. If they should develop a real deposit and can present some evidence that further exploration would be warranted, we could reconsider the property, but I feel that the high price established at the Grants Pass Depot should be stimulus enough. ?

If I interpret the last sentence on page one correctly, the applicants are asking for a loan for some other properties in Coos County. It might be well to inquire about this.

I believe that we could ask the Field to keep this prospect in mind and visit it only if someone happens to pass close by.

Re: Docket No. DMEA 3185 - Chromium
No. 1 Chrome Dome
Josephine County, Oregon

Gentlemen:

Your application for aid for an exploration project and other data available to us in Washington relating to the above named property have been reviewed.

Projects approved by the Defense Minerals Exploration Administration must, in its judgment, show definite promise of yielding materials of acceptable grade in quantities that will significantly improve the mineral supply position for the National Defense Program.

Careful study of all our information, although noting a small amount of marginal chrome ore on your property, indicates to us that the probability of disclosing minable ore reserves by your proposed program is not sufficiently promising to justify Government participation. We regret to advise you, under these circumstances, that your application for exploration assistance is denied.

We wish to thank you for your interest in the Defense Minerals Exploration Program and for bringing your property to our attention.

Sincerely yours,

C. O. Mittendorf (for)

December 15, 1953

MEMORANDUM

To: Administrator, DMEA

From: Iron and Ferro-Alloys Division

Subject: Denial of application for exploration assistance in the amount of $2,000.00
Docket No. DMEA 3185 - Chromium
Grover C. Royer and E. S. Leep, Partners
No. 1 Chrome Dome claim
Josephine County, Oregon

The denial of the subject application by this Division is based on the following information:

(1). The applicant requested exploration assistance in the sum of $2,000.00 to explore for chromium on the No. 1 Chrome Dome claim, Josephine County, Oregon.

(2). There are no workings on the claim except a pit 20 feet wide, 30 feet long and a maximum of 6 feet deep, which has exposed a band of dunite 1 to 2 feet wide by 10 to 12 feet long striking nearly due north and dipping steeply to the east. Because of sloughing the exposure could not be traced in either direction from the pit. The dunite contains dull gray crystals of olivine plus disseminated crystals of chromite. Two samples taken from this band gave the following results:

Sample	Cr_2O_3	Fe
By Oregon State Department of Geology	19.17%	15.95%
By DMEA Field Team 8" cut	20.02%	7.8%

(3). The predominant rock type in the vicinity of the claim is perioditite which in places has been altered to serpentine.

(4). A number of narrow bands of chromite, one-half to three-quarters inches wide, were seen south of the open pit.

(5). The occurrence of disseminated chromite in peridotite in a narrow band with very limited lateral extent leads to the belief that there is little possibility it represents a surface exposure of a minable ore deposit.

(6). No ore reserves exist on the property.

(7). It is concluded that the band of dunite is too small to justify further exploration.

(8). The Examining Team recommends denial of the application and the Field Team concurs.

(9). The Commodity Divisions of the Geological Survey and Bureau of Mines concur with the denial.

To: DMEA Field Team, Region II

From: Willard P. Puffett, Geologist, U. S. Geological Survey, and Richard N. Appling, Mining Engineer, U. S. Bureau of Mines

Subject: Docket No. DMEA-3185 (Chromite), Field Examination of Royer and Leep Prospect (Crome Dome No. 1 Claim), Josephine County, Oregon

APPLICANT

Grover S. Royer, Box 1212, Myrtle Point, Oregon
E. S. Leep, Myrtle Point, Oregon
Gene Leep, Myrtle Point, Oregon
Delbert Leep, Myrtle Point, Oregon

RECOMMENDATIONS

It is recommended that the application be denied. A 2-foot wide band of dunite with disseminated chromite has been exposed by trenching on the Crome Dome Claim No. 1. This band of dunite can be traced only a few feet in a horizontal direction and thus it appears to be too small to justify further exploration.

EXAMINATION

The Crome Dome Claim No. 1 was examined on Friday, November 6, 1953, by R. N. Appling, U. S. Bureau of Mines, and W. P. Puffett, U. S. Geological Survey. Grover Royer and Gene Leep were at the property. Approximately 1½ hours were devoted to the examination.

NAME AND LOCATION

The Crome Dome No. 1 claim is in the NW¼, Sec. 9, T. 41 S., R. 9 W., W.M., Josephine County, Oregon. The property is just north of a sharp hairpin turn on the Wimer Road, 7.1 miles southwest of O'Brien, Oregon.

Reviewed by
DMEA OPERATING COMMITTEE
12-14-53
(date)

ACCESSIBILITY

The 7.1 miles of road from O'Brien to the prospect is gravelled the entire distance and is in fair to good condition. This road is open the entire year, except for heavy snowfall periods.

COMPETENCY OF APPLICANT

The applicant states he would use his machinery and apply his labor toward the costs of a project. Other than these items, he is not prepared to expend any actual cash on the project.

Presumably Mr. Royer would supervise operations. Mr. Royer has had some experience in prospecting, but it is doubtful if he has sufficient experience to supervise any but the most simple type of exploration project.

PROPERTY RIGHTS

The Crome Dome No. 1 claim is owned by right of location by Grover Royer and George W. Bauguess. Apparently Grover Royer and E. S. Leep have leased the one-half interest in the claim held by Mr. Bauguess. No copy of this lease has been submitted.

DESCRIPTION OF PROPERTY

The applicant's property is on the top and north slopes of a ridge extending northeast from Oregon Mountain. Branches of Whiskey Creek flow on both sides of this ridge. The top of the ridge is at 2,379 feet elevation and the average relief in the immediate area is of the order of 1,000 feet.

The accompanying map shows the only workings that have been excavated on the property. These consist of a shallow trench which has been widened to a small open pit opening on the north slope of the ridge. This pit is about 20 feet wide, 30 feet long and a maximum of 6 feet deep. A bulldozer road connects this pit with the main road which is some 400 feet to the southwest. Near the main road there has been some bulldozer work to level a space for erection of buildings. No bedrock has been exposed by this work.

GEOLOGY

The State of Oregon Department of Geology and Mineral Industries Bulletin No. 40 entitled "Preliminary Description of the Geology of the Kerby Quadrangle, Oregon," by F. G. Wells, P. E. Hotz, and F. W. Cater, Jr., discusses the area in which the Crome Dome No. 1 property is located. According to this report, the predominant rock type in the vicinity of the claim is peridotite of Jurassic or Cretaceous Age. Just to the east of this property is a wide band of serpentine which is in turn bordered on the east by a band of volcanic rocks, mainly andesite, assigned to the Galice formation of Jurassic Age.

From what could be observed during the DMEA examination, the most common rock in the vicinity of the open pit is paridotite (saxonite?), which in places has been altered to serpentine. In the open pit the exposed rock is all serpentine with the exception of a narrow band of dunite near the east face of the pit. Because of very poor exposures in the pit, due to slough from the banks, it was difficult to obtain much evidence concerning the dimensions and orientation of the dunite band. From that which could be observed, it is believed the dunite band is 1 to 2 feet thick, 10 to 12 feet long, strikes nearly due north and dips steeply to the east. This band contains dull gray crystals of olivine plus disseminated crystals of chromite, giving a "salt and pepper" appearance to the rock. The chromite crystals constituted from 20 to 50 percent of the rock. This band of chromite-bearing dunite could not be traced in either direction from the pit.

The office of the Oregon State Department of Geology in Grants Pass was visited to obtain more information about the deposit. A representative from that office had visited the property in February 1953, at which time only a narrow trench crosscutting the dunite band existed. Their report indicates the dunite is 2 feet thick and dips 60 degrees to the east. A sample taken across the dunite band yielded an assay result of 19.17 percent Cr_2O_3 and 15.95 percent Fe.

An 8-inch sample, cut across the dunite band near its northern end by the DMEA examiners, yielded an assay result of 20.02 percent Cr_2O_3 and 7.8 percent Fe.

A number of narrow bands of chromite in paridotite were seen in the vicinity south of the open pit. These bands ranged from one-half to three-quarters of an inch in thickness and apparently persist only short distances along the strike.

The occurrence of disseminated chromite in a narrow band with very limited lateral extent, leads one to believe there is little possibility that it represents a surface exposure of a minable chromite ore deposit. The general characteristics of the deposit are similar to a great many of the chromite occurrences in the Grants Pass area.

No ore reserves of consequence exist at the property.

PAST OPERATION

The applicant shipped slightly more than four tons of rock from the pit to a small mill in Grants Pass (Tubandt's Crome Mill) some time late in the summer of 1953. From this material one ton of concentrates were made which contained 49.8 percent Cr_2O_3 and 14.7 percent Fe. Mr. Grover Royer exhibited a check for $76.00, which he

received for this ore. Mr. Tubandt stated that this tonnage consisted predominately of overburden and near-surface material with very little contained hard rock.

APPLICANT'S PROPOSAL

No definite exploration project was outlined in the application. During the examination Mr. Royer stated that he wanted to do some bulldozing down slope from the open pit and drive a crosscut tunnel to the downward extension of the chromite-bearing band and then to drift on this band. Mr. Royer also mentioned wanting to do some diamond drilling in the area, although he was not certain how much drilling he wanted or just exactly where he wanted to do the drilling.

The exposures on the property were not sufficiently encouraging to justify any more work other than perhaps a few hand trenches to test for possible extensions of the ore band. There was certainly no indication of sufficient chromite present to warrant any consideration for a DMEA project.

Re: Docket No. DMEA 3185 - Chromium
No. 1 Chrome Dome
Josephine County, Oregon

Gentlemen:

Reference is made to the above-docketed application for exploration assistance which has been reviewed by the Iron and Ferro-Alloys Division of the Defense Minerals Exploration Administration and referred to Mr. A. E. Weissenborn, Executive Officer, DMEA Field Team, Region II, South 157 Howard Street, Spokane 4, Washington, for a field examination of the property.

The Regional Office will contact you at an early date with regard to an examination of your property. Any assistance that you can render the members of the field team during the examination will be appreciated.

Sincerely yours,

Frank E. Johnson (for)

ACTING Administrator

No. 1 Chrome Dome
Josephine County, Oregon

Dear Mr. Weissenborn:

Reference is made to the above-docketed application for exploration assistance which is being referred to your office for a field examination of the property.

The application is poorly prepared and lacks most of the data required. However, a field examination is being requested as the application indicates that there is little chance of obtaining additional information by correspondence from Royer and Leep.

Sincerely yours,

George C. Selfridge
Chairman, Operating Committee (GCS)

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Grover C. Royer, Box 1212, Myrtle Point, Oregon
Partner: E. S. Leep, Myrtle Point, Oregon
Owner of equipment listed.

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract As per ~~lect~~ permit FOREST
4-5-8.9. T. W. P. 41 S. R 9, W. of Josephine Co., Oregon

(*b*) State any mine name by which the property is known. No. 1 Crome Dome

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise Owner ½,
Have ½ leased on 5 and 10 %

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property.

(*e*) If you own the land, describe any liens or encumbrances on it None
9103 560-61 Vol. 53, 562-63, Vol. 53, Page 454, Vol. 14

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. As per assay enclose

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore .....

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within ..... days and be completed within ..... months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

☐ Money ☐ Use of equipment owned by you ☐ Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

Additional Papers for application for aid in an Exploration Project

Bureau of Land Management
RECEIVED
OCT - 2 1950

Grover C. Royer
Box 1212, Myrtle Point, Oregon

4. Physical description:
(a) Drilling site roads to some mill site working. Excavating for living quarters and tool shed . Also, cut in ore vent seam and removing 5 tons of crushed constrck worth $100.00.

(b) As assay enclosed shows and better ore showing.

(c) All indications showing of said land show it necessary to mine from the lower level as shown on map, as water conditions show and 100 tons of crome picked up from surface.

(d) Road and electric lines crossing claims, 38 miles to U. S. stock pile. All state and county roads.

5. The exploration project:
(d) 25 years of experience in oil exploring working on U. S. dams and mine exploring. Will expect to do the work with some hired labor.

6. Estimate of costs:
We estimate that the exploring and opening up to pay can be done with $2000.00 of working capital for labor, fuels, powder and assays.
(d) Operating equipment: The equipment we have consists of the following:

Dump truck	$2000.00
Dozer	15000.00
Tractor Loader	2000.00
Crusher and motors	2250.00
4 wheel power truck	625.00
Small tools necessary	225.00
Mine timbers, tool house & cabins	1000.00
	$23,900.00

Needed equipment loan:

Diamond drill equipment	$7000.00
Air compressor and drillers assers	3000.00
Working capital	2000.00
	$12000.00

Notice, holding not to be included in this contract unless the Government wants exploring sooner. Assay of Coos County holdings which I am interested in, I and B. S. Loop, consists of 16 crome and copper claims leased, 6 Manganese claims, copper, gold, iron and titanium. We are 1/3 each or 2/3 interest in same which we do not expect to explore until the Grants Pass property is on production, on ~~[illegible]~~ unless the government insists to explore at a early date. Hoping this statement, assays and map will be clear to you. There is also a large deposit of asbestos. Furthermore, if such loan is granted, we will expect to name it Royer and Loop Exploration and Developing Company of Myrtle Point, Oregon.

SISKIYOU NATIONAL FOREST

Close-Down Zone No. 16

The sections of the laws referred to provide that the following requirements shall be complied with during the term of this permit:

1. The permittee shall use every reasonable precaution which, in the judgment of the State Forester, is necessary in order to prevent the start and escape of fire from said operation.
2. The permittee shall, when so notified by the State Forester, close down any part or all of said operation during any day or part thereof or during any period of time when, in the judgment of the State Forester, the area covered by this permit is extremely susceptible to damage by fire due to low humidity, high wind or temperature or due to the existence thereon of an excessive amount of inflammable debris, or due to a combination of any such conditions.
3. Said permittee shall designate a representative authorized to act on all matters having to do with fire control. Said representative shall be available at all times by direct means of communication with the State Forester, to receive and transmit promptly information as to burning conditions additional precautionary measures necessary and notification to close down his operation or other instructions hereunder.
4. Said permittee shall furnish and maintain such weather instruments as the State Forester may prescribe as adequate in his judgment to determine the relative humidity and temperature of the air, and the direction of the wind; provided, however, that the cost to the permittee of instruments prescribed hereunder shall not exceed twenty-five dollars ($25.00).
5. That both the operator and landowner shall comply with such rules and regulations as may be promulgated by the State Forester and approved by the State Board of Forestry, within the limits of the stated requirements of Sections 5 and 6, Chapter 237, Oregon Laws 1941, as amended, and shall in any event either leave reserve trees of commercial species deemed adequate by the State Board of Forestry under normal conditions to maintain continuous forest growth or provide adequate stocking to insure future forest growth.
6. That in the conduct of logging operations and prior to and during slash disposal by burning as required by Section 107-222, O.C.L.A., it shall be the duty of every operator and landowner to take proper action and to use every reasonable effort to protect residual stands and trees left uncut as a source of seed supply.
7. This permit shall be posted at a conspicuous place at the headquarters of said operation.

Permission to operate power-driven machinery may be suspended for any period or periods when, in the judgment of the State Forester, the above described area or adjoining areas are extremely susceptible to damage by fire due to low humidity, high wind or high temperature, or due to the existence on said described area of an excessive amount of inflammable debris, or due to any combination of such conditions. Permission to harvest timber or other forest tree products may be suspended, after 30 days notice, for failure to comply with the terms of provisions 5 and 6 above.

The same penalties apply for each day's operation during a period or periods when this permit is suspended or revoked as are provided by law for conducting an operation without a permit.
