Gentlemen:

On July 17, you returned the enclosed Technical Data Forms (MF-100) of the Mica Development Corporation which had been supplied in connection with their application for exploration aid. Notation states: "Not in operation. Please resubmit when operation is resumed and priorities assistance is required".

We prepared the above application and a number of others for mine operators in this area. In this instance the application was for exploratory aid only. It is our impression that if a mine is in operation such aid will not be granted. Therefore, we believe an error has been made in the consideration of the particular point. Should our assumption be correct will you please proceed with processing this application.
