Gentlemen:

RE: Your letter 6/2/61

Replies are in accordance with your request.
1(a). I made a personal appearance at the First National Bank of Oregon, Union Finance Company and Klosterman & Joachims requesting financial assistance. The situation was discussed in detail and in each instance, in view of the fact that the Corporation and me personally are out of funds and security very, very limited, (I'm sure you are aware of the Banking and Finance Company regulations and understand that their loans are not made in cases like mine) and inthe case of Klosterman & Joachims, they felt that such an operation was too foreign to them to enter into this project.

1(c). Attached.
3.(a). Attached.
(c). I have made every effort to obtain figures and the best I have been able to obtain is a comment from the State of Oregon Geoligist Mr. Mason, which was that placer mining is so secretly done in most instances it is not possible to get records-But he did state thatthe Althouse Creek Area has been know to have produced an enormous amount of gold in years gone by. In fact it is recognized as being the greatest producing area in Oregon. The only reference he could give was: Northwest Hand Book Published in Spokane (no reference as to Spokane, Wash or what) 1918 Page 297 by Sidney Norman. I presume that book is available to your Agency. I cannot locate it but Mr. Mason believes this book will bear out his statement as to the Mineral in the Althouse area.
2. (b) out of order. Legal description. E½SW¼, Sec 4, T 4 R 1 So. R. 7 W. WBEM.
3. (e) Attached.
3.(g). The reports were mailed you in single copies and that were the only ones I had. Could you be kind enough to photostat copies and please return these to me.
5.(a) The attachment referred to is only an unsured obligation owing to B. F. Randolph, Cage Junction. It was work done by him as he felt the project to be sound and he would get considerable more work. This should not have been reported as an attachment as it is not an attachment.
5. (b) Attached. PLEASE RETURN AS SOON AS POSSIBLE.
7. Attached.
The key to this operation is the building of the road and if given your assistance, this project would certainly help the labor situation as well as the Government in the development of this mining operation. This project I'm sure would warrant one of your men to meet with me and personally inspect this project.

I am surely looking forward to a favorable quick reply. I'm sure that if you inquire as to the potential in this property you will find that those who know mining in Oregon will say this is as fine a property as can be found.

Yours truly,
Consolidated Mining Co. Inc. By Louis Pearson, Pres

9. Your letter 6/2/61. I mailed you the only copy I had. Please photostat & return copy to me.
