

Table 12. Concentrations of total organic carbon in environmental and replicate bed-sediment samples collected from the harbors and bays in New Jersey and New York during the Hurricane Sandy reconnaissance study, June–October 2013.

[Map location number refers to figures 2 and 3. Samples analyzed at the U.S. Environmental Protection Agency (EPA), Edison, New Jersey, and archived in the EPA STORage and RETrieval (STORET) Data Warehouse. mg/kg, milligrams per kilogram; ND, not detected above minimum reporting limit of 1,000 mg/kg]
