OFFICIAL DOCKET FILE

IMEA NO. 4657

Application (Denied ✓
(~~Withdrawn~~
(After disposition, delete items not applicable)

Contract (Terminated - not Certified
(Cancelled
(Terminated - Certified
(Royalty Agreement

This is the official contract file containing all official records of the project. The records contained in the files are checked and are arranged in this order:

Left Side

Interim Royalty Audits
Reports of Royalty Review
Certification of Discovery
Certificate of Audit (Final)
Interim Audit(s)
Report of Review
Termination Notice or Agreement
Recision Notice
Assignment of Contract
Contract Amendments (latest on top)
Contract with all exhibits and annexes
Owner's Consent to Lien
Subordination Agreement
Leases and assignments of leases
✓ Application and attachments • BIDS
(3) Envelope for maps

Right Side

✓ Project summary
Work completed analysis
All other material is filed in chronological order with correspondence including the following reports as checked:

Final Field Team Report (Tab)
Operator's Final Report
(2R) Interim Reports
(2R) Operator's monthly reports and all attachments (latest on top)
✓ ~~On-site Exam Report~~(s) (Tab) F.T. Memo Recom-
(4) Settlement Sheets

When the volume of records is expected to warrant additional folders, or when convenience of reference warrants separate folders for certain records, they should be set up in this order:

Left Side

Folder No. 2: (In chron. order) Interim Summary Reports by W. O. Engineers

Right Side

Operator's Semi-Annual Report for Certified Project, Field Team Interim Reports, Operator's Monthly Report with transmittal, narrative, maps, and Field Team review.

Folder No. 3: Maps (Use pocket folder or envelope. Fold maps with title block out and show reference to related document or correspondence.)

Folder No. 4: Settlement Sheets

Folder No. 5: Drill Logs

all exhibits to be returned to operator-

Memorandum

To: Secretary to the Operating Committee, DMEA

From: DMEA Field Team, Region III

Subject: Application for DMEA Aid (Uranium) Utah Grand, Inc. (Yellow Cat and Hell Roaring Claim Groups), Grand County, Utah

Enclosed are the original and one copy of the subject application in the amount of $14,580.00. One copy of the application is being forwarded to the Grand Junction Office, DMEA, and one copy is being retained in our file.

Please note that the listing of the enclosed exhibits is attached to the original application only. Exhibit No. 12 was not included. If a field examination is required, you are specifically requested to return all exhibits for use by the field examiners.

INDEX ON ENCLOSED "EXHIBITS"

X Exhibit #1---------- Utah Grand Offering Circular

X Exhibit # 2---------Map of Hell Roaring Claims. please return

X Exhibit # 3--------Sketches of drill sites and dozer work proposed for Hell Roaring Canyon Claims. please return

X Exhibit #4---------Mining Certificates of "Walter Scott". please return.

X Exhibit #5---------Geologic Report.

X Exhibit #6---------Dozer Bids.

X Exhibit #7-- -- ---Drilling Bids. #8 ore sample analysis #9 area map

For "Yellow Cat" Claims.

X Exhibit #10---------Yellow Cat drilling site. (proposed) please return

X Exhibit # 11--------Yellow Cat Legal Descriptions.

X Exhibit #12--------Yellow Cat mining lease. ~~Not Rec'd Rec'd~~

Exhibit # 13-------Yellow Cat opinion of title. please return

X Exhibit # 14------ Yellow Cat assignment of Mining lease to Utah Grand Inc. please return

X Exhibit #15----- -U.S.G.S Drilling Log on Yellow Cat Claims.

X Exhibit # 16-----Utah Grand Inc. Drilling Logs on Yellow Cat.

Exhibit # 17----- LETTER WITH ADDITIONAL INFORMATION FOR APPLICATION FOR AID ON YELLOW CAT CLAIMS. ~~Not Rec'd Rec'd~~

X Exhibit 18------ Yellow Cat Drill bids.

2 cc's of this sent to FT.

is: Exhibits checked in red were returned to Applicant under separate cover - 5-10-57.

APPLICATION FOR AID IN AN EXPLORATION PROJECT, PURSUANT TO DMEA ORDER 1, UNDER THE DEFENSE PRODUCTION ACT OF 1950, AS AMENDED

Not to be filled in by applicant

Docket No. 4657
Metal or Mineral Uranium
Date Received 2-28-57
Estimated Cost 14,580.00
Participation (Government %)

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: Walter Scott 1151 West 6th. st. Pomona, Calif.
(b) President. Utah Grand Inc. (refer to page 1) A Nevada Corporation.
(c) Corporation Officers names, and addresses: (refer to page 1 reference sheet).

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized. President, Utah Grand Inc. (refer to page 1) ref.

(*c*) If a corporation, add to above statement, titles, names and addresses of officers refer to sheet or page 1.

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract South East corner of Sec. 33 T 255 R18E. In The Hell Roaring Canyon in the Green River Mining District, known as: Tim. Aux. and Tim. Aux. Ext. Claims. see Exhibit #3. Also 31 claims, named Yellow Cat Claims. see Exhibit #11 Yellow Cat.

(*b*) State any mine name by which the property is known. no mine.

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise refer to sheet 1; for Yellow Cat Claims: see exhibit # 12-13-and 14 Yellow Cat.

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property Hell Roaring Canyon claims--see page 6 of Exhibit #1 (Offering Circular) For yellow Cat---see exhibit # 12-13 and 14 Yellow Cat.

(*e*) If you own the land, describe any liens or encumbrances on it 10 % Royalty on both group of Claims.

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice. For Hell Roaring group, see page 6 of Offering Circular (exhibit 1) for Yellow Cat Group---see exhibit #12-13 and 14.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes. see reference sheet1. also Yellow Cat-exhibit 15 & 16

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. none.

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you. see ref. sheet 1 and exh. #5 also Yellow Cat exhibit 15 &16

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points. for Hell Roaring--ref. sheet 2; also Yellow Cat exhibit # 17 (letter)

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power. for Hell Roaring --ref. to sheet 2: also Yellow Cat exh. # 17.

16—66551-1

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore uranium.

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc. Hell Roaring--see exh.#5.(Geologist report) also-Y.C.exh.#10

(*c*) The work will start within 30 days and be completed within 5 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations. see ref. sheet, page 2

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project. page 3 also exh. 10&17

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.). all contracted.

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants. see page 3, also exh. #17

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel. none.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be. all contracted.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project. none.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project. none.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes. all contracted.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above. none

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs.

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)? yes.

(*b*) How do you propose to furnish your share of the costs?

[X] Money [ ] Use of equipment owned by you [ ] Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

3. SOUTH EAST ~~Se~~ corner of Sec. 33 T 25S R18E. ~~Equal 99. 165 ft. North and 200 405.8 ft. East.~~ Known as; Tim. Aux. Ext. Claims in the Hell Roaring Canyon, in the Green River Mining District. (exhibit #2 enclosed).

3-b No mine.

T. 25S, ?, SLM

3-c Lessee purchased claims from Norman B. Platt of Grand Junction, Col. By Walter Scott of Pomona, Calif. Purchased from Walter Scott, By Utah Grand Inc.

3-e 10% Royalty.

3-f See exhibit #3

4. Physical description.--- Approximately 300 yards of Rim Stripping on Tim. Aux. 57 and Tim Aux. Ext. 57. No mine.

4-b None.

4-c In the Hell Roaring Canyon in the Green River Mining District in Grand County, Utah; roads are built to claims #27 and 29 and31 where 2 channels are present and are exposed. Samples taken from these channels show mineralization and assayed a trace of U308. See exhibit #4. On Tim. Aux. #57, analysis show 0.07 to 0.14 U308
The 2 channels on Tim. Aux. 27 and 29 run in a N.W. direction across claim 29 and 31 and go under the Wingate at this location. It is approximately 500 to 700 Ft. high. Drilling at this location is approximately 25 to 75 ft. To Claim #43 the road has not been completed. Refer to exhibit #5 of the Geologic Report. Page 8. On Claims #47 and 49, the road is not complete. --Refer to page 11 of the Geologic Report. A road has been built from the bottom of the canyon up the very rough terrain approximately 2 miles to claims 61-59-59Ext., 57-57Ext., 55-55Ext., running toward claim 49. Road to 49 not complete. Bulldozing on this group of claims, or Rim Stripping shows very good Scintilation, and samples taken.(refer to exhibit #4. There is no report on this area in the Geologic Report. Mineralization is very good here. Some years back the A.E.C. built a road up the Green River from Minerals Canyon road for a distance of 2 miles up the Green River to the mouth of Hell Roaring Canyon. From this point up, the bottom of Hell Roaring Canyon, a Jeep road was Built up Hell Roaring Canyon for a distance of approximately 8 miles. In 1955, the Utah Grand Inc., reworked the roads up to the Claim #10 (Excalibar Uranium Col.) Between Tim. #17 and Tim. Aux.61, there are roads completed to Tim. Aux. #27-29-31 a distance of approximately 1 mile. Also to Claims, Tim. Aux. 55, Tim. Aux. Ext. 55, Tim Aux. 57&57 Ext.,Tim Aux. 59, & Ext. 59, and Tim Aux. 61. The road is

Walter Scott
1151 West 6th. st.
Pomona, Calif.

4-c (cont.)

The road is complete for a distance of approximately 2 miles from the Canyon floor.

4-d The Hell Roaring Property, Tim. Aux., and Tim. Aux. Ext., claims are located approximately 6 miles from a Buying Station, located in the mouth of Minerals Canyon on the Green River. The nearest Mill is approximately 41 miles, in Moab, Utah. Another Buying Station, approximately 60 miles at Thompson, Utah. Another Mill located 110 miles at Monticello, Utah. and also Grand Junction, Col.

A permanent Camp should be set up in the Mouth of the Hell Roaring Canyon, where there would be Domestic Water from wells. Temporary Camps on the claims where mining is proposed.

4-e Man power, materials, supplies and equipment are available at Grand Junction, Col., Moab, Utah, Thompson, and Green River, Utah. Drilling water could be obtained by drilling a well in the Canyon floor. Or from the Green River. No electric power line available.

5. The exploration project.------ Uranium.

5d Work will be supervised by Walter Scott. (qualifications) see exhibit #6. Please return. 40 years mining experience as; Miner, Mine Foreman, Mine Supt., Mine owner and operator. 1922 to 1925: Mine Foreman, Midwest Coal and Iron Co., Midwest Mine, Palisade, Col. 1925 to 1928: Mine Supt. Ohio Creek Fuel Co., Gunnison Fuel and Feed Co., Gunnison, Col. O.C. Mine, (C.M.Long, Gunnison) 1928 to 1929: Supt. Pallisade Coal and Supply Co., Pallisade Mine, Pallisade, Col. (Harry Koch, owner, Aspin, Col.) 1929 to 1949: Operator and Owner of the Garfield Mine, Pallisade, Col. 1949 to 1950: Lessor of McGregor Mine, McGregor, Col. 1950 to 1951: Prospecting and Road Building and developing ore mine, Silverton, Col. (for self) 1951 to 1952: Hamilton and March, Lessee, Mine Supt., Welland State, owner, Cedar Edge, Col. 1952 until now: Convair, San Diego and Pomona, Calif.

6. Estimate of Costs (Next Sheet)

Walter Scott

Application to D.M.E.A.

SHEET 3
page 3

Walter Scott
1151 West 6th. st.
Pomona, Calif.

6.. Estimate of costs---------- Drilling and Dozer work, Tim. Aux. Ext. 55-57-59 and Tim . Aux. 55-57-59 and 61, approximately 42 holes and approximately 75ft. deep. approximately 3,000ft. of hole @ 65 cents per ft. ----- $1950.00 X

Dozer work for drill sites on above mentioned Claims, 30 hrs. @ $17.00per hr. (includes extra man and compressor)---- $ 510.00
approx. total------- $2460.00

Drilling on Tim. Aux. 41-43-45-47 and 49: 31 holes at approx. 75 ft. deep. approx. 2325 ft. of hole @ .65--- $1511.25 X

Dozer work, approx. 85 hrs. @ $17.00 per hr.---------- $1445.00
approx. total--------- $2956.25

Drilling on Tim.Aux. 17-19-21 and 23: approximately 16 holes, 75ft. deep. 1,200 ft. of hole @ .65 per ft.-------$780.00
Dozer work, (drill sites) approx. 50 hrs @ $17.00 ------- $850.00
approximate total------$1630.00

33 @35.8 110

Drilling on Tim. Aux. 25-27-29 and 31: 25 holes, 75 ft. deep, (average) 1875 ft. of hole, @ .65cents per ft.---- $1218.75
Dozer work: approx. 60 hrs. @ $17.00 per hr.---------- $1020.00
approximate total------ $2238.75

Reworking road in Canyon Bottom: 10 hrs.@$17.00----------$170.00
Making road at mouth of Canyon: 25 hrs. " " ---------- $425.00
Dozer work------- Approximate total--------- $595.00
Approximate total cost of DRILLING & DOZING--- $9880.00

8400 ft. of drilling @.65 = $5,460.00 260 hrs Dozer work @ 17.00 per hr. $4,420.00

6b Supervision: Walter Scott, salary----------$500.00 5460
Labor:---included in contract price. 9880

6c Operating materials and supplies: Gasoline, oil etc.---$400.00
Incidentals:-------- $105.00
approximate total-------
$1005.00

Approximate GRAND total----$10,885.00

7b Our percentage of the money will be deposited in Escrow in the First National Bank of Grand Junction, Col. before work begins.

Walter Scott

Total Hell Roaring claim $10,885.00
Total Yellow Cat claim $3 695.00
Grand Total $14,580.00

Pomona, Calif.

DMEA
DEPARTMENT OF THE INTERIOR
FEB 21 1957
REGION III
DENVER, COLORADO

Gentlemen:

Please find enclosed an application for D.M.E.A. Aid. Under separate cover you will find maps, sketches and an Offering Circular etc. We are not selling stock under this Offering Circular, as this Circular is out of date, and not a true picture of the situation. It is merely shown to acquaint you with the Utah Grand Inc., and to avoid having to send a lot of unnecessary papers.

Since the release of this Offering Circular, there has been a lot of changes. Mr. Harry Hall, who was President, is deceased. Mr. Thomas Edwards (who was one of the promoters) has been bought out of the Utah Grand Inc. ; His stock and interests were purchased by the present Board of Directors. Namely: Walter Scott, President, Ben C. Koelzer, Vice Pres. Frank B. Bowles, Secretary and Director. Don Peck, Director. Jack Wright, Director. The "Edwards" stock is equally owned by five Board Members, and will remain in Escrow.

Mr. L.L. LaFortune is no longer the Underwriter for reason of default. He sold no stock. Approximately $5000.00 of public stock was sold. $3600.00 of that was bought by the present Board of Directors, The rest was bought by a few friends. This money was used to accomplish the 1955-56 assessment work.

In regard to the Yellow Cat Property-31 Claims. This is strictly a Drilling Project. In 1952 the U.S.G.S. drilled 26 holes on part of these claims, at distance of from600 to 1000 ft, apart. Also please note the deepest holes was 173 ft. deep. It is a known fact that the Morrison Salt Wash formation is present in this locality at approximately 200 ft. depth. At the time of the Drilling by U.S.G.S. the Salt Wash Formation was unknown. In 1956, The Utah Grand Inc. Drilled 8 holes on this property. The first hole 335 ft. deep. This Hole to determine Formation. 3 of the holes were out of formation. The other 5 holes are quite interesting. Claim#UG8 showed mineralization and a small count. (Logs are included for reference.)

The Yellow Cat and Hell Roaring Claims are title clear and in Good standing with the Utah Grand Inc. The Yellow Cat Group mentioned, refer to Page 14, Note1 of the Offering Circular.

The Big share of the expense of Exploratory work and other expense have been taken care of by the Board.

A new Offering Circular and Ammendments are in the S.E.C. at the present time.

We will be very Happy to go along on an examination of these properties with the Field Crew of the D.M.E.A. if you so wish.

I am Very Truly Yours;

Walter Scott

Original copy

Application for aid in an exploration project, pursuant to DMEA order 1, under the Defense production act of 1950, as amended

Walter Scott, Pres.
1151 West 6th. st.
Pomona, Calif.

"Exhibit # 17" (reference sheet)

HellRoaring Claims information and the following YELLOW CAT CLAIMS information, are ALL under the one application for Aid.

3. Applicants property rights----See Exhibit #11 Yellow Cat.

3c--- 31 Claims, See Exhibit # 12,13 and 14 Yellow Cat Claims

3d---See #exhibit 12-13-and 14 Yellow Cat Claims.

3e----Also 10% Royalty on Yellow Cat Property.

3f----See Exhibit 12-13 and 14 Yellow Cat Claims.

4.a---Physical description--- See Exhibit # 15 and16.

4c----The Gardner Group of Claims known to and refered to as the "Yellow Cat Claims" by the Utah Grand Inc., are located in the Morrison formation. In most places on this Group of Claims, the Upper series of the Morrison are eroded away. The middle of the Morrison and the lower Series remain to be explored.

4d----The Yellow Cat Claims are located approximately 10 miles South-West of Cisco, Utah. And approximately 10 miles South of Highway 50 and 6.--- Buying Stations are located in Thompson, Utah--about 30 miles. Grand Junction, Col. about 65 miles. Roads run across the Yellow Cat Claims and are accessable from Highways 6 and 50.

4e--- Man Power, materials, Supplies and Equipment are available at Cisco, Thompson, Utah, and Grand Junction, Col.

5---The exploration project.--(a) -- Uranium.

6. Estimate of costs.--- See exhibit 10 Yellow Cat. Propose Drilling 11 holes at approximate 200 ft. deep each. @ Bid Price-- plugging wet--- 1.50 per ft. (2200ft.of hole)--------$3300.00
Using Marsh Travis's Bid. See Exhibit #18 Yellow Cat.

10 hrs. Dozer Work @ $17.00 per hr. ---------- $170.00
using Hector and Gregsby bid. (exhibit # 6)

approximate total cost----------	$3470.00
Extra man @ 2.00 per day, 8 hr.day, 10 days----------	$ 160.00
Samples, Gas, oil etc.---------- - - - --- -- - - - - - - --	$ 65.00
(no Charge for Supervision)	
Yellow Cat Grand Total (approximate)	$3695.00

Walter Scott

underwriter has agreed for a period of 180 days from the date authorized for any public offering to sell the securities being offered.

The Underwriting Agreement is hereafter discussed in detail under the heading UNDERWRITING AGREEMENT.

At present the officers, directors and promoters own all of the issued and outstanding 300,000 shares of the aggregate par value of $300,000.00, for which they assigned property (and other assets subject to liabilities set forth in the financial statement attached to the Offering Circular), costing them $22,700.00 for which the company issued shares, and in addition thereto notes in the amount of $25,700.00, to be paid out of the proceeds of this offering, and services rendered consisting of those in the organization, promotion and other similar services rendered in connection with the organization of the company. Such amounts of shares being an arbitrary determination thereof. The promoters, officers and directors are not to be repaid any amounts out of the proceeds of this offering in excess of the amounts of cash expended by them for the assets acquired by the company. If all the shares being offered are sold, and there is no assurance that such will occur, the officers, directors and promoters will own fifty per cent (50%) of the outstanding shares, and the public investors, along with the underwriter in event of the exercise of option, will own fifty per cent (50%) of the then outstanding shares for which the public and the underwriter will have paid cash in the approximate amount of $300,000.00.

There is no provision for a refund to the public investors if less than all of the securities offered are not sold.

DIRECTORS, OFFICERS AND PROMOTERS

HARRY HALL, President-Treasurer, Director and Promoter, 1151 West 6th Street, Pomona, California. Buick and Cadillac Agent in Long Beach and San Diego, California, for 25 years. Currently with Consolidated Vultee Aircraft Company.

WALTER SCOTT, Vice President, Director and Promoter, 1151 West 6th Street, Pomona, California. Mine owner and operator in Colorado, Wyoming, Utah and New Mexico for past 35 years. Holds all necessary mine certificates in these states.

FRANK BOWLES, Secretary, Director and Promoter, 126 North Heathdale, Covina, California. Formerly with Phelps Dodge Corporation, Engineering Department for 7 years. Currently with Tool Division of Consolidated Vultee Aircraft Company.

BEN KOELZER, Director and Promoter, 4974 Taft, Chino, California. Formerly with Natomas Gold Dredging Company. Later in business as farmer and in oil field operations work. Presently employed by Consolidated Vultee Aircraft Company, Tool Division.

THOMAS J. EDWARDS, Director and Promoter, 1017 Garfield Avenue, South Pasadena, California. Industrial Engineer. Formerly with Pacific Coast Borax Company, five years in Industrial Engineering Department of Aluminum Company of America, and later in Underwriting

UTAH GRAND, INC.

STATEMENT OF FINANCIAL CONDITION

As of October 15, 1955

I. ASSETS

Cash in Bank	$ 2,180.68	
Unrecoverable cost of mining leases	15,250.00	Note
Unrecoverable organization expenses	1,083.39	
Organization and Legal expense	3,738.03	Note
Engineering and geological expense	545.16	
Unrecoverable exploratory work	3,802.74	
	$ 26,600.00	

II. LIABILITIES

Notes Payable	$ 25,700.00
Legal Expense	900.00
	$ 26,600.00

III. CAPITAL SHARES

Total authorized non-assessable common stock of a par value of $1.00 per share	1,000,000	shares
Outstanding	300,000	*
Balance unissued	700,000	
Unrecoverable Cost of Mining Leases		
Total cost of leases to be paid Norman Platt	$12,000.00	
Amount paid to the above	12,000.00	
Total cost of quitclaim	250.00	
Amount paid on quitclaim	250.00	
Total cost of lease to be paid to L. L. Gardner, Dave N. Gardner and M. L. Gardner	3,000.00	Note 1
Amount paid on above	3,000.00	Note 1

Note: There were only three cash disbursements made after the corporate organization, which were $4,500.00 paid on September 1, 1955, representing the balance due on the Hell Roaring claims, $500.00 paid on account of legal fees on August 11, 1955, and $500.00 on account of legal fees paid on September 13, 1955. The $4,500.00 paid as above outlined is included in the item Unrecoverable Costs of Mining Leases, and the two items of $500.00 each paid as aforesaid are included in the item above set forth Organization and Legal Expense.

Unrecoverable Organization Expenses			$ 1,083.39
Expenses paid to Edwards		$700.00	
Travel, hotel, telephone, photostats, etc.		383.39	
Legal Expenses			$ 3,738.03
Reiter and Kelley	$2,500.00		
Paid $2,000.00			
Balance 500.00			
Heckman	400.00		
Blackman	200.00		
Oscar Zapf	325.00		
Abstracts	271.75		
Misc. (recordings, photostats, etc.)	41.28		
Unrecoverable Exploratory Work			$ 3,802.74
Rental and lease of equipment—Tractor, jack hammer, compressor, pick-up truck, transport truck, jeep, etc. Includes also 6 miles road reworked and graded, 2 miles jeep road built, ¾ truck, rim stripping and one mile excess road built.		1,541.50	
Labor		1,437.50	
Miscellaneous. Includes food, supplies, fuel, powder, caps, fuse, trailer house.		823.74	
Notes Payable			$25,700.00
All non-interest bearing notes, set up to be payable through Harry Hall, Trustee.			
Frank Bowles	$10,000.00 due February 12, 1956		
Jack Wright	5,200.00 due February 12, 1956		
Don Peck	5,000.00 due February 12, 1956		
Ben Koelzer	5,500.00 due February 12, 1956		

* Note: That the 300,000 shares represent shares issued to the promoters for assignments of properties and other assets subject to liabilities of the joint venture plus promotional services, and no dollar values are assigned to these shares in the financial statement.

Note 1: The $3,000.00 items under Unrecoverable Costs of Mining Leases is included in the $15,750.00 asset item so designated. The company has a claim against the promoters for the $3,000.00 so spent, it having elected not to take the claims involved.

The promoters and the underwriter will take none of the risks of the venture but if the venture should prove successful will be entitled to a majority of the profits and assets of the venture.

The underwriter will receive 25% of the proceeds from the shares sold to the public, plus an option to purchase additional shares at par value. If all of the shares are sold the underwriter will receive a total of $67,500.00 which with other expenses will absorb in excess of 25% of the entire funds contributed to the enterprise by the public.

All the funds necessary to explore the properties will be furnished by the public who will take all of the risks of the venture and who will receive less than a majority of any future profits and assets of the company, whereas the underwriter and promoters will have contributed nothing to the venture but will have derived substantial profits from underwriting fees and "expense" money, as well as the majority of the profits and assets of the enterprise if it should prove successful.

The broad purposes and general type of business of the corporation are to acquire mining properties and to engage generally in the exploration and development of mineral lands which the company may acquire. Included in those general purposes is the acquisition of thirty (30) unpatented lode mining claims situated in Grand County, Utah, hereinafter particularly referred to.

That in 1955 three of the persons now appearing as officers, or directors, or promoters, acquired by option to lease the mining claims herein involved, and thereafter, and on or about the 14th day of May, 1955, Frank Bowles, Secretary, Director and Promoter, Jack Wright, Promoter, Don Peck, Promoter, Ben Koelzer, Director and Promoter, Harry Hall, President-Treasurer, Director and Promoter, Walter Scott, Vice President, Director and Promoter, and Thomas J. Edwards, Promoter, entered into a partnership which had for its general purpose the development of potential uranium bearing claims. The assets and liabilities of the partnership were assigned to the company in consideration of the agreement of the company to issue shares of its capital stock in the total amount of 300,000 shares, which assets and liabilities consist of the option for lease of the claims described under "Description and Acquisition of Properties." The liabilities consist of the promissory notes payable to the following individuals:

Name	Amounts
Frank Bowles	$10,000.00
Jack Wright	5,200.00
Don Peck	5,000.00
Ben Koelzer	5,500.00

The officers, directors and promoters are not to be reimbursed for any additional amounts. The expenses of acquisition to date have been paid by the originators of the company.

There is no commitment on the part of the Underwriter to purchase any of the shares of the corporation. The underwriting agreement is on a "best efforts" basis, by the terms of which the

REPRESENTATION BY OTHERS

No dealer, salesman or other person has been authorized to make any representations other than those contained in this Offering Circular in connection with the offering herein contained, and if given or made, such information or representation must not be relied upon.

This Offering Circular does not constitute an offering by the Company or by the Underwriter in any State or jurisdiction where it is unlawful to make such an offering.

INTRODUCTORY STATEMENT

UTAH GRAND, INC., was organized under the laws of the State of Nevada on the 1st day of August, 1955, with its principal place of business at Room 312 Byington Building, Reno, Nevada.

The mining claims and leases acquired and to be acquired by the company from the promoters presently have no known commercial reserves of ore. Whether or not exploration of the properties will result in the discovery of commercial deposits of ore is extremely speculative and uncertain.

The public investors will furnish all of the funds for exploration and take all of the risks of failure of the enterprise.

OFFERING CIRCULAR

TRANSFER AGENT

UTAH GRAND, INC., the Company, will act as its own Transfer Agent. The address of the Company is 312 Byington Bldg., Reno, Nevada.

USE OF PROCEEDS

If all of the shares of UTAH GRAND, INC., are sold that are publicly offered hereunder, the net proceeds to the Company will be $202,500.00, after deduction of the Underwriter's selling expense of 25%. The said net proceeds of the public offering shall be used and employed for the following purposes, in the following approximate order and in the following approximate amounts:

Documentary stamps, printing and Blue Sky qualification costs	$ 7,000.00	
Exploratory costs	47,180.00	
Engineering	15,800.00	
Equipment costs	53,200.00	Note 3
Repayment of notes	25,700.00	
General mining costs and acquisition of new properties	17,200.00	
Miscellaneous, including supplies, administrative costs and insurance	23,590.00	
Unallocated and contingent	12,830.00	Note 2
	$202,500.00	Note 1

Note 1. The foregoing, as indicated, are estimates and include the direct charges against specified items such as required taxes, reserves, legal contributions, etc.

In the event that less than the entire 270,000 shares herein publicly offered are sold within the time of the underwriting, which would net the Company $202,500.00 for the foregoing purposes, the Company proposes to proceed with its operations.

It is the present intention of the company to follow the above order of priority under "Use of Proceeds", reserving, however, the privilege of reallocating amounts and priorities as deemed for the best interests of the company.

No arrangements have been made to refund any sums paid by public investors in the event the total issue is not sold and the proceeds will be used for exploratory work and mining operations in connection with the mining claims.

It is the intention of the company to repay the notes to the promoters in the aggregate amount of $25,700.00 from and out of the proceeds of public sales, notwithstanding that all of the issue may not be sold.

However, the holders of the notes have contracted with the company that the time for payment of the notes shall be extended until the company shall have raised by sale of its securities sufficient moneys to pay all sums having a higher priority as set forth above.

Note 2. The item designated "Unallocated and Contingent" in the sum of $12,830.00 includes the estimated cost of documentary stamps, necessary copies of Offering Circular, subscription forms, etc.

Note 3. With respect to the $53,200.00 item for equipment costs it is intended to use initially $27,900.00 and the use of the balance will be dependent on encountering favorable results by exploration.

Department of the First California Company. Past five years buying and selling businesses and corporations.

DON PECK, Promoter, 402 East Foothill Blvd., LaVerne, California. Automotive business for self for several years. Presently employed by Consolidated Vultee Aircraft Company, Tool Division.

W. J. EBERHART, Promoter, Grand Junction, Colorado.

MARIE BOWLES, Promoter, 126 North Heathdale, Covina, California.

SUSANNA WRIGHT, Promoter, 3825 Valley Blvd., Walnut, California.

DOROTHY PECK, Promoter, 402 East Foothill Blvd., LaVerne, California.

LEONA KOELZER, Promoter, 4974 Taft, Chino, California.

MYRTLE SCOTT, Promoter, 1151 West 6th Street, Pomona, California.

ELMINA M. EDWARDS, Promoter, 1017 Garfield Avenue, South Pasadena, California.

Except as set forth in this offering circular, no director, officer or affiliate has any direct or indirect material interest by security holdings, contracts, options or otherwise in UTAH GRAND, INC., or in any assets proposed to be acquired or operated by that company or in any properties near the properties of the company whose value would tend to be enhanced by favorable results flowing from activities of the company on its properties.

The company does not intend to pay officers and directors, as such, any compensation for their services until such time as the company is in operation and is receiving earnings, and then such compensation shall be paid as is reasonable under the then existing circumstances, with due and proper regard to the interests of the shareholders and the ability of the company to pay for such services.

DESCRIPTION AND ACQUISITION OF PROPERTIES

The claims to be acquired by the company arising from an assignment of option for lease, which option was entered into on or about the 28th day of April, 1955, between Norman B. Platt, of Grand Junction, Colorado, and Walter Scott on behalf of himself and Harry Hall, Marion K. Starkey and Thomas J. Edwards, by the terms of which the optionees received an option to obtain a lease upon the following described mining claims which are located in the Bowknot (unorganized) Mining District, Grand County, State of Utah:

Name	Book	Page
Tim 1 Aux.	41	361
" 3 "	"	362

" 57 " Ext.	"	492
" 59 Aux.	"	489
" 59 " Ext.	"	"
" 61 Aux.	"	490

By the terms of said option it is provided that optionees shall pay to optionor, in addition to the $750.00 paid as a consideration for the execution of the option, the sum of $11,250.00, payable $2250.00 at the time of the exercise of the option; $4500.00 on or before August, 1955; $4500.00 on or before September 1, 1955, which latter payment was made before September 1, 1955.

This summary does not purport to be complete, and reference is made to the option and lease for its full text, both of which are on file in the principal office of the company.

"Provided,

"1. That the option be granted to the Underwriter and not his nominees.

"2. That no dealer may be assigned an interest in the option directly or indirectly.

"3. That neither the option nor the shares subject thereto may be assigned or otherwise disposed of for a period of at least one year.

"4. That no transfer assignment or other disposition of the shares may be made thereafter unless offered under an effective registration statement or regulation A filing."

The underwriter has made no commitment that he will buy all or any part of the shares covered by the Optional right.

That the option granted Underwriter gives the Underwriter an opportunity to profit from a market rise in the company's stock at the expense of the stockholders of the company who made the initial capital investment; that further, the existence of such option may have adverse effects upon any future financing of the company, and that any profits on the sale of the option or shares (issued pursuant thereto) may be regarded as an additional underwriting commission.

In excess of twenty-five per cent (25%) of the investment made by the purchasers of the shares will be absorbed in selling commissions and other selling expenses, and will not be used for mining operations.

All expenses incurred or contracted for the preparation of the Offering Circular, the filing of the Letter of Notification under the Securities Act of 1933, as amended, and any and all filings with any State Securities Commission and all geological, legal, accounting and advertising expense shall be borne by the issuer, UTAH GRAND, INC., and shall not be included in the 25% selling expense item.

Paragraph 9 of the Underwriting Agreement provides as follows:

"9. That as a part of the consideration for the execution of this contract, and as a condition for its execution, it is agreed that all shares of stock heretofore issued to the promoters in an aggregate amount of 300,000 shares shall be placed in escrow at Reno, Nevada, and held in such escrow for a period of thirteen (13) months from the date of the execution of this instrument. Nor shall any such shares be alienated or transferred in any manner whatever prior to such thirteen (13) months period."

KIND AND AMOUNT OF SECURITIES PROPOSED TO BE OFFERED

The Company proposes to offer to the public generally an aggregate of 270,000 shares of its capital stock, fully paid, and non-assessable, of the par value of $1.00 per share, for cash, subject to a selling expense of not to exceed 25%.

No securities are to be offered hereunder on behalf of any person other than the issuer, UTAH GRAND, INC.

All shares issued or proposed to be issued have equal voting rights, namely, one vote for each share. All shares have the same rights on liquidation. There are no preemptive rights.

The following is a brief outline of the educational qualification and experience of Mr. Fekete:

Schools:

Three years New Mexico School of Mines, Socorro, New Mexico. Major in geology and mine engineering.

Three years Pomona College, Claremont, California. Major in geology and petroleum.

Surveying at Colorado School of Mines, Golden, Colorado. Geology and mining at University of California at Los Angeles, California. Basic engineering at University of Utah, Salt Lake City, and Utah State College, Logan, Utah. Other engineering courses at Sacramento Jr. College, Sacramento, California.

Graduated in geology and equivalent mine engineering in 1952, B.S. Degree, Pomona College, Claremont, California.

Work experience:

Mining Geologist with the California State Division of Mines, San Francisco and Los Angeles offices—one year;

Chief Mine Engineer with Anaconda Copper Mining Company, Darwin Mines, Darwin, California—one year;

Field geologist, Richfield Oil Corporation in Nevada, Utah and southern Idaho; engineering geologist, Kennecott Copper Corporation, Nevada; geologist, Minerals Materials Company, Moab, Utah—seven months.

UNDERWRITING AGREEMENT

The Company, UTAH GRAND, INC., has entered into an underwriting agreement with ~~Lester L. LaFortune, 1802 South Main Street, Las Vegas, Nevada,~~ who does not guarantee to sell the shares offered by the Company but does agree to use his best efforts to sell the same. Pursuant to the underwriting or selling agreement, ~~Lester L. LaFortune~~ shall receive a selling expense of 25% of the public offering price, equal to $0.25 per share or a total of $67,500.00, if all such shares publicly offered are sold. The underwriter has no interest, direct or indirect, in the Company.

The underwriting contract provides for compensation in addition to the 25% payable to the underwriter as follows:

"5. That in addition to the compensation hereinabove provided to be paid to Underwriter, Corporation hereby grants to said Underwriter an option to purchase one share of the common capital stock at par for cash for each ten (10) shares of stock sold by Underwriter pursuant to this agreement, which option may not be exercised by Underwriter prior to the completion of the public offering of shares by Issuer; that the option shall continue for a period of two years after the completion of said public offering of the shares by Corporation as herein contemplated.

The optionees (company) have made payments aggregating $7500.00 on account of said option, and have made an additional payment of $4500.00 prior to September 1, 1955, which was the final payment thereon.

No exploration and development work has been conducted on the above properties.

No representation is or can be made that uranium exists upon said properties or under said properties. In the event that exploratory activities conducted on said properties do not result in the discovery of commercial bodies of ore, a possibility which may occur, the said amount expended by issuer to acquire said properties and to explore them shall be total losses. For these reasons it must be recognized that the public offering proposed herein is purely speculative.

TITLES

A Title Opinion dated August 8, 1955, has been procured covering the subject mining claims written by Adams, Heckman, Traylor and Ela, lawyers of Grand Junction, Colorado. A copy of the Title Opinion is on file in the office of the company at 312 Byington Bldg., Reno, Nevada.

The following is an excerpt from the Title Opinion of August 8, 1955, which excerpt does not purport to be complete and reference is made to the copy on file:

"Based upon examination of the above described mining claims we find record title to the above described unpatented mining claims to be vested in NORMAN B. PLATT as of June 9, 1955, and that the original location certificates therein contained appear to conform with the requirements of the laws of the State of Utah and the United States Government except for the following discrepancies, to-wit:

"1. The location certificate of Tim No. 41 Aux. as set forth in entry 19 first describes a discovery 102 feet south 40° east from the North end center stake and then later in the metes and bounds description describes a discovery 70 feet south 40° east from the North end center stake.

"2. The location certificate of Tim No. 43 Aux. describes the end lines as being 838 feet in length whereas mathematical computation indicates that they should be approximately 638 feet.

"The writer has not searched the Bureau of Land Management Reports, has not made a personal check of the records of Grand County, Utah, has not made a personal inspection of the ground or had a registered engineer report relevant to conflicts, staking, discovery, ties, etc., and has not been supplied with a map signed by a registered engineer, therefore, no opinion is offered as to these matters which lie outside the above mentioned abstract.

"As of June 9, 1955, no judgments of record, or tax sales appear against Norman B. Platt, or the mining claims above described. This statement does not purport to cover taxes on personal property not listed with said claims on the assessment rolls; chattel mortgages describing said claims, mining claims by the same name which are not described as noted in the location notices referred to on the caption page of this abstract, or other claims overlapping or conflicting the claims herein abstracted, or taxes which have not gone to sale.

"The writer has also been supplied with certain other apparently valid photostatic copies of instruments affecting title to the above described mining claims. From an examination of these instruments, Utah Grand Company, a Nevada Corporation, appears to be the assignee-lessee of an option for lease of the above described mining claims executed by Norman B. Platt as lessor. The option appears to be in full force and effect as of the present date. By virtue of not having a certified abstract of these instruments, we do not certify the validity or effect of the option for lease or any subsequent assignments thereof but only say that such transactions appear to have occurred and of course we offer no opinion as to liens, judgments, taxes or other infirmaties affecting the Utah Grand Company or any officer, director or stockholder thereof."

Titles based on unpatented mining claims are subject to hazards and it is only when a mining claim is patented that legal title vests in the usual concept of real property ownership. Two of the hazards are whether the same ground might be held by prior location and whether there has been a valid mineral discovery on each of said claims.

CAPITAL STOCK

The total capitalization of UTAH GRAND, INC., is 1,000,000 shares of capital stock at the par value of $1.00 per share.

Total Capitalization		1,000,000 shares
Public Offering	270,000 shares	
*Issued for property assets of partnership and promotional services	300,000 shares	
Reserved for optional purchase by Underwriter at par for cash in conformity with underwriting agreement	27,000 shares	
Balance treasury stock	403,000 shares	
	1,000,000 shares	

*The persons who have received the aggregate of the 300,000 shares of the capital stock for the consideration of the transfer to the corporation of the assets and liabilities of the joint venture and promotional services are as follows:

Name		Shares
Frank Bowles	Marie Bowles	35,000 shares
Jack Wright	Susanna Wright	19,400 "
Don Peck	Dorothy Peck	21,000 "
Ben Koelzer	Leona Koelzer	25,200 "
Harry Hall		77,400 "
Walter Scott	Myrtle Scott	60,000 "
Thomas J. Edwards	Elmina M. Edwards	60,000 "
W. J. Eberhart		2,000 "

GEOLOGICAL REPORT

A written report under the title of GEOLOGIC REPORT OF THE TIM CLAIMS, HELL ROARING CANYON, GRAND COUNTY, UTAH as of July 10, 1955, has been made by Rudolph W. Fekete, Geologist of Moab, Utah. The report is on file with the Underwriter and with the Company at its principal office for full detail thereof.

The report sets forth certain conclusions and recommendations which are summarized in part below. This summary does not purport to be complete and reference is made to the report itself for its full text. The summary, containing a part of the conclusions and recommendations, is as follows:

"CONCLUSIONS AND RECOMMENDATIONS

Several conclusions were reached during the geologic investigation of the Hell Roaring Canyon area along the Green River. These are:

1. The herein-named claims under discussion are favorably located with regard to mineralized outcrops;

2. Trends of 'channels or scours' can be predicted to a degree, that would make an exploration program of drilling or drifting feasible;

3. On several of the claims examined, all favorable criteria for mineral deposition, as described under 'Distinctive Features Investigated', have been observed, however, there is no assurance of uranium deposits wherever any or all of such features occur.

4. Active exploration and development work is under way on adjacent properties; and

5. Altered zones have been observed to a marked degree, and this 'change of color' indicates the movement of solutions; probably hydrothermal solutions. The association of alteration and mineralization is classic in the Bowknot Bend area, White Canyon area, and the Mineral Canyon area.

Based on the foregoing conclusions, the following recommendations are presented for consideration.

It is recommended that:

1. Prior to the commencing of an exploration program, radio-active readings should be recorded again to establish the most favorable horizon on the Tim Aux. Nos. 47 and 49 Channel.

2. Drifting on the above mentioned channel should follow along the N55W fracture pattern on the flank of the channel as indicated on 'channel profile'.

3. An exploration program (drifting or drilling) may be commenced on the Tim Aux Nos. 27, 29, and 31 channel and 'altered zone' along the channel flank with regard to fracture pattern (N55W).

4. Geologic control should be maintained on all future exploration work and should include core logs, if drilling is used, assay reports and mine maps, if drifting is used."

Docket

May 9, 1957

Murphy
Ellis

Summary of Proposed Project

Object: Denial of application for exploration aid without making a field examination of the claim groups.

Docket No.: DMEA-4657

Commodity: Uranium

Applicant: Utah Grand, Inc.
Walter Scott, President
1151 West 6th Street
Pamona, California

Property: Lessee of 31 claims in the Yellow Cat area and 30 "Tim" claims in the Hell Roaring Canyon area on the Green River about 25 air miles southwest. "Tim" claims lie in sec. 30, T. 25 S., R. 18 E., and the Yellow Cat claims in secs. 19 and 30, T. 22 S., R. 23 E., and secs. 24 & 25, T. 22 S., R. 24 E., Grand County, Utah.

Date of Application: Undated, received February 28, 1957

Amount of Application: $14,580.00

Referred to Reg. 3: March 15, 1957

Field Examination made: - Not examined

F.T. Report received: April 29, 1957

Work proposed and Costs:

"Tim" group: (Hell Roaring Canyon)

113 holes totaling 8,400 ft. @ $0.65/ft.	$5,460.00	
260 hrs. bulldozing main roads and access roads & drill sites @ $17/hr.	4,420.00	
Supervision	500.00	
Supplies	505.00	$10,885.00

Yellow Cat group:

11 holes, 2,200 ft. @ $1.50/ft.	$3,300.00	
Access roads, bulldozer, 10 hrs. @ $17/hr.	170.00	
Extra labor	160.00	
Supplies	65.00	$3,695.00

Total Estimated Cost $14,580.00

Excerpts from FT Report: The field reviewers and Field Team recommend that the application be denied without a field examination. Their conclusions are based on the following data relating to the two areas in which the claims are located:

"The applicant's Hell Roaring claims are located in an area where known uranium deposits are small and scattered, and consist of thin discontinuous seams and small pods of mineralized material generally restricted to the lower sandstone beds of the Moss Back member of the Triassic Chinle formation. These lenticular sandstones thicken and thin abruptly, largely as a result of the underlying erosional surface of the Triassic ~~Chinle formation. These particular~~ Moenkopi formation and not because of channels which elsewhere are important features related to localization of uranium deposits. Excessive topographic development presents costly road-building problems. Chinle beds overlying the potential ore horizon form steep boulder-strewn slopes on the outcrop and are capped by sheer Kayenta-Wingate cliffs as much as 400 feet high. Although the Moss Back member is exposed for many miles by numerous canyons in the inter-river area between the Green and Colorado Rivers, rather extensive prospecting by private industry and government agencies have failed to disclose uranium deposits of significant size and grade. A DMEA project (docket 2970) explored property about 3½ miles south of the applicant's claims with negative results. An application (docket 4054) for Government aid to explore adjoining claims in the area was denied because of the small size and sparse distribution of known ore deposits. The Excalibur Uranium Corporation was granted DMEA assistance to explore property located about three miles north of the applicant's claims under dockets 1631 and 1896. A relatively small deposit of what was estimated to be 1,832 tons of uranium ore was found under docket 1631, but these reserves appear depleted after 450 tons of ore were shipped. Results of DMEA exploratory work under docket 1896 were negative. The nearby Edna claims were examined and a report (DMEA 4566) recommending denial was recently sent to the Washington office. In summary, it is considered that the applicant's Hell Roaring Canyon property is located in an area where the chances of finding ore deposits of significant grade and tonnage are poor.

The U. S. Geological Survey drilled 1,741 holes in the Yellow Cat area and found 56,850 tons of ore by this rather large amount of drilling. Exploratory drilling was discontinued in 1954 when it was concluded that deposits in this area are relatively small and of marginal grade. Known ore deposits in the Yellow Cat area occur in five sandstone lenses in the Jurassic Morrison formation. The four lower sandstones are in the Salt Wash member while the uppermost ore-bearing sandstone is in the Brushy Basin member. The larger deposits usually occur in the lower 125 feet of the Salt Wash member.

Twenty-six of the U. S. Geologically Survey holes were drilled on the subject claims. These holes together with eight holes drilled by the applicant were all barren and indicate that the ore-bearing sandstones on the applicant's property are generally unfavorable for significant ore deposits. Favorable host rock and larger ore bodies occur about one mile west of the applicant's claims."

Commodity Member's Comments:

USBM, James Paone, May 3, 1957:

Mr. Paone agrees with the Field Team in its recommendation to deny application DMEA-4657

USGS, N. E. Nelson, May 6, 1957:

Mr. Nelson summarizes the above data, and concurs in the Field Team's recommendation to deny the application without a field examination.

Rare & Miscellaneous Metals Div., F. M. Murphy, May 9, 1957:

The Time group is evidently in an area where considerable exploration work by this and other Government agencies, as well as private industry, has failed to find uranium ore deposits of any significant size or grade. Similarly, the Yellow Cat group is in a proven unfavorable area, moreover, 34 holes drilled on the Yellow Cat group were barren. In view of the above it does not appear that the proposed projects to further explore the two groups would result in finding a significant amount of uranium ore.

Conclusion and Recommendation:

This Division agrees with the conclusions of W. B. Gazdik, USGS, and M. H. Salsbury, USBM, who reviewed the application; and concurs in the Field Team's recommendation to deny the application without a field examination.

Pomona, California

Re: Docket No. DMEA-4657 (Uranium)
Yellow Cat and Tim Groups
Grand County, Utah

Dear Mr. Scott:

Your application for aid in an exploration project and other information available to us in Washington concerning the above-named property have been reviewed.

Projects approved by the Defense Minerals Exploration Administration must, in its judgment, show definite promise of yielding materials of acceptable grade in quantities that will significantly improve the mineral supply position for the National Defense Program.

Careful study of all our information indicates that the probability of disclosing significant ore reserves is not sufficiently promising to justify Government participation. We regret to advise you that, under these circumstances, your application for exploration assistance is denied.

In accordance with your request, we are returning Exhibits Nos. 1 through 16, and 18, under separate cover, which were submitted with your application.

We wish to thank you for your interest in the Defense Minerals Exploration Program and for bringing your property to our attention.

Sincerely yours,

C. O. Mittendorf (for)

Memorandum

To: E. W. Ellis, Defense Minerals Exploration Administration

From: N. E. Nelson, U. S. Geological Survey

Subject: Review of reviewers' memorandum

The applicant requested assistance in drilling a property in an area about which much is known and much can be inferred. Drilling of the property by the U. S. Geological Survey and the applicant failed to find ore or favorable indications. Drilling of nearby properties and prospecting of long rim exposures also resulted in failure to find deposits commensurate with the expenditures incurred.

The reviewers conclude "...it is considered that the applicant's Hell Roaring Canyon property is located in an area where the chances of finding ore deposits of significant grade and tonnage are poor." They recommend that the application be denied without a field examination.

I agree with the conclusions and concur with the recommendation of denial of the reviewers and the Field Team.

Memorandum

To: Acting Executive Officer, DMEA Field Team, Region III

Through: E. N. Harshman
John F. Shaw
J. William Hasler

From: W. B. Gazdik
~~M. H. Salsbury~~

Subject: Recommendation for denial without a field examination DMEA docket 4657 (Uranium), Utah Grand, Inc., Yellow Cat and Tim groups, Grand County, Utah

Utah Grand, Inc., has applied for DMEA assistance on two widely separated properties consisting of 31 claims in the Yellow Cat area and 30 claims in the Hell Roaring Canyon area on the Green River about 25 air miles to the southwest. The applicant's proposed program is poorly presented but apparently consists of wagon drilling, rotary-bit drilling, coring and road building at a total estimated cost of $14,580.

The applicant's Hell Roaring claims are located in an area where known uranium deposits are small and scattered, and consist of thin discontinuous seams and small pods of mineralized material generally restricted to the lower sandstone beds of the Moss Back member of the Triassic Chinle formation. These lenticular sandstones thicken and thin abruptly, largely as a result of the underlying erosional surface of the Triassic Moenkopi formation and not because of channels which elsewhere are important features related to localization of uranium deposits. Excessive topographic development presents costly road-building problems. Chinle beds overlying the potential ore horizon form steep boulder-strewn slopes on the outcrop and are capped by sheer Kayenta-Wingate cliffs as much as 400 feet high. Although the Moss Back member is exposed for many miles by numerous canyons in the inter-river area between the Green and Colorado Rivers, rather extensive prospecting by private industry and government agencies have failed to disclose uranium deposits of significant size and grade. A DMEA project (docket 2970) explored property about 3½ miles south of the applicant's claims with negative results. An application (docket 4054) for Government aid to explore adjoining claims in the area was denied because of the small size and sparse distribution of known

(date)

ore deposits. The Excalibur Uranium Corporation was granted DMEA assistance to explore property located about three miles north of the applicant's claims under dockets 1631 and 1896. A relatively small deposit of what was estimated to be 1,832 tons of uranium ore was found under docket 1631, but these reserves appear depleted after 450 tons of ore were shipped. Results of DMEA exploratory work under docket 1896 were negative. The nearby Edna claims were examined and a report (DMEA 4566) recommending denial was recently sent to the Washington office. In summary, it is considered that the applicant's Hell Roaring Canyon property is located in an area where the chances of finding ore deposits of significant grade and tonnage are poor.

The applicant's Yellow Cat claims are located in secs. 19 and 30, T. 22 S., R. 23 E., and secs. 24 and 25, T. 22 S., R. 24 E. The U. S. Geological Survey drilled 1,741 holes in the Yellow Cat area and found 56,850 tons of ore by this rather large amount of drilling. Exploratory drilling was discontinued in 1954 when it was concluded that deposits in this area are relatively small and of marginal grade. Known ore deposits in the Yellow Cat area occur in five sandstone lenses in the Jurassic Morrison formation. The four lower sandstones are in the Salt Wash member while the uppermost ore-bearing sandstone is in the Brushy Basin member. The larger deposits usually occur in the lower 125 feet of the Salt Wash member.

Twenty-six of the U. S. Geological Survey holes were drilled on the subject claims. These holes together with eight holes drilled by the applicant were all barren and indicate that the ore-bearing sandstones on the applicant's property are generally unfavorable for significant ore deposits. Favorable host rock and larger ore bodies occur about one mile west of the applicant's claims.

In view of the foregoing it is concluded that both of the applicant's properties are in areas considered geologically unfavorable for uranium deposits and the chances of finding ore deposits of significant size and grade are poor. It is recommended, therefore, that the subject application be denied without a field examination.

J. W. Bailer w/enclosures, Items 2-4 below

From: DMEA Field Team, Region III

Subject: Docket DMEA-4657 (Uranium) Utah Grand, Inc. (Yellow Cat and Tim groups) Grand County, Utah

Enclosed is the following material relating to the subject docket.

1. Copy of application for Government assistance in exploration work under the DMEA program.
2. Memorandum of review by John E. Crawford, U. S. Bureau of Mines.
3. Memorandum of review by W. P. Williams, U. S. Geological Survey.
4. Letter of transmittal of the foregoing to this office, dated March 15, 1957, from the Chairman, Operating Committee, DMEA.
5. Routing control sheet.

We request that the field examiners investigate all aspects of the work proposal, consider the comments contained in the Chairman's letter, make a field examination if considered advisable, and jointly submit their findings to this office in the form of a suitable covering report.

We additionally request that when you submit the report you include with the Bureau of Mines' copy of the application, the exhibits requested by the Chairman for return to Washington. The Geological Survey's copy of the application should be returned to Mr. Bowdoman's office.

If the field examiners recommend Government participation in the proposed exploration program, please submit 12 extra copies of each map used in the joint report which show the land to be subcontinented and the location and extent of recommended work in relation to property boundaries. Please return the Bureau of Mines' copy of the application to this office with the Report of Examination.

Re: Docket No. DMEA-4657 (Uranium)
Utah Grand, Inc.
Yellow Cat and Tim Groups
Grand County, Utah

Dear Mr. Harshman:

The captioned application is referred to Region III Field Team for investigation, a field examination if deemed advisable, and recommendations.

Enclosed are copies of memoranda, dated March 4 and 12, 1957, by W. P. Williams, USGS, and J. E. Crawford, USBM, respectively, relating to the application. Also enclosed for Field Team use is one copy of the application, including the one copy each of the 18 exhibits listed which you requested to be returned to your office if the application was referred to the Field Team. We have not made copies of these exhibits, however, as you forwarded 2 copies of Exhibit 1 and 3 copies of Exhibit 2, we are retaining one copy of these exhibits with one copy of the application form and answers. The exhibits should be returned to this office, together with your recommendations regarding the two proposed projects on the Yellow Cat area group and the Tim group in Hell Roaring Canyon.

With reference to the Tim group you will note that the Applicant has not submitted the legal papers relating to the ownership of these claims. For the present it is suggested that the Applicant's statement of ownership be accepted. However, in the event the Field Team concludes that one or both of the proposed projects appear to be warranted, it should request the Applicant to submit the required documents and the Owner's Consent to Lien and Subordination Agreement relating to the claims involved.

Sincerely yours,

George C. Selfridge

Memorandum

March 4, 1957

To: E. W. Ellis, Defense Minerals Exploration Administration

From: W. P. Williams, U. S. Geological Survey

Subject: Review of application, DMEA 4657, Utah Grand, Inc., Inter-river and Yellow Cat areas, Grand County, Utah, (uranium).

The applicant proposes to explore for uranium ore deposits on two widely separated groups of claims. The applicant's proposals are indistinct, but from his cost estimates it is gathered that he wishes to do wagon and plug-bit drilling at a total estimated cost of $14,580.

One part of the applicant's property consists of 31 mining claims located (as near as can be ascertained from the incomplete application) in the vicinity of the Squaw Park area of the Yellow Cat district. The U. S. Government discontinued an extensive drilling program there, after it was concluded that any ore bodies that might be present would be small and scattered. N.G.

The other part of the applicant's property consists of about 17 claims located in the vicinity of the Bowknot Bend in the Inter-river area. There, too, ore deposits are known to be small and scattered. DMEA 1896 and 2970 in the vicinity were failures. DMEA 1631 discovered less than 2,000 tons of ore; and DMEA 4054 was denied - both also near the Bowknot Bend.

The application does not appear to present well qualified lands for DMEA consideration. More succinctly, I doubt that DMEA expenditures on the applicant's property are warranted. However, I recommend that the application be referred to the Field Team for review and for whatever field action they consider necessary.
