Mr. Tomer Noark
150 Fifteenth Street
Ely, Nevada

Re: Docket No. DMRA 2346 - Tungsten
Je Jane Claims Nos. 1, 2 and 3
White Pine Range
Nye County, Nevada

Dear Mr. Noark:

Your application for exploration assistance and other information referring to the above noted property available to us in Washington have been carefully reviewed.

This information, while noting a small amount of scheelite mineralization on your property, indicates that, geologically, there is little probability of making a significant mineral discovery. We regret, therefore, to inform you that your application is denied.

We wish to thank you for your interest in the Defense Minerals Program and for bringing this property to our attention.

As per your request, we are returning to you the following:

3 Photographs
3 Location notices
2 Assay certificates.

Sincerely yours,

(signed) FRANK E. JOHNSON

Acting Administrator, DMEA July 15, 1952

Iron and Ferro-Alloy Division, DMEA

Denial of exploration project in the amount of $7,142.50
Docket No. DMEA 2346X - Tungsten
Jo Jane Claims Nos. 1, 2 and 3
White Pine Range
Nye County, Nevada

The denial of the subject application by this Division is based on the following information:

1. Limestones of the White Pine Range have been intruded by narrow, fine grained intrusive dikes which, in places, are concordant with the bedding. Close by and paralleling the dikes a narrow quartz vein with accessory stringers can be traced for a distance of 300 feet. Minor scheelite deposition occurs in the quartz vein and stringers. Samples from the better showings gave very low tungsten values. The area indicated very little probability of making a significant mineral discovery.

2. Only one 18-foot cut was found on the property and there is no record of any production.

3. The Field Team and Commodity Division of the U. S. Geological Survey recommend denial.

L. P. Muller, Mining Engineer
U. S. Bureau of Mines

June 30, 1952

JUL 7 - 1952

DMEA-2346 (Tungsten), Homer Roark

Jo Jane Claims Nos. 1, 2 and 3
Nye County, Nevada

SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

Application for Government assistance (DMEA-2346) by Mr. Homer Roark, Ely, Nevada, to conduct exploration on tungsten claims in Nye County, Nev., has been reviewed in the field.

Proposed exploration included sinking of a shaft, road building, road repair, and water development.

The property is a raw prospect, isolated from labor and supply sources. Exploration could only be done during summer months due to climate and road conditions.

The field examination revealed only minor amounts of scheelite in zones of strongest mineral deposition. Samples indicated no ore reserves. The nature of scheelite occurrence limits the probability of making a significant mineral discovery by exploration.

It is recommended that the application be denied.

INTRODUCTION

An initial examination of the Roark tungsten prospect was made on April 24, 1952 and again on May 15, 1952 by an engineer[1] of the U. S. Bureau of Mines in connection with docket DMEA-2346. Mr. Homer Roark, 150-15th Street, Ely, Nev., and Mr. George Allen, watchman, accompanied the engineer.

The applicant's holdings comprise 8 unpatented mining claims on unsurveyed land on the south slope of the White Pine mountains. The

1/ L. F. Muller

prospect is reached from Currant (Callaways) on U. S. Highway No. 6, 52.3 miles southwest of Ely, Nev., by traveling northwest 9.5 miles on the Duckwater road (Nevada 20), then 10 miles northeast over a poor wagon road, the last 3 miles of which are impassable to passenger vehicles.

The claims extend from bottom to top of a foot-ridge of moderate slope. Altitudes range from 7,000 feet (approximate) in the floor of Broom Canyon to 7,500 feet at the upper or northeast end of the claims. Shallow overburden covers the claims pertinent to exploration, Jo Jane Nos. 1, 2 and 3. With present road conditions, this area is only accessible between May and November.

There is sufficient scrub timber in the area to provide support for exploratory openings. Water for mining and domestic use could be developed from a small spring in the canyon 1,000 feet from the proposed exploration site. Fuel for Diesel or gasoline generation of power would have to be transported from Ely, the nearest rail point.

HISTORY AND PRODUCTION

Claims were located in November 1951. No exploratory or location work has been performed by the applicant. However, a 10-foot cut was made on the present Jo Jane No. 2 claim, presumably to prospect a previous gold-silver location. No production is recorded.

GEOLOGY

The White Pine Range in the vicinity of the property is made up of thin bedded limestones striking N 45° W to N 75° W and dipping 50° to 35° NE. Narrow, northeasterly trending, fine grained light and dark colored intrusive dikes cut and in places are concordant with bedding. These can be traced for approximately 900 feet; and a narrow, closely

paralleling, vertical quartz vein with accessory stringers is visible over the northernmost 300 feet. Limestones are partially silicified adjacent to both dikes and vein.

Traces of scheelite can be observed in thin fractures in limestones over wide areas on both sides of the dike zone. Stronger deposition occurs in conjunction with quartz vein and stringers. However, in the latter case, it was noted that mineral occurrence, with little exception, is in thin crystals in siliceous druses along edges of quartz stringers.

A visual appraisal indicates no reserves of ore under present economic conditions or any conceivable future market.

SAMPLING

Samples were taken from the best mineralized showings and the analyses of these samples indicate only a minor amount of WO_3.

Sample No.	%, WO_3	Width/ ft.
1	0.02	1.0
2	0.02	2.0
3	0.04	3.3
4	0.19	1.5

DISCUSSION OF EXPLORATION

The applicant has requested a loan of $7,142.50 for exploration and preparation for exploration to consist of road building 0.25 miles, road repair 0.10 miles, water development and sinking an inclined shaft 100 feet. A revision of costs and preparation of a suitable program by the engineer in conjunction with the applicant has not been made because of the limited ore exposure. The probability of making a significant ore discovery by any form of exploration is unlikely.

Re: Docket No. DMRA 2346X - Tungsten
Je Jane Claims Nos. 1, 2 and 3
White Pine Range
Nye County, Nevada

Dear Mr. Peark:

Your application for assistance in exploring the above noted tungsten property has been reviewed by the Iron and Ferro-Alloy Division of the Defense Minerals Exploration Administration, and has been referred to Mr. R. C. Miller, Executive Officer, DMEA Field Team, Region III, 1012 Flood Building, 870 Market Street, San Francisco 2, California, for a field examination.

The Regional Office will contact you at an early date in regard to the examination of your project. Any assistance that you can give the field team during the examination will be appreciated.

Sincerely yours,

C. O. Mittendorf

Memorandum

To: George C. Selfridge, DMA

From: D. H. Lemmon, [illegible]

Subject: Exploration application $7,142.50 [illegible] 2346 - Tungsten
Homer Roark
150 15th St.
Ely, Nevada

Property: Jo Jane Nos. 1, 2, and 3 claims
White Pine Range
"White River National Forest" - (Presumably Nevada National Forest)
Nye County, Nevada

Proposal:	Repair road	$ 300
	New road 1/4 mile	700
	Inclined shaft (or tunnel?) on vein - 100 ft.	5,000
	Ore bin	700
	Total	$ 6,700

In the itemized expenditures, the total is $6,962.50. The total given of $7,142.50 is not explained.

Geologic Appraisal:
The Geological Survey apparently has not examined this property. The location is not clearly stated.

The information given by the applicant suggests that additional surface trenching and sampling is required before underground exploration is warranted.

Recommendation:
It is recommended that this docket be referred to the field for examination of the property. Snow will make this area inaccessible until late spring.

APPROVED:

Member, Bureau of Mines

Member, Geological Survey

Defense Minerals Administration

Review of Application for Exploration Assistance

Docket No. 2346

Commodity Tungsten

Total Amount ~~5,[illegible]~~ 7,142.50

Govt. Participation $5,312.90

1. Name and Address of Applicant Homer Roark, 150 - 15th St
Ely, Nevada

2. Location of Property Jo Jane No's 1, 2, and 3
White Pine Range, Nye County, Nevada.

3. Mineral or metal Tungsten Is it listed in Section 9 of MO-5?

If not, application will be rejected.

4. Geologic probability of discovery—based on data in application (question #16, 17, 18, 20 and 22)*

Mines or Survey reports, etc., do you rate chances:

a) Good Yes

b) Poor

c) None

d) ~~Don't know~~ needs field examination to check assays, Geology and proposed method of work

e) Is there an alternative and favorable project? Possibly, - must be checked
(If so, attach an explanation)

5. Is the applicant's right to the property clearly stated? Yes -
(question 5, 6, 7)*

6. If applicant is a lessee, is a copy of the lease attached? No (Owner)

Does the lease have sufficient time to run to cover a future

productive period? —

*question numbers are those of MF-103

7. Are subordination agreements necessary? No

a) MF-201? _____

b) MF-202? _____

8. From the data presented, does the proposed project appear feasible from the point of view of:

a) Available manpower Yes

b) Equipment and supplies Yes
(question 14 plus general knowledge of availability)*

c) Accessibility (question 12)* Yes

d) Water (question 13)* Yes

e) Power (question 13)* Yes

Is a field check needed on any of these points? Only as to sufficiency of proposal as to equipment and supplies –

9. Does the experience of the applicant appear to be adequate to assure that he can properly conduct the proposed project? (question 4)* Yes

Is a field check needed on this point? Yes

10. Exhibit A. (question 21 and 22)*

a) Is the project adequately described? Generally, yes, in detail, no, should be more clearly described

If not, are there sufficient data given so that you can describe the project? _____ If so, attach a draft.

b) Is there an adequate map or sketch of the proposed work? Yes

c) Is the proposed work "exploration" under the definition of Section 8, MO-5? Yes

If not, what part of it is? _____

Is this part a worthwhile exploration project?_____

d) Are the cost estimates detailed? Yes

Can they be summarized, as on page 2 of Procedural Instruction 5-A, from the available data? Yes If so, attach a draft.

e) Are the cost estimates reasonable? Yes

f) Should more information be requested from applicant? Yes

g) Is a field examination necessary to complete Exhibit A? Yes

11. Exhibit B (question 23-d)*

a) Is it applicable?_____

b) If so, are sufficient data furnished?_____ If so, attach a draft.

c) Is a field check needed?_____

12. Exhibit C (question 23-e, f and g)*

a) Is it applicable? Yes

b) Sufficient data? Yes If so, attach a draft.

c) Are rents and charges reasonable? Yes

d) Is a field check needed? No

13. Exhibit D (question 23-a, b)*

a) Are there sufficient data? Yes

b) Is the schedule adequate for the work proposed? Yes

c) Is the schedule excessive for the work proposed? No

d) Are the proposed wages and salaries reasonable? Yes

e) Is a field check needed? No

14. Exhibit E (question 23-c)*

a) Is it applicable? No

b) Sufficient data?

c) Reasonable?

d) Field check needed?

15. In your judgment, can the proposed work be done in the proposed time? Yes

(All exploration must be completed within two years)

16. If field examination is not needed, attach your recommendation.

17. If field examination is needed, do you have any special instructions for the field team not indicated by your answers to the foregoing question? Yes:- This appears to be a worthwhile project, but has never been reported upon. The field team should make more than a casual geological examination, and their findings should be substantiated by maps and assays. The proposed method of exploration should be reviewed on the ground and an amended proposal submitted if a more suitable method is evolved, subject to the applicant's ability to contribute his portion thereof.

SUMMARY, CONCLUSIONS AND RECOMMENDATIONS

Application for Government assistance (DMEA-2346) by Mr. Homer Roark, Ely, Nevada, to conduct exploration on tungsten claims in Nye County, Nev., has been reviewed in the field.

Proposed exploration included sinking of a shaft, road building, road repair, and water development.

The property is a raw prospect, isolated from labor and supply sources. Exploration could only be done during summer months due to climate and road conditions.

The field examination revealed only minor amounts of scheelite in zones of strongest mineral deposition. Samples indicated no ore reserves. The nature of scheelite occurrence limits the probability of making a significant mineral discovery by exploration.

It is recommended that the application be denied.

INTRODUCTION

An initial examination of the Roark tungsten prospect was made on April 24, 1952 and again on May 15, 1952 by an engineer[1] of the U. S. Bureau of Mines in connection with docket DMEA-2346. Mr. Homer Roark, 150-15th Street, Ely, Nev., and Mr. George Allen, watchman, accompanied the engineer.

The applicant's holdings comprise 8 unpatented mining claims on unsurveyed land on the south slope of the White Pine mountains. The

1/ L. F. Muller

prospect is reached from Currant (Callaways) on U. S. Highway No. 6, 52.3 miles southwest of Ely, Nev., by traveling northwest 9.5 miles on the Duckwater road (Nevada 20), then 10 miles northeast over a poor wagon road, the last 3 miles of which are impassable to passenger vehicles.

The claims extend from bottom to top of a foot-ridge of moderate slope. Altitudes range from 7,000 feet (approximate) in the floor of Broom Canyon to 7,500 feet at the upper or northeast end of the claims. Shallow overburden covers the claims pertinent to exploration, Jo Jane Nos. 1, 2 and 3. With present road conditions, this area is only accessible between May and November.

There is sufficient scrub timber in the area to provide support for exploratory openings. Water for mining and domestic use could be developed from a small spring in the canyon 1,000 feet from the proposed exploration site. Fuel for Diesel or gasoline generation of power would have to be transported from Ely, the nearest rail point.

HISTORY AND PRODUCTION

Claims were located in November 1951. No exploratory or location work has been performed by the applicant. However, a 10-foot cut was made on the present Jo Jane No. 2 claim, presumably to prospect a previous gold-silver location. No production is recorded.

GEOLOGY

The White Pine Range in the vicinity of the property is made up of thin bedded limestones striking N 45° W to N 75° W and dipping 30° to 35° NE. Narrow, northeasterly trending, fine grained light and dark colored intrusive dikes cut and in places are concordant with bedding. These can be traced for approximately 900 feet; and a narrow, closely

paralleling, vertical quartz vein with accessory stringers is visible over the northernmost 300 feet. Limestones are partially silicified adjacent to both dikes and vein.

Traces of scheelite can be observed in thin fractures in limestones over wide areas on both sides of the dike zone. Stronger deposition occurs in conjunction with quartz vein and stringers. However, in the latter case, it was noted that mineral occurrence, with little exception, is in thin crystals in siliceous druses along edges of quartz stringers.

A visual appraisal indicates no reserves of ore under present economic conditions or any conceivable future market.

SAMPLING

Samples were taken from the best mineralized showings and the analyses of these samples indicate only a minor amount of WO_3.

Sample No.	%, WO_3	Width/ ft.
1	0.02	1.0
2	0.02	2.0
3	0.04	3.3
4	0.19	1.5

DISCUSSION OF EXPLORATION

The applicant has requested a loan of $7,142.50 for exploration and preparation for exploration to consist of road building 0.25 miles, road repair 0.10 miles, water development and sinking an inclined shaft 100 feet. A revision of costs and preparation of a suitable program by the enginner in conjunction with the applicant has not been made because of the limited ore exposure. The probability of making a significant ore discovery by any form of exploration is unlikely.

2. Location of Property Jo Jane Claims Nos. 1, 2 and 3
White Pine Range
Nye County, Nevada

3. Mineral or metal Tungsten Is it listed in Section 9 of MO-5?

If not, application will be rejected.

4. Geologic probability of discovery—based on data in application (question #16, 17, 18, 20 and 22)*

Mines or Survey reports, etc., do you rate chances:

a) Good Yes

b) Poor

c) None

d) ~~XXXXXXXXXX~~—needs field examination to check assays, geology and proposed method of work.

e) Is there an alternative and favorable project? Possibly, must be checked.
(If so, attach an explanation)

5. Is the applicant's right to the property clearly stated? Yes
(question 5, 6, 7)*

6. If applicant is a lessee, is a copy of the lease attached? No (owner)

Does the lease have sufficient time to run to cover a future

productive period?

*question numbers are those of MF-103

7. Are subordination agreements necessary? No

a) MF-201? _____

b) MF-202? _____

8. From the data presented, does the proposed project appear feasible from the point of view of:

a) Available manpower Yes

b) Equipment and supplies Yes
(question 14 plus general knowledge of availability)*

c) Accessibility (question 12)* Yes

d) Water (question 13)* Yes

e) Power (question 13)* Yes

Is a field check needed on any of these points? Only as to sufficiency ofproposal as to equipment and supplies.

9. Does the experience of the applicant appear to be adequate to assure that he can properly conduct the proposed project? (question 4)* Yes

Is a field check needed on this point? Yes

10. Exhibit A. (question 21 and 22)*

a) Is the project adequately described? Generally, yes - in detail, no. Should be more clearly described.

If not, are there sufficient data given so that you can describe the project? _____ If so, attach a draft.

b) Is there an adequate map or sketch of the proposed work? Yes

c) Is the proposed work "exploration" under the definition of Section 8, MO-5? Yes

If not, what part of it is? _____

Is this part a worthwhile exploration project?_____

d) Are the cost estimates detailed? Yes

Can they be summarized, as on page 2 of Procedural Instruction 5-A, from the available data? Yes If so, attach a draft.

e) Are the cost estimates reasonable? Yes

f) Should more information be requested from applicant? Yes

g) Is a field examination necessary to complete Exhibit A? Yes

11. Exhibit B (question 23-d)*

a) Is it applicable?_____

b) If so, are sufficient data furnished?_____ If so, attach a draft.

c) Is a field check needed?_____

12. Exhibit C (question 23-e, f and g)*

a) Is it applicable? Yes

b) Sufficient data? Yes If so, attach a draft.

c) Are rents and charges reasonable? Yes

d) Is a field check needed? No

13. Exhibit D (question 23-a, b)*

a) Are there sufficient data? Yes

b) Is the schedule adequate for the work proposed? Yes

c) Is the schedule excessive for the work proposed? No

d) Are the proposed wages and salaries reasonable? Yes

e) Is a field check needed? No

14. Exhibit E (question 23-c)*

a) Is it applicable? No

b) Sufficient data?

c) Reasonable?

d) Field check needed?

15. In your judgment, can the proposed work be done in the proposed time? Yes

(All exploration must be completed within two years)

16. If field examination is not needed, attach your recommendation.

17. If field examination is needed, do you have any special instructions for the field team not indicated by your answers to the foregoing question? Yes - This appears to be a worthwhile project, but has never been reported upon. ~~The field team should make more than a casual geological examination and their findings should be substantiated by maps and assays.~~ The proposed method of exploration should be reviewed on the ground and an amended proposal submitted if a more suitable method is evolved, subject to the applicant's ability to contribute his portion thereof.

It is assumed this would be done as a matter of course (Operating Committee)

G-MD-DML

UNITED STATES
DEPARTMENT OF THE INTERIOR
GEOLOGICAL SURVEY
WASHINGTON 25, D. C.

February 1, 1952

Memorandum

To: George C. Selfridge, DMEA

From: D. M. Lemmon, U.S.G.S.

Subject: Exploration application $7,142.50 DMEA 2346 - Tungsten
Homer Roark
150 15th St.
Ely, Nevada

Property: Jo Jane Nos. 1, 2, and 3 claims
White Pine Range
"White River National Forest" - (Presumably Nevada National Forest)
Nye County, Nevada

Proposal:

Repair road	$ 300
New road 1/4 mile	700
Inclined shaft (or tunnel?) on vein - 100 ft.	5,000
Ore bin	700
Total	$ 6,700

In the itemized expenditures, the total is $6,962.50. The total given of $7,142.50 is not explained.

Geologic Appraisal:

The Geological Survey apparently has not examined this property. The location is not clearly stated.

The information given by the applicant suggests that additional surface trenching and sampling is required before underground exploration is warranted.

Recommendation:

It is recommended that this docket be referred to the field for examination of the property. Snow will make this area inaccessible until late spring.

If you have already filed MF-100, give date filed _____, type of assistance requested Exploration,

DMA Docket Number (if available) _____

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four copies each, of the signed application form, General Technical Data Form MF-100, and answers to questions as specified, to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive office thereof, with your name and address on each sheet of the application and all accompanying papers. If you have previously filed MF-100, it is not necessary to file it again. However, you should indicate in space provided above the type of assistance previously applied for (loans, procurement contracts, etc.) and DMA Docket Number, if available. *When a question is inapplicable it should be so stated in the form.* Additional sheets should be attached in answering any questions or in supplying additional information. IF YOU CANNOT ANSWER A QUESTION, SO STATE.

1. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

   (*b*) If you are not the owner of the property, submit a copy of the lease, purchase option, or other agreements under which you are authorized to operate the property with each copy of your application.

   (*c*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

   NOTE: (1) If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*c*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

   (2) If applicant is not the owner of the property or if there are any liens or encumbrances against the property, copy of agreements of claimants, lienors, encumbrances, and lessors subordinating their interests in the property to the interest of the Government under the Exploration Project Contract will be required for attachment to the Contract.

2. (*a*) What metals or minerals do you expect to find?

   (*b*) Furnish statement of the geologic features of your property, giving type of ore deposit and reasons for expecting to find commercial ore bodies. Illustrate with maps or sketches. If you have a geologic or engineering report, or assay maps showing width and grade, please send them with application, stating whether or not you wish to have them returned.

The information requested in questions 3, 4, 5, 6, 7, 8, and 9 below should be answered specifically and in detail, as this information will be attached to and incorporated as part of the Exploration Project Contract, if such contract is entered into with you by the Government.

ANSWER EACH QUESTION ON SEPARATE SHEETS OF PAPER AND SUBMIT A COPY OF EACH ANSWER FOR EACH COPY OF YOUR APPLICATION.

3. (*a*) Describe fully the proposed work and give the total cost of the project.

   (*b*) State the time required to start the project and to complete it.

4. Submit a map or sketch of the property involved showing a plan (and cross section, if needed) of the present mine workings and the *location of the proposed exploration work* as related to geologic features, such as contacts, veins, ore-bearing beds, etc.

5. Furnish an itemized list of existing facilities, buildings, installations, and fixtures with a statement of the cost of any necessary rehabilitation or repairs to put into useful and operable condition.

6. Furnish a detailed list of additional facilities, buildings, and fixtures to be purchased, installed, or erected by you, with the estimated cost of each item.

7. Furnish a detailed list of operating equipment, separated into items to be—

   (*a*) Rented

   (*b*) Purchased

   (*c*) Furnished by you

   with the rental, purchase price, or depreciation of each item, as the case may be, to be charged as a cost of the project.

8. Furnish an itemized schedule of labor, by numbers and classes (miners, muckers, etc.) and of supervisors by numbers and positions, with the maximum wages or salaries to be paid to each.

9. Furnish a detailed list with estimated cost of each item for materials, supplies, engineering, assaying, accounting, power, water, utilities, and any other items not provided for above.

10. (*a*) How much are you prepared to invest in the proposed project?

    (*b*) Is this amount sufficient to pay your part of the cost of the project, in accordance with the regulations on Government participation (Sec. 9 of MO–5)?

11. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

U. S. GOVERNMENT PRINTING OFFICE 16—64067-2

1. (a) This group of eight mineral claims are located on U.S. Government land in White River National Forest, Nye County, Nevada which I have legally discovered, filed, and recorded and performed all necessary requirements. Primarily only three of these claims will be involved in the Exploration Work for which I am herewith making application for loan. They are described as follows: JO JANE NO. 1, NO. 2, and NO. 3 lying in line on The Vein in a north-east and south-west direction, consisting of 4,500 feet in length and 600 feet in width.

The Exploration Work will start approximately in center of the middle of NO. 1 Claim, the original discovery, at a point where ore vein extends above surface. This vein is approximately five feet in width, consisting of quartz veins and lime stone which are mineralized from wall to wall assaying 0.93 WO_3 and other minerals. This Vein runs along and against a green stone diabase dike, the foot wall. This dike can be traced the full length of these three claims, no doubt much farther. The ore Vein appears at various places along the course of the dike. The over-burden prevents it from showing only in a few places in a distance of approximately one thousand feet on mountain side. The diabase dike is approximately ten feet wide which cuts diagonally across a rather large mineralized mountain as per drawing. The other five claims lie to the East and higher on the mountain and are recorded under the name of LOST CABIN, NO. 1, NO. 2, NO. 3, NO. 4, NO. 5. This group was at one time WORKED

1. (a) (Continued)
and was known to produce very high grade lead, copper and silver. They show very good grade "Scheelite" also. They were abandoned at an early day due to transportation and inaccessibility; it was a pack-mule proposition.

I am enclosing assays taken from Vein at original discovery point at surface of JO JANE NO. 1. This ore Vein lies between two very distinct walls, the diabase dike being the foot wall; the other is a form of felsite which is the hanging wall and makes up the surrounding rock on this mountain. The sample of Scheelite that was assayed 0.93 and 0.91 was a fair one taken across face of five foot vein in a proper manner, at the surface. WO_3 also shows at the various other out-croppings along the course of the Vein above and below on this rather steep mountain.

2. I expect to find high-grade "Scheelite" Tungsten principally and perhaps lead, copper, and silver at a reasonable depth. I am confident we will uncover a large deposit of high-grade Tungsten ore due to all indication at the surface. Since having this assay run, we have prospected the Vein lower down the mountain which shows much more promising; also numerous stringer Veins, out-crops and float over this mountain shows Scheelite under the ultra violet lamp of good grade. I have not had a geologic or engineering report made of this property, but I have had several mining men to look it over, including one man who has operated Tungsten Mines throughout the country since 1915 and who is considered one of the best authorities on Scheelite in this section of the country. He says it's the best prospect he has seen in a long time.

It's my opinion that the main reason why these claims have not already been developed is due to their remote location. There are no live stock run in this canyon; it is known as an unused part of the White River National Forest; consequently, no one ever rides there. It is just so situated that big game hunters seldom hunt in it, although it has been locally known for years that lead, copper and silver of a very high grade was packed by mules from these claims in the early days but due to the inaccessibility of them, no one did anything about it. However, no one knew that Tungsten existed in them. They are located 20 miles from oil highway, ten miles from gravel County highway. This last ten miles is an old logging road built in

2. (Continued)

early days from the gravel highway up Broom Canyon to base of mountain within one-quarter mile of JO JANE Tungsten property and to point of Exploration.

3. (a) Repair old road from gravel highway up Broom Canyon to base of mountain 10 miles. 3 days with bulldozer, 10 hr. days, $10.00 per hour. $ 300.

(b) Build new road approximately one-fourth mile from Canyon floor to point where Exploration Work will begin. 7 days with bulldozer $10.00 per hour, 10 hr. days. $ 700.

(c) Inclind shaft on the Vein. This is a very difficult question to answer, as we all know, but due to the fact that I have milling ore WO_3 at the surface of around 1% and shows even promise of getting better, my honest opinion is that we should encounter an ore body or large deposit of high-grade Tungsten within one hundred feet; figuring thirty dollars per foot for running this tunnel, including one miner, one mucker, supervising the work myself; powder, gasoline, etc. - Five-thousand dollars.

(d) Ready to start Exploration Work immediately upon approval of this loan. Including all preliminary work, the project should be completed within 90 days.

5. There are no existing facilities, buildings, etc. on this property at present. I am using trailer house now and will provide tents as housing for workers while doing the Exploration Work and until I am in production.

Owing to the fact that I am starting in milling ore I will need ore bin. There is sufficient timber on the property to build most of it with the exception of doors, iron reinforcements and the labor involved.

Near as can be estimated, including material and labor $ 700.

Material	$ 160.00
Labor	540.00

6. As I understand the purpose of this loan is for Exploration Work only, and not for the purchase of items that could be done without during Exploration, which could be purchased after, or when, if ever, the project is in production.

Therefore, I am listingfacilities, material, etc. that I will actually need while I am developing this property. I am trying to keep the cost of this project within my means as much as possible, as I realize this money will have to be paid back to the Government.

7. List of Equipment to be Rented

1 Denver Gardner Air Compressor with Hose drills complete, except drilling steel @ $250. per month - 90 days $ 750.00

8.

Labor Schedule

1 Miner	- Wages	$1.75	per hr.-	8 Hr.	Day-	$14.-	90	days			$ 1,260.
1 Mucker	"	1.25	"	"	"	"	"	10.	"	"	900.

If you have already filed MF-100, give date filed No, type of assistance requested Exploration,

DMA Docket Number (if available)

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four copies each, of the signed application form, General Technical Data Form MF-100, and answers to questions as specified, to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive office thereof, with your name and address on each sheet of the application and all accompanying papers. If you have previously filed MF-100, it is not necessary to file it again. However, you should indicate in space provided above the type of assistance previously applied for (loans, procurement contracts, etc.) and DMA Docket Number, if available. *When a question is inapplicable it should be so stated in the form.* Additional sheets should be attached in answering any questions or in supplying additional information. IF YOU CANNOT ANSWER A QUESTION, SO STATE.

1. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

   (*b*) If you are not the owner of the property, submit a copy of the lease, purchase option, or other agreements under which you are authorized to operate the property with each copy of your application.

   (*c*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

   NOTE: (1) If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*c*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

   (2) If applicant is not the owner of the property or if there are any liens or encumbrances against the property, copy of agreements of claimants, lienors, encumbrances, and lessors subordinating their interests in the property to the interest of the Government under the Exploration Project Contract will be required for attachment to the Contract.

2. (*a*) What metals or minerals do you expect to find?

   (*b*) Furnish statement of the geologic features of your property, giving type of ore deposit and reasons for expecting to find commercial ore bodies. Illustrate with maps or sketches. If you have a geologic or engineering report, or assay maps showing width and grade, please send them with application, stating whether or not you wish to have them returned.

The information requested in questions 3, 4, 5, 6, 7, 8, and 9 below should be answered specifically and in detail, as this information will be attached to and incorporated as part of the Exploration Project Contract, if such contract is entered into with you by the Government.

ANSWER EACH QUESTION ON SEPARATE SHEETS OF PAPER AND SUBMIT A COPY OF EACH ANSWER FOR EACH COPY OF YOUR APPLICATION.

3. (*a*) Describe fully the proposed work and give the total cost of the project.

   (*b*) State the time required to start the project and to complete it.

4. Submit a map or sketch of the property involved showing a plan (and cross section, if needed) of the present mine workings and the *location of the proposed exploration work* as related to geologic features, such as contacts, veins, ore-bearing beds, etc.

5. Furnish an itemized list of existing facilities, buildings, installations, and fixtures with a statement of the cost of any necessary rehabilitation or repairs to put into useful and operable condition.

6. Furnish a detailed list of additional facilities, buildings, and fixtures to be purchased, installed, or erected by you, with the estimated cost of each item.

7. Furnish a detailed list of operating equipment, separated into items to be—

   (*a*) Rented

   (*b*) Purchased

   (*c*) Furnished by you

   with the rental, purchase price, or depreciation of each item, as the case may be, to be charged as a cost of the project.

8. Furnish an itemized schedule of labor, by numbers and classes (miners, muckers, etc.) and of supervisors by numbers and positions, with the maximum wages or salaries to be paid to each.

9. Furnish a detailed list with estimated cost of each item for materials, supplies, engineering, assaying, accounting, power, water, utilities, and any other items not provided for above.

10. (*a*) How much are you prepared to invest in the proposed project?

    (*b*) Is this amount sufficient to pay your part of the cost of the project, in accordance with the regulations on Government participation (Sec. 9 of MO–5)?

11. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

Title 18, U. S. Code (Crimes), Section 1001, makes it a criminal offense to make a willfully false statement or representation to any department or agency of the United States as to any matter within its jurisdiction.

U. S. GOVERNMENT PRINTING OFFICE 16—64067-2

1. (c) This group of eight mineral claims are located on U.S. Government land in White River National Forest, Nye County, Nevada which I have legally discovered, filed, and recorded and performed all necessary requirements. Primarily only three of these claims will be involved in the Exploration Work for which I am herewith making application for loan. They are described as follows: SO SMALL NO. 1, NO. 2, and NO. 3 lying in line on the Vein in a north-east and south-west direction, consisting of 4,500 feet in length and 600 feet in width.

The Exploration Work will start approximately in center of the middle of NO. 1 Claim, the original discovery, at a point where ore vein extends above surface. This vein is approximately five feet in width, consisting of quartz veins and lime stone which are mineralized from wall to wall assaying 0.93 WO_3 and other minerals. This Vein runs along and against a green stone diabase dike, the foot wall. This dike can be traced the full length of these three claims, no doubt much further. The ore Vein appears at various places along the course of the dike. The over-burden prevents it from showing only in a few places in a distance of approximately one thousand feet on mountain side. The diabase dike is approximately ten feet wide which cuts diagonally across a rather large mineralized mountain as per drawing. The other five claims lie to the East and higher on the mountain and are recorded under the name of EAST SMALL NO. 1, NO. 2, NO. 3, NO. 4, NO. 5. This group was at one time WORKED

1. (a) (Continued)
and was known to produce very high grade lead, copper and silver. They show very good grade "Scheelite" also. They were abandoned at an early day due to transportation and inaccessibility; it was a pack-mule proposition.

I am enclosing assays taken from Vein at original discovery point at surface of JO JANE NO. 1. This ore Vein lies between two very distinct walls, the diabase dike being the foot wall; the other is a form of felsite which is the hanging wall and makes up the surrounding rock on this mountain. The sample of Scheelite that was assayed 0.93 and 0.91 was a fair one taken across face of five foot vein in a proper manner, at the surface. WO_3 also shows at the various other out-croppings along the course of the Vein above and below on this rather steep mountain.

2. I expect to find high-grade "Scheelite" Tungsten principally and perhaps lead, copper, and silver at a reasonable depth. I am confident we will uncover a large deposit of high-grade Tungsten ore due to all indication at the surface. Since having this assay run, we have prospected the Vein lower down the mountain which shows much more promising; also numerous stringer Veins, out-crops and float over this mountain shows Scheelite under the ultra violet lamp of good grade. I have not had a geologic or engineering report made of this property, but I have had several mining men to look it over, including one man who has operated Tungsten Mines throughout the country since 1915 and who is considered one of the best authorities on Scheelite in this section of the country. He says it's the best prospect he has seen in a long time.

It's my opinion that the main reason why these claims have not already been developed is due to their remote location. There are no live stock run in this canyon; it is known as an unused part of the White River National Forest; consequently, no one ever rides there. It is just so situated that big game hunters seldom hunt in it, although it has been locally known for years that lead, copper and silver of a very high grade was packed by mules from these claims in the early days but due to the inaccessibility of them, no one did anything about it. However, no one knew that Tungsten existed in them. They are located 20 miles from oil highway, ten miles from gravel County highway. This last ten miles is an old logging road built in

2. (Continued)

early days from the gravel highway up Broom Canyon to base of mountain within one-quarter mile of JO JANE Tungsten property and to point of Exploration.

3. (a) Repair old road from gravel highway up Broom Canyon to base of mountain 10 miles. 3 days with bulldozer, 10 hr. days, $10.00 per hour. $ 300.

(b) Build new road approximately one-fourth mile from Canyon floor to point where Exploration Work will begin. 7 days with bulldozer $10.00 per hour, 10 hr. days. $ 700.

(c) Inclind shaft on the Vein. This is a very difficult question to answer, as we all know, but due to the fact that I have milling ore WO_3 at the surface of around 1% and shows even promise of getting better, my honest opinion is that we should encounter an ore body or large deposit of high-grade Tungsten within one hundred feet, figuring thirty dollars per foot for running this tunnel, including one miner, one mucker, supervising the work myself; powder, gasoline, etc. - Five-thousand dollars. 5,000

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four copies each, of the signed application form, General Technical Data Form MF-100, and answers to questions as specified, to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive office thereof, with your name and address on each sheet of the application and all accompanying papers. If you have previously filed MF-100, it is not necessary to file it again. However, you should indicate in space provided above the type of assistance previously applied for (loans, procurement contracts, etc.) and DMA Docket Number, if available. *When a question is inapplicable it should be so stated in the form.* Additional sheets should be attached in answering any questions or in supplying additional information. IF YOU CANNOT ANSWER A QUESTION, SO STATE.

1. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

   (*b*) If you are not the owner of the property, submit a copy of the lease, purchase option, or other agreements under which you are authorized to operate the property with each copy of your application.

   (*c*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

   NOTE: (1) If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*c*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

   (2) If applicant is not the owner of the property or if there are any liens or encumbrances against the property, copy of agreements of claimants, lienors, encumbrances, and lessors subordinating their interests in the property to the interest of the Government under the Exploration Project Contract will be required for attachment to the Contract.

2. (*a*) What metals or minerals do you expect to find?

   (*b*) Furnish statement of the geologic features of your property, giving type of ore deposit and reasons for expecting to find commercial ore bodies. Illustrate with maps or sketches. If you have a geologic or engineering report, or assay maps showing width and grade, please send them with application, stating whether or not you wish to have them returned.

The information requested in questions 3, 4, 5, 6, 7, 8, and 9 below should be answered specifically and in detail, as this information will be attached to and incorporated as part of the Exploration Project Contract, if such contract is entered into with you by the Government.

ANSWER EACH QUESTION ON SEPARATE SHEETS OF PAPER AND SUBMIT A COPY OF EACH ANSWER FOR EACH COPY OF YOUR APPLICATION.

3. (*a*) Describe fully the proposed work and give the total cost of the project.

   (*b*) State the time required to start the project and to complete it.

4. Submit a map or sketch of the property involved showing a plan (and cross section, if needed) of the present mine workings and the *location of the proposed exploration work* as related to geologic features, such as contacts, veins, ore-bearing beds, etc.

5. Furnish an itemized list of existing facilities, buildings, installations, and fixtures with a statement of the cost of any necessary rehabilitation or repairs to put into useful and operable condition.

6. Furnish a detailed list of additional facilities, buildings, and fixtures to be purchased, installed, or erected by you, with the estimated cost of each item.

Form MF-103
(Revised June 1951)

UNITED STATES DEPARTMENT OF THE INTERIOR
DEFENSE MINERALS ADMINISTRATION

Budget Bureau No. 42-R1035.1.

MF-103 Should Be Filed With General Technical Data Form MF-100

APPLICATION FOR AID FOR AN EXPLORATION PROJECT PURSUANT TO MINERAL ORDER 5, UNDER DEFENSE PRODUCTION ACT OF 1950

Not To Be Filled in by Applicant

DEPARTMENT OF THE INTERIOR
Defense Minerals Administration
RECEIVED
JAN 2 1 1952

Docket No. DMEA-2346
Date Received 1-25-52
Amount $
Participation (Government %)

Name and address of applicant

Homer Roark
150 - 15th St
Ely Nevada

Date Jan 8th 1952

If you have already filed MF-100, give date filed ....., type of assistance requested Exploration,

DMA Docket Number (if available) .....

INSTRUCTIONS

Read Mineral Order 5, Regulations Governing Government Aid in Defense Projects, before completing this application. Submit four copies each, of the signed application form, General Technical Data Form MF-100, and answers to questions as specified, to Defense Minerals Administration, Department of the Interior, Washington 25, D. C., or to the nearest field executive office thereof, with your name and address on each sheet of the application and all accompanying papers. If you have previously filed MF-100, it is not necessary to file it again. However, you should indicate in space provided above the type of assistance previously applied for (loans, procurement contracts, etc.) and DMA Docket Number, if available. *When a question is inapplicable it should be so stated in the form.* Additional sheets should be attached in answering any questions or in supplying additional information. IF YOU CANNOT ANSWER A QUESTION, SO STATE.

1. (*a*) Give a description of the real property that will be in any way involved in the exploration project, including any existing mine or operating property.

   (*b*) If you are not the owner of the property, submit a copy of the lease, purchase option, or other agreements under which you are authorized to operate the property with each copy of your application.

   (*c*) Give the legal description of the exact parcel, plot, or area upon which the exploration is to be conducted.

   NOTE: (1) If both areas are the same, so state. The only obligation to repay the Government is from the net earnings from any commercial discovery made in the area specified in (*c*) above in which the exploration is to be conducted, and the expenditure of funds which may be charged as costs of the project must be limited to that area or to work necessary to perform the exploration in that area.

   (2) If applicant is not the owner of the property or if there are any liens or encumbrances against the property, copy of agreements of claimants, lienors, encumbrances, and lessors subordinating their interests in the property to the interest of the Government under the Exploration Project Contract will be required for attachment to the Contract.

2. (*a*) What metals or minerals do you expect to find?

   (*b*) Furnish statement of the geologic features of your property, giving type of ore deposit and reasons for expecting to find commercial ore bodies. Illustrate with maps or sketches. If you have a geologic or engineering report, or assay maps showing width and grade, please send them with application, stating whether or not you wish to have them returned.

The information requested in questions 3, 4, 5, 6, 7, 8, and 9 below should be answered specially and in detail, as this information will be attached to and incorporated as part of the Exploration Project Contract, if such contract is entered into with you by the Government.

ANSWER EACH QUESTION ON SEPARATE SHEETS OF PAPER AND SUBMIT A COPY OF EACH ANSWER FOR EACH COPY OF YOUR APPLICATION.

3. (*a*) Describe fully the proposed work and give the total cost of the project.

   (*b*) State the time required to start the project and to complete it.

4. Submit a map or sketch of the property involved showing a plan (and cross section, if needed) of the present mine workings and the *location of the proposed exploration work* as related to geologic features, such as contacts, veins, ore-bearing beds, etc.

5. Furnish an itemized list of existing facilities, buildings, installations, and fixtures with a statement of the cost of any necessary rehabilitation or repairs to put into useful and operable condition.

6. Furnish a detailed list of additional facilities, buildings, and fixtures to be purchased, installed, or erected by you, with the estimated cost of each item.

7. Furnish a detailed list of operating equipment, separated into items to be—

   (*a*) Rented

   (*b*) Purchased

   (*c*) Furnished by you

   with the rental, purchase price, or depreciation of each item, as the case may be, to be charged as a cost of the project.

8. Furnish an itemized schedule of labor, by numbers and classes (miners, muckers, etc.) and of supervisors by numbers and positions, with the maximum wages or salaries to be paid to each.

9. Furnish a detailed list with estimated cost of each item for materials, supplies, engineering, assaying, accounting, power, water, utilities, and any other items not provided for above.

10. (*a*) How much are you prepared to invest in the proposed project?

    (*b*) Is this amount sufficient to pay your part of the cost of the project, in accordance with the regulations on Government participation (Sec. 9 of MO–5)?

11. State any conditions or circumstances regarding the property not sufficiently brought out by the foregoing questions.

CERTIFICATION

The undersigned company, and the official executing this certification on its behalf, hereby certify that the information contained in this form and accompanying papers is correct and complete to the best of their knowledge and belief.

U. S. GOVERNMENT PRINTING OFFICE 16—64067-2

1. (a) This group of eight mineral claims are located on U.S. Government land in White River National Forest, Nye County, Nevada which I have legally discovered, filed, and recorded and performed all necessary requirements. Primarily only three of these claims will be involved in the Exploration Work for which I am herewith making application for loan. They are described as follows: JO JANE NO. 1, NO. 2, and NO. 3 lying in line on The Vein in a north-east and south-west direction, consisting of 4,500 feet in length and 600 feet in width.

The Exploration Work will start approximately in center of the middle of NO. 1 Claim, the original discovery, at a point where ore vein extends above surface. This vein is approximately five feet in width, consisting of quartz veins and lime stone which are mineralized from wall to wall assaying 0.93 WO_3 and other minerals. This Vein runs along and against a green stone diabase dike, the foot wall. This dike can be traced the full length of these three claims, no doubt much farther. The ore Vein appears at various places along the course of the dike. The over-burden prevents it from showing only in a few places in a distance of approximately one thousand feet on mountain side. The diabase dike is approximately ten feet wide which cuts diagonally across a rather large mineralized mountain as per drawing. The other five claims lie to the East and higher on the mountain and are recorded under the name of LOST CABIN, NO. 1, NO. 2, NO. 3, NO. 4, NO. 5. This group was at one time WORKED

1. (a) (Continued)
and was known to produce very high grade lead, copper and silver. They show very good grade "Scheelite" also. They were abandoned at an early day due to transportation and inaccessibility; it was a pack-mule proposition.

I am enclosing assays taken from Vein at original discovery point at surface of JO JANE NO. 1. This ore Vein lies between two very distinct walls, the diabase dike being the foot wall; the other is a form of felsite which is the hanging wall and makes up the surrounding rock on this mountain. The sample of Scheelite that was assayed 0.93 and 0.91 was a fair one taken across face of five foot vein in a proper manner, at the surface. WO_3 also shows at the various other out-croppings along the course of the Vein above and below on this rather steep mountain.

2. I expect to find high-grade "Scheelite" Tungsten principally and perhaps lead, copper, and silver at a reasonable depth. I am confident we will uncover a large deposit of high-grade Tungsten ore due to all indication at the surface. Since having this assay run, we have prospected the Vein lower down the mountain which shows much more promising; also numerous stringer Veins, out-crops and float over. this mountain shows Scheelite under the ultra violet lamp of good grade. I have not had a geologic or engineering report made of this property, but I have had several mining men to look it over, including one man who has operated Tungsten Mines throughout the country since 1915 and who is considered one of the best authorities on Scheelite in this section of the country. He says it's the best prospect he has seen in a long time.

It's my opinion that the main reason why these claims have not already been developed is due to their remote location. There are no live stock run in this canyon; it is known as an unused part of the White River National Forest; consequently, no one ever rides there. It is just so situated that big game hunters seldom hunt in it, although it has been locally known for years that lead, copper and silver of a very high grade was packed by mules from these claims in the early days but due to the inaccessibility of them, no one did anything about it. However, no one knew that Tungsten existed in them. They are located 20 miles from oil highway, ten miles from gravel County highway. This last ten miles is an old logging road built in

2. (Continued)

early days from the gravel highway up Broom Canyon to base of mountain within one-quarter mile of JO JANE Tungsten property and to point of Exploration.

3. (a) Repair old road from gravel highway up Broom Canyon to base of mountain 10 miles. 3 days with bulldozer, 10 hr. days, $10.00 per hour. $ 300.

(b) Build new road approximately one-fourth mile from Canyon floor to point where Exploration Work will begin. 7 days with bulldozer $10.00 per hour, 10 hr. days. $ 700.

(c) Inclind shaft on the Vein. This is a very difficult question to answer, as we all know, but due to the fact that I have milling ore WO_3 at the surface of around 1% and shows even promise of getting better, my honest opinion is that we should encounter an ore body or large deposit of high-grade Tungsten within one hundred feet; figuring thirty dollars per foot for running this tunnel, including one miner, one mucker, supervising the work myself; powder, gasoline, etc. - Five-thousand dollars.

(d) Ready to start Exploration Work immediately upon approval of this loan. Including all preliminary work, the project should be completed within 90 days.

5. There are no existing facilities, buildings, etc. on this property at present. I am using trailer house now and will provide tents as housing for workers while doing the Exploration Work and until I am in production.

Owing to the fact that I am starting in milling ore I will need ore bin. There is sufficient timber on the property to build most of it with the exception of doors, iron reinforcements and the labor involved.

Near as can be estimated, including material and labor $ 700.

Material	$ 160.00
Labor	540.00

6. As I understand the purpose of this loan is for Exploration Work only, and not for the purchase of items that could be done without during Exploration, which could be purchased after, or when, if ever, the project is in production.

Therefore, I am listingfacilities, material, etc. that I will actually need while I am developing this property. I am trying to keep the cost of this project within my means as much as possible, as I realize this money will have to be paid back to the Government.

7. List of Equipment to be Rented

1 Denver Gardner Air Compressor with Hose drills complete, except drilling steel @ $250. per month - 90 days $ 750.00

8.

Labor Schedule

1 Miner - Wages	$1.75	per hr.-	8 Hr.	Day-	$14.-	90	days	$ 1,260.
1 Mucker "	1.25	" "	"	"	"	10.	" "	900.
1 Supervisor "	1.75	(Myself)	"	"	"	14.	" "	1,260.
1 Carpenter "	2.50	per hr. -	"	"	"	20.	15 "	300.
1 Carpenter's Helper	2.00	" " -	"	"	"	16.	" "	240.
								$ 3,960.00

Material to be Purchased

1 Mine Car, Air Pipes Rails drill steel	$ 250.00
1 ton blasting powder, 40%, # 23.50 cwt.	470.00
500 foot fuse @ $1.50 per 100 ft.	7.50
2 Boxes @ $2.50 per box of 100 caps	5.00
Gasoline for Compressor, 20 gal. per day, 30 cents per gal., 1800 for 90 days	540.00
Engineering	270.00
Assaying	50.00
Developing spring for Camp and Compressor water	500.00
2 doors, iron reinforcements, hinges, and lumber for ore bin	160.00

10. I am prepared to handle the twenty-five per cent of the cost of the project as required in accordance with the regulations on Government participation.

The exact amount that I am asking for is $7,142.50. TOTAL
LESS MY 25% — 1,785.60
$ 5,356.90

11. Enclosed find assays sheets, location notices and photographs of the JO JANE mining Claims NO. 1, NO. 2, NO. 3.

I would appreciate it very much if you would return these items back to me. I would like to mention the fact that a company known as Baltimore Camas Mining Co. has agreed to build a Custom Tungsten Mill here in Ely this spring which will be a great advantage for the small local mine operators.
