Re: DMA-1393
Commodity-Copper

Dear Mr. Maher:

Since you have failed to answer our letters of August 30, 1951 and December 20, 1951, we are assuming that you wish to withdraw your application for a production loan. We have informed the Docket Control Center of this action.

Very truly yours,

J. B. Gowen

Re: DMA-1393

Dear Mr. Maher:

On or about August 30, 1951 forms were sent to you to complete and return and also a request was made for more information. As yet we have not heard from you pertaining to these requests and therefore are wondering whether you still wish your application to be processed or whether it may be withdrawn.

Very truly yours,
J. B. Gowen

Re: Docket No. DMA-1393

Dear Mr. Maher:

After studying your application for a production loan it is found that more information is needed before it can be further processed.

From the material submitted with your application you state, and we quote, "Assays of copper ore for leaching range from a low of 1.49% to a high of 8% general average has been 5.56% on several samples. There is every indication that high grade shipping ore will be opened in the project." Yet, from the accompanying assay sheets, there is only one copper assay showing above 1%. Evidence should be submitted to substantiate the quoted copper assays and sufficient measured tonnage to justify the loan.

We are enclosing Form MF-100 (General Technical Data) which should be filled out completely. All the supporting material requested is necessary to complete the processing of your application.

It is noted that in your original application there is some exploration included. We are enclosing 5 copies of MF-103 (Application for aid for an Exploration Project) on the assumption that this might form the basis for a separate project under exploration aid. For your information we are also enclosing MO-5 (Regulations) and press releases dated April 11, 1951 and May 14, 1951 explaining this exploration program.

Very truly yours,

J. B. Gowen
