Dear Mr. Osborn:

We hereby acknowledge receipt of your letter dated June 15, 1954 in which you state that because you have leased the claims which were the subject of your application for Government assistance to explore for uranium, you are not interested at the present time in the continuation of your application.

Based on this letter, we have closed DMEA Docket 3234 as of this date.

We thank you for your interest in the Defense Minerals Exploration program.

Very truly yours,

Riley R. Osborn
Dirty Shame Mining Company
Dirty Shame, Sorry Sight and
Knob Hill Groups
Garfield County, Utah

Dear Mr. King:

Enclosed are the following documents relevant to the captioned application:

1. One copy of Form MF-103, Application For Aid in An Exploration Project, dated January 12, 1954.

2. Original memorandum attached to the application and similarly dated.

3. One list of recorded claims with book and page numbers.

4. One sketch map of claims.

5. One copy of a memorandum, dated February 1, 1954, from Arthur P. Butler, Jr. to E. Wm. Ellis regarding the application.

6. Two copies of a memorandum, dated March 1, 1954, from Riley R. Osborn to Ernest Wm. Ellis in reply to latter's letter of January 20 requesting more information.

7. Two copies of our letter to Riley R. Osborn in reply to Applicant's memorandum of March 1.

You will note that the information supplied by Mr. Osborn is quite inadequate and that he suggests that a geologist be sent to the property to secure whatever information is required. He also mentions that Mr. Isidore Million, Atomic Energy Commission geologist from Grand Junction, Colorado, has inspected the property.

In accordance with our teletype of January 21 we have concluded that the data required to support this application cannot be secured through correspondence with the Applicant, and since no sum was mentioned in the application, we are assuming that it is within the Field Team's

R.C.G.
3-11-54

authority to process. Accordingly, it is suggested that a field examiner contact the Applicant and arrange for an interview and inspection of the property, and that the Field Team proceed from there on as if the application had originally been made to Region IV.

Sincerely yours,

George C. Selfridge

Dear Mr. Osborn:

This will acknowledge your memorandum of March 1, 1954, addressed to Ernest Wm. Ellis, Chief, Rare and Miscellaneous Metals Division, in regard to the subject docket.

The information furnished by you is still too incomplete for us to process your application. Consequently, we are forwarding all the material on hand to Mr. W. H. King, Executive Officer, DMEA Field Team, Region IV, 224 New Customhouse Building, Denver 2, Colorado, for his consideration. It is possible that Mr. King will find your application sufficiently promising to have a geologist or engineer contact you for the purpose of inspecting your property.

Please direct any future correspondence in connection with this application to Mr. King.

Sincerely yours,

C. O. Mittendorf (for)

3/8/54 gla

Utah State Fish and Game Commission

Torrey, Utah. Mar 1, 1954

Memorandum for Ernest Wm Ellis, Chief
Rare and Misc. Metals Division
Washington 25, D.C.

DEPARTMENT OF THE INTERIOR
Atomic Minerals Administration
RECEIVED
MAR 8 1954

Dear Chief Mr. Ellis!

I have your Memo of Jan 20, 1954, where you request some more information before you can complete DMEA-3234 Form on our Uranium Property known as the Dirty Shame Mining Co.

In the first place we are of a Partner Ship of Three of us. Each own 1/3 Interest. Names Riley R. Osborn, De Von Thompson of Torrey, Utah and Ben J. Dieringer of Marysvale, Utah, and we are just local prospectors without much funds to operate on, and at this time we do not have a large scale map as you requested, However, I will proceed to give you some Geology of our Property.

We have 17 Claims 600 ft by 1500 ft long each all joining together. Have shipped a few tons going at 4#/ton and 1. Percent, and Hand Samples going as high as 1.50 %. The Formation is of Chinle and Shinarump and ore is in Trees & Clay and Sandstone.

Utah State Fish and Game Commission

"Page 2"

19

Memorandum for Our Mineral exposures consists mostly of Irons & Clays, and Sand Stone. Some lengths of exposures are near 1500 ft long and going downward in Chinle Formation Mr. Isidore Million, Geologist from Atomic Energy Comm from Grand Junction, Colo went over our property, and he reported a good showing of a big deposit of Uranium Or. Also said it was the same Formation as the Steen Property of Moab, Utah. The work I want done is core drilling mostly. An independent contractor would be impossible out here as no body does that kind of work, Therefore, we would have to depend on the Government for such exploring. Our property rights are Discovery Locations all well surveyed and recorded at Tangnitch, Utah Garfield County. We have Road now accessable to property by Trucks, Jeeps and Pickups. Marysvale, Utah is the nearest shipping point 130 Miles from Property. Mill Power easy to get, availability of water Good Especially for Milling Purposes.

There is a Big Boom going on in this

Utah State Fish and Game Commission

"Page 3"

19

Memorandum for area now, However, some very good strikes being made, There are around 400 uranium Location allready been made of this area. The property is in the Henry Mountains District around 20 air line Miles South of the Vernon Fick property. If for further information I would suggest sending in a Geologist, Therefore, he could Map out all necessary places for Explorations of Our Property.

Hope this will help toward bring our Loan to a mess close.

Sincerely yours

Philip L. Osborn
Acting Sec
Torrey, Utah.

Re: Docket No. DMEA-3234 (Uranium & Vanadium)
Dirty Shame Mining Co.
Garfield County, Utah

Dear Mr. Osborn:

Regarding your application for aid in an exploration project, we find the information furnished by you too incomplete for processing. Before we can proceed further we will require the following data:

(1) Large scale map or sketch of the claims to be explored showing the proposed work (location of proposed road, drill holes, etc.), geology of the area, and location of mineral exposures with related assay data. A narrative description of each mineral exposure will be helpful, i.e., width and length of each exposure, extent of mineralization and radiometric indications. If you have or can secure any existing geologic or engineering report, assay maps, or other technologic information on your property, please forward same with the foregoing data.

(2) A complete description of the work to be done, together with a detailed estimate of the costs as outlined on the back of your application form MF-103. If you plan to have the proposed core drilling and road building done by independent contractors your estimate of costs could be simplified by showing the cost in terms of units of work such as per foot of drilling, per hour of bulldozer operations, or per cubic yard of material moved, etc.

(3) If the Dirty Shame Mining Co. is a partnership, give the names and addresses of your partners.

(4) Give a complete description of your property rights. If the partnership holds a one-third ownership of the property, give the names of the owners of the two-thirds interest and submit documents evidencing your right to control and operate the property as a whole.

(5) Describe availability of roads to your property, nearest shipping and supply points, availability of water, power, manpower, etc.

We shall be pleased to process your application further upon receipt of the foregoing information.

Sincerely yours,

Ernest Wm. Ellis

January 12, 1954

Mr. W. H. King,
Executive Officer
DMEA Field Team, Region IV
Washington 25, D. C.

Dear Mr. King:

Please find my application submitted for a mineral exploration operation. Also I'm sending along a brief map of our property, which we do have a very good showing of uranium ore, and have assays showing of 1.35 percent uranium. All 17 claims have good showings. Formation is in chinley and shivery. We are doing some prospecting now; but due to equipment and funds we only can carry on in a small way.

Mr. Isidore Million, Geologist from Atomic Branch of Grand Junction, Colorado looked at our property, and says we have ore of the same nature as the Sceen Property of Moab, Utah area, also same formation.

I would appreciate any assistance you could give me toward making a good exploration of our property. I would suggest core drilling for such exploration, also would need some funds for making roads over property, in order to get necessary equipment to places for exploration. I would be ready at any time, suiting your convenience, to go over the property for your observation for an exploration project.

Very sincerely yours,

(signed) Riley R. Osborn

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Dirty Shame Mining Co. Riley R. Osborn, Partner-Ship and acting Sec. Jordrey, Utah

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract a map of Claims is submitted with application, "17 Claims".

(*b*) State any mine name by which the property is known. Dirty Shame Mining Co

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise 1/3 interest

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property.

(*e*) If you own the land, describe any liens or encumbrances on it none

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes.

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you.

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points.

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore Uranium and Vanadium

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc.

(*c*) The work will start within ..... days and be completed within ..... months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations.

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)?

(*b*) How do you propose to furnish your share of the costs?

☐ Money ☐ Use of equipment owned by you ☐ Other

Explain in detail on acompanying paper. man Labor

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

Mr. Riley R. Osborn
Torrey, Utah

Dear Mr. Osborn:

This will acknowledge your letter of November 25 requesting information on Defense Minerals Exploration Administration assistance. The Defense Minerals Exploration Administration has a program for exploration of deposits of uranium minerals. This program is intended to assist in exploration work.

In some cases we have found it possible to include some road repair work in connection with an exploration project. The roads constructed under this program are limited to the bare necessity involved in making an area accessible for exploration.

Enclosed are DMEA Order 1, Amendments No. 1 and No. 2, and five copies of Form MF-103. DMEA Order 1 and its amendments guide the Defense Minerals Exploration Administration in selection of projects that may be considered favorably by examining engineers.

In case you are in position to qualify for assistance in the exploration of your uranium property, you should complete application form MF-103 in quadruplicate. The fifth copy is for your files. The completed forms may be sent to this office or direct to Defense Minerals Exploration Administration, Interior Building, Washington 25, D. C.

The construction of access roads for transportation of ore was within the province of the Defense Materials Procurement Agency. This agency has now been taken over by the General Services Administration. If you have in mind assistance in developing your property for production or the construction of an ore hauling road we suggest that you write to Mr. Irving Gumbel, Director, Materials Division, Emergency Procurement Service, General Services Administration Building, Washington 25, D. C., and explain your needs.

Yours very truly,

W H King

W. H. King
