Re: Uranium
DMA docket 1540X
Leeds, Utah

Dear Mr. Morgan:

Under date of August 7, 1951, DMA requested that you remit sufficient information to enable processing your application, DMA-1540X, for an exploration project. No reply has yet been received.

In view of the time elapsed, we assume that you are no longer interested in the project. Unless you advise us to the contrary within thirty (30) days, we shall accordingly close the docket.

Sincerely yours,

C. O. Mittendorf

Re: Uranium, Lease, Utah
DMA Docket 1540x

Dear Mr. Morgan:

Receipt of your letter of July 27, 1951 is hereby acknowledged.

For your information we enclose copies of May 14, 1951 Press Release and DM-5 as amended, which give general data on exploration projects. We also enclose five copies of Form DM-103 in case you wish to submit a revised application under the same docket number, the extra copy being for your files.

Please note that under exploration projects nothing should be included that is not strictly necessary for exploration purposes. Often, comparatively heavy expense may be avoided by renting equipment, or by contracting drilling and diamond drilling. Your control over the ground included in the project should be valid for sufficient time to insure completion of the project, and preferably you should obtain provision for a reasonable extension to life of lease. Copies of your lease must be published, and after study all questions on form DM-103 should be answered in most complete detail, on separate sheets of paper, preferably with maps or sketches showing location, width and assay of samples taken together with location of proposed, new, exploratational work. A clear description of the ambor is desirable, together with its objectives and geological basis.

We are happy to request our advice if you have any questions. You may also refer to field ~~Land~~ Land Office whose address is given in the enclosed release, for additional advice and assistance.
