OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files of the Washington office pertaining to Contract Idm-E548, Docket DMEA-2921 (mica), dated June 15, 1953, with

Fred Taylor, Julian Greene, and Johnnie Greene
c/o Fred Taylor
Box 127
Newland, North Carolina

for the purpose of determining the amount of royalty payable to the U. S. Government on sales of minerals from property referred to as the Cow Camp (South) Mine located in Avery County, North Carolina, during the period February 20, 1958, through June 15, 1960.

A certification of discovery or development was issued on June 7, 1954, and, in accordance with Article 6 and Annex I of the contract, royalty is payable on all minerals produced from the land described in Article 2 of the contract for a period of 10 years from the date of the contract or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first. A Report of Review dated April 26, 1954, indicated accepted costs under the exploration contract amounting to $5,450.00 with the Government's contribution on a 90 percent basis being $4,905.00.

The status of the project, the scope of review, and the reasons therefor are stated on page 2.

This review established no sales subject to the Government's royalty subsequent to the period covered by a prior Report of Royalty Review which found the sales subject to the Government's royalty through February 19, 1958, to be $8,509.47. The royalty account as of February 19, 1958, was:

Total Royalty Payable	$425.48
Total Royalty Paid	425.48
Balance of Royalty Due	$ -0-

As of June 15, 1960, the royalty account of this project was found to be:

Total Royalty Payable	$425.48
Total Royalty Paid	425.48
Balance of Royalty Due	$ -0-

December 6, 1961

E. D. Talbert, OME Auditor

Idm-E548 Fred Taylor, Julian Greene, and Johnnie Greene DMEA-2921

STATUS OF PROJECT, SCOPE OF REVIEW
AND REASONS THEREFOR

The property under the contract consists of 70 acres more or less, excepting 15 acres known as Cow Camp (North) Mine. The Operators, a partnership, held possession on the date of the exploration project contract by virtue of a March 3, 1952, lease of the mineral rights to Fred Taylor by Charles M. Trammel and Iris M. Trammel, 2501 Calvert St., N. W., Washington, D. C. The Trammels had obtained such mineral rights under a July 18, 1949, deed from W. R. Robbins and Ethel Robbins, Route 3, Newland, North Carolina, who had retained the surface rights.

In consideration of and as an inducement for the Government to enter into the exploration contract, on February 27, 1953, the Trammels executed an Owner's Consent to Lien. On August 22, 1953, however, their mineral interests were deeded to Fred Taylor. On December 13, 1955, Lewis Aldridge of Spruce Pine, North Carolina, became the owner of the mineral rights by virtue of a deed executed by Fred Taylor and Laura G. Taylor. Sometime in 1957 Aldridge leased the mineral rights to a Dave Dellenger, address not indicated in the files.

During the period that Aldridge was in possession of and operating the property, he granted a 1/3 interest to W. R. Robbins, the surface owner, as consideration for the use of the surface and for supervisory services, and a 1/3 interest to Paul Edwards, Unicoi, Tennessee, for the use of a bulldozer. After Dave Dellenger leased the property, operations were conducted by Dellenger, Cleon McKinney, and W. R. Robbins on a partnership basis with ½ of the profits, if any, accruing to Gene Penland, president of the bank in Newland, for supplying all equipment and supplies.

During the period from November 1953 to December 1957 sales of mica were made progressively in the following names:

Cow Camp Mining Company, Newland, N. C.
Fred Taylor, Box 127, Newland, N. C.
John N. Taylor, Newland, N. C.
Cow Camp Mining Co., Box 237, Spruce Pine, N. C.
Cleon McKinney, Route 2, Spruce Pine, N. C.

All such sales were covered by Royalty Audit Reports and Certificates dated July 26, 1954, and March 21, 1955, and a Report of Royalty Review dated March 14, 1958.

Inspections of the property, inquiries of the surface owner, and checks at the G.S.A. Mica Purchase Depot by field representatives

have established that all sales of production through June 15, 1960, have been accounted for and that the property has not been operated since November 15, 1957.

Article 7 of the exploration project contract provides, in part, that the Operator remains liable for payment of the Government's percentage royalty if he makes or permits conveyance of the Operator's rights in the land without preserving the right to royalty and the lien for payment thereof. The Operator's deed to Lewie Aldridge did not preserve the Government's rights and lien.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(1) The files indicate that all sales of production have been accounted for and proper royalty thereon paid;

(2) The property has been inactive since November 1957; and

(3) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible additional royalty which might be disclosed.

CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the records of the Executive Officer, DMEA Field Team, Region V, Knoxville, Tennessee, pertaining to Contract Idm-E548, Docket No. DMEA-2921 (Mica), dated June 15, 1953, with

Fred Taylor, Julian Greene, and Johnnie Greene, Partners
Newland, North Carolina

for the purpose of determining the amount of royalty due the U. S. Government on sales of mica from property referred to as Cow Camp Mine, located in Avery County, North Carolina, during the period March 16, 1955, to February 19, 1958.

A certificate of discovery or development was issued on June 7, 1954, and, in accordance with the contract, royalty is payable on the net proceeds realized from production as a result of such discovery or development during a period of 10 years from the date of the contract or until the amount of the Government's contribution to exploration costs has been repaid, without interest, whichever occurs first. A report of review in lieu of final audit dated April 26, 1954, indicated accepted costs under the exploration contract amounting to $5,450.00 with the Government's contribution, on a 90 percent basis, being $4,905.00. The scope of this royalty review and the reasons therefor are stated on Schedule "A" attached.

My review established the total sales of mica for this period to be $2,270.63. Royalty due the U. S. Government at the contract rate of 5 percent is $113.54. Prior royalty audits covering the period June 15, 1953, to March 15, 1955, stated the sales of mica to be $6,238.84 for that period and the status of the royalty account as follows:

Total Royalty Due	$311.94
Total Royalty Paid	311.94
Balance of Royalty Due	- 0 -

As of February 19, 1958, the royalty account of this project was found to be:

Total Royalty Due	$425.48
Total Royalty Paid	425.48
Balance of Royalty Due	- 0 -

G. E. Fisher
G. E. Fisher, Auditor

March 14, 1958

Schedule "A"

Contract Idm-E548, Docket No. DMEA-2921 (Mica)
REPORT OF ROYALTY REVIEW

This review was limited to the listing of sales of sheet mica to the Mica Purchase Depot, Spruce Pine, North Carolina, and scrap, punch, etc. sold to other companies and individuals as indicated by the records of the DMEA Region V office in connection with production from Cow Camp Mine on which royalty was paid during the period under review. Such list, which is filed with my audit work papers, was also checked with the purchase records of the Depot. A summary of the indicated production, sales, and royalty paid to the Government follows:

Item	Production (Pounds)	Sales	Royalty Paid
Sheet mica	557.38	$8,131.62	$406.58
Scrap mica	9,950.00	121.75	6.09
Punch mica	1,061.00	106.10	5.31
Other	N.A.	N.A.	7.50
Totals	11,568.38	$8,359.47	$425.48

The last royalty payment included in this review as received on December 18, 1957. Included was an amount of $7.50 described as royalty due on a sale of December 7, 1957, to Mrs. Vista Buchanan. It is recommended that the regional office secure information regarding kind of mica sold, weight and value to complete its records.

An on-site royalty audit was not made at this time because the administrative cost to the Government would be excessive in relation to the amount of possible additional royalty which might be disclosed.

DEFENSE MINERALS EXPLORATION ADMINISTRATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

SECOND ROYALTY AUDIT CERTIFICATE

I have examined the records and sales documents pertaining to the sale of mica for the period July 22, 1953 to March 15, 1955, by:

Fred Taylor, Julian Greene
and Johnnie Greene, partners
Newland, North Carolina

produced from the Cow Camp Mine, Newland, Avery County, North Carolina, under the terms of Contract IdM-2548, Docket No. DMEA-2921.

My examination was made in accordance with generally accepted standards applicable to the circumstances.

The audit established the total sales of mica for this period to be $6,236.84. Royalty due the U. S. Government at the contract rate of 5 percent is $311.94. The royalty paid and balance due are as follows:

Total Royalties Due	$311.94
Total Royalties Paid	311.94
Balance of Royalties Due	$ -0-

C. E. Fisher
C. E. Fisher, Auditor

March 21, 1955

SECOND ROYALTY AUDIT REPORT

I INTRODUCTION

On March 15, 1955, an audit was made of the sales, and royalty accounts and records of:

Fred Taylor, Julian Greene
and Johnnie Greene, partners
Newland, North Carolina

pertaining to the sale of mica during the period July 22, 1953 to March 15, 1955, from the Cow Camp Mine, located four miles southeast of Newland, Avery County, North Carolina, in accordance with Contract Idm-2548, Docket No. DMEA-2921.

The sales records are in the possession of Mrs. Fred Taylor, wife of one of the partners, in their home in Newland, North Carolina.

Mr. William Beck, Mining Engineer, U. S. Bureau of Mines, Knoxville, Tennessee, collaborated in the performance of this audit.

II GENERAL INFORMATION

The exploration contract was entered into on June 15, 1953. Exploration started on July 22, 1953 and was completed on February 26, 1954. A Certificate of Discovery was issued by DMEA on June 7, 1954. The total accepted cost of the exploration project is $5,490.00. The approved Government participation in the cost of exploration is $4,905.00. A lien against the property for 10 years after date of contract is held by the Government as a guarantee of repayment of the Government's lien is repayable at a rate of 5 percent on all sales of mica produced in the area covered by the contract.

III SCOPE OF AUDIT AND FINDINGS

The audit consisted of a review of the sales of strategic mica made by examination of the sales documents and comparing them with the lists previously prepared from the records of the General Services Administration Mica Purchase Depot in Spruce Pine, North Carolina. Miscellaneous non-strategic mica sales were scheduled from documents in Mrs. Taylor's possession.

A previous royalty audit made of this contract by B. J. Brukhas on July 8, 1954, disclosed royalties due amounting to $100.94 of which $13.37 was unpaid at that date. The balance of $13.37 was subsequently paid and the operators had paid additional royalties amounting to $76.51 between the date of the previous audit and March 15, 1955.

The current audit disclosed sales aggregating $2,689.80 (list attached) on which royalties at 5 percent had not been paid. However, Mr. Fred Taylor presented his check in the amount of $134.49 in settlement of the account at the conclusion of the audit.

ROYALTY AUDIT CERTIFICATE

I have examined the records and sales documents pertaining to the sale of mica for the period July 22, 1953 to June 30, 1954, by:

Fred Tayler, Julian Greene
and Johnnie Greene, partners
Newland, North Carolina

produced from the Cow Camp Mine, Newland, Avery County, North Carolina, under the terms of Contract Idm-K548, Docket No. DMEA-2921.

My examination was made in accordance with generally accepted standards applicable to the circumstances.

The audit established the total sales of mica for this period to be $2,018.76. Royalty due the U. S. Government at the contract rate of 5 percent is $100.94. The royalty paid and balance due are as follows:

Total Royalties Due	$100.94
Total Royalties Paid	87.57
Balance of Royalties Due	$ 13.37

W. J. BREKHUS
Auditor

July 26, 1954

ROYALTY AUDIT REPORT

I INTRODUCTION

On July 8, 1954 an audit was made of the sales, and royalty accounts and records of:

Fred Taylor, Julian Greene
and Johnnie Greene, partners
Newland, North Carolina

pertaining to the sale of mica during the period July 22, 1953 to June 30, 1954 from the Cow Camp Mine, located four miles southwest of Newland, Avery County, North Carolina, in accordance with Contract Idm-E548, Docket No. DMEA-2921.

The sales records are in the possession of Mrs. Fred Taylor, wife of one of the partners, in their home in Newland, North Carolina. The records Mrs. Taylor presented were not sufficient to enable the representatives of DMEA to determine sales from the properties covered by this contract. A second trip in the evening was necessary in order that Mr. Taylor could furnish the necessary information.

Mr. William Beck, Mining Engineer, U. S. Bureau of Mines, Knoxville, Tennessee, collaborated in the performance of this audit.

II GENERAL INFORMATION

The exploration contract was entered into on June 15, 1953. Exploration started on July 22, 1953 and was completed on February 26, 1954. A Certificate of Discovery was issued by DMEA on June 7, 1954. The total accepted cost of the exploration project is $5,450.00. The approved Government participation in the cost of exploration is $4,905.00. A lien against the property for 10 years after date of contract is held by the Government as a guarantee of repayment of the amount of money advanced to the partnership. The amount of the Government's lien is repayable at a rate of 5 percent on all sales of mica produced in the area covered by the contract.

The Operators do not maintain production records. Mica as it comes from the mine requires considerable handling and hand processing by splitting, cutting and grading. Only the best grades are sold to the Government as strategic mica. The poorer grades are sold as punch and washer mica, and the lowest grades are sold by the ton as scrap mica.

III SCOPE OF AUDIT AND FINDINGS

The audit consisted of a review of the sales of strategic mica made by examination of the sales documents and comparing them with the lists previously prepared from the records of the General Services Administration Mica Depot in Spruce Pine, North Carolina. Miscellaneous non-strategic mica sales were scheduled from documents on hand at bookkeepers office. There was also one sale of scrap totalling $110.00 which included scrap from the Cow Camp Mine and the Maryland Mine. The Operator had for settlement purposes with the land owners allocated one-half of the revenue to the Cow Camp Mine. It is felt that this is as equitable an allocation as could be made under the circumstances.

The Operator had previously forwarded $87.57 as royalty on strategic mica sold to General Services Administration in five deliveries between January 15 and April 12, 1954. There remained unpaid royalty on one sale of strategic mica sold on November 16, 1953 in the sum of $139.35 and three sales of scrap mica for $128.00 the total royalty due on these sales is $13.37. The Operator promised to forward duplicate copies of the sales transactions and his check for royalty due at an early date.

The sales, as summarized were found to consist of the following:

Strategic Mica	$1,890.76
Punch and Scrap	128.00
Total	$2,018.76

Pursuant to the provisions of Exploration Project Contract No. DMA-2568, dated June 13, 1953 (Docket No. DMA-[illegible]), hereinafter called the "Contract" between you and the United States of America, hereinafter called the "Government", to establish and fix the Government's percentage royalty on production and its lien thereon and on the land described in the Contract, the Government considers and therefore certifies that discovery or development from which production may be made has resulted from the exploration work.

The nature of said discovery or development is described broadly or indicated as follows:

The exploration work encountered a series of low dipping pegmatite lenses in mica schist and hornblende gneiss from which strategic mica was produced.

REPORT OF REVIEW

I have reviewed the Monthly Reports of:

Fred Taylor, Julian Greene and Johnnie Greene

Newland, North Carolina

pertaining to Exploration Project Contract No. DMA-2548, Docket No. DMEA-2981, including Amendment No. 1, for the months of July, 1953 to February, 1954, inclusive, covering a project for the exploration of mica on property known as the Cow Camp (South) Mine, located in Avery County, North Carolina.

My review included an examination of the Monthly Reports (Forms MF-104) and supporting documents attached thereto, comparison of the costs claimed with the contract and pertinent schedules, verification of work performed by reference to reports of Field Team representatives, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the following reasons:

all of the costs incurred were under a contract provision for payment by the Government on the basis of agreed estimated costs of units of work actually performed.

The review disclosed the following facts in regard to the amount paid or to be paid the contractor:

Total cost as billed by Contractor		$5,450.00
Exceptions:		
By DMEA Finance Officer	$ -0-	
Herewith	-0-	-0-
Total Accepted Cost		$5,450.00

The contract calls for a 90 percent participation of exploration expenses by the United States Government. Therefore, payment to the contractor by the Government in the amount of Four thousand nine hundred five and no/100 Dollars,

"$4,905.00"

is considered valid and proper, provided that the Regional Executive Officer, the Administrator, or other competent official has accepted or will accept the project as having otherwise met the terms of the contract.

AMENDMENT NO. 1

Exploration Project Contract Idm-E 548, Docket No. DMEA-2921, (mice) Fred Taylor, Julian Greene, and Johnnie Greene, partners, of Newland, North Carolina dated 15th June 1953, is hereby amended as follows:

Item 3 is amended to read, " The Operator.....; and shall bring the project to completion within a period of eleven (11) months from the date of the contract," instead of 8 months as written in the original contract.

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be obligated to pay, or the percentage of the cost which the Government may be obligated to pay, under the provisions of Article 4 of the contract form.

UNITED STATES OF AMERICA
DEPARTMENT OF THE INTERIOR
DEFENSE MINERALS EXPLORATION ADMINISTRATION

EXPLORATION PROJECT CONTRACT[1]
(Short Form)

IT IS AGREED this 15th day of June, 195 3 between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and[2] Fred Taylor, Julian Greene and Johnnie Greene, Partners c/o Fred Taylor, Lowland, North Carolina

hereinafter called the "Operator," as follows: and as set forth in Annexes I and II attached hereto and made a part hereof:

ARTICLE 1. *Authority for contract.*—This agreement is entered into under the authority of the Defense Production Act of 1950, as amended, pursuant to DMEA Order 1 entitled "Government Aid in Defense Exploration Projects."

ARTICLE 2. *Operator's property rights.*—With respect to that certain land situated in the State of North Carolina, County of Avery, described as follows:[3] the mineral rights in set forth in Annex II,

the Operator represents and undertakes:[4]

(a) ~~That the Operator is the owner in possession and entitled to possession, and that the property is subject only to the following claims, liens, encumbrances, etc.: [illegible]~~

(b) That the Operator is a lessee, in possession and entitled to possession, and the Owner's Consent to Lien is attached.

The Operator shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of the exploration project without any allowance for the use, rental value, depreciation, depletion, or other cost of acquiring, owning, or holding possession thereof.

ARTICLE 3. *Exploration project.*—The Operator, within 60 days from the date of this contract shall commence work on a project of exploration for[5] Mica

in or upon the described land; and shall bring the project to completion within a period of eight (8) months from the date of this contract. The work to be performed is more fully described in Exhibit "A" attached hereto, which, with any maps or drawings thereto attached, are made a part of this contract. The Government will contribute to the cost of this work as hereafter provided. The work shall be performed by the Operator or by independent contractor or contractors efficiently, expertly, in a workmanlike manner, in accordance with good mining standards and State regulations for health and safety and for workmen's compensation and employers' liability insurance, with suitable and adequate equipment, materials, and labor, to bring the project to completion within the time fixed. The Government shall have the right to enter and observe and inspect the work at all reasonable times, and the Operator shall provide the Government with all available means for doing so. The Government may consult with and advise the Operator on all phases of the work.

ARTICLE 4. *Costs of the project.*—The agreed, estimated costs of performing the work, expressed in terms of units of work to be performed (per foot of drifting, per foot of drilling, per cubic yard of material to be moved, etc.) are set forth in Exhibit "A," attached hereto. The Government will pay 80 percent of these agreed, estimated costs, as they accrue, for units of work actually performed that conform with the description or specifications for the work set forth in this contract, in an aggregate total amount not in excess of $4,000.00, which is 80 percent of $5,450.00 the agreed, estimated total cost of the project in which the Government will participate: *Provided,* That until the Operator's final report and final accounting have been rendered to the Government and any final check or auditing required by the Government has been made, and a final settlement of the contract has been made, the Government may withhold from the last voucher or vouchers such sums as it sees fit not in excess of ten (10) percent of the maximum total which the Government might have been called upon to pay under the terms of the contract. The Government may, as it sees fit, make payments direct to the Operator's independent contractors, if any, for the account of the Operator, rather than to the Operator.

ARTICLE 5. *Reports, accounts, audits.*—(*a*) *Progress reports.* The Operator shall provide the Government with monthly reports of units of work performed under the contract, in quintuplicate (five copies), upon forms provided by the Government. These progress reports shall be certified by the Operator, and shall constitute both the Operator's invoice of units of work performed on the project during the period covered by the report and his voucher for repayment by the Government, unless the Government requires the use of a standard voucher form with invoice attached. Progress reports shall include surface and/or underground engineering-geological maps or sketches showing the progress of the exploration, with assay-reports on samples taken concurrently with the advance in mineralized ground.

[1] If sufficient space is not provided in any blank, use an extra sheet of paper and refer to it in the blank.
[2] State name, address, and nature of organization if any.
[3] Give legal description or enough to identify the property, particularly excluding any land or interest therein to which the Government's lien is not to attach or the production from which is not to be subject to the Government's percentage royalty.
[4] Strike out the provision not applicable.
[5] Name of mineral or minerals.

(*b*) *Final report.*—Upon completion of the exploration work or termination of the contract the Operator shall provide the Government with an adequate geological and engineering report, in quintuplicate (five copies), including an estimate of ore reserves resulting from the exploration work.

(*c*) *Compliance with requirements.*—If, in the opinion of the Government, any of the Operator's reports are insufficient or incomplete, the Government may procure the making or completion of such reports and attachments as an expense of the exploration work; and the Government may withhold approval and payment of any vouchers depending upon insufficient or incomplete reports.

(*d*) *Accounts and audits.*—The Operator shall keep suitable records and accounts of the units of work performed, which the Government may inspect and audit at any time. The Government may at any time require a check of the work performed and an audit of the Operator's records and accounts, by a certified public accountant or otherwise, the cost thereof to be treated as a cost of the project. The Operator shall keep and preserve said records and accounts for at least 3 years after the completion of the project or the termination of this contract. Upon the completion of the project or termination of the contract the Operator shall render a final account and statement of work performed to accompany his final report.

ARTICLE 6. *Repayment by Operator.*—(*a*) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than 6 months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows: See Annex I, substituted for that part of 6(a) preceding the colon:

(1) One and one-half (1½) percent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) percent of any such net amounts, plus one-half (½) percent of such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such net amounts.

(For instance: The percentage royalty on a net amount of five dollars ($5.00) per ton, would be one and one-half (1½) percent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(*b*) As here used, "net smelter returns," "net concentrator returns," and "other net amounts realized from the sale or other disposition," mean gross revenue from sales, or if not sold, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be the gross income from mining operations for percentage depletion purposes in income-tax determination.

(*c*) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(*d*) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

ARTICLE 7. *Assignment, transfer, or loss of Operator's interest.*—Without the written consent of the Government, the Operator shall not assign or otherwise transfer or hypothecate this contract or any rights thereunder. The Operator shall not make any voluntary nor permit any involuntary transfer or conveyance of the Operator's rights in the land described in Article 2, without making suitable provision for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof; *Provided*, that mere failure by the Operator to maintain the Operator's rights in the land, without any consideration running to the Operator other than relief from the cost of maintaining such rights (as by surrender of a leasehold, failure to perform assessment work, or failure to exercise an option), coupled with complete abandonment by the Operator of all interest in or operations on the land for a period of 10 years from the date of this contract, shall not constitute such a transfer or conveyance. Should the Operator make or permit any transfer or conveyance in violation of this provision, the Operator shall be and remain liable for payment to the Government of the same amounts, at the same times, as would have been paid under the terms of the percentage royalty on production. If for any reason the net smelter returns, net concentrator returns, or other net amounts realized from the sale or other disposition of such production are not available as a means of measuring the amount of the Operator's liability, the amount thereof shall be estimated as well as may be, and in the event of dispute as to such estimates, the determination thereof by the Administrator of Defense Minerals Exploration Administration or by his successor shall be final and binding upon the Operator.

ARTICLE 8. *Termination and completion.*—The Government may, at any time, by written notice to the Operator, terminate this contract: (*a*) If the Operator fails to provide his share of the money necessary to prosecute operations pursuant to the terms of the contract; (*b*) if the Operator, in the opinion of the Government, fails to prosecute operations pursuant to the terms of the contract; or (*c*) if, in the opinion of the Government, operations up to the time of the notice have not indicated the probability of making any worth while discovery and in the opinion of the Government further operations are not justified.

ARTICLE 9. *Changes and added provisions* _____

Executed in sextuplicate the day and year first above written.

EXPLORATION PROJECT CONTRACT
FRED TAYLOR, JULIAN GREENE, AND JOHNNIE GREENE, PARTNERS
DOCKET NO. DMEA-2921

ANNEX I

The following provisions are in lieu of all of paragraph (a) of Article 6 which precedes the colon:

If at any time the Government considers that a discovery or development from which production may be made has resulted from the exploration work, the Government, at any time not later than six months after the Operator has rendered the final report and final account required by the exploration project contract, may so certify in writing to the Operator. Such certification shall describe broadly or indicate the nature of the discovery or development. The Operator, or his successor in interest, shall pay to the Government a royalty on all minerals mined or produced from the land which is the subject of the exploration project contract, as follows: (1) Regardless of any certification of discovery or development, from the date of the contract until the lapse of the time within which the Government may make such certification of discovery or development, or until the total net amount contributed by the Government, without interest, is fully repaid, whichever occurs first, unless the Government waives its right to a royalty; or (2) if the Government makes a certification of discovery or development, for a period of ten years (or other period fixed by the contract) from the date of the contract, or until the total net amount contributed by the Government, without interest, is fully repaid, whichever occurs first. Said royalty shall be a percentage of the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, as follows:

EXPLORATION PROJECT CONTRACT

DOCKET NO DMEA-2921

ANNEX II

The land referred to in Article 2 was leased to the Operator by Charles M. Trammell and Iris M. Trammell, his wife, by an instrument dated March 3, 1952. The land is described in this lease and in the deed from W. R. Robbins and his wife to Charles M. Trammell and Iris M. Trammell, his wife, recorded in Book 46, page 34, in the Office of the Recorder of Deeds of Avery County, North Carolina, as follows:

> BEGINNING on a small oak in the Burton Cornett line, and runs thence North-East to a spruce pine on the bank of Cow Camp Creek; thence near East up and with the meanderings of said Creek to a chestnut oak; thence South 80 deg. East to a maple; thence near South-East up and crossing Spanish Oak Mountain to a double cucumber in the R. M. Burleson line; thence South 50 deg. West to a chestnut; thence near South with the meanderings of the branch to a small birch in the forks of the branch; thence near North-East up and with the branch to a stake in the R. M. Burleson line; thence South 50 deg. West to a sugar maple, the R. M. Burleson old corner; thence South 50 deg. West to a white oak; thence North 50 deg. West 31 poles to a sugar maple; thence West to the beginning, containing 70 acres, more or less.

There is excepted from this land 15 acres known as Cow Camp North (mine), on which acreage none of the project work is being performed, or will be performed.

EXPLORATION PROJECT CONTRACT

DOCKET NO. DMEA-2921

EXHIBIT "A"

Description of the Work

Exploration for concentrations of strategic mica in a nearly flat lying pegmatite dike will be accomplished by the work shown diagrammatically on the attached map entitled "Sketch of Cow Camp (South) Mine, Avery Co., N. C., DMEA-2921" and described below.

1. Prepare an adit entrance by scaling the face and erecting protective timber at a point mutually acceptable to the Operator and the Government.

2. Drive not more than 150 feet of adit and drifts 5 feet by 7 feet in cross section and timbered as necessary.

The location, direction, and extent of all work shall have prior approval of the Government.

Agreed Unit Costs of the Project

Preparing site and timbering for portal of adit 1/	$200.00	
Driving adit and drifts, 150 feet @ $35.00/ft.	5,250.00	
Total Agreed Unit Costs		$5,450.00
Government Participation at 90%		$4,905.00

1/ The completed job is the unit.

OWNER'S CONSENT TO LIEN

WHEREAS, the undersigned, as owner, co-owner, lessor, or seller has an interest in certain property in the State of North Carolina, County of Avery, described as follows:1/

Described in lease to Fred Taylor dated March 3, 1952 and recorded in office to Recorder of Deeds in and for said county in Book B 48 page 316.

which is the subject of a proposed exploration project contract, hereinafter called the "contract", between the United States of America, hereinafter called the "Government", and

2/ A partnership composed of Fred Taylor, Julian Greene and Johnnie Greene

hereinafter called the "Operator"; and

WHEREAS, under certain provisions of said contract which are set forth on the reverse side hereof, the Government is entitled to a percentage royalty on production and to certain other rights and equities which do or may conflict with or be adverse to the interest of the undersigned in said property;

NOW THEREFORE, the undersigned, in consideration of said contract and as an inducement to the Government to enter into same, undertakes and agrees as follows:

1. The Government's equity in and right to dismantle, sever, take possession of, and remove and dispose of facilities, buildings, fixtures, equipment, or other items as provided in the contract, or any amendment thereof, shall prevail over and be prior and superior to any conflicting or adverse rights of the undersigned, and the Government is authorized to enter upon the land for such purposes.

2. To secure the payment to the Government of the percentage royalty on production3/ provided for under the terms of said exploration project contract, or any amendment thereof which does not increase the maximum amount of the Government's claim here stated or alter the provisions for repayment, there is hereby granted to the Government a lien upon the land herein described and upon any production of minerals therefrom, until the royalty claim is fully paid in the amount of the Government's contribution, not in excess of 4/$ 4,905.00, or ten years have elapsed from the date of the contract.

3. The undersigned shall commit no act nor assert any claim that may contravene or conflict with the lien, claim, or rights of the Government under the provisions of said contract. This agreement shall be binding upon the heirs, executors, administrators, successors, and assigns of the undersigned.

Dated this 27th day of February, 1953.

/s/ Charles M. Trammell [Seal]

/s/ Iris M. Trammell [Seal]

_____ [Seal]

1/ Either (a) insert the legal description of the land, or (b) strike out the words "as follows" and insert "in a lease [or contract, deed, or other document] dated _____, and recorded in book _____ page _____ official records of said county." If (b) is used, the book and page of recordation cannot be dispensed with. If the space provided is insufficient, use an Annex, and refer to the Annex in the space.

2/ Insert the name of the Operator as it will appear in the exploration project contract.

3/ Mining or production from the land is not required, and in the absence of production there is no obligation to repay the Government.

4/ Insert the maximum amount of the Government's contribution.

RELEVANT CONTRACT PROVISIONS

Repayment by Operator. (a) If, at any time, the Government considers that a discovery or a development from which production may be made has resulted from the exploration work, the Government, at any time not later than six months after the Operator has rendered the required final report and final account, may so certify in writing to the Operator. The certification shall describe broadly or indicate the nature of the discovery or development. In the event of such certification, any minerals mined or produced from the land described in Article 2 within 10 years from the date of this contract, including any mined or produced before the certification, shall be subject to a percentage royalty which the Operator or his successor in interest shall pay to the Government, upon the net smelter returns, the net concentrator returns, or other net amounts realized from the sale or other disposition of any such production, in whatever form disposed of, including ore, concentrates, or metal, until the total amount contributed by the Government, without interest, is fully repaid, or said 10 years have elapsed, whichever occurs first, as follows:

(1) One and one-half (1½) per cent of any such net amounts not in excess of eight dollars ($8.00) per ton.

(2) One and one-half (1½) per cent of any such net amounts, plus one-half (½) per cent such net amounts for each additional full fifty cents ($0.50) by which such net amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) per cent of such net amounts.

(For instance: the percentage royalty on a net amount of five dollars ($5.00) per ton, would be one and one-half (1½) per cent; on a net amount of ten dollars ($10.00) per ton, three and one-half (3½) per cent.)

(b) As here used, "net smelter returns", "net concentrator returns", and "other net amounts realized from the sale or other disposition", mean gross revenue from sales; or if not sold, the market value, the market value of the material after it is mined in the form in which and the place where it is held. In the case of integrated operations in which the material is not disposed of as such, these terms mean what is or would be gross income from mining operations for percentage depletion purposes in income tax determination.

(c) To secure the payment of its percentage royalty, the Government shall have and is hereby granted a lien upon the land described in Article 2 and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(d) This article is not to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any mining or production operations.

Title to and disposition of property. All facilities, buildings, fixtures, equipment, or other items costing more than $50.00 each, paid for or purchased with funds contributed jointly by the Operator and the Government, although title may be taken in the name of the Operator, shall belong to the Operator and the Government jointly, in proportion to their respective contributions, and upon the completion of the work or the termination of the contract shall be disposed of promptly by the Operator for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator at a price at least as high as could otherwise be obtained, as may appear to be for the best interest of the Government, unless the Government, in writing, waives its interest in any such item. If necessary to accomplish such disposition, the Operator shall dismantle, sever from the land, and remove any such item, the cost thereof to be for the joint account of the parties in proportion to their respective interests. If the Operator, within 90 days after the receipt of written notice from the Government, fails, neglects, or refuses to dispose of such property, the Government may itself enter upon the land, take possession of, and remove and dispose of any such property as above provided.

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Fred Taylor, Julian Greene and Johnnie Greene, a partnership Newland, North Carolina

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract See copy of lease attached for description

(*b*) State any mine name by which the property is known. Cow Camp

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise Lessee

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property. Copy of lease attached

(*e*) If you own the land, describe any liens or encumbrances on it not applicable

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice. Not applicable

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore .....

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within ..... days and be completed within ..... months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

☐ Money ☐ Use of equipment owned by you ☐ Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

Dated February 3, 1953

(Applicant)

By Fred Taylor

Julian F. Greene

John Greene

Title 18, U. S. Code (Crimes), Section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

U. S. GOVERNMENT PRINTING OFFICE 16—66551-1

Answers to questions:

(4-a) Mining now being carried on as indicated on sketch attached by tunnels, but it is believed that other mica veins will be discovered by the exploration work as set out and as shown on sketchs. The partnership (applicant) is now carrying on the present work, but it is believed that the places indicated on sketches will disclose large quantities of mica of the quality required by the government. The mine workings and the proposed exploration work is readily accessible for examination purposes as shown in more detail below.

(4-b) Over past years mica was produced, but amount of production is not now available. The current production is shown in copies of reports of mica sales to the government which are attached. This shows also the grades. The amount of reserves is not established.

(4-c) The geologic features of the property are shown by the sketches attached. Type of deposit is in veins.

The reason for wishing to explore is the fact that the indications are that theplaces indicated on the sketch attached adequate quantity of high grade ruby mica suitable for the government program will be discovered, as illustrated on sketches. Applicant does not have available other geological data, reports etc. However, in the Grological Survey Bulletin 936-A, reference to which is made, such data is set out and the Cow Camp mine is referred to.

(4-d) Hard top road within ¼ mile of property, gravel road from hard top road to the mine, residence 2½ miles from mine. Mica will be shipped by trucks. Spruce Pine, the place where mica is bought by the government is about 15 mines from the mine.

(4-d) Man power, men experienced in mica mining, are available; materials, supplies, equipment, water and power are all readily available. Electric lines are on the highway about ¼ mile from property.

5. The mineral which it is desired to explore is mica, ruby color and of the quality meeting government specifications.

(5-a) The proposed work is best described by refe ring to the sketch. It is proposed to put in a tunnell 5' X 7' from the present working to a point as shown on sketch where there is evidence that mica of the quantity and quality required by the government will be discovered.

(5-b) The workwill start within 10 days from the approval of this application and signing of contract and will be finished within 120 days thereafter.

(5-c) The ope ating experience and background of applicant is about 15 years in mining mica. Mica was sold to the Colonial Mica Company in 1941.

6. Estimates of costs:

(a) None

(b) Work is to be done by hand with the use of the equipment set out below with the estimate of costs as follows:

(a)	Foreman 60 days (8 hours per day) @ $1.50 ---	$720.00
(b)	Manual labor, 60 days for four men @ $1.00 -	$1,920.00
(c)	Cable for hoist, 300 ft. ----------	$48.00
(c)	Pick, shovel and hand tools----------	$50.00
(c)	Gas and oil for pump 60 days @ $1.25 per day-	$81.00
(c)	Gas for hoist 60 days @ $1.50 per day--------	$90.00
(c)	Gas for Jeep truck 60 days @ $2.00 per day---	$120.00
(d)	Water pump 60 days @ $5.00 per day----------	$300.00
(d)	Hoist, steel rail and dump car 60 days @ $5.00-	$ 300.00
(d)	Timber for props and cribbing overhead (by us)-	$250.00
(d)	Dozer work 15 days @ $8.00 per hr.----------	$960.00
(d)	Jeep truck to and from mine 60 days @ $7.00-----	$420.00
(e)	Repairs and up keep on equipment for 60 days---	$60.00
(f)	Tool house----------	$75.00
(g)	Social Security tax 60 days @ .66¢----------	$39.60
(g)	Insurance 60 days @ $4.00 per day----------	$240.00

7. Yes. Will furnish our share of cost of the proposed project in accordance with government regulations on Government participation

We will furnish equipment to make up our share, and can supervise the job. Also, can furnish timbers for the tunnel.

The above figures which amounts to $5,673.60 is an estimation as near as we can figure it.

Sincerely yours,

Fred Taylor

LEASE CONTRACT

This contract made and entered into this 3rd day of March, 1952, between Charles M. Trammell and his wife, Iris M. Trammell, of Washington, D. C., as parties of the first part and Fred Taylor, of Newland, North Carolina, as party of the second part.

Listed in phone book. 1961-1962

WITNESSETH:

That for and in consideration of the sum of $1.00 and other valuable considerations, the receipt and adequacy of which is hereby acknowledged, the parties of the first part have leased, rented and remised and do hereby lease, rent and remise unto the said party of the second part for the primary period of two years from the date hereof, (which term is automatically renewable as hereinafter provided) with the exclusive right to prospect for, mine and remove any and all minerals, ores and mineral products in, upon or under the following described land in Avery County, North Carolina, in the Linville Township, containing approximately 55 acres, more or less, to wit:

BEGINNING on a small oak in the Burton Cornett line, and runs thence North-East to a spruce pine on the bank of Cow Camp Creek; thence near East up and with the meanderings of said Creek to a chestnut oak; thence South 80 deg. East to a maple; thence near South-East up and crossing Spanish Oak mountain to a double cucumber in the R. M. Burleson line; thence South 50 deg. West to a chestnut; thence near South with the meanderings of the branch to a small birch in the forks of the branch; thence near North-East up and with the branch to a stake in the R. M. Burleson line; thence South 50 deg. West to a sugar maple, the R. M. Burleson old corner; thence South 50 deg. West to a white oak; thence North 50 deg. West 31 poles to a sugar maple; thence West to the beginning, containing 70 acres, more or less.

This description is based on the deed from W. R. Robbins and wife to lessor recorded in Book 46, page 34. There is excepted from the land described in said deed approximately 15 acres known as Cow Camp North to which one Johnson has deed to surface.

Together with the right of ingress and egress and all the rights for the use of water and timber and the right to build roads, erect houses, etc., as fully as the said parties of the first part are vested with such rights and privileges by virtue of deed to them, from W. R. Robbins and wife dated July 18, 1949, which is recorded in Book 46, page 34 in the public records of Avery County, and subject to all the obligations and liabilities as provided in the said deed, as to which the lessee agrees to save the lessors harmless.

The primary term of this lease is two years but it is automatically renewable at the expiration of said term and for each succeeding term of two years on the same terms and conditions here provided on condition that all terms hereof are fully complied with during any preceding term and the property is being continously operated on a paying basis. It shall not be considered as having been or is being operated on a paying basis, however, unless the average royalty payment to the said parties of the first part for any period of 12 months next preceding the expiration of any term or before the expiration of

any renewal term, shall at least amount to $150.00 per month.

The said lessee shall have the exclusive right to carry on exploration work and to carry on mining operations in such manner or by such process or processes as may be deemed advisable and to remove from the premises any minerals mined, subject to the said deed to said lessors, said lessee shall have the right to erect suitable buildings for the operations, including triming or other processing and to place on said premises such machinery and equipment as may be deemed necessary for mining and processing purposes.

The said party of the second part agrees and binds himself to pay to the said parties of the first part a royalty of 12½ per-cent of the gross selling price of mica, including scrap, said gross sales price is based on mica after sheeting and trimming. This contemplate sales at arm-length transactions at the market price. If however, any cobbed or untrimmed or unsheated mica is sold to the United States or any governmental agency under the government mica program, then as to such mica so sold the royalty shall be based on the gross selling price of mica in that form or condition.

If any substances containing uranium in any of its forms or compounds or uranium ores of any kind, monazite, beryllium or other rare-earth minerals or thorium, asbestos or other minerals not herein mentioned and for which no specified royalty is mentioned should be mined or produced on the premises herein described, then the amount of royalties to be paid to the said parties of the first part shall be 12½ per-cent of the gross selling price in the form or condition in which sold.

It is agreed and understood that within a period of four months from the date hereof said party of the second part, or assigns shall begin mining operations on the said property. Otherwise this lease shall be null and void unless the time is extended in writing.

If the provision relating to the period when operations shall begin is not complied with, unless expressly waived or extended in writing by lessor, then this lease contract may be cancelled of record by the said parties of the first part or either of them, or their heirs, executors or administrators filing an affidavit with the register of deeds of said Avery County reciting the non-performance and after the filing thereof all rights of the said party of the second part, his heirs or assigns, shall thereafter be cancelled of record, the title of the said parties of the first part shall be completely clear of record, and the lessee or its successors or assigns shall have no further right, title or interest in said property.

The party of the second part, its successors or assigns shall have the right to remove any equipment or machinery placed on the premises if this lease contract shall be surrendered or cancelled provided all payments due to the said parties of the first part have been paid.

The royalties herein set forth shall be payable on the 20th day of each month for all minerals mined during the preceding month, and at the same time, said parties of the first part shall be furnished with a statement of all operations for the period covered by said royalty payment, and said lessors shall at all reasonable business hours have the right through anyone designated by them or either of them, to inspect the books and records of said party of the second part or his assignees, insofar only as quantities mined and sales made are concerned.

Lessee agrees to so mine, handle, trim and sheet the mica so as to get the best results practical as to quantity mined and quantity

of saleable sheet mica in accordance with any program and specifications by the United States or any agency thereof.

The parties of the first part shall also have the right at all reasonable times to inspect the mines, equipment and buildings of the party of the second part. It is further agreed that the said lessee shall keep said mines and tunnels in such condition and carry on operations in accordance with the law of North Carolina.

It is further agreed that said parties of the first part shall be furnished with reports as to any exploration work done on the property.

It is understood and agreed that the Defense Minerals Administration has made a loan of approximately $900.00 for exploration work, which constitutes a lien against the mica under said premises, which loan is payable only out of mining operations and slaes of mica. Said lessee, his heirs or assigns assumes said obligation and releases the said lessor thereof.

The provisions hereof shall be binding on the heirs, legal representatives, successors and assigns of the respective parties.

IN WITNESS WHEREOF the said parties of the first part have hereunto set their hands and seals the day and year first above mentioned, and the party of the second part has accepted and executed the same.

May 31, 1953.)

"copy"

March 18, 1952

Mr. Fred Taylor
Newland
North Carolina

Dear Mr. Taylor:

With reference to the lease I made to you on what is called the Cow Camp South Mine in Avery County, at your request the following provision is added;

> "Not withstanding any other term or condition of this lease, after mining operations shall begin, it shall not be declared forfeited or cancelled by the lessor unless the lessee shall cease actual mining operations for a period of 60 days. Actual bona fide exploration work shall, for this purpose, be considered as mining operation."

The above shall be read into and be considered as a part of your lease.

Sincerely,

Charles M. Trammell

CMT/mvg

"COPY"

Newland, N.C.
Feb. 21, 1953

To whom it may concern:

I have had a considerable amount of expierence in mining mica in the past 20 or 25 years. I once mined the old Cow Camp mine, which produced a fine grade of Ruby mica. I once sank a shaft around 150 ft. south, about 15 degrees east from the main entrance of the old Cow Camp mine. I went down about 50 to 60 ft., and struck a vein of very fine Ruby mica. Due to the fact that the surface was soft, I was unable to work it from the shaft. And to the best of my knowledge no one has ever run a tunnell as far as I had sunk the shaft.

Respectfully yours,

(signed by Ronald Hughes)

DEFENSE MINERALS EXPLORATION ADMINISTRATION
WASHINGTON 25, D. C. 600

Project Summary Report

By: Walter C. Anderson May 24, 1954

1. Docket No. DMEA-2921 - Mica
Contract No. Idm-E548
Cow Camp (South) Mine
Avery County, North Carolina

Operators: Fred Taylor, Julian Greene, and Johnnie Greene, Partners
C/o Fred Taylor
Newland, North Carolina

Operator's property rights: Lease and option dated March 3, 1952. Owner's Consent to Lien dated February 27, 1953.

2. Contract - dated June 15, 1953
Work authorized:

Preparing site and timbering portal of adit	$200.00
150 feet of adit and drifts @ $35.00/ft.	5,250.00
Total estimated cost	$5,450.00
Government participation @ 90%	$4,905.00

Amendments No. 1 - 2/12/54 - extends completion date from 8 months to 11 months.

Work completed: Same as authorized.

Work began on July 22, 1953, and was completed on February 26, 1954. $3,885.10 worth of sheet mica was recovered and sold during operation.
Field Team Final Report received April 29, 1954.
Operator's Final Report received May 10, 1954.

3. Audit - certificate issued on April 26, 1954 (no exceptions).

Accepted cost	$5,450.00
Government participation	$4,905.00

4. Certification of Discovery issued June 7, 1954.
The nature and occurrence of the pegmatite lenses make it impossible to estimate ore reserves. Production during project amounted to $3,885.10 worth of sheet mica. The project gave the Operators access to mica occurrence and therefore it should be certified.

5. Comments:

How conducted - The work authorized in the contract was completed in a satisfactory manner. Additional time was required because of heavy ground necessitating timbering throughout.

Operation - Good.

Engineering - Reporting was somewhat better than average, although not meeting the required standard.

Geological Premises - The premise that a flat-lying mica-rich pegmatite would continue laterally in a south-eastern direction was incorrect. Only discontinuous pegmatite lenses of limited extent were encountered.

Geological criteria upon which work was based:

1. Flat-lying mica-rich pegmatite about 4 feet thick.
2. Strategic mica of very good quality.
3. Recent work resulted in sale of $3,013.21 worth of mica to the Spruce Pine Depot.

Criteria developed during project:

1. Series of low-dipping discontinuous pegmatite lenses ranging up to 2.5 feet thick.
2. Limited amount of mica, small in size but of excellent quality.

Future possibilities: Heavy ground and limited amount of mica makes mining of this deposit economically questionable.

Recommendations:

The Nonmetallic Minerals Division concurs in field team's recommendation to certify on basis of mica recovered during the project. The Geological Survey and Bureau of Mines are in agreement.

Re: DMMA-2921 (Mica)
Taylor, Greene, and Greene
Cow Camp (South) Mine
Avery County, North Carolina
Contract Idm-E548

Gentlemen:

Thank you for returning the completed Form 63's mailed to you on February 20, 1964.

By the terms of the subject Exploration Project Contract, as amended, and the certification of discovery or development dated June 7, 1954, all minerals mined or produced from June 15, 1953, to June 15, 1963, were subject to the Government's royalty as set forth in said contract.

As the period during which production was subject to royalty has now expired, the Government according to its present records retains no claim or lien against the property subject to the contract or any future production therefrom. We, therefore, are closing our books and records on this contract. Your attention, however, is called to the provisions of the contract which require the Operator to keep and preserve certain records for the periods indicated.

Sincerely yours,

George Fumich, Jr.

Acting Director

Contract Idm-E548

Gentlemen:

On July 10, 1962, you advised us that the noted property was completely out of mining operations. As a matter of record, if you will now kindly bring us up to date covering the period July 10, 1962, to June 15, 1963, we should be able to release the Government lien against any future production from the property and to close our books.

Sincerely yours,

Re: DMEA-2921 ~~(Mica)~~
Taylor, Greene, and Greene
Cow Camp (South) Mine
Avery County, North Carolina
Contract Idm-8548

Gentlemen:

My attention has been directed to a sale of 18.96 pounds of trimmed ruby mica made by Lewie Aldridge to the Spruce Pine Mica Purchase Depot and shown as coming from Cow Camp Mine. The sale was consummated as Depot lot No. SPAR-547(a), approved May 8, 1959, in the amount of $214.14. Royalty due to the Government under provisions of the referenced contract amounting to $10.71 has not been received.

According to our records the mineral rights in the land which was the subject of this exploration contract were conveyed to Mr. Aldridge without the preservation of the Government's royalty rights under the exploration contract. Thus, the Government looks to you for the payment of any royalty accruing to it on production from the land subject to the contract prior to the expiration of the royalty repayment period on June 15, 1963.

Please promptly remit the amount of $10.71, plus any additional royalty which may be due on scrap or punch mica or other mineral production from the property.

Sincerely yours,

George Fumich, Jr.

Director

7/10/62

Dear Sir:
Im sorry we overlooked the pmt. due for royalty on the above mentioned mica. This was the last mica mined from this mine. It has not been worked since. Is completely out of mining operation.
Ck. inclosed for royalty in full.

Sincerely
Fred Taylor

DMEA-2921

June 27, 1962

Memorandum

To: E. D. Talbert, Acting Chief
Contract Administration and Audit Division

From: C. E. Fisher, OMM Auditor

Subject: Audit Trip to Spruce Pine, North Carolina

I left Washington, D. C., via Southern Railway train No. 47 at 9:00 p.m., EST, June 17, 1962. Arrival in Asheville, N. C., was about 10:00 a.m., June 18. There I secured an automobile from Avis Rent-A-Car and drove to Spruce Pine, N. C. Left Spruce Pine at 10:00 a.m., June 23, and arrived back in Washington at 3:10 a.m., June 24, via Southern Railway train No. 16.

Most of the time in Spruce Pine was spent in reviewing the purchase records of the G.S.A. Mica Purchase Depot for the purpose of determining whether any unreported purchases had been made by that Depot of production from mines on which DMEA had entered into exploitation project contracts. A total of 57 contracts were assigned for this investigation.

The last purchase by the Depot under the Mica Purchase Program was made on June 7, 1962. Mr. J. P. McKinney, Depot superintendent, stated that processing the mica on hand and making final settlements with vendors will take another 60 to 90 days before the Depot is finally closed. Mr. McKinney also advised that 3,972 Participation Certificates were issued and 21,609 lots of mica were purchased during the program. At June 15 the yield of strategic mica amounted to 1,516,755.75 pounds. This will increase some when all processing is completed. As of June 1 the total payments to vendors amounted to $20,526,000. This amount will be increased when final settlements have been completed.

My review of the Depot records disclosed 13 contracts under which the Government may beentitled to royalty as hereinafter discussed. The investigation failed to disclose any purchases of production from the properties covered by the remaining 44 contracts. Memoranda for the files have been prepared for this latter group of contracts.

My review of [illegible] royalty in connection with [illegible] contracts as follows:

Contract Idm-[illegible]

I secured for [illegible] a copy of [illegible] statement for lot No. [illegible], approved May [illegible], [illegible], [illegible] from

Frank W. Phillips [illegible] pounds of [illegible], yielding 51.74 pounds of trimmed [illegible], for which [illegible] totaled $394.50. A Report of Royalty Review dated April 23, 1[illegible], indicated $19.73 unpaid royalty applicable to this sale. [illegible] of the document was obtained to complete the DMEA files. This sale was made from production subsequent to "abandonment" by the original operators under the contract. Under a ruling by the Solicitor's office royalty is not collectible unless the original operators would again mine the property during the relaymentorium period.

Contract I[illegible], [illegible] Cline West

Final settlement statement for [illegible], approved July 20, 1956, under which [illegible] Street, Asheville, N. C., received [illegible] the mine name as "Summer [illegible]. This contract covered [illegible] to the contract and the [illegible] executed by T. B. Summer, that mine located [illegible] N. C. Asheville is the county seat of [illegible] that the sale by Mr. [illegible] covered [illegible] by him under the mine name [illegible] Summer Mine on the settlement sheet.

On March 11, 1[illegible], Mr. [illegible] and [illegible] Summer whose address is Summer [illegible], Inc., Haywood Building, Asheville, N. C., and found his [illegible] information about sales from the [illegible] royalty as owner of the [illegible] ding the sale by [illegible] on which the Government is [illegible] certified because of reason [illegible].

Contract I[illegible], [illegible]

Final settlement [illegible] 229(a), approved [illegible], under [illegible] Box 962, Sylva, N. C., [illegible] This settlement statement [illegible] does not give the location of the [illegible] exploration at the [illegible], of which Sylva is the [illegible].

Contract I[illegible], [illegible]

Final settlement sheets [illegible] 2, 1960, and [illegible]-68(a), approved December 2[illegible] aggregating

$206.08 and $865.20, respectively, for mica sold by Baird Cove Mining Company, Route 3, c/o Ralph Cunningham, Franklin, N. C. The name and location of the mine are shown as Baird Cove Mine, Macon County, N. C., which is in agreement with the description of the mine in which exploration was performed.

Contract Idm-5495, DMEA-2793, Burns-Spangler Construction Co.

Final settlement sheet SPAR-157(a), approved September 18, 1958, covered payments aggregating $136.64 to Ed Burleson, Box 265, Rutherfordville, N. C. The name and location of the mine are shown as Lee Cornwell, Cleveland County, N. C., which is in agreement with the description of the mine in which exploration was performed.

Contract Idm-5548, DMEA-2921, Fred Taylor, Julian Greene & Johnnie Greene

Final settlement sheet SPAR-547(a), approved May 8, 1959, covered payment of $214.14 to Lewie Aldridge, Spruce Pine, N. C. The name and location of the mine are shown as Cow Camp, Avery County, N. C., which is in agreement with the description of the mine in the exploration contract.

Contract Idm-5537, DMEA-3000, B. T. R. Mining Company

Check dated June 14, 1962, from B-K Associates brought royalty receipts under this contract up to $4,279.39 or within $130.61 of the total Government contribution.

The Bennt records indicated additional purchases from B-K Associates as follows:

Date	Lot No.	Amount	
6/7/62	SPAR-496	$2,145.16	Final
6/15/62	" -512	1,214.58	"
4/5/62	" -523	1,100.98	Preliminary

" -414(a)	3/15/5[illegible]	L. T. Rounds, Rt. 2, Columciana, Ala.	157.82
" -511(a)	3/25/5[illegible]	" " "	649.37
" -780(a)	6/23/5[illegible]	" " "	356.95

Contract Idm-[illegible], [illegible]-3247, Newland Buchanan, et al.

Final settlement sheet for lot No. SPAR-163(a), approved August 24, 1960, covered payments aggregating $854.94 to [illegible]. Burleson & Frank W. Phillips [illegible], c/o Mitchell Lumber Co., Spruce Pine, N. C. The name and location of the mine are shown as Johnson Mine, Mitchell County, N. C., which is in agreement with the description of the mine in which exploration was performed.

Contract Idm-[illegible], [illegible]A-3740, Roy Grindstaff, et al.

Final settlement sheet for lot [illegible]-154[illegible], approved January 27, 1960, covered payments aggregating $[illegible] to Beasley & Grindstaff, Route 3, c/o Roy Grindstaff, Bakersville, N.C. The name and location of the mine are shown as Conley, Mitchell County, N. C., which is in agreement with the description of the mine in which exploration was performed.

Contract Idm-8977, IMEA-4337, Hawk Mining Company

Royalty has not been paid to the Government in connection with the following settlement statements:

Lot No.	Date Approved	Seller	Amount
SPAO-475(a)	4/18/59	J. E. Wilson, c/o Mitchell Lumber Co., Spruce Pine, N.C.	$ 114.80
" - 12(a)	7/24/59	" " " "	594.62
" - 51(a)	8/24/59	" " " "	1,070.75*
" - 89(a)	1/9/62	" " " "	302.37*

* Includes production from various mines. Amounts applicable to Hawk Mine are $195.57 and $9.4[illegible], respectively.

Contract Idm-8665, DMEA-3216, Hector Mining Company

Final settlement sheets for lots SPAO-10(a) and SPAO-14(a), approved September 7, 1960, covered payments aggregating $195.70 and $141.11, respectively, to Dan Allen, Route 2, Burnsville, N. C. The name and location of the mine are shown as Hector Mine, Yancey County, N. C., which is in agreement with the description of the mine in which exploration was performed.

Contract Idm-8734, DMEA-3452, Howard Boone & John Jarrett

Final settlement sheet for lot SPAP-359(a), approved December 1, 1959, covered payments aggregating $101.31 to Parsley & Grindstaff, c/o Roy Grindstaff, Route 3, Bakersville, N. C. The name and location of the mine are shown as Putman, Mitchell County, N. C., which is in agreement with the description of the mine in which exploration was performed.

The following is furnished for your use in the unlikely event you may find it necessary to secure additional information regarding purchases by the Spruce Pine Depot.

Mr. McKinney stated that he does not know what is to become of the Spruce Pine Depot records when the Depot is finally closed. He is recommending that the copies of settlement statements and supporting papers maintained at the Depot be destroyed as they are duplicates of original documents on which disbursements were made. The original documents are in the custody of:

General Services Administration, Region 3
Office of Regional Comptroller
Document Control and Collections Section
Room 6238, Regional Office Building
7th and D Streets, S. W.
Washington 25, D. C.

During the purchase program it was the practice to furnish copies of all settlement sheets to:

Mr. Avery H. Reed, Jr., Chief
Knoxville Field Office
Division of Mineral Industries
Bureau of Mines
404 Hamilton Bank Building
Knoxville 2, Tennessee

I understand that these copies were used by the Bureau of Mines to compile statistical data relating to production from the various mines. I do not have any information regarding the ultimate disposition made of these copies.

* During an inspection of this property on November 12, it was definitely established that all production by the present lessee, Mr. Fred Young, is not coming from any part of the contract area.

** There has been no production from this property since the last inspection. The Operator was again requested to pay up the royalties due on past production. He agreed to do this but to-date he has not complied.

V. J. Lynch, Mining Engineer

RECEIVED APR 9 1958

DMEA CERTIFIED PROJECT

Semi-Annual Report of Certified Project (mica)

Reporting Period: 7-1-57 to 1-1-58. Date Examined: March 26, 1958

Operator: Fred Taylor, Julian and Johnnie Greene, P.O. Box 127, Newland, North Carolina

Mine Name: Cow Camp. County: Avery. State: North Carolina

DMEA-2921, Idm-E548. Commodity: Mica. Contract date: June 15,1953.

Date of Certification: June 17, 1954.

Expiration of Royalty Pay't: June 15, 1963. Total Contract: $5,450.00

Expended under contract: $5,450.00

Amount of Govenment participation at 90%--$4,905.00

Royalty paid this Period: $75.78. Rreviously Paid: $349.70

Total Royalty Paid: $425.48. Percent Gov't Participation Repaid: 8.7%

Royalty Due on Production to date: None

Royalty Remarks: All royalty has been paid on production to date. One royalty payment of $7.50 was made on a sale to Mrs. Vista Buchanan without giving any information as to the type or quantity of mica. Mr. Cleon McKinney who made the sale stated it was approximately 150 pounds of excellent hand cobbed mica for which $150 was received.

Production DMEA Ore (this period):

Type Mica	Pounds	Value
Sheet	64.93	$1,016.82
Hand cobbed	150.00	150.00
Total	214.93	$1,166.82

Production DMEA Ore (Previous)

Sheet	492.45	$7,114.80
Punch	1,061.00	106.10
Scrap	9,950.00	121.75
	11,503.45	7,342.65

Production DMEA Ore (to date)

Type Mica	Pounds	Value
Sheet	557.38	$8,131.62
Hand Cobbed	150.00	150.00
Punch	1,061.00	106.10
Scrap	9,950.00	121.75
	11,718.38	$8,509.47

Remarks: This property was visited March 26, 1958. Mr. W. R. ? Jmm Robbins one of the last Operators and the surface owner said the mine was not operated since November 15, 1957.

Contract No. Idm-E548

Dear Mr. Laurence:

I am enclosing the original and two copies of Mr. Fisher's report of royalty review dated March 14, 1958, pertaining to the subject contract.

If you concur with the findings, the original should be forwarded to the Regional Finance Officer, a copy should be retained in your files, and a copy should be sent to the landowner.

Sincerely yours,

(Signed) J. L. Chambers

Dear Mr. Laurence:

Re: Cow Camp Mine
W. R. Robbins and
Lewie Aldridge Property
Avery County, N. C.

Enclosed are GSA Forms 1013 and 1013a indicating sale of mica from captioned property together with check on Cleone McKinney in the amount of $10.20, five per cent of the gross proceeds from the sale of November 22, 1957.

Also enclosed is McKinney's check in the amount of $7.50, five per cent of gross sale of December 7, 1957; said sale having been made in block to Mrs. Vista Buchanan, an individual.

Please credit both checks as payment on D. M. E. A. loan previously obtained upon subject property.

Yours very truly,

J. Ray Braswell

Knoxville 2, Tennessee

Re: Docket No. DMEA-2321, Mica
Fred Taylor, Julian Greene
and Johnnie Greene
Cow Camp (South) Mine
Avery County, North Carolina
Contract No. Idm-1548

Dear Mr. Laurence:

Your memorandum of October 17, 1957, requests advice regarding the collection of $17.43 in past due royalties, and royalties on present and future production from the above referenced project.

A review of the deeds in the file discloses that neither the deed from Charles and Iris Trammel to Fred Taylor nor the deed from Fred and Laura Taylor to Lewie Aldridge made any provision for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof. Accordingly, unless such provision was made in a separate instrument, neither Lewie Aldridge nor any subsequent purchaser, without actual notice, would be liable for any royalties.

In the circumstances, the only recourse is to demand payment of the $17.43, first, from the original operators, Fred Taylor, Julian Greene and John Greene and failing that, secondly, from Charles and Iris Trammel, the parties who executed the Owners' Consent to Lien. The same parties in the same order would be liable for present and future royalties.

Mr. Beck's report indicates that a Mr. Gene Penland, President of the bank at Newland, North Carolina, is involved in the present operation of the property and ". . . will see that all royalty is paid." The intent of this statement is not clear. However, if Mr. Penland

8623

has any separate agreements with the prior owners to make such payments, we should obtain a copy of the agreements and payment from Mr. Penland. If no such agreements exist and Mr. Penland is agreeable to making payments, DMEA should accept them until its loan is repaid.

Sincerely yours,

George C. Selfridge

Mr. Lewie Aldridge

Spruce Pine, N. C.

Re: DMEA-2921, Idm-E548-mica
Fred Taylor & Julian and
Johnnie Greene
Cow Camp (South) Mine
Avery County, N.C.
and
DMEA-2557, Idm-E432-Mica
Anglin & Ellis
Huskins Mine, Yancey County, N.C.

Dear Mr. Aldridge:

The Government royalty on production of mica made by your operations at the above two mines is long past due and we would appreciate your checks made payable to the Defense Minerals Exploration Administration, together with copies of settlement sheets on all sales made.

On may 14, 1957 this office wrote you about two sales of mica to the GSA Depot in Spruce Pine amounting to $228.13, reported to have been produced at the Cow Camp Mine. Todate we have not received the royalty of $11.41 requested in that letter. Since then we have learned that you made a sale May 7, 1957 for which you received $120.52. Royalty on this amounts to $6.03. Thus, royalty amounting to $17.44, plus 5 percent of the amounts received for sales of scrap and punch is now due.

On May 14, 1957, a letter was written to R. B. Deyton, owner of the Huskins Mine, which you leased and operated during 1956, advising him we had not received royalty amounting to $111.12 on sales of sheet, hand cobbed, and scrap made by you. These sales amounted to $2,222.38.

On October 23, Mr. Beck visited the property and talked with Mr. Deyton. He stated you were advised of the royalty due when he received the above letter, and you said you would send a

check immediately. As of this date we have not received the check.

We also wish to point out that you have paid no royalty on mica produced and sold from the Murphy Mine, Docket No. DMEA-4268, Idm-E1037.

We cannot indefinitely postpone collection of these long overdue royalties, and if settlement is not made within thirty (30) days we will refer this matter to our Washington office for further action.

Very truly yours,

Memorandum

To: Operating Committee, DMEA - Washington

From: DMEA Field Team, Region V - Knoxville, Tennessee

Subject: DMEA-2921, Idm-E548-Mica. Fred Taylor, Julian and Johnnie Greene, Newland, N.C. Cow Camp Mine(south) Avery County, N.C.

Reference is made to our memorandum of October 3.

Enclosed are three copies of Mr. Beck's report of the semi-annual inspection, and three copies each of the deeds conveying the mineral rights from Charles M. and Iris M. Trammel to Fred Taylor and from Fred and Laura G. Taylor to Lewie Aldridge.

Please note that unpaid royalty amounts to $17.43. From whom should be seek payment of these royalties, as well as any which may become due as a result of the present activity, if they are not remitted by the present Operators?

Office of Register of Deeds
Newland, Avery County, North Carolina
by Wm. A. Beck

NORTH CAROLINA,
AVERY COUNTY.

THIS DEED, made and entered into this 13 day of December, 1955, by and between Fred Taylor and wife, Laura G. Taylor, of Avery County, North Carolina, parties of the first part; and Lewie Aldridge of Avery County, North Carolina, party of the second part;

WITNESSETH: That said parties of the first part, for and in consideration of the sum of Ten Dollars to them in hand paid, receipt of which is hereby acknowledged have remises and released, and by these presence do remise, release, and forever quitclaim unto the party of the second part and his heirs and assigns all right, title, claim and interest of the said parties of the first part in and to the mines, minerals, mining and working rights of whatsoever kind or nature on, in or under that certain tract or parcel of land lying and being in Linville Township, Avery County, North Carolina, the surface belongs to Will Robbins, same being more fully described as follows:

BEGINNING on a small oak in the Burton Cornett Line, and runs thence Northeast to a spruce pine on the bank of Cow Camp Creek; thence near East up and with the meanderings of said Creek to a chestnut oak; thence South 80 degrees East to a maple; thence near Southeast up and crossing Spanish Oak Mountain to a double cucumber in the R. M. Burleson line; thence South 50 degrees West to a chestnut; thence near South with the meanderings of the branch to a small birch in the forks of the branch; thence near Northeast up and with the branch to a stake in the R. M. Burleson line; thence South 50 degrees West to a sugar maple, the R. M. Burleson old corner; thence South 50 degrees West to a white oak; thence North 50 degrees West 31 poles to a sugar maple; thence West to the beginning containing 70 acres more or less.

This description is based on the deed from W. R. Robbins and wife to the lessor (Trammell) recorded in Book 46, page 34. There is excepted from the land described in the deed approximately 15 acres known as Cow Camp North to which one Johnson has deed to surface. It being understood and agreed that the above description is intended to apply to all the lands to which Will Robbins owns the surface on the South side of Cow Camp Creek; but does not apply to and shall have no effect as to any lands lying on the North side of the said Cow Camp Creek to which the said Will Robbins owns the surface. The title of parties of the first part herin conveyed deriving from that certain Deed dated August 22, 1953, from Charles M. Trammell and wife, Iris M. Trammell, to Fred Taylor, which is of record in the Avery County Registry in Book No. 50, page 437; it is being expressly understood and agreed that the rights of the parties of the first part herein are subject to a certain written agreement entered into between parties of the first part and Will Robbins and wife

Ethel Robbins, said agreement being dated the ___ day of _____, 195____, and being of record in the Avery County Registry in Book No. _____, page ____.

TO HAVE AND TO HOLD the aforesaid mines, minerals and working rights of whatsoever kind or nature located on, in and under the aforesaid tract or parcel of land unto him, the said party of the second part and his heirs and assigns free and discharged from all right, claim or interest of said parties of the first part or anyone claiming by, through or under them.

In Testimony Whereof, said parties of the first part have hereunto set their hands and seals the day and year first above written.

DMEA-EXPLORATION PROJECT

Semi-Annual Report of Certified Project

Reporting Period: 1-1-57 to 7-1-57. Date Examined: 10-9-57

Operator: Fred Taylor, Julian and Johnnie Greene, Box-127, Newland, N. C.

Mine Name: Cow Camp. County: Avery. State: North Carolina

Docket No. DMEA-2921. Contract: Idm-E548. Commodity: Mica

Date of Contract: June 15, 1953. Date Certified: June 7, 1954

Royalty Date Expires: June 15, 1963. Total amt. of contract: $5,450.00

Total Expended under contract: $5,450.00.

Government participation at 90% $4,905.00

Royalty Payments this Period: None. Previously Paid: $349.70

Total Paid to Date: $349.70. Percent Gov. Part Repaid: 7.13%

Royalty Due on Production to date: $17.43.

Royalty Remarks: Since the last semi-annual report, one sale of 9.75 lbs. of sheet mica was made to the GSA depot. Lewie Aldridge, the present owner of the mineral rights received $120.52 for the sale. No royalty has been paid on 3 sales made by Mr. Aldridge amounting to $348.65; listed as follows:

Date	Lot No.	Lbs.	Prelim. Pay't	Final.	Total
12-3-56	902	11.50	$119.23	51.41	$170.64
1-22-57	1143	5.81	47.95	9.54	57.49
5-7-57	1619	9.75	70.65	49.87	120.52
		27.06	237.83	110.82	$348.65

Original estimate of DMEA reserves(Field Team final report)
None given

	Type	Lbs	Value
Production DMEA ore (this period)	sheet	9.75	$120.52
Production DMEA ore(previous)	Sheet	482.70	$6,994.27
	Punch	1061.00	106.10
	Scrap	9950.00	121.75
		11493.70	$7,222.12

Production DMEA ore todate:

Type	Pounds	Value
Sheet	492.45	$7,114.79
Punch	1,061.00	106.10
Scrap	9,950.00	121.75
	11,503.45	$7,342.64

Remarks: The writer called at the subject mine October 9, 1957 conferred with W. R. Robbins, the owner of the surface rights. He said that Mr. Aldridge has now leased the mineral rights to Dave Dellinger.

The mine is nowbeing operated by Dave Dillinger, Cleon McKinney and W. R. Robbins, under the following arrangement:

The above three men do the actual manuel labor at the mine and divide half the profits. Gene Penland, President of the bank at Newland, North Carolina receives the other half of the profit if any, and in turn furnishes all the equipment and supplies. He is also handling the finances and will see that all royalty is paid.

When visited the adit had been rehabilitated and about one-half ton of mica(mine-run) had been produced.

Wm. A. Beck, Mining Engineer
Bureau of Mines

Memorandum

To: Operating Committee, DMEA - Washington

From: DMEA Field Team, Region V - Knoxville, Tennessee

Subject: DMEA-2921, Idm-E548-mica. Fred Taylor and Julian and Johnnie Greene, Newland, N.C. Cow Camp(south)Mine, Avery County, North Carolina.

Reference is made to Mr. Beck's semi-annual report of April 15, 1957 on certified project.

It is our understanding that, when Mr. Aldridge purchased the mineral rights to the Cow Camp property, he agreed to assume the liability for DMEA royalty payments. However, he has not answered our letter of May 14, and the $11.41 royalty has not been paid.

We are told that additional sales have been made since April, and when Mr. Beck visits the Spruce Pine Depot this month, he will investigate this matter.

Under these circumstances, are we justified in writing to Mr. Aldridge to pay-up these delinquent royalties, or must we look for payment from Messrs. Taylor, Greene and Greene, the Operators under the contract, or Charles M. and Iris M. Trammell who signed the Owner's Consent to Lien?

Please advise us, so that we may take appropriate action when Mr. Beck obtains the necessary data.

Mr. Lewie Aldridge

Spruce Pine, N. C.

Re: DMEA-2921, Idm-/E548-Mica
Fred Taylor & Johnnie Greene
Cow Camp (south)Mine
Avery County, N. C.

Dear Mr. Aldridge:

It has just been brought to our attention that you have purchased the rights on the subject property for mining, and that you are now operating the mine. We have also been told that you are cognizant of the Government's Lien on the property, and its right to a percentage royalty on any sales made there from.

Our records show that at least two sales of sheet mica have been made to the Government Mica Buying Depot. These sales amounted to $228.13. Your check in the amount of 5 percent of this amount or $11.41 is past due. Checks should be made payable to the Defense Minerals Exploration Administration and sent to R. A. Laurence, Executive Officer, DMEA, Region V, Room 13, Post Office Building, Knoxville 2, Tennessee. Copies of settlement sheets covering all sales should accompany the check.

For your information the project was certified for $4,905.00 and $349.70 of this has been paid leaving a balance of $4,555.30.

Very truly yours,

V. J. Lynch, Acting
Executive Officer, DMEA

INTERIM REPORT OF CERTIFIED PROJECT

DMEA-2921, Idn-E548 (mica)

COW CAMP (South) MINE
Avery County, North Carolina

Accompanied by C. E. Fisher, Auditor, Contract Administration and Audit Division, the writer called on Fred Taylor at his office in Newland, North Carolina November 15, 1955, in regard to royalty due the Government on sales made to the Government Mica Depot March 29, 1955 and July 11, 1955. A check in the amount of $37.76 was given the writer as payment for the above and one sale of scrap which was sold July 25, 1955.

Dear Mr. Taylor:

A recent check at the Government Mica Buying Depot at Spruce Pine, disclosed that you made a sale of 30.25 pounds of mica from the subject mine , lot No. 1805 for which you received $303.99. To date the Government has not received its 5 percent royalty on this sale. Please send your check, made payable to the Defense Minerals Exploration Administration for this royalty, plus the royalty on any other sales made since Mr. Fisher's audit in March, to this office at your earliest convenience.

Very truly yours,

Robert A. Laurence

AUG 2 - 1954

REPORT OF INSPECTION OF CERTIFIED PROJECT
DMEA-2921, Idm-E 548 (mica)

COW CAMP (south) MINE
Avery County, North Carolina

Fred Taylor, Julian Greene and Johnnie Greene, Ptners. c/o Fred Taylor, Newland, N. C.

Accompanied by B. J. Brekhus, Auditor, Contract Administration and Audit Division, the writer contacted Mr. Fred Taylor on July 8, 1954, to make an audit of the mica sales on the subject project. It was found that sales amounting to $2,018.76 were made from mica produced from the date of the contract until July 1, 1954. Of this amount $1,890.76 was sheet mica sold to the Government Buying Depot and $128.00 was for miscellaneous sales of scrap and punch. Royalty amounting to $87.57 hasbeen paid the Government, leaving a balance of $13.37 still due.

The Field Team's Final report stated that $3,885.10 worth of mica was recovered and sold during the operation; this was an error, as sales made to GSA on August 3, 11 and 21, 1953 amounting to $2,175.40 were made from mica produced prior to the date of the contract. This was confirmed by L. E. Shirley, Mining Engineer, U. S. Bureau of Mines.

The mine is now operating on a small scale.

JUN - 8 1954

Mr. Fred Taylor

Yadkinville, North Carolina

Re: Contract No. [illegible] - Lina
Fred Taylor, Julian Greene
and Johnnie Greene
Gov Cary (Smith) Mine
Avery County, North Carolina
Contract No. [illegible]

Dear Mr. Taylor:

Enclosed herewith is a Certification of Recovery or Development on Contract No. [illegible] on the Gov Cary (Smith) Mine, Avery County, North Carolina.

As the terms of the Exploration Project Contract set out in the Certification, all production from the property from the date of the Exploration Project Contract, June 15, 1953, is subject to the Government's percentage royalty as set forth in the contract until the sum of $4,775.00 is paid, or until June 15, 1963, whichever occurs first.

Payments should be made to Mr. Robert [illegible] Laurence, Executive Officer, Defense Minerals Exploration Administration Field Team, Region VII, Room [illegible], Post Office Building, Knoxville [illegible], Tennessee. Checks should be drawn payable to the Treasurer of the United States. The purchaser should be advised to deduct the royalties from the amount due on each shipment and forward check direct to the Executive Officer.

Royalty payments to the Government should be accompanied by suitable evidence, such as copies of settlement sheets showing quantity and grade of ore sold, the name of the purchaser, and the price and charges certified to be correct by the purchaser.

You are requested to notify Mr. Laurence of any changes in ownership or production rights that may have any effect on the Government's right to its percentage royalty. Also, if production ceases at any time for any extended period, please notify Mr. Laurence at six-month intervals that no production has been made.

Sincerely yours,

SIGNED

Re: Docket No. DMA-921 - Mica
Fred Taylor, Julian Greene
and Johnnie Greene
Cow Camp (South) Mine
Avery County, North Carolina
Contract No. IDM-1548

Dear Mr. Cumbel:

I am enclosing one copy of a Certification of Discovery or Development relating to the subject contract.

The exploration contract was signed June 15, 1953, with the Government participating to the extent of 90% of $5,450.00, or $4,905.00.

The project work was started on July 22, 1953, and was completed on February 26, 1954, after the expenditure of $5,45[illegible] which is the total net accepted cost according to the audit Service. The Government paid 90% of the total accepted cost, or $4,905.00.

The work performed on this project consisted of preparation of an adit entrance and driving 150 feet of adit and drift through a series of low-dipping discontinuous pegmatite lenses up to 2.5 feet thick conformable to the enclosing wall rock. Strategic mica was produced during the project.

The DMEA concurs with the field team evaluation of the work performed and has certified that a discovery or development has resulted from the work under this contract.

Sincerely yours,

SIGNED

Subject: Docket No. DMEA-2921 - Mica
Fred Taylor, Julian Greene
and Johnnie Greene
Cow Camp (South) Mine
Avery County, North Carolina
Contract No. Idm-E548

Dear Mr. Laurence:

Reference is made to field team final report of examination of the subject property.

Since a certification is to be made on this project it will be necessary to have an estimate of ore reserves. The report does not contain the necessary data to calculate reserves.

It will be appreciated if you will have the field team submit an ore reserve estimate at this property as soon as possible.

Sincerely yours,

Chairman, Operating Committee

Re: DMEA-292I, Idm-E548(mica)
Cow Camp Mine

Dear Sirs,

This is the final report of the Cow Camp Mine: We ran a tunnel south west I50 ft. 5 ft. high, 7 ft. wide. We found a small vein of mica, but it ran out before we finished the tunnel. We had vein material in the back of the tunnel, but no mica.

We produced 3400 lbs. of block mica, which worked out II2.9I lbs. We sold it for a total of $I75I.4I, which yuo will find inclosed sales slips for.

We have some scrap mica on hand, so far we havent found any sale for it.

We are also inclosing a check for $87.57 for royalty in full.

Any further information you need we will be glad to furnish it, if we can.

Thanking you for your cooperation.

Yours sincerely,

Fred Taylor

FINAL REPORT
On
DMEA-2921, COW CAMP MINE (south)
Idm-E 548, mica.

Operator: Fred Taylor, Julian Greene, and Johnie Greene, c/o Fred Taylor
Newland, North Carolina

The Cow Camp mine (south) is located on the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap and about 4 miles southwest of Newland, Avery County, North Carolina.

Work completed under the contract consisted of preparation of an adit entrance and driving 150 feet of timbered 5' x 7' adit and drift. As considerable strategic mica was recovered during the project, a certification of discovery should be made. No additional exploratory work is warranted.

Work began July 22, 1953 and was completed on February 26, 1954. A total of 150 feet of level work was done in a southeast direction (see attached map). Heavy ground necessitated timbering of all work.

A series of low-dipping discontinuous pegmatite lenses which are conformable to the enclosing wall rock are present in the levels. No systematic distribution of the lenses is apparent. They consist of feldspar, quartz and ruby mica and range up to 2.5 feet thick and 30 feet in lateral extent. The enclosing rock is highly weathered mica schist and hornblende gneiss.

A total of $3,885.10 worth of sheet mica was recovered and sold during the operation. It was small in size but was of excellent quality. The discontinuous nature and sporadic occurrence of the lenses renders any estimation of reserves as impractical and unreliable. The heavy ground condition which necessitates continuous timbering may make any mining of this deposit uneconomical.

Expenditures:

(a)	Total approved	$5,450.00
(b)	Total cost of project	5,450.00
(c)	Gov. share of cost	4,905.00
(d)	Gov. share unexpended	none
(e)	Value of production	3,885.10

The project was conducted in a satisfactory and efficient manner. No equipment was purchased under the contract.

April 13, 1954.

K. H. Teague and D. H. Amos, Geologists
U. S. Geological Survey.

Re: DMEA-2921, Idm-E548 (mica)
Cow Camp Mine

Dear Mr. Taylor:

Please send us as soon as possible your final engineering and geologic report on the subject exploration project as required by Article 5 (b) of the contract form. Please note also that Annex I of the contract requires payment of 5 percent royalty of all mica produced during exploration work. Your monthly narratives accompanying the vouchers indicate you have produced 3400 lbs. of mica Please send your check payable to the Treasurer of the United States for 5 percent of the sale value, accompanied by copies of sales slips or invoices. This applies to the sale of punch and scrap also.

Yours very truly,

Robert A. Laurence
Executive Officer, DMEA
Region VII

Dear Mr. Laurence:

Reference is made to field team interim report of March 10, 1954, which stated that subject contract has been completed and can be recommended for certification.

We have not yet received the field team's final report. In order to process the certification we will appreciate very much receiving this report as soon as possible.

Sincerely yours,

George C. Selfridge

REVIEW OF FIELD TEAM REPORT ON APPLICATION DMEA-2921 (mica)

To: L. G. Houk, Defense Minerals Exploration Administration
From: D. M. Larrabee, U. S. Geological Survey
Applicant: Fred Taylor, Julian Greene, and Johnnie Greene, Newland, N. C.
Name of property: Cow Camp mine (South)
Location of property: 4 miles southwest of Newland, Avery County, N. C.
Date of field team report: March 10, 1954.
Authorship of field team report: L. E. Shirley and K. H. Teague.
Field team's recommendation:

1. Termination of project.
2. A certification should be made.

Comments: Good chance that additional work will pay off.
ACTION RECOMMENDED:
Follow field team's recommendation.

To: Operating Committee, DMEA - Washington

From: Executive Officer, DMEA - Region VII

Subject: Amendments to Contracts

Reference is made to your letter of March 11.

The following actions have been taken:

DMEA-2784, Idm-2519, Amendment is being prepared. We have been trying to get the operators back to work on this job.

DMEA-2785, Idm-2518. Completed

DMEA-2840, Idm-2507. Completed

DMEA-2872, Idm-2539. Amendment has been sent to Operator; signed copies not yet returned.

DMEA-2873, Idm-2562. Amendment has been sent to Operator; signed copies not yet returned.

DMEA-2917, Idm-2561. Completed

√ DMEA-2921, Idm-2548. Amendment sent to you March 10.

DMEA-3008, Idm-2560. Completed.

INTERIM REPORT

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene, and Johnnie Greene, c/o Fred Taylor, Newland, N. C.

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home, and about 4 miles southwest of Newland, Avery County, N. C.

This contract has been completed. Adit work has consisted of driving 150 feet in weathered biotite gneiss which has cut numerous lenses or pods of pegmatite material at scattered intervals. Most of these pods have not been worked along their extensions. The thickest pod encountered can be observed in the present face. It trends S 10° W and dips 25° west. The body is composed largely of quartz with minor feldspar and muscovite mica. It is the examiners opinion that this mine can be recommended for certification. An actual estimate of the mica produced can not be made because of the irregularity of work in the pegmatite lenses, here today and gone tomorrow. At least two sales have been made and possibly others. A quantity of mine run block is on hand ready for processing.

Due to the weathered nature of the material this adit required solid timbering. An adequate job was done throughout and the field examiners believe that the pegmatite extensions will be worked at the known points in the future. The work was conducted efficiently and satisfactorily and the operator was cooperative with all suggestions made.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene, and Johnnie Greene, c/o Fred Taylor, Newland, N. C.

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home, and about 4 miles southwest of Newland, Avery County, N. C.

Work has resumed on this contract after a brief delay caused by heavy rains and inability to handle water coming into the mine. An advance of 9 feet has been made on a new heading being driven N 5° W. Material encountered is weathered hornblende gneiss and a narrow lense of coarse grained pegmatite containing a little mica. Eleven feet remains to be driven under the contract.

Mr. W. A. Beck, member of the DMEA Field Team, Region VII, accompanied the Field Examiners on this visit to the mine.

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene and Johnnie Greene, c/o Fred Taylor, Newland, North Carolina

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home, and about 4 miles southwest of Newland, Avery County, N. C.

Drifting has been halted temporarily on this contract because of recent heavy rains with subsequent deluges of water and heavy ground reported. Examination of the mine disclosed the presence of water, but little or no heavy ground in most parts of the adit. One stull and cap was cracked, but all other timbers were in good shape and no movement was observed as previously reported. Work is expected to resume shortly. Only 20 feet of drifting remains under contract.

INTERIM REPORT

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene, and Johnnie Greene, c/o Fred Taylor, Newland, N. C.

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home and about 4 miles southwest of Newland, Avery County, N. C.

Drifting continues on this contract and is now at 130 feet. A narrow lense of pegmatite was picked up at about 120 feet and was followed downward on a shallow incline for about 10 feet. This 10 feet acted as a collecting basin for incoming waters and forced the workers to quit work until a pump can be procured. During this period of idleness a short crosscut, at the operators own expense, was driven to the west at a point 40 feet from the portal. Several bags of very good quality mica was recovered.

Drifting is expected to resume in the near future.

The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

for the
Month of ~~November~~ December, 1953

Work Accompolished

Dec. I-3I

Olin Burleson and Simon Franklin worked a total of 356 hrs.tunneling, timbering,mucking and pumping water.Going a distance of I7 ft. The vein has pitched down about 25 degrees.Have produced about 300 lbs. block mica. Water is increasing.

Fred Taylor, Julian & Johnnie Greene, Partners

By: Fred Taylor Partner

INTERIM REPORT

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene and Johnnie Greene, c/o Fred Taylor, Newland, North Carolina.

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home, and about 4 miles southwest of Newland, Avery County, N.C.

This adit continues to be driven under contract and is now at 120 feet. A gradual turn from the original direction now places the heading in a S 70° W direction. A lense of pegmatite was picked up at about 90 feet from the portal and was followed. As a result the floor was raised considerably for a distance of about 20 feet. All visible pegmatite was stoped in this area for a vertical distance of 23 feet from the floor. The remaining 10 feet has been driven on a level. Material in the present face from bottom to top consists of the following: 6 inches of weathered hornblende gneiss, 6 inch lense of pegmatite, 2 feet of weathered gneiss, and 4 feet of scattered 1 inch pegmatite stringers and interlayered gneiss. The material is becoming harder as work progresses.

No estimate can be made at present of mica recovered to date, but one small sale has been made recently according to the mine foreman.

INTERIM REPORT

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene and Johnnie Greene, c/o Fred Taylor, Newland, North Carolina.

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home, and about 4 miles southwest of Newland, Avery County, N. C.

This adit continues to be driven under contract and is now at 115 feet. Material observed in the face is weathered biotite gneiss containing pods or lenses of pegmatite. The operator could not be contacted to learn how much mica had been produced from the last 15 to 25 feet of work. Solid timbering remains necessary in this type of material and a good job has been accomplished throughout the adit. Progress on this contract is satisfactory.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

Docket No. DMEA No.292I-IDME548----

Operators Progress Report
for the
Month of October, 1953

Work Accomplished

Oct. I-3I. Olen Burleson, Simon Franklin, Dave Dellinger Jr. and Ray Watson worked a total of 432 hrs. tunneling, timbering, pumping water and mucking. Going a distance of 30 ft. Mica vein has raised about six ft. Have a small vein of mica over head. Looks very favorable.

Fred Taylor, Julian Greene, Johnnie Greene,
Partners

By Fred Taylor Partner

INTERIM REPORT

DMEA-2921 Idm-E548 COW CAMP MINE (SOUTH) (mica)

OPERATOR: Fred Taylor, Julian Greene, and Johnnie Greene, c/o Fred Taylor, Newland, North Carolina

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home, and about 4 miles southwest of Newland, Avery County, N. C.

This adit continues to be driven and is now at 72.5 feet. Difficulties between the operator and landowner have been ironed out and workers have been allowed to return to the job. Material encountered during last few feet has not changed and has been principally weathered mica schist with an occasional lense of pegmatite. The condition of the material continues to require solid timbering throughout.

A new gasoline hoist was observed on the job, which should help in future progress.

INTERIM REPORT

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene and Johnnie Greene, c/o Fred Taylor, Newland, North Carolina.

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home and about 4 miles southwest of Newland, Avery County, North Carolina.

This adit continues to be driven slowly and is still in old works. The last 25 feet has been in old workings and the country rock is a soupy, highly weathered mica schist that has required careful timbering throughout. The present heading is at 57.5 feet.

The mine was not working at the time of this visit because of a dispute between the surface landowner and the operator. Complete details could not be obtained, but one of the operators stated that mining would probably resume within the coming week.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

MONTHLY REPORT OF OPERATOR

The Operator (Contractor) of an exploration project is required to make a monthly report to the Government through the Regional Executive Officer. This report consists of three parts as follows:

(a) *Form MF-104—Operator's Monthly Report and Voucher.*—This form details expenditures and constitutes a voucher for reimbursing the Operator for the Government's share of costs;

(b) *Form MF-104A—Operator's Unit Cost and Progress Report.*—This is a statistical report of expenditures which shows costs for the various types of operation; and

(c) *Narrative.*—A concise narrative description of progress made, results accomplished, and any unusual difficulties encountered must be furnished as an attachment to this Report and Voucher. Wherever possible, the narrative is to be illustrated with maps or sketches showing formations penetrated and location and assays of samples taken as well as advances in workings. In the case of diamond drilling or churn drilling, the location and inclination of holes is to be shown on a map; logs and assays also are to be submitted.

The Monthly Report of Operator should be prepared in an original and four copies all of which must be sent to the Executive Officer of the Region not later than the 15th of the month following.

Preparation of Form MF-104—Operator's Monthly Report and Voucher.—All the applicable spaces in Form MF-104 should be filled in by the Operator, and the Operator or his agent should sign the certification in the lower left corner of the form.

The items of costs are arranged in the order they appear in Article 6 (a) of Form MF-200 (Revised February 1952), however, this form is readily adaptable for use in reporting activities under other contract forms.

Under Item (1) delete words "Short Form" if the contract is a sub-contract under Form MF-200; and delete word "Independent" if the contract reported is on Form MF-200 (A). Also, report work paid for on a unit basis under contract Form MF-200 as though it were performed under an independent contract.

Under Item (2) include labor, supervision and technical services incurred for the exploratory operations. Do not include labor, supervision and technical services used for work performed under items (5) and (6).

Under Item (3) include the costs of material and supplies used in the project other than that used under items (5) and (6).

Under Item (4) appear the three types of operating equipment expenditures, that is, rental, purchase and depreciation. The expenditures made for renting equipment belonging to a third party will be reported under "Rental". The amount paid or duly obligated for payment for the purchase of equipment will be reported under "Purchase". The amount of expenditures due the Operator to reimburse him for depreciation of equipment owned will be reported under "Depreciation".

Item (5) comprises costs of labor, supervision, technical services, materials, etc., which are used in the initial rehabilitation and repair of existing buildings, installations, fixtures, and equipment. These costs, therefore, should not be reported under items (2) and (3).

Item (6) includes the labor, supervision, technical services, materials, etc., used in the installation or construction of new buildings, fixed improvements, etc., necessary for the project. These costs, therefore, should not be reported under items (2) and (3).

Item (7) covers miscellaneous types of expenditure such as payroll taxes, liability insurance, workmen's compensation insurance, repairs to equipment and sampling and analysis. Only that part of payroll taxes, liability insurance and workmen's compensation which are paid by the operator should be reported under item (7). The share paid by the employee as a payroll deduction is to be included under item (2) as labor costs.

Item (8) includes any unforeseen costs not included in the other seven categories.

The original of Form MF-104 when submitted for reimbursable expenses incurred under contract Form MF-200 must be supported by original documentation or by certified copies of purchase orders, payrolls or transcripts of payrolls, unless such documentation has been waived by the Regional Executive Officer. This certification may be stated thus, "Certified True Copy (or Transcript)", followed by appropriate signature. If the Executive Officer of the Region determines that a contract under Form MF-200 should have an "on-site" audit, that is, a Government auditor should make an audit of the Operator's books and records of account, the Operator need not support his monthly voucher with original or certified documents except in cases of equipment purchases whose individual costs exceed $50.00. In these cases the original or a certified copy of the purchase order or invoice should be attached to the Monthly Voucher. N. B.—Only the *original* of Form MF-104 is required to be documented. The four copies of Form MF-104 are not to be thus supported.

Form MF-104 submitted for reimbursement under fixed price contracts on Form MF-200 (A), however, are not required to be supported by documentation of any kind. The Operator will submit his claim under item (1) of Form MF-104 by deleting as stated above the word "Independent" and by showing the number of feet or other units immediately after the appropriate descriptive word, such as, drilling, bulldozing, crosscutting, drifting, etc., and giving the "Monthly Total" amount due. "Totals Previously Reported", and "Totals to Date" columns should also be filled in.

REMARKS:
We have put in a tank, heat, electric pumped electricity. Widened entrance to portal. Have about 25 hrs. clean rock preparing portal.

→ NOTE.—Title 18, U. S. Code (Crimes), section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

(Instructions on reverse)

(For Government use only)

INSTRUCTIONS

Preparation of Form MF–104A—Operator's Unit Cost and Progress Report.—Applicable places on Form 104A should be filled in by the Operator. The purpose of this form is twofold as follows: (1) to furnish the supervising engineers and other administrators with statistical information necessary to better determine the progress of the project; and (2) to furnish more permanent information on mining costs for future use. The more important phases of operation on which permanent information is desired have been outlined in the form. There are blank lines, however, for those unusual phases which may need to be reported for a particular project. It will be necessary for the Operator to distribute his costs among the applicable phases reported with the exception of three items the costs of which are not to be distributed by the Operator. These three items are: "Operating Equipment Purchased", "Initial Rehabilitation and Repairs", and "New Buildings, Improvements, etc." The reason for not distributing these items on a monthly basis is doubtless clear to the Operator, since such distribution might well overstate the cost for any one month or period short of the entire contract period.

Form MF–104A has been designed to tie in with Form MF–104 for both monthly and cumulative costs. The "Total Costs" on Form MF–104A for each month should equal the monthly "Total Costs" as reported on Form MF–104. This is also true of the "Total Costs To Date".

In preparing Form MF–104A, it will be necessary frequently to distribute certain costs over a number of items. For instance, supervisory and engineering costs may have to be distributed over several phases, such as, drifting, crosscutting, raising, etc., provided that these items were reported active for the month. Such distributions should be made on the basis of time spent on the various phases, on man days of labor charged to such phases, or on some other equitable basis. "Operating Equipment", "Initial Rehabilitation and Repairs", and "New Buildings Improvements, etc.", will be distributed to the several phases of the project by the Washington Office of DMEA at the close of the project if determined necessary. The last two columns headed "Authorized by Contract" will be filled in by the Operator if such information is found in the contract. This information is usually a part of Exhibit "A" of the contract. A space for remarks has been provided for the use of the Operator to call attention to any unusual circumstances causing excessive or disproportionate unit costs.

INTERIM REPORT

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene and Johnnie Green, c/o Fred Taylor, Newland, North Carolina.

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home, and about 4 miles southwest of Newland, Avery County, N. C.

This adit continues to be driven under contract and is now at 30 feet. Material encountered has consisted principally of a highly weathered schist with an occasional narrow lense of pegmatite containing small blocks of ruby mica. Three such lenses not exceeding 4" in thickness where showing in the heading on the date of this visit. Mica removed is small, bent and is slightly stained. Some heavy ground was encountered at about 23 feet, but was handled satisfactorily. Stulls have been set on 3 to 6 ft. centers and both top and side lagging has been necessary for entire adit distance. Track has been lain to the face and a mine car removes muck. Drainage facilities for water removal was installed during portal preparation. Progress on this contract is satisfactory.

INTERIM REPORT

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene and Johnnie Greene, c/o Fred Taylor, Newland, North Carolina

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home and about 4 miles southwest of Newland, Avery County, North Carolina.

Adit work is underway on this contract and is now at 23 feet from first set. Measurements for footage allowable under contract will be made from the third set, because adit was not started in new ground, and this gives an advance of 14 feet. Material encountered has consisted principally of a highly weathered mica schist, which has required heavy timbering. A small pegmatite pod was encountered at portal during excavation and 2 pods were showing in the face at the time of this visit. These pods consisted of quartz, feldspar and muscovite mica of varying sizes. Progress on this project is satisfactory.

INTERIM REPORT

DMEA-2921 Idm-E548 (mica) COW CAMP MINE (SOUTH)

OPERATOR: Fred Taylor, Julian Greene, and Johnnie Greene, c/o Fred Taylor, Newland, North Carolina.

LOCATION: On the headwaters of Cow Camp Creek about 1/6 mile east of Cow Camp Gap, immediately south of the Will Robbins home, and about 4 miles southwest of Newland, Avery County, North Carolina.

Starting date on this project was July 22, 1953. This project was visited on July 24, 1953 and bulldozing for expansion of the open cut and scaling of the face in preparation of an adit entrance was in progress. Some pegmatite was uncovered near the adit entrance in the bottom of the cut.

Another visit was made on July 29, 1953 and protective timbers were being erected at the adit entrance. This entrance will be side and top lagged solid, stulls will be set on 3 to 5 feet centers and top lagging will be loaded properly.

Subject: Docket No. DMEA-2921 - Mine
Fred Taylor, Julian Greene and
Johnnie Greene
Cow Camp (South) Mine
Avery County, North Carolina

Dear Mr. Laurence:

Please find herewith the original and five copies of a contract covering the subject exploration project which have been signed by the Government with register number and effective date as shown.

If the contract meets with your approval, insert the time for starting and completing the work in Article 3 of the contract and present it to the Operators for approval and signature. Please explain to the Operators that the contract, when executed, is a firm commitment under the terms of which they are obligated to complete the work outlined at the agreed unit cost. If any part of this contract does not have either your approval or that of the Operators and cannot be amended within your delegated authority, then the original and all copies of the contract are to be returned to this office, together with the proposed changes for consideration.

After execution of the contract, the copies are to be distributed in the usual manner.

Copies of memoranda from the Geological Survey and the Bureau of Mines are enclosed.

Sincerely yours,

George C. Selfridge

FIELD EXAMINATION REPORT
on
DMEA-2921, COW CAMP(South) Mine (mica)

Applicant: Fred Taylor, Julian Greene and John Greene
c/o Fred Taylor, Newland, North Carolina

Mica of very good quality occurs at this locality. Evidence uncovered by the applicants since the termination of exploration Contract Idm-E 97, Trammell Mining Corporation, indicates that a worthwhile deposit of strategic mica occurs. The field examiners, therefore, recommend that exploration assistance be granted.

This property was examined on April 7, 1953. Fred Taylor and Julian Greene accompanied the field examiners on the inspection which required two hours.

The Cow Camp (south) Mine was the subject of an exploration contract, Docket No. DMA-1224X, Idm-E 97, dated August 3, 1951. Work under this contract was poorly directed and not carried to completion. After this contract was terminated the present applicants (apparently there is no tie-in between the two groups of applicants) conducted considerable shovel trenching and work from old adits at their own expense. This work resulted in the sale of mica worth $3013.21 to the Spruce Pine Depot. All of the adit work has been in old works and the mica recovered has been obtained by robbing pillars.

These openings are at present accessible to a limited extent. They are in a nearly flat-lying pegmatite whose thickness is about 4 feet. It is rich in mica. The present openings are of small cross-section and have been poorly timbered, thus are in an unsafe condition.

After the termination of Contract Idm-E97, the present applicants deepened the drainage trench and extended it to the adit portal. This trench provides gravity drainage from the various openings, thus removing the water problem which in the past has been one of the more serious mining problems.

In Contract Idm-E 97, Stage II was to consist of drilling 4 - 100 foot diamond drill holes. Since that time the field examiners have studied pegmatites in this area which appear to be similar in character to the Cow Camp (south) pegmatite. It has been our observation that many of the low-dipping pegmatites consist of a series of discontinuous pods whose distribution cannot be predicted. An example of this type of pegmatite is the one under exploration by DMEA Contract Idm-E410 at the Elk Mine.

Reviewed by
DMEA OPERATING COMMITTEE

4-24-53
(date)

Pegmatites of this type appear to be always conformable to the enclosing rock. Therefore, it is entirely possible that drilling the pegmatite would give little conclusive information. In place of the drilling, we think that perhaps the drifting as proposed in the present application will supply greater information and have more likelihood of success.

Therefore, the field examiners recommend that the present face be scaled and a loft erected to make it safe, and approximately 150 feet of new adit and drifts be driven on undisturbed pegmatite.

Estimated Cost:

Preparation of adit entrance	$200.00	
150 feet of adit and drift (5' x 7') and timbered where necessary @ $35/ft.	$5,250.00	
Estimated Total Cost.....		$5,450.00

Estimated time required 75 shifts.

April 14, 1953.

Kefton H. Teague, Geologist
U. S. G.S.

Lawrence E. Shirley, Mining Eng.

Cow Camp (South) Mine
Avery County, North Carolina

Dear Mr. Taylor:

J.C. 3/23/53

Your application for assistance in exploring your property has been reviewed by the Nonmetallic Minerals Division of the Defense Minerals Exploration Administration and has been referred to Mr. Robert A. Laurence, Executive Officer, DMEA Field Team, Region VII, Room 13, Post Office Building, Knoxville 2, Tennessee, for further consideration and possibly a field examination.

In the event that a field examination of your property is to be made, the Regional Office will contact you. Any assistance that you may give the members of the field team in the examination will be appreciated.

Sincerely yours,

C. O. Mittendorf (fw)

Administrator

John Greene
Cow Camp (South) Mine
Avery County, North Carolina

Dear Mr. Laurence:

J. C. 3/23/53

Please arrange for a field examination unless your information on the Cow Camp Mine makes an on-site investigation unnecessary. In this event, submit your recommendation on the proposed exploration program after a conference with the applicants. From the data submitted, the present applicants appear to have no connection with the previous contract at this mine (DMEA-1024, Contract No. IDM-037) which involved the Trammel Mining Corporation and A. L. Reid.

Two copies each of memoranda from the Geological Survey and the Bureau of Mines are enclosed for your convenience.

March 13, 1953

Memorandum

DEPARTMENT OF THE INTERIOR
Defense Minerals Administration
RECEIVED
MAR 13 1953

To: Nonmetallic Minerals Division
Defense Minerals Exploration Administration

From: Chief, Ceramic and Fertilizer Materials Branch

Subject: DMEA-2921, Mica, Cow Camp Mine, Avery County
North Carolina

The Bureau of Mines' records indicated 112.06 pounds of Good Stained and Better full trimmed mica, 49.52 pounds of Stained, and 11.59 pounds of Heavy Stained were sold from subject mine to the Government Purchasing Depot in Spruce Pine, North Carolina. A definite length for the proposed tunnell described under item 5-a should be established. However, on the basis of the quantities of mica sold to the Government which qualifies as ruby mica and the applicant's description of present exposures, a field team investigation is recommended to ascertain if an exploration program is justified.

Memorandum

DEPARTMENT OF THE INTERIOR
Defense Minerals Administration
MAR 13 1953

REVIEW OF APPLICATION DMEA-2921 (mica)

To: L. G. Houk, Defense Minerals Exploration Administration
From: J. J. Norton, U. S. Geological Survey
Applicant: Fred Taylor, Julian Greene, and Johnnie Greene, a partnership, Newland, North Carolina.
Name of property: Cow Camp mine.
Location of property: Linville Twsp., Avery County, North Carolina.
Estimated cost of project: $5,673.60.
Summary of applicant's proposal:

Tunnel from the present working to a point as shown on accompanying sketch. The length apparently is expected to be about 100 feet.

Sources of information on applicant's property:

1) Docket DMEA-1224. Contract Idm-E97.
2) Jahns, R. H., Cow Camp North mine and South mine: Mica deposits of the Blue Ridge province, North Carolina and Georgia, U. S. Geol. Survey Unpublished Prof. Paper.
3) Jahns, R. H., and Lancaster, F. W., 1950, Physical characteristics of commercial sheet muscovite in the southeastern United States: U. S. Geol. Survey Prof. Paper 225, p. 60.
4) Kesler, T. L., and Olson, J. C., 1942, Muscovite in the Spruce Pine district, N. C.: U. S. Geol. Survey Bull. 936-A.
5) Colonial Mica Corporation purchase records.

Comments:

1) See DMEA-1224. A field examination is not necessary because the previous docket contains adequate data, but we should solicit the opinions of the field team regarding what should be done with this new application.
2) Applicant submits three invoices for sale of mica to Spruce Pine Mica Purchase Depot in the amount of $3,013.21.
3) Work done under DMEA-1224 was thoroughly unsatisfactory, and it is clear that the applicant did not meet the conditions of the contract. Consequently, if any of the persons involved in DMEA-1224 is also involved in this new application, then obviously the application must be denied in order to avoid getting the same treatment we got before. The burden of proof certainly should be on the applicant to show that he will do better than was done on DMEA-1224.
4) The application shows that a new lease has been made on the Cow Camp mine, but it does not explain what happened to the old lease or to the persons involved. Furthermore, the applicants make no mention of the fact that there has already been a DMEA contract on this property.

5) I am skeptical that the applicant can present sufficient data to show that we should take a chance on getting burned a second time on this property.
6) If a contract is made, it should be based on the original field team report.

RECOMMENDATION:

Refer to field team for any pertinent opinions they may have on what should be done.

J. J. Norton
