Re: Docket No. DMEA-4119 (Zinc)
The New Jersey Zinc Company
Talbot Area
Jefferson and Hamblen Counties,
Tennessee
Contract No. Idm-E936

Dear Mr. Goodwin:

Reference is made to your terminated exploration contract with the Government.

We sincerely regret that the work performed did not result in a certification of discovery or development under the provisions of the contract. Your attention is called to item 4 of the Termination Agreement dated April 19, 1957, covering reacquisition of lands covered by the contract. Also to the contract provisions which require the Operator to keep and preserve records for the period indicated.

Your interest in the Defense Minerals Exploration Administration exploration program and participation therein are fully appreciated.

Sincerely yours,

C. O. Mittendorf

Administrator

OFFICE OF MINERALS EXPLORATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF ROYALTY REVIEW

I have reviewed the files of the Washington office pertaining to Contract Idm-E936, Docket DMEA-4119 (zinc), dated March 30, 1956, with

The New Jersey Zinc Company
160 Front Street
New York 38, New York
and
Jefferson City, Tennessee

for the purpose of determining the amount of royalty payable to the U. S. Government on sales of minerals from property referred to as the Morristown Sector-Talbott Area located in Jefferson and Hamblen Counties, Tennessee, during the period March 30, 1956, through June 30, 1959.

In accordance with paragraph 4 of a Termination Agreement dated April 19, 1957, royalty is payable on all minerals produced from the land described in Article 2 of the contract, should the Operator or any affiliate or subsidiary hold or reacquire an interest in any of such land or production therefrom, for a period of 30 years from the date of the contract or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first. A Report of Review dated May 13, 1957, indicated accepted costs under the exploration contract amounting to $71,331.62 with the Government's contribution on a 50 percent basis being $35,665.81.

The status of the project, the scope of review, and the reasons therefor are stated on page 2.

This review established no sales subject to the Government's royalty for the period. Accordingly, as of June 30, 1959, the royalty account of this project was found to be:

Total Royalty Payable	$ -0-
Total Royalty Paid	-0-
Balance of Royalty Due	$ -0-

March 20, 1962

E. D. Talbert, OME Auditor

STATUS OF PROJECT, SCOPE OF REVIEW
AND REASONS THEREFOR

Paragraph 4 of the Termination Agreement provides that, should the Operator or an affiliate or subsidiary hold or reacquire an interest in any of the land under the contract or any production of minerals therefrom, the Operator shall pay, as principal if the producer or as surety if not the producer, a percentage royalty on all minerals mined therefrom. The minerals specifically include limestone and dolomite products resulting from the processing of ore.

At the time the contract was executed the Operator was in possession of the mineral rights in the land thereunder by virtue of options to purchase such rights in 21 tracts aggregating 2,244 acres. Amendments Nos. 1 and 3 added 21 tracts aggregating 1,185.6 acres. Generally, such options were for a period of one year with extension privileges. The usual requirement for execution of Consents to Lien was waived.

Exploration work under the contract was terminated on February 28, 1957, and the Operator allowed its options to expire. No ores were produced during the period of the exploration work and examinations of the property by field representatives through the period covered by this review disclosed no further activity on the property.

This review was made in lieu of an on-site audit of the Operator's accounts and records for the following reasons:

(1) No ores were produced during the period covered by this review;

(2) The property has been inactive since February 1957; and

(3) The administrative cost to the Government of an on-site royalty audit at this time would be excessive in relation to the amount of possible royalty which might be disclosed.

DEFENSE MINERALS EXPLORATION ADMINISTRATION
CONTRACT ADMINISTRATION AND AUDIT DIVISION

REPORT OF REVIEW

I have reviewed the Monthly Reports of:

The New Jersey Zinc Company
Jefferson City, Tennessee
and
160 Front Street
New York 38, New York

pertaining to Exploration Project Contract No. Idm-2936, DMEA No. 4119, including Amendment Nos. 1, 2, and 3, and a Termination Agreement dated April 19, 1957, for the months of May 1956 to February 1957, inclusive, covering a project for the exploration of zinc on property, known as the Morristown Sector, Talbott Area, located in Jefferson and Hamblen Counties, Tennessee.

My review included an examination of the Monthly Reports (Forms MF-104) and supporting documents attached thereto, comparison of the costs claimed with the contract and pertinent schedules, verification of work performed by reference to Field Team reports and correspondence, and a determination of the reasonableness and propriety of the costs.

This review was made in lieu of a final audit of the Operator's accounts and records for the following reasons:

(a) the Monthly Reports were supported by documentary proof of that portion ($61,945.70) of the costs which covered work performed at unit rates under independent contract (per summary attached);
(b) the balance ($9,385.92) of the costs incurred were under a contract provision for payment by the Government on the basis of fixed unit costs of work actually performed; and
(c) the administrative cost to the Government of an audit would be excessive in relation to the estimated amount of possible disallowances thereunder.

The review disclosed the following facts in regard to the amount paid or to be paid the contractor:

Total cost as billed by Contractor		$71,331.62
Exceptions:		
Prior to this review	$ -0-	
Herewith	-0-	-0-
Total Accepted Cost		$71,331.62

The contract calls for a 50 percent participation of exploration expenses by the United States Government. Therefore, payment to the contractor by the Government in the amount of Thirty-five thousand six hundred sixty-five and 81/100 Dollars

$35,665.81

is considered valid and proper, provided that the Regional Executive Officer, the Administrator, or other competent official has accepted or will accept the project as having otherwise met the terms of the contract.

May 13, 1957

E. D. Talbert, Auditor

TERMINATION AGREEMENT

It is agreed this 19th day of April, 1957, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and The New Jersey Zinc Company, hereinafter called the "Operator," parties to that certain Exploration Project Contract Idm-E936 (Docket No. DMEA-4119), dated March 30, 1956, as amended, hereinafter called the "Contract," that:

1. Effective February 28, 1957, the Contract and all obligations of the parties thereunder, except as otherwise herein expressly provided, shall be and are hereby terminated.

2. The Government shall contribute only to the allowable costs and fixed unit costs of work performed prior to said effective date.

3. The Operator shall promptly perform all winding-up and settlement actions provided for in the Contract, including the rendering of the final report and final account, and shall keep and preserve records as required by the Contract.

4. Should the Operator or any affiliate or subsidiary hold or reacquire an interest in any of the land described in Annex I of the Contract or any production of minerals therefrom, the Operator shall pay royalty to the Government as set forth in Article 8 of the Contract, as amended by provisions (d) and (e) of Article 13, on any production made from the date such interest is acquired, to the extent of the interest held, the same as though certification of discovery or development had been made by the Government.

5. The Operator hereby releases and agrees to save the Government harmless from all claims or demands under or arising out of said Contract, except as otherwise provided in this termination agreement.

IN WITNESS WHEREOF, these parties have executed this agreement as of the day and year first above written.

EXPLORATION PROJECT CONTRACT
THE NEW JERSEY ZINC COMPANY
DOCKET No. DMEA-4119

AMENDMENT No.3

It is agreed this 15th day of November, 1956, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and the New Jersey Zinc Company, that Exploration Project Contract Idm-E936 (Docket No. DMEA-4119), dated March 30, 1956, and amended May 7 and June 1, 1956 is further amended as follows:

Effective as of the date of the original contract, March 30, 1956, there is hereby added to the land referred to in Article 2 of the contract form, and described in Annex I by reference to the property map, Figure 2, the following parcels of land similarly held under option agreement:

Name of Property Owner	Acreage
Greene, Horace	19
Breeden, Mrs. Oma	76
Massengill, W. C.	45
Massengill, Mrs. Roe	9
Haag, Frank	15
Ford, Mrs. Mamie	50
Kinsler, Edward	15
Kinsler, Mrs. Fannie	20
Moore, Austin B.	18
Smith, Lee	30

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, or the cost of any item of work.

Executed in sextuplicate the day and year first above written.

EXPLORATION PROJECT CONTRACT
THE NEW JERSEY ZINC COMPANY
DOCKET NO. DMEA-4119

AMENDMENT NO. 1

It is agreed this 1st day of June, 1954, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and The New Jersey Zinc Company that Exploration Project Contract No. Idm-8934 (Docket No. DMEA-4119), dated March 30, 1954, as amended, is further amended as follows:

1. In the fourth paragraph of Exhibit "A", the second sentence is revised to read as follows:

> All core containing significant mineralization shall be properly sampled and the samples assayed for zinc.

2. In Exhibit "A", the second item under "Fixed Unit Costs" is revised to read as follows:

> 450 samples to be assayed @ $1.00/sample 450.00

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, or the fixed unit cost of any item of work.

EXPLORATION PROJECT CONTRACT
THE NEW JERSEY ZINC COMPANY
DOCKET NO. DMRA-4119

AMENDMENT No. 1

It is agreed this 7th day of May 1956, between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, and The New Jersey Zinc Company, that Exploration Project Contract Idm-8936 (Docket No. DMRA-4119), dated March 30, 1956, be amended as follows:

Effective as of the date of the original contract, March 30, 1956, there is hereby added to the land referred to in Article 2 of the contract form, and described in Annex I by reference to the property map, Figure 2, the following parcels of land similarly held under option agreement:

Name of Property Owner	Acreage
J. T. Cline, Mayne Cline, Jack F. Cline and Agnes Cline	312
Helen Quarles James, Sam H. James	102
Lloyd Welch and Edna Welch	30
J. S. Walker and Myrtle Pearl Walker	45
Robert E. Smith and Willie Mae Smith	43
Charlie J. P. Smith and Lizzie Smith	100
Henry Hopkins and Viola S. Hopkins	52.6
J. A. Eller and Nell Eller	13.5
Nellie Carmichael	40.5
Raymond E. Smith and Farrie Smith	120
Olive Smith	30

This amendment shall not be construed to increase the estimated total cost of the project, the aggregate total amount which the Government may be required to contribute, or the cost of any item of work.

Executed in sextuplicate the day and year first above written.

CLINE and wife, AGNES CLINE, of Jefferson County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the parties of the first part grant unto the party of the second part for a period of one year from June 1, 1956 with the privilege of extension for a further period not to extend beyond June 1, 1958, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises.

SITUATE in the Fourth and Ninth Civil Districts of Jefferson County, Tennessee being all the farm lands of the Owners, containing 512 acres, more or less, and bounded generally as follows:

On the North by Swann, Kyle, Underwood and Miller;
On the East by Porter Massengill, Bill Massengill
and Sherman Hazelwood;
On the South by J. R. Line, R. J. May, H. L. May
and Newman; and
On the West by Lewis Murph and Lauderback.

Owners acquired title to the above described premises by Deed of Rufus McElhaney and wife, dated April 24, 1947 and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 94, Pages 454-55.

Together with the right to prospect for, mine, mill and remove the same; water rights, the right of ingress and egress, and the right to purchase surface acreage to the extent of twenty acres, in accordance with the terms of an agreement of even date herewith entered into between the parties hereto. And the parties of the first part also grant to the party of the second part during said period the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water and to remove samples, all accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the Agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and inure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owners and parties of the first part have hereunto set their signatures the day and year first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 28th day of May, 1955, by and between JOHN CARTER (MIDOWER), NELLIE CARTER MORRIS, JAMES B. CARTER and wife, ETHEL PATE CARTER and DAVID C. CARTER, of Jefferson County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Zinc Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

WHEREAS, the Owners and the Zinc Company entered into a certain Contract and Agreement under date of September 24th, 1952. The short form thereof of even date between the parties appears of Record in the Register's Office for Jefferson County, Tennessee in Misc. Book 6, Page 17. Both are incorporated by reference, and made a part hereof, as fully as if copied verbatim herein, with respect to certain farm lands of the Owners Situate in the Fourth Civil District of Jefferson County, Tennessee and bounded generally as follows:

On the North by the lands of Mrs. C. C. James and Mrs. D. M. Henry;
On the East by the lands of Kyle Heirs;
On the South by the lands of R. T. Jones; and
On the West by the lands of Williams, containing 47 acres, more or less.

For title reference see the following deeds of conveyance of record in the Register's Office for Jefferson County, Tennessee: Deed Book 55, Page 505; Deed Book 97, Page 98; Deed Book 97, Page 99.

WHEREAS, said Contract and Agreement expires on September 26th, 1955 and the parties have mutually agreed to an extension of the terms and provisions thereof.

NOW, THEREFORE, in consideration of the sum of ONE ($1.00) DOLLAR cash and other good and valuable considerations, the Owners grant an extension of said Contract and Agreement of September 26th, 1952 for an additional period of two years, expiring on September 26th 1957.

The terms of this Extension Contract and Agreement are fully set out in an agreement of even date hereewith, which is here referred to and made a part hereof as if fully set out at length. Otherwise than specified therein all the provisions of the aforesaid Contract and Agreement of September 26, 1952 shall be in full force and effect during said extended period.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owners and parties of the first part have hereunto set their signatures the day and year first above written.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 21st day of February, 1956, by and between LLOYD WELCH and wife, EDNA WELCH, of Jefferson County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in theState of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the parties of the first part grant unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for further periods not to extend beyond February 21, 1959, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises:

SITUATE in the Ninth Civil District of Jefferson County, Tennessee, consisting of two certain tracts of land, adjoining each other and the lands of Mel Rickard, Bert Moore, Henry Hopkins, Cansler and Charlie Smith, more particularly described as follows:

TRACT ONE:

BEGINNING at a black oak in the "Grant Old Line"; thence N. 30 W. 55 poles to a rock in said line Now A. A. Carter's corner; thence W. 21 poles to a rock in Carter's and Julia E. Bacon's line; thence S. 30 E. 7 poles to a rock in J. E. Bacon's line, and in the line of the 159-1/2 acre survey; thence N. 67 deg. E. 18-7/8 poles to the BEGINNING, containing 8 acres more or less.

TRACT TWO: BEGINNING on a stone, a corner of "First Tract; and in the division line of Abram Watkins and O. R. Watkins; thence S. 45 deg. West with the line of Charlie Smith the distance of 1214 feet to a rock, a corner this day established by the parties hereto; thence in a Northernly direction, a new line this day established by the parties hereto, with the line of A. H. Hazelwood the distance of 750-1/2 feet to a rock; thence N. 45 E. with the old A. G. Watkins or A. J. Duncan and A.P.C. Bettis line, the distance of 1035 feet to a stone in the division line of the old A. G. Watkins and O. R. Watkins line; thence S. 30 E. to a rock, the Northwest corner of "First Tract", thence continuing S. 30 E. with the Eastern boundary of First Tract to the point of BEGINNING, containing 22 acres more or less.

Owners acquired title to the above described premises by Deed of A. H. Hazelwood (widower), dated February 26, 1946, of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 95, Page 442.

Together with the right to prospect for, mine, mill and remove the same; water rights, the free and uninterrupted right of ingress and egress, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto.

And the parties of the first part also grant to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the Agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owners and parties of the first part have hereunto set their signatures the day and date first above written.

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the party of the first part grants unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for further periods not to extend beyond February 28, 1959, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises.

SITUATE in the Ninth Civil District of Jefferson County, Tennessee and bounded and described as follows:

> BEGINNING on a rock in the junction of the Talbotts road, corner with Burnett and Ingram, thence with the road and Ingram's line N. 45-30 E. 1039 feet to a rock in the road, Ingrams corner; thence S. 53 E. with Bacon and G. P. Smith line 647 feet to a rock, G. P. Smiths Corner; thence with Smiths line S. 45-30 W. 183 feet to a rock, corner of a 16 acre tract and corner of a 23 acre tract; thence continued with G. P. Smiths line S. 52-45 E. 1190 feet to a rock in a sink, near old well, corner with said Smith and T. O. Breeding thence with Breedings line S. 39-30 W. 967 feet to a rock in the Talbotts road; thence with the Road N. 49-30 W. passing the corner of the 23 acre tract at 1300 feet, in all 1938 feet to the BEGINNING containing 40.51 acres.

Olen Carmichael and wife, Nellie Carmichael acquired title to the above described property as an estate by the entirety by Deed of the Morristown Trust Company, dated February 1, 1930 and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 73, Page 162, to which reference is made. The said Olen Carmichael being now deceased, leaving Nellie Carmichael sole owner as surviving tenant of an estate by the entirety.

Together with the right to prospect for, mine, mill and remove the same; water rights, the free and uninterrupted right of ingress and egress, and the right to purchase the entire surface area of the above described premises, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto.

And the party of the first part also grants to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the Agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owner and party of the first part has hereunto set her signature the day and date first above written.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 17th day of April, 1956, by and between RAYMOND B. SMITH and wife, FARRIE SMITH of Jefferson County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the parties of the first part grant unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for further periods not to extend beyond April 17, 1959, upon payment of sums of money agreed upon the exclusive right and option to purchase all minerals, morals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises:

SITUATE in the Ninth Civil District of Jefferson County, Tennessee consisting of three tracts of land described as follows:

TRACT ONE : BEGINNING on a post planted, corner to tract of land conveyed to Gertie Collett, in the line of Stoke Walker, thence with cross fence and line of tract conveyed to said Collett, to a stake in the line of Knight, corner to said Collett; thence with the line of Knight to the line of Oakley to the line of Walker; thence with the line of Walker to the point of BEGINNING containing 16 acres more or less.

TRACT TWO BEGINNING on a stone in the center of the pike near the pond; N. 3-3/4 W. 30 poles to a stone; thence N. 21-1/2 W. 19 poles to a stone, S. 42 W. 1-1/2 poles to the center of the pike; then S. with the center of the pike 45 poles and 11-1/2 poles to the BEGINNING, 1 acre more or less.

TRACT THREE : BEGINNING at a rock set in the ground on the West edge of the Talbott's road, a short distance Northwest of the widow Line's dwelling; thence with her line S. 88-1/2 E. 24-4/5 poles to a rock, corner with same; thence S. 72 E. 2 poles to a rock; thence along a road and her line S. 52 E. 20 poles to a rock; thence with the same S. 30-1/2 E. 15 poles to a rock, corner of W. F. Breeden; then with his line N. 65 E. 45 poles to a rock; N. 12-4/5 poles to a rock in J. A. Line's line; then with his line West 20 links to a rock; then N. 15-1/2 E. 135 poles and 17 links to a rock, corner to J. F. Knowling; thence with his line N. 77 W. 61 poles to a rock, his corner; thence with same S. 53-3/4 W. 68-1/2 poles to a rock, Collett's corner; thence with his line S. 19 E. 11 poles to a rock, his corner; thence with same S. 48-1/2 W. 44 poles to a rock in center of Dandridge Road, S. 20-1/4 E. 11 poles to a rock; S. 3-3/4 E. 35 poles to a rock; S. 25 E. 27 poles to the BEGINNING, containing 103-1/4 acres.

From tract Two there is excluded 10 acres hereto fore sold and conveyed to Bob Haag under date of June 10, 1937, also 3 acres heretofore sold and conveyed to Robert Estes.

Except fro said exclusions being the same property conveyed to the Owners by the following deeds of conveyance of Record in the Register's Office for Jefferson County, Tennessee as follows: (1) Deed of Oma Davis Breeden, et vir, et al., dated October 21, 1944, Deed Book 94, Page 339-40; and (2) Deed of C. C. Line, et ux., dated January 30, 1947, Deed Book 96, Page 410.

Together with the right to prospect for, mine, mill and remove the same; water rights, the right of ingress and egress, and the right to purchase the surface area to Tract One, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto. And the parties of the first part also grant to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials and rocks of any kind, including limestone, in, under or on all of said premises,

including the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the Agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owners and parties of the first part have hereunto set their signatures the day and year first above written.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 18th day of April, 1956 by and between OLIVE SMITH (one and the same person as Olive Midkiff Smith), of Jefferson County, Tennessee, hereinafter called the Owner, party of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the party of the first part grants unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for further periods not to extend beyond April 18, 1959, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including lime stone, in, under or on the following described premises.

SITUATE in the Ninth Civil District of Jefferson County, Tennessee, consisting of two tracts, both adjoining and making up one boundary, described as follows:

TRACT ONE : BEGINNING on a rock, corner with J. B. Line's corner to Collett's line, thence with Collett and J. W. Smith line Easterly course 56 poles to a rock corner in J. W. Smith line, Northerly course 20 poles to J. P. Knowling line with a fence,

Northerly course 70 poles to a rock corner in said line, thence Westerly course with Smith line 53 poles to a rock corner in J. B. Lines line, thence with Line's line Southeasterly course 22 poles to the BEGINNING, containing seven acres, more or less.

TRACT TWO: BEGINNING on a rock J. B. Lines corner, thence Easterly course 104 poles to a rock in G. P. Smith line and Jess Cline line; thence with Cline's and T. H. Knowling's line 54 poles South to a rock Line Brothers corner and T. H. Knowling corner; thence with Line Bros. line 25 poles Westerly course to a rock corner of Sherman Smith's; thence with Sherman Smith's line 20 poles Northerly course with Sherman Smith's line to a rock corner; thence with Sherman Smith's line Westerly course 52 poles to a rock in J. B. Line's line; thence with said Line's line 35 poles to the BEGINNING, containing 23 acres more or less.

Owner acquired title to the above described premises by the following deeds of conveyance of Record in the Register's Office for Jefferson County, Tennessee as follows: (1) Deed of Sherman Smith, dated March 26, 1931, Deed Book 75, Page 394; and (2) Deed of Sherman Smith dated August 11, 1932, Deed Book 76, Page 238.

Together with the right to prospect for, mine, mill and remove the same; water rights, the free and uninterrupted right of ingress and egress, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto.

And the party of the first part also grants to the party of the second part during said periods the rights to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned agreement. APR 1 3 1956

MF-200
(Revised June 1954)

Docket No. DMEA - 4119

Commodity Zinc

Contract No. Idm-E - 936

UNITED STATES OF AMERICA
DEPARTMENT OF THE INTERIOR
DEFENSE MINERALS EXPLORATION ADMINISTRATION

EXPLORATION PROJECT CONTRACT[1]

It is agreed this MAR 3 0 1956 day of ....., 195...., between the United States of America, acting through the Department of the Interior, Defense Minerals Exploration Administration, hereinafter called the "Government," and [2] The New Jersey Zinc Company, a New Jersey corporation, whose mailing address is 160 Front Street, New York 38, New York, hereinafter called the "Operator," as follows:

ARTICLE 1. *This contract* is entered into under the authority of the Defense Production Act of 1950, as amended. It consists of this form (MF-200), the attached Exhibit "A," Annex I, and 2 maps, Figures 2 and 3.

The Operator shall not transfer or assign this contract or any right thereunder without the written consent of the Government.

ARTICLE 2. *Operator's property rights.*—(a) The land which is the subject of this contract (hereinafter called "the land") is in the State of Tennessee, County(ies) of Jefferson and Hamblen, and is described in Annex I.[3]

(b) The Operator represents and undertakes that:

(1) The Operator is the [4] optionee (see Annex I) of [5] ..... in the land, in possession and entitled to possession for all of the purposes of this contract, under and by virtue of a [6] ....., [7] ..... recorded in Book ....., page ....., official records of said County; and

(2) The Operator's right, title, or interest (whether as owner, lessee, or otherwise) is subject only to the following claims, liens, or encumbrances: None

(c) The Subordination Agreement of the holder of any claim, lien, or encumbrance listed above, and (if the Operator does not hold the legal title) the Consent to Lien of any holder of the legal title

[1] If sufficient space is not provided in any blank, use an extra sheet of paper and refer to it in the blank.
[2] Insert name, and if an organization, its nature (corporation and place of incorporation, partnership with names of partners, etc.).
[3] State on a separate sheet marked "Annex I" the legal description or enough to identify the property, particularly excluding any areas from which the production is not to be subject to the Government's percentage royalty.
[4] Insert "owner," "lessee," "contract purchaser," "locator," etc.
[5] Insert "the entire interest," "the mineral rights," "an undivided one-third," etc.
[6] Insert "deed," "lease," "contract," "location notice," "patent," etc.
[7] If not recorded, so indicate by inserting "un."

of the land (lessor, seller, optionor, etc.), are attached, as follows: Consents to Lien waived.

(d) The Operator shall preserve and maintain his right, title, and interest in the land and his right to the possession thereof for the purposes of this contract, and shall devote the land and all existing improvements, facilities, buildings, installations, and appurtenances to the purposes of this contract. Until the lapse of the time within which the Government may make a certification of discovery or development without any such certification having been made, and after any such certification has been made, the Operator shall neither transfer, convey, nor surrender the land nor any right, title, or interest therein, nor permit nor suffer any claim, lien, or encumbrance thereon, without expressly referring to and providing in the instrument of conveyance, lien, or encumbrance for the preservation of the Government's right to a percentage royalty on production and lien for the payment thereof. If the Government makes no certification of discovery or development within the time limited in Article 8, it shall thereafter have no claim against the land or any production therefrom except for any production referred to in Article 8(b)(1).

ARTICLE 3. *The exploration project.*—The project is a search for indicated or undeveloped deposits of zinc. The work to be performed is described in Exhibit "A." The Operator on or before June 1, 1956, shall commence the work, and on or before September 1, 1957 (unless the Operator's obligation to prosecute the work is terminated—see Article 10) shall either have completed the work or shall have incurred allowable costs (see Article 6) in a sum not less than the estimated total allowable cost set forth in Exhibit "A."

ARTICLE 4. *Performance of the work.*—(a) *Operator's responsibility.*—The work shall be performed with reasonable diligence, efficiently, expertly, in a workmanlike manner, in accordance with good mining standards and State regulations for health and safety and for liability insurance covering employment; and with suitable and adequate equipment, facilities, materials, supplies, and labor, to bring it to completion within the time fixed.

(b) *Independent contracts.*—To the extent that the allowable costs are estimated in Exhibit "A" with express reference to performance by independent contractors on a unit-price basis (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations), the work may be so performed; but if the reference in Exhibit "A" to any such independent contract requires the Government's approval thereof, payments under such contract will not be allowable costs unless the Government gives its written approval of the contract. Any such independent contract shall refer to some specific and identifiable part of the work, and shall be subject to all of the pertinent terms and conditions of this exploration contract; but the Government shall not be considered a party thereto, and its rights under this contract, including the right to terminate its contributions, shall not be affected thereby. Regardless of the provisions of any such independent contract and regardless of the Government's approval thereof, the Government will participate in payments to the independent contractor only on account of work performed in accordance with the provisions of this exploration project contract, and only to the extent that the Government deems the unit prices for the work under the independent contract to be reasonable.

(c) *Government may inspect.*—The Operator shall consult with and inform the Government on all phases of the work as it progresses. The Government may enter at all reasonable times to inspect the work under the contract, and also after a certification of discovery or development to inspect production operations and underground workings. The operator shall provide the Government with all reasonable means of access for such inspections.

ARTICLE 5. *Contribution by the Government.*—The estimated total allowable cost of the project, set forth in Exhibit "A," is the sum of $156,250.00 The Government shall contribute 50 percent of the allowable costs as they are incurred in a total sum not in excess of $78,125.00: *Provided,* That until the Operator has rendered to the Government his final report, and any final auditing required by the Government has been made, and a final settlement of the contract has been made, the Government may withhold from the last

voucher or vouchers such sums as it sees fit not in excess of 10 percent of the estimated total cost of the work or not in excess of the amount of the Government's contribution to the cost of property which is or may become subject to disposal as provided in Article 9(c), whichever is greater. The Government will make its contribution on the basis of the monthly vouchers referred to in Article 7(b), but all payments by the Government are provisional only, subject to audit, until the account between the Operator and the Government is finally audited and settled. "Costs incurred" mean costs that have been paid or have become due and payable, or that in the opinion of the Government have become an obligation. The Government may make payments directly to independent contractors and suppliers for the account of the Operator rather than to the Operator.

ARTICLE 6. *Estimated costs.*—(a) *Categories of costs.*—The allowable costs of the work to which the Government shall contribute are limited to those that are direct, reasonable, necessary, and that are estimated in Exhibit "A" by categories as specified in this article. If any category or subcategory is omitted from the estimate of costs, or if the word "none" is annexed to the listing thereof, costs under such category or subcategory are not allowable. Any excess over any estimate which is indicated as the maximum of any category, subcategory, or item, either as to requirement or related cost, and any excess over the estimated total allowable cost of the work, shall not be allowable. Any excess over the estimate of any category, subcategory, or item, either as to requirement or related cost, not indicated as a maximum shall be allowable within the limit of the estimated total allowable cost of the work. To the extent that excesses over maximums other than the estimated total allowable cost of the work may be necessary for the performance of the work, the Operator shall incur such excesses for his own account without contribution by the Government; but except for any such necessary excesses in categories, subcategories, or items thereunder the Operator is not obligated to incur more than his agreed percentage of the estimated, total allowable cost of the work. **See Article 13**

To the extent specified in this article or in Exhibit "A" the following categories, subcategories, and elements thereof are maximums; but if not so specified either here or in Exhibit "A" they are not maximums, and may be exceeded within the limit of the estimated total allowable cost of the work:

CATEGORY (1)—INDEPENDENT CONTRACTS.—Work to be performed under independent contracts (see Article 4(b)). The estimated total amount of this category and the estimated cost of each unit of work for performance under an independent contract are maximums.

CATEGORY (2)—PERSONAL SERVICES.

Subcategory (a)—Supervision.—All elements of this subcategory (number of supervisors, periods of employment, rates of pay, and total) are maximums.

Subcategory (b)—Technical services.—All elements of this subcategory (number of technicians, periods of employment, rates of pay, and total) are maximums.

Subcategory (c)—Labor.

CATEGORY (3)—OPERATING MATERIALS AND SUPPLIES.—Includes such items as drill bits and steel, explosives, fuel, pipe, power, small tools costing less than $50 each, timber, track.

CATEGORY (4)—OPERATING EQUIPMENT.

Subcategory (a)—Rental.—The number of each object to be rented [6 mine cars, 1 truck], the rate of rental [$100 per month, $5 per hour], and the total of this subcategory are maximums.

Subcategory (b)—Purchases.—The estimated total of this subcategory is a maximum.

Subcategory (c)—Depreciation.—All elements of this subcategory (time periods, rate of depreciation, and subcategory total) are maximums.

CATEGORY (5)—INITIAL REHABILITATION AND REPAIRS.—Estimates under this category include all requirements and related costs, such as labor, materials and supplies, and supervision at a rate not higher than provided for in Category (2), and shall not be duplicated under any other category. The estimated total of this category is a maximum.

Subcategory (a)—Initial rehabilitation and repairs of existing buildings, fixtures, and installations (exclusive of mine workings).—The estimated total of this subcategory is a maximum.

Subcategory (b)—Initial rehabilitation and repairs of operating equipment.—The estimated total of this subcategory is a maximum.

CATEGORY (6)—NEW BUILDINGS, FIXTURES, AND INSTALLATIONS (EXCLUSIVE OF MINE WORKINGS).—Estimates under this category include all requirements and related costs, such as labor, materials and supplies, and supervision at a rate not higher than provided for in Category (2), and shall not be duplicated under any other category. The estimated total of this category is a maximum.

CATEGORY (7)—MISCELLANEOUS.—Repairs and maintenance (other than initial) of operating equipment, analytical work, prints and other reproductions, accounting, Operator's share of payroll taxes, liability insurance covering employment, travel, communications, and any other items of requirement or cost that do not fall within any of the first 6 categories.

THE ESTIMATED TOTAL ALLOWABLE COST of the work is a maximum.

(b) *Nonallowable costs.*—The following costs are not allowable for contribution by the Government:

(1) *Costs of the land,* such as rental, depreciation, depletion, or other cost of acquiring, owning, or holding possession;

(2) *Indirect costs,* such as general overhead, corporate management, interest, taxes (other than payroll and sales taxes), insurance (other than liability insurance covering employment), damages to persons, damages to property (other than necessary repairs or replacements of equipment or other property used in the work);

(3) *Previous work* performed or costs incurred before the date of this contract; and

(4) *Deferred payments.*—Any costs incurred by the Operator under any rental-purchase agreement, installment-purchase agreement, or any agreement for the purchase of goods under the provisions of which payment of the full purchase price is deferred more than 90 days from the delivery of the goods; unless the purchase agreement is approved by the Government in writing.

(c) *Reductions in costs.*—The Operator shall account for and give the Government credit for any incidental benefits, credits, or money received in the ordinary course of business in prosecuting the work (as by salvage or sale of materials or equipment, furnishing of room or board, furnishing of power or services to third persons, rebates or discounts on purchases, etc.), in the same ratio in which the Government contributes to costs; and such amounts shall be treated as a reduction in costs incurred so that they are available for use within the limit of the original estimated total cost. This provision does not apply to receipts from production which are subject to the Government's percentage royalty under the provisions of Article 9.

See Article 13.

ARTICLE 7. *Reports, accounts, audits.*—(a) *Operator's records.*—The Operator shall keep suitable records and accounts of the work performed and of any production in which the Government may have an interest; and shall preserve those with respect to work performed for at least three years after final payment by the Government, and those with respect to production for at least three years after any obligation to pay royalties to the Government has terminated. The Government may inspect and audit said records and accounts at any time, either by itself or by a certified public accountant. If the Government elects to audit said records and accounts relating to the exploration work by certified public accountant, it may do so as a cost of the work to which the Operator shall contribute. The Comptroller General of the United States or his representative, until the expiration of said three-year periods, shall have access to and the right to examine any pertinent books, documents, papers, and records of the Operator. All of the Operator's vouchers and records and accounts relating thereto and the Government's payments thereof remain subject to adjustment until final audit by the Government. If work under this contract is carried on in conjunction with any other operations, or if labor, supervision, services, materials, supplies, equipment, facilities, or other requirements for carrying on the work are also used in connection with other operations, the costs shall be segregated and accounted for on a basis and by methods and accounts that are satisfactory to and approved by the Government.

(b) *Progress reports and vouchers.*—The Operator shall provide the Government with five copies of monthly progress reports in three sections as follows: (1) Operator's Monthly Report and Voucher showing detailed costs incurred during the reporting period; (2) Operator's Unit Cost and Progress Report showing the various types of work performed during the reporting period and costs incurred for each type of work; and (3) a Narrative Report of the work performed during the reporting period including adequate engineering-geological maps or sketches, drill hole logs and locations, and assay reports on samples taken concurrently with advance in mineralized ground. (Forms for reporting under (1) and (2) above will be provided by the Government.)

(c) *Final report.*—Upon completion of the work or termination of the Government's obligation to contribute to costs, the Operator shall furnish the Government with five copies of a final report (in addition to the final progress report and voucher). This final report shall include a geological and engineering evaluation of the results of the work performed under the contract with an estimate of the ore reserves resulting from such work, complete assay data, adequate geological and engineering maps or sketches, and a summary of the work performed and related costs incurred.

(d) *Report of sales.*—The Operator shall provide the Government with suitable accounting and documentary evidence covering all production to which the Government's percentage royalty relates, such as copies of smelter or concentrator settlement sheets, and certified accounts of production and sale or other disposition of production.

(e) *Compliance with requirements.*—If in the opinion of the Government any of the Operator's reports, records, or accounts are insufficient or incomplete, or if the Operator fails to make them, the Government may procure the making or completion of such with suitable attachments as an expense of the work to which the Operator shall contribute. The Government may withhold approval and payment of any vouchers relating to insufficient or incomplete reports, records, or accounts.

ARTICLE 8. *Repayment by Operator.*—(a) *Certification.*—If the Government considers that a discovery or development from which production may be made has resulted from the work, the Government, at any time not later than six months after a sufficient final report and final account (see Article 7) has been rendered, may so certify in writing to the Operator. Such certification shall describe broadly or indicate the nature of the discovery or development.

(b) *Royalty on production.*—The Operator, as principal if the Operator is the producer, or as surety if the Operator is not the producer, shall pay to the Government a royalty on all minerals mined or produced from the land, as follows: (1) regardless of any certification of discovery or development, from the date of the contract until the lapse of the time within which the Government may make such certification, or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first; or (2) if the Government makes a certification of discovery or development, within a period of [illegible] years from the date of the contract, or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first. **See Article 13.**

(c) *Basis for computation.*—The Government's royalty shall be a percentage of the gross proceeds (including any bonuses, premiums, allowances, or other benefits) from the production sold, in the form sold (ore, concentrates, metal, or equivalent), at the point of delivery (the f. o. b. point); *except,* that charges of *the buyer* arising in the regular course of business, and shown as deductions on the buyer's settlement sheets, on account of the cost of treatment processes performed by *the buyer,* sampling and assaying to determine the value of the production sold, and freight paid by *the buyer* to a carrier (not the Operator), shall be allowed as deductions in arriving at the "gross proceeds" as that term is used herein. Any costs of treatment processes, sampling or assaying, or transportation, performed or paid by the Operator or by anyone other than the buyer, are not deductible in arriving at the "gross proceeds" as that term is here used. The term "treatment processes," as here used, means those processes (such as milling, concentrating, smelting, refining, or equivalent) applied to the crude ore or other production after it is extracted from the ground, to put it into a commercially marketable form; excluding fabricating or manufacturing. **See Article 13.**

(d) *Unsold production.*—If any production (ore, concentrates, metal, or equivalent), after the lapse of six months from the date the ore was extracted from the ground, remains neither sold nor used by the Operator in integrated manufacturing or fabricating operations (for instance, if it is stockpiled), the Government, at its option, as long as it so remains, may require the computation and payment of its royalty on the value of such production in the form (ore, concentrates, metal, or equivalent) it is in when the Government elects to require computation and payment. If any production is used by the Operator in integrated manufacturing or fabricating operations before the Government makes its election, the Government's royalty on such production shall be computed on the value therof in the form in which and at the time when it is so used. "Value" as here used means what is or would be gross income from mining operations for percentage depletion purposes in Federal income tax determination, or the market value, whichever is greater.

(e) *Percentages of royalty.*—The percentages of the Government's royalty shall be as follows:

One and one-half (1½) percent of amounts ("gross proceeds" or "value") not in excess of eight dollars ($8.00) per ton of production in the form in which sold, held, or used, plus one-half (½)

percent for each additional full fifty cents ($0.50) by which such amounts exceed eight dollars ($8.00) per ton, but not in excess of five (5) percent of such amounts.

(For instance: the royalty on an amount of five dollars ($5.00) per ton would be one and one-half (1½) percent; on an amount of ten dollars ($10.00) per ton, three and one-half (3½) percent.)

(f) *Time for computation and payment.*—The Government's royalty shall be computed and paid currently upon each lot sold, held, or used in integrated operations, as the case may be, as above provided in this article.

(g) *Lien for payment.*—To secure the payment of its percentage royalty, there is hereby granted to the Government a lien upon the land or the Operator's interest in the land and upon any production of minerals therefrom, until the royalty claim is extinguished by lapse of time or is fully paid.

(h) *Notice to purchasers.*—The Operator shall give notice of the Government's claim for royalty to any purchaser of the production, and shall authorize and direct such purchaser to pay the royalty directly to the Government and to furnish the Government with copies of the settlement sheets. If the records of any production and sales or other disposition of production, whether the production is by the Operator or by others, are not made available to the Government, the amount of the royalty may be estimated by the Administrator, Defense Minerals Exploration Administration, or his successor, and his estimate thereof shall be final and binding upon the Operator.

(i) *No obligation to produce.*—Nothing in this contract is to be construed as imposing any obligation on the Operator or the Operator's successor in interest to engage in any production operations.

(j) *Government not obligated to buy.*—Nothing in this contract shall be construed as imposing any obligation on the Government to purchase any minerals mined or produced from the land.

ARTICLE 9. *Interests in purchased property.*—(a) *Title and ownership.*—All costs under this contract shall be incurred by the Operator in the Operator's own name and for the Operator's own account; but any property acquired to the cost of which the Government contributes shall belong to the Operator and the Government jointly in proportion to their respective contributions, although title thereto shall be taken in the name of the Operator.

(b) *Preservation of property.*—Until the final disposal of any property in which the Government has an interest the Operator shall preserve and protect same for the best interest of the Government, any reasonable and necessary costs thereof to be treated as an allowable cost of the project. After the completion of the work or termination of the Government's obligation to contribute, or when such property is not in use for or needed for the work, the Operator shall neither use it without the written consent of the Government nor without paying a reasonable rental to be fixed by the Government for its interest.

(c) *Disposal of property.*—Upon the completion of the work or termination of the Government's obligation to contribute to costs, or when the property is no longer needed for the work, the Operator shall promptly dispose of salable or salvageable property in which the Government has an interest for the joint account of the Government and the Operator, either by return to the vendor, by sale to others, or purchase by the Operator or the Government at a price at least as high as could be obtained from others, unless the Government in writing waives its interest in any such property. Without advance approval of the sales price by the Government the Operator shall not sell at any price any item of property the cost of which was more than $500, and shall not sell at less than 25 percent of the purchase price any item of property which cost $500 or less. The Government, in lieu of approving the sales price for any such item, may itself purchase the item at the best price which the Operator is able to obtain or himself cares to give. Property remaining upon any termination of the work shall be considered in groups or categories (such as drill steel, or explosives, or pipe, or rails), and if the original cost of the remaining unexpended portion of any such group or category is less than $50, the Government waives its interest therein. If necessary to accomplish the disposal of any item the Operator shall dismantle and sever it from the land, the cost thereof to be treated as a cost of the project.

(d) *Default of the Operator re disposal.*—If within 90 days after the completion of the work or termination of the Government's obligation to contribute to costs, or after the property is no longer needed for the work, or after such further time as the Government may in writing allow, the Operator has failed to sell or otherwise liquidate or dispose of any property in which the Government has an interest, the Government, at any time prior to final settlement under the contract, may pursue one of the following two courses: (1) the Government, by written notice to the Operator, may place upon such property what in its opinion is a fair valuation thereof, not in excess of the cost less 1.66 percent per month from the

date such property was purchased under this contract to the termination of said 90-day period; and such property shall thereupon be considered and accounted for as having been purchased by the Operator at the valuation so fixed by the Government; or (2) the Government may enter and take possession of such property wherever it may be found, and remove and dispose of it for the joint account of the parties.

ARTICLE 10. *Termination of the Government's obligations.*—(a) If in the opinion of the Government operations at any time have failed to achieve anticipated results that indicate the probability of making a worthwhile discovery, and in the opinion of the Government further operations are not justified, the Government may give the Operator written notice thereof, and thereupon: (1) the Government shall be free of all obligation to contribute to costs not then incurred other than such as may be allowable under the provisions of the contract as necessary and incidental to winding up, reporting, and accounting; and (2) the Operator shall be free of all obligation to prosecute the work other than such as may be necessary and incidental to winding up, reporting, and accounting.

(b) If in the opinion of the Government the Operator is in any manner in default under the terms of the contract, the Government may give the Operator written notice of such default with a specification of reasonable time within which the default must be cured; and if the Operator fails to cure such default as required, thereupon: (1) the Government shall be relieved of all obligation to contribute to costs not incurred when the notice was given, other than such as may be allowable by the provisions of the contract as necessary and incidental to winding up, reporting, and accounting; and (2) the Operator shall be free of all obligation to prosecute the work other than such as may be necessary and incidental to winding up, reporting, and accounting. The remedy provided for the Government in this paragraph "(b)" is in addition to any other remedy provided in this contract, and in addition to any other remedy the law may provide for breach of contract.

(c) The giving of any notice by the Government under the provisions of this Article 10 shall not affect the Government's rights as provided for in the contract with respect to a percentage royalty, and such rights shall be fully preserved.

ARTICLE 11. *Notices to be given by the Government* may be delivered to the Operator, or may be sent by registered mail addressed to the Operator at his mailing address stated in this contract. If mailed, notices are deemed to have been delivered five days after the date of mailing.

ARTICLE 12. *Officials not to benefit.*—No member of or delegate to Congress or resident commissioner shall be admitted to any share or part of this contract or to any benefit that may arise therefrom; but this provision shall not be construed to extend to this contract if made with a corporation for its general benefit.

ARTICLE 13. *Changes and added provisions.*— **(a) Categories (2) through (7) of Article 6(a) are deleted. (b) To the extent that costs are set forth in Exhibit "A" as "Fixed Unit Costs" they are in lieu of the actual costs that otherwise would be allowable costs of the project under Article 6 of the contract. The Government will contribute to the fixed unit costs as they accrue, on the basis of units of work actually performed. The fixed unit costs include all costs of the work necessary to complete the project. (c) That part of the last sentence in the first paragraph of Article 6(a) commencing after the semicolon, is deleted. (d) In Article 8(b): (1) the word "minerals" includes limestone and dolomite products produced in processing ore; and (2) the words "ten years" are changed to "thirty years." (e) The following clause is added to Article 8(c): "Provided, however, That so long as the Operator operates smelting facilities as an integrated part of its business, the settlement made by the Operator's smelter to its mine or mill on the ore or concentrates subject to the Government's royalty shall be, for the purpose of calculating the royalty payable to the Government under this contract, on the same settlement basis that the said smelter makes to its independent suppliers under the schedule most favorable to any independent supplier, or should gross income from mining operations for percentage depletion purposes in Federal income tax determination show a greater value for ore or concentrate sales than that value which would result from applying the smelter schedule most favorable to an independent supplier, the greater value would be used as the basis for calculating royalty payable to the Government."**

Executed in sextuplicate the day and year first above written.

EXPLORATION PROJECT CONTRACT
THE NEW JERSEY ZINC COMPANY
DOCKET NO. NMRA-4119

ANNEX I

The land referred to in Article 2 of the Contract consists of various privately owned tracts of land which are held by the Operator pursuant to option contracts, which permit it to purchase all mineral and mining rights on such tracts. Such land areas are outlined in blue on the attached map entitled "The New Jersey Zinc Company, Jefferson City, Tennessee, Property Map, Morristown Sweetwater-Talbot Area, Figure 2" which is hereby made a part of this Contract.

The various land parcels are identified as follows:

Name of Property Owner	Acreage
Mitchell Moseley, Pearl Moseley and Herman Moseley	127
Hattie Miller	78
Earl Morgan and Sadie Marie Morgan	76
W. B. Watkins, Wilma B. Watkins and I. N. Watkins	176
Annette McElveen	135
Miriam M. Caldwell	75
John Carter	47
Joe Pollard and Cardie Pollard	42
Thomas Courtney	30
H. H. Oakley	137
William Pollard and Jessie Pollard	28
C. M. Breeden and Martha Breeden	81
Roy O. Breeden and Anna Lee Breeden	8
C. E. Goodman and Martha Goodman	400
H. V. Gaile and Florence Franklin Gaile	109
Hilda Knight and Maude Knight	80
John Austin and Jennie Lee Austin	182
Leonard B. Deering	230
Jessie G. Burnett	59
Elam Davis, Vrela Davis, and Ray F. Davis	42
W. B. Bugal, Earl Bugal and Pauline Bugal	42

SPECIAL AGREEMENT CONCERNING LAND

1. In the event the Operator should at any time during the period expiring ten years from the date of this Contract acquire any interest, title or equity, in any lands contiguous to the lands covered by this Contract, it is agreed that such contiguous lands shall thereupon become subject to the provisions of this Contract, and the parties hereto shall promptly execute amendments to this Contract listing such contiguous lands as lands included in this Contract.

2. It is further agreed that the Operator may, at any time before the expiration of thirty days following the completion or termination of exploration work under this Contract, request the Government to delete from this Contract such lands described in the Option Contracts listed in this Annex I, or by any amendments thereto, as have no known value for mineral production. The Government will promptly prepare amendments removing the specified lands from the Contract which amendments shall provide that the Operator:

(a) certifies the lands have no known value for mineral production;

(b) has, prior to the execution of the respective amendment, surrendered or otherwise disposed of all its interest, title, and equity in such lands, and any minerals produced therefrom, including any option, lease or permit thereto, without any consideration whatsoever, including future compensation, for such surrender or disposition, other than relief from the cost of maintaining such interest;

(c) agrees that no benefit from such lands or any production of minerals therefrom will accrue to the Operator or to any of its subsidiaries, directly or indirectly, during the period expiring thirty years from the date of this Contract.

(d) agrees that if the Operator or any of its subsidiaries acquires any interest, title or equity in such lands or any minerals produced therefrom, or derives any benefit therefrom, before the expiration of thirty years from the date of this Contract, the lands with respect to which such interest, title or equity is acquired, and any minerals produced therefrom, shall be deemed subject to this Contract and any certification from the date that the Operator or its subsidiaries acquired such interest, title or equity, or any benefit therefrom, until the expiration of thirty years from the date of this Contract, or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first.

EXPLORATION PROJECT CONTRACT
THE NEW JERSEY ZINC COMPANY
PROJECT NO. [illegible]-4119

EXHIBIT "A"

Description of the Work

The purpose of the project is to explore for ores of zinc by diamond drilling (plus necessary overburden drilling). The preliminary drilling to be done under the Contract is roughly indicated on the attached map entitled "Fig. 5, The New Jersey Zinc Company, Morristown Quarry, Talbot Area."

The intent of the work is to investigate the ore potential of the Kingsport limestone and dolomite which is the ore-bearing formation of the district. It is anticipated that drill holes will range from [illegible] to 1,700 feet in depth, with a probable average depth of 1,[illegible] feet.

The project is not intended to accomplish the detailed outlining of individual ore bodies. Drill holes will not be located on closer spacing than 600 feet, except by special arrangement with the Government. All diamond drilling, including location of holes and depths, will be subject to prior Government approval.

All drill holes shall be logged geologically and all drill core will be made available to the Government for examination. All mineralized core will be properly sampled and assayed for zinc and iron. Such assays, together with proper geological logs of drill holes, will be reported to the Government, together with proper plot maps and sections showing the progress of the work. Diamond drilling will be done with AX size, or larger, core recovery drills and coring bits.

The project work shall be supervised at all times by competent engineers or geologists.

It is estimated that 50,000 feet of drilling will be required to test the gross ore potential of the area.

Estimated Cost of the Project

Actual Costs

Category (1) Independent Contracts

Overburden drilling and diamond drilling to 1,000 ft. depth
48,000 feet @ $2.16/ft. $103,680.00

Diamond drilling 1,000 ft. to 1,500 ft. depth
10,000 feet @ $2.66/ft. 26,600.00

Diamond drilling over 1,500 ft. depth
2,000 feet @ $3.16/ft. 6,320.00 $136,600.00

The above rates cover charges for running, cementing, water supply, casing, changing of locations, and all charges which may be incurred by the diamond drill contractor. 1/

Categories (2) through (7)

None

Fixed Unit Costs (See Article 13)

Incidental allowance for each foot of drilling completed
60,000 feet @ $0.32/ft. $ 19,200.00

300 samples to be assayed @ $4.30/sample 490.00 $ [illegible]

Estimated Total Cost of Project [illegible]

Government Participation @ 50% $ [illegible]

1/ Casing left in drill holes at option of Operator will not be accepted as a charge to the Contract.

Dear Sirs:

Submitted herewith in quadruplicate is a short form option contract for the W. B. Rugel 42 acre property in the Morristown Sector, Tennessee which The New Jersey Zinc Company has recently secured.

This agreement is a part of Exhibit "A" of our application mailed to you January 6, 1956, and is the last property listed on Sheet No. 2 of our application for aid in an exploration project to DMEA Order I. Through an oversight, the attached agreement was not submitted with the others on January 6.

Very truly yours,

Dear Sirs:

Submitted herewith on behalf of The New Jersey Zinc Company is an application for aid in an exploration project pursuant to DMEA Order I, under the Defense Production Act of 1950, as amended, and prepared in accordance with Form MF-103 in quadruplicate.

Pending your acceptance and approval of this application, we are ready to proceed with the project. Therefore, your attention to this matter at some early date would be very much appreciated.

Very truly yours,

S. S. Goodwin
Vice President
and
Manager of Mines

Date Received 1-9-56
Estimated Cost $170,000.00
Participation (Government %)

INSTRUCTIONS

1. *Name of applicant.*—(*a*) State here your full legal name, in the form in which you will wish to contract, and your mailing address: The New Jersey Zinc Company
160 Front Street
New York 38, New York.

(*b*) If other than an individual, add to your name above whether a corporation, partnership, etc., and the name of the State in which incorporated or otherwise organized. A New Jersey Corporation

(*c*) If a corporation, add to above statement, titles, names and addresses of officers. See sheet No.1 attached

(*d*) If a partnership, add to the above statement the names and addresses of all partners.

2. *General.*—Read DMEA Order 1, "Government Aid in Defense Exploration Projects," before completing this application. Submit this application and all accompanying papers in quadruplicate (four copies), with your name and address on each sheet of the application and on all accompanying papers. Where sufficient space is not provided on the form for all required information, state it on an accompanying paper, with a reference in each case to the instruction to which it refers by number. Comply with all applicable instructions; or, if not applicable, so state. File the application with Defense Minerals Exploration Administration, Department of the Interior, Washington 25, D. C., or with the nearest field executive officer thereof.

3. *Applicant's property rights.*—(*a*) State the legal description of the land upon which you wish to explore, including all land which you possess or control that may be benefited by the exploration, and excluding any land or interest in land which is not to be included in the exploration project contract
See sheet No. 2 attached

(*b*) State any mine name by which the property is known. none

(*c*) State your interest in the land, whether owner, lessee, purchaser under contract, or otherwise
See Sheet No. 2 attached

(*d*) If you are not the owner, submit with this application a copy of the lease, contract, or other document under which you control the property. See Exhibit "A" and Sheet No. 2

(*e*) If you own the land, describe any liens or encumbrances on it

(*f*) If the land consists of unpatented claims, add to the description above, the book and page numbers for each recorded location notice.

4. *Physical description.*—(*a*) Describe in detail any mining or exploration operations which have been or now are being conducted upon the land, including existing mine workings and production facilities. State your interest, if any, in such operations. Also describe accessibility of mine workings for examination purposes. See Sheet No. 3 attached

(*b*) State past and current production, and ore reserves, if any, giving quantities and grades. See Sheet No. 3

(*c*) Describe the geologic features of the property, including mineralization, type of deposit (vein, bedded, etc.), and your reasons for wishing to explore. Illustrate with maps or sketches. Send with your application (but not necessarily as a part of it) any geologic or engineering report, assay maps, or other technologic information you may have, indicating on each whether you require its return to you. See sheet No. 3 attached

(*d*) State the facts with respect to the accessibility of the project: Access roads, distances to shipping, supply and residence points. See sheet No. 3 attached

(*e*) State the availability of manpower, materials, supplies, equipment, water, and power.
See sheet No. 3 attached.

16—66551-1

RECEIVED
JAN 9 1956

5. *The exploration project.*—(*a*) State the mineral or minerals for which you wish to explore This exploration seeks to discover zinc ore bodies

(*b*) Describe fully the proposed work, including a map or sketch of the property showing a plan (and cross sections if needed) of any present mine workings, and the location of the proposed exploration work as related to such features as contacts, veins, ore-bearing beds, etc. See sheet No. 4 attached

(*c*) The work will start within 10 days and be completed within 24 months from the date of an exploration project contract.

(*d*) State the operating experience and background of the applicant with relation to the ability to carry out such exploration project, and also that of the person or persons who will supervise the operations. See sheet No. 4 attached

6. *Estimate of costs.*—Furnish a detailed estimate of the costs of the proposed work (you will have to use a separate sheet), under the following headings. Add the totals under all headings to give the estimated total cost of the project:

(*a*) *Independent contracts.*—(Note.—If the applicant does not intend to let any of the work to contractors, write "none" after this item. To the extent that the work is to be contracted, do not repeat the cost of the contract-work in subsequent items.) State the cost of any proposed independent contracts for the performance of all or any part of the work, expressed in terms of units of work (such as per foot of drilling, per foot of drifting, per hour of bulldozer operations, per cubic yard of material moved, etc.).

(*b*) *Labor, supervision, consultants.*—Include an itemized schedule of numbers, classes and rates of wages, salaries or fees for necessary labor, supervision and engineering and geological consultants.

(*c*) *Operating materials and supplies.*—Furnish an itemized list, including items of equipment costing less than $50 each, and power, water and fuel.

(*d*) *Operating equipment.*—Furnish an itemized list of any operating equipment to be rented, purchased, or which is owned and will be furnished by the Operator, with the estimated rental, purchase price, or suggested use-allowance based on present value, as the case may be.

(*e*) *Rehabilitation and repairs.*—Furnish a detailed list showing the cost of any necessary initial rehabilitation or repairs of existing buildings, installations, fixtures, and movable operating equipment, now owned by the Operator and which will be devoted to the exploration project.

(*f*) *New buildings, improvements, installations.*—Furnish a detailed list showing the cost of any necessary buildings, fixed improvements, or installations to be purchased, installed or constructed for the benefit of the exploration project.

(*g*) *Miscellaneous.*—Furnish a detailed list showing the cost of repairs to and maintenance of operating equipment (not including initial rehabilitation or repairs of the Operator's equipment), analytical work, accounting, workmen's compensation and employers' liability insurance, and payroll taxes.

(*h*) *Contingencies.*—Give an estimate of any necessary allowances for contingencies not included in the costs stated above.

NOTE.—No items of general overhead, corporate management, interest, taxes (other than payroll and sales taxes), or any other indirect costs, or work performed or costs incurred before the date of the contract, should be included in the estimate of costs. See sheet No. 5 attached

7. (*a*) Are you prepared to furnish your share of the cost of the proposed project in accordance with the regulations on Government participation (Sec. 7, DMEA No. 1)? Yes

(*b*) How do you propose to furnish your share of the costs?

[X] Money [ ] Use of equipment owned by you [ ] Other

Explain in detail on acompanying paper.

CERTIFICATION

The undersigned, whether as an individual, corporate officer, partner, or otherwise, both in his own behalf and acting for the applicant, certifies that the information set forth in this form and accompanying papers is correct and complete, to the best of his knowledge and belief.

(c) The New Jersey Zinc Company holds options for the purchase of all mineral and mining rights on each of these properties,

and has limited purchase privileges. This Company holds the exclusive right to prospect and explore for minerals on these properties.

No. 4 of Instructions - Physical Description

(a) The only activities on the land have consisted of a small number of churn drill holes put down in 1928 to 1940 by American Zinc Company and by U. S. Steel Corporation, and 20 diamond drill holes put down by this Company in 1953 and 1954. All of the previous drilling was done in that part of the land under which the favorable Kingsport formation lies at a shallow depth. The diamond drilling was practically confined to the northwest 10% of the area presently under consideration. There are no mine workings on the land.

(b) There has been no production from this property. The previous drilling has indicated mineralization. No ore has been encountered to date, but one hole has shown a vertical thickness of 26 feet of 4.4% zinc at a depth of 845 to 871 feet.

(c) The area under consideration would be expected to contain any northeast extension of the Jefferson City zinc district. See area outlined in blue, figure 1. It is underlain by Kingsport limestone and dolomite which are the ore-bearing formations of of the district, at depths from 800 to 2000 feet. These beds are dipping at an angle of about 10 degrees to the southeast. Reference is made to 1: 24000 scale geologic sections AA' BB' and CC' shown on Fig. 4.

The ore bodies of the Jefferson City district consist of very pure sphalerite deposited as large replacements of the Kingsport Limestone. The existance of the favorable formation, and the

proximity to known large orebodies makes this property an attractive exploration project. Further, its location on the northeast projection of an apparent alignment of orebodies, plus the known mineralization encountered in previous limited drilling programs add materially to the attractiveness of the exploration possibilities. Geochemical prospecting along the outcrop area has revealed the presence of zinc in the residual clay which is undoubtedly related to zinc mineralization in the rocks from which the clays have been derived. (See plan, fig. 3 and sections, fig. 4).

(d) The property is located about four miles northeast of Jefferson City. It is crossed by the Southern Railway, and is served by a network of rural roads, as well as U. S. Highway 11 E. The small village of Talbott lies in the center of the area. (See Figure 1).

(e) Manpower, supplies, and power are readily available in the area.

No. 5 of Instructions - The Exploration Project

(b) The proposed work consists of a widespaced grid of diamond drill holes located in such a manner as to provide a gross screening of the potential ground. Any ore penetrations or other favorable indications (alteration, structures, etc) made by this first screening will be followed by a somewhat closer grid to outline the gross ore potential. No effort will be made to determine detailed ore outlines. The drill holes will be spaced originally at about 1/4 and 1/2 mile intervals, and will range in depth, depending on distance from the outcrop, from 800 to possibly more than 1700 feet. Area "A" shown on Fig. 3 will be initially investigated by holes drilled on 1/4 mile spacing. Area "B" shown on Fig. 3 will be initially investigated by holes drilled on approximately 1/2 mile spacing.

The ore-controlling structures in the district (gentle flexures, faults, of very minor displacements, original sedimentary structures) are of such subtle character that they are not reflected in the sparse outcrops at the surface. Moreover, the subject area lies within the influence of the Koppick Knob thrust fault, a dominating structure of the Jefferson City district, and surface outcrop largely shows disturbance from this fault. The formations which we propose

to explore lie beneath this fault. Thus, surface geologic data are of only limited value and wide-spaced exploratory drilling is required to obtain any information respecting the ore potential.

(d) The New Jersey Zinc Company has had wide experience in large-scale exploration programs in the Jefferson City district, as well as many other mining districts in the U. S. This project will be under the supervision of Johnson Crawford, Superintendent for Tennessee operations, who has been active in the Jefferson City district for over 25 years.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 6th day of December, 1955, by and between JAKE AUSTIN and wife, JENNIE LEE AUSTIN, of Hamblen County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the parties of the first part grant unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for further periods not to extend beyond December 6, 1958, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises:

TRACT 1: Situated in the Second (Old Fifth) Civil District of Hamblen County, Tennessee, bounded and described as follows:

BEGINNING on a stone set in old Tan Kiln on the North edge of a road, a corner with John Quarles and the A. P. C. Bettis Farm; thence North 76-3/4 deg. West 12-4/5 poles to a rock in front of dwelling; thence North 40 deg. West 21 poles and 2 links to a rock, Roberts, corner; thence South

38-1/2 deg. East 39-2/5 poles with Roberts' line to a rock; thence North 65-1/2 deg. East 29-4/5 poles with Roberts' line to a rock in Miller's line; thence South 38-1/2 deg. East 76 poles with Miller to a solid rock and cedar stump; thence North 19 deg. East 23-39/25 poles to a chinquapin oak stump; thence South 42-1/4 deg. East 45 poles to a spanish oak, Campbell's corner, thenceSouth 54 deg. East 65 poles with Campbell's line to a black oak; thence South 46 deg. West 59 poles with Pollard and Ingram to white oak; thence North 51-1/4 deg. West 76 poles with Ingram to a rock in gulley; thence South 19 deg. West 111 poles and 19 links to a rock at a road in front of John Walker's barn; thence North 76-1/2 deg. West 16 poles and 9 links to a rock; thence South 52-1/4 deg. West 4 poles and 8 links to a rock, Eugene Hunter's corner; thence North 30 deg. West 94 poles with Eugene Hunter's line to a rock; thence West 16 poles to rock in Quarels line; thence North 3 deg. East 133 poles with Quarels line to the BEGINNING, containing 152 acres and 65 square poles be the same, more or less.

TRACT II: Situated in the Ninth Civil District of Jefferson County, Tennessee, bounded and described as follows:

BEGINNING at two small post oaks in the East edge of a road in the line of John Quarles; thence with his line and the line of J. P. Knowling South 3 deg. East 146 poles to a rock corner to said Knowling; thence South 26 poles to a rock in Knowling's field; thence South 42 East 42 poles to a rock in the road; corner to said Knowling; thence North 47-1/2 East 44 poles with said road to a rock in same; thence North 30 West 94 poles to a rock; thence West 10 poles to a small cedar; thence North 3 West 76 poles to a rock; thence North 32-1/2 West 18 poles to the BEGINNING, containing 30 acres, more or less.

Owners acquired title to the above described property by Deed of Lea King Donaldson, dated October 5, 1949 and of Record in the Register's Office for Hamblen County, Tennessee in Deed Book 52, Page 288, and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 100, Page 443, to which reference is made.

Together with the right to prospect for, mine, mill and remove the same; water rights, the free and uninterrupted right of ingress and egress, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto.

And the parties of the first part also grant to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including

the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the Agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owners and parties of the first part have hereunto set their signatures the day and date first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 10th day of June, 1955, by and between ROY O. BREEDEN and wife, ANNA LEE BREEDEN, of Hamblen County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

WHEREAS, the Owners and the Zinc Company entered into a certain Contract and Agreement under date of October 22nd, 1952 with respect to the following described property:

SITUATE in the Ninth Civil District of Jefferson County, Tennessee and the Second Civil District of Hamblen County, Tennessee, known as the "W. E. Dyer Residence Property", containing 6 acres, more or less and bounded generally as follows:

On the North by the lands of Sams;
On the East by the lands of Treat;
On the South by the lands of Bowlin; and
On the West by the lands of May.

Owners acquired title to the above described premises by Deed of W. E. Dyer and wife, dated April 22, 1950 and of Record in the Register's Office for Hamblen County, Tennessee in Deed Book 85, Page 75, to which reference is here made.

Said Contract and Agreement of October 22, 1952 and the short form thereof of even date between the parties as appears of record in the Register's Office for Hamblen County, Tennessee in Misc Book _____, Page _____ are incorporated by reference, and made a part hereof, as fully as if copied verbatim herein. And;

WHEREAS, by the terms and provisions thereof said Contract and Agreement expires on October 22, 1955. And in the event the Zinc Company elects to exercise its right and option to purchase thereunder there is remaining due and unpaid purchase money for the mineral and mining rights fully described in paragraph "Two" the sum of ONE THOUSAND ($1000.00) DOLLARS. And;

WHEREAS, the Owners and the Zinc Company have mutually agreed to extend said option Contract and Agreement.

NOW, THEREFORE, in consideration of SEVENTY FIVE ($75.00) DOLLARS cash in hand paid to the Owners, receipt of which is hereby acknowledged, said Contract and Agreement is hereby extended until October 22, 1957. Otherwise than above specified all the provisions of the aforesaid Contract and Agreement of October 22, 1952 shall be in full force and effect during said extended period.

The parties hereto agree that the whole of said Extension Contract and Agreement between them is written herein and in a short form Agreement of even date herewith which is intended to be recorded, and the parties hereto are not bound by any agreements, understandings or conditions otherwise than as set forth herein and said short form agreement.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the parties of the first part have hereunto set their signatures on this the day and date first above written.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 13th day of December, 1955, by and between JESSIE QUARLES BURNETT, of Jefferson County, Tennessee, hereinafter called the Owner, party of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the party of the first part grants unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for further periods not to extend beyond December 13, 1958, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone in, under or on the following described premises.

SITUATE in the Ninth Civil District of Jefferson County, Tennessee, and being a certain farm known as the "Eller or Duncan Lands" and bounded and described as follows:

> BEGINNING on an iron pin on the South side of the Southern Railway Company, running thence North 49-30' E. 68.8 poles; thence leaving the Southern Railway Company's right-Of-way and running S. 20-20' 134.8 poles to a stake in public road; thence with said public road S. 50 W. 68.5 poles to a stake, corner with John Bettis; thence with said Bettis line N. 20-20' W. 142.4 poles to the BEGINNING,

containing 59.4 acres, more or less, and a perpetual right of way 25 feet wide is hereby dedicated and set out for the use and benefit for the said party of the second part and other owners of said Duncan lands said right of way crosses the Southern Railway and extends to the old railway bed or county road between Lots 12 and 13 of the sub-division of said Duncan Lands.

Owner acquired title to the above described property by Deed of Helen Quarles James, et al., dated May 1, 1950 and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 102, Page 231. See also will Book 12, Page 204, County Court Clerk's Office.

Together with the right to prospect for, mine, mill and remove the same; water rights, the free and uninterrupted right of ingress and egress and the right to purchase the entire surface of the above described premises, in accordance with the terms of an agreement of even date herewith entered into between the parties hereto.

And the party of the first part also grants to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon to use available water and to remove samples, in accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owner and party of the first part has hereunto set her signature the day and date first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 24th day of May, 1955, by and between MIRIAM M. CALDWELL (Single), of Hamblen County, Tennessee, hereinafter called the Owner, party of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

WHEREAS, the Owner and the Zinc Company entered into a certain Contract and Agreement under date of September 25, 1952. The short form thereof of even date between the parties appears of Record in the Register's Office for Jefferson County, Tennessee in Misc. Book 6, Page 14. Both are incorporated by reference, and made a part thereof, as fully as if copied verbatim herein, with respect to certain farm lands of the Owner, Situate in the Fourth Civil District of Jefferson County, Tennessee and being Lots Nos. Thirteen (13), Fourteen (14), Fifteen (15), Sixteen (16), Twenty Three (23), Twenty Four (24), Twenty Five (25), Twenty Six (26), Twenty Seven (27), Twenty Eight (28), Twenty Nine (29) and Thirty (30) as shown by the Plat of the Boyle Byrd Farm as surveyed by O. O. Graham, which Plat appears of record in the Register's Office for Jefferson County, Tennessee in Plat Book 2, Page 238 to which reference is here made, containing 75 acres, more or less, and more particularly described as follows:

BEGINNING on a stake set in the Southern side of U. S. Highway 11-E; thence North 50 deg. 45' East 613.6 feet to a stake on the South side of said Highway, corner to Lot No. 17; thence with the Western line of Lot No. 17 South 34 deg. 45' East 310 feet to a stake in the Northern line of Lot No. 23; thence North 53 deg. 48' East 539 feet to a stake in the line of John A. May; thence with the line of May South 7 deg. 30' East 1,946 feet to an iron pin; thence South 74 deg. 30' West 1,523 feet to a rock; thence North 43 deg. 00' West 1,168 feet to a stake, corner to Lot No. 1; thence North 50 deg. 45' East 1,223 feet, crossing the roadway as shown on the above Plat, to a stake, Northwest corner of Lot No. 23; thence North 13 deg. 12' West 220 feet to a stake; thence North 25 deg. 15' West 115 feet to the BEGINNING.

Owner acquired title to the above described premises by Deed of Doyle Byrd and wife, dated March 19, 1951 and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 103, Page 329, to which reference is here made.

WHEREAS, said Contract and Agreement expires on September 25, 1955 and the parties have mutually agreed to an extension of the terms and provisions thereof.

NOW, THEREFORE, in consideration of the sum of ONE ($1.00) DOLLAR cash and other good and valuable considerations, the Owner grants and extension of said Contract and Agreement of September 25th, 1952 for an additional period of two years, expiring on September 25, 1957.

The terms of this Extension Contract and Agreement are fully set out in an agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length. Otherwise than specified therein all the provisions of the aforesaid Contract and Agreement of September 25, 1952 shall be in full force and effect during said extended period.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owner and party of the first part has hereunto set her signature the day and year first above written.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 29th day of October, 1955, by and between R. V. COILE and wife, FLORENCE FRANKLIN COILE, of Hamblen County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the parties of the first part grant unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for a further period not to extend beyond October 29, 1957, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises:

SITUATE in the Second Civil District of Hamblen County, Tennessee and Ninth Civil District of Jefferson County, Tennessee being three certain tracts of land, containing in all 109 acres, more or less, (tracts Two and Three adjoin), more particularly described as follows:

TRACT ONE : Situate in the Second Civil District of Hamblen County Tenressee, adjoining the lands of Britton, Leming, Sams, and possibly others, and described as follows:

BEGINNING at a stake in the Northern margin of the Southern Railway Company's right of way and running North 17 deg. 20' West 2065 feet to a stake; thence North 74 deg. East 737 feet to a rock; thence South 24 deg. 20' East 1680 feet to a stake in a road; thence with said road South 49 deg. 25' West 824 feet to a stake; thence South 52 deg. 20' West 178 feet; thence South 63 deg. West 42 feet to the BEGINNING, containing 37.85 acres, more or less.

R. V. Coile acquired title to Tract One by Deed of W. C. Watkins, et ux., dated July 22, 1919, and recorded in Deed Book 41, Page 392, Register's Office for Hamblen County, Tennessee.

TRACTS TWO AND THREE :

Situate in the Ninth Civil District of Jefferson County, Tennessee, Tract two containing 70 acres, more or less, and Tract three containing 1 acre, more or less, both tracts adjoining and making up one boundary, bounded generally as follows:

On the North by the lands of Benny Franklin;
On the East by the lands of C. M. Breeden;
On the South by the lands of Rickard; and
On the West by the lands of Knight.

Florence Franklin Coile acquired title to tract two by Deed of J. H. Brown, dated December 5, 1906, recorded in Deed Book 36, Page 423, Register's Office for Jefferson County, Tennessee, and to Tract Three by Deed of John M. Watkins, dated April 17, 1907, Recorded in Deed Book 37, Page 178 of said Register's Office, to which deeds reference is here made.

Together with the right to prospect for, mine, mill and remove the same; water rights, the right of ingress and egress, and the right to purchase the surface area of Tract One, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto. And the parties of the first part also grant to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water

and remove samples, in accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs and executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owners and parties of the first part have hereunto set their signatures the day and date first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 1st day of June, 1955, by and between THOMAS COURTNEY (WIDOWER), of Jefferson County, Tennessee, hereinafter called the Owner, party of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

WHEREAS, the Owner and the Zinc Company entered into a certain Contract and Agreement under date of October 6th, 1952 with respect to the following described property:

SITUATE in the Fourth Civil District of Jefferson County, Tennessee, adjoining the lands of Davis, Moser, Oakley, McElveen, Watkins and Housley, containing 90 acres, more or less and more particularly described as follows:

> BEGINNING at a stake in the Highway, corner to R. F. Brown; thence West with the said Highway a distance of 954 feet to a stake; thence South 24-50 East 1911 feet to a stake in the center of a public road; thence with said Public Road North 1-1/2 East 1060 feet to a stake corner to I. G. Watkins land; thence North 86-1/4 West 69 poles to a stake; thence Northerly direction with the old Talbott line to the right of way of the Southern Railway Company; thence Westerly with the Southern Railway right of way a distance of 110-1/2 poles to a stake opposite Brown's corner; thence with Brown's line 1470 feet to the BEGINNING.

Owner acquired title to the above described premises by Deed of J. B. Huff and wife, dated September 24, 1926, and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 70, Page 99, to which reference is here made.

Said Contract and Agreement of October 6, 1952 and the short form thereof of even date between the parties as appears of record in the Register's Office for Jefferson County, Tennessee in Misc. Book 6, Page 23 are incorporated by reference, and made a part hereof, as fully as if copied verbatim herein. And;

WHEREAS, by the terms and provisions thereof said Contract and Agreement expires on October 6, 1955. And in the event the Zinc Company elects to exercise its right and option to purchase thereunder there is remaining due and unpaid purchase money for the mineral and mining rights fully described in paragraph "Two" the sum of THIRTEEN THOUSAND FIVE HUNDRED ($13,500.00) DOLLARS. And;

WHEREAS, the Owner and the Zinc Company have mutually agreed to extend said option Contract and Agreement.

NOW, THEREFORE, in consideration of NINE HUNDRED ($900.00) DOLLARS cash in hand paid to the Owner, receipt of which is hereby acknowledged, said Contract and Agreement is hereby extended until October 6, 1957. Otherwise than above specified all the provisions of the aforesaid Contract and Agreement of October 6, 1952 shall be in full force and effect during said extended period.

The parties hereto agree that the whole of said Extension Contract and Agreement between them is written herein and in a short form Agreement of even date herewith which is intended to be recorded, and the parties hereto are not bound by any agreements, understandings or conditions otherwise than as set forth herein and said short form agreement.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the party of the first part has hereunto set his signature on this the day and date first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 29th day of July, 1958, by and between ELEN DAVIS (SINGLE), TRULA DAVIS (Single) and ROY F. DAVIS of Jefferson County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company .

W I T N E S S E T H

WHEREAS, the Owners and the Zinc Company entered into a certain Contract and Agreement under date of December 20, 1952 with respect to the following described property:

SITUATE in the Fourth Civil District of Jefferson County, Tennessee, adjoining the lands of Moser, Morgan, and Courtney, containing 42 acres, more or less, and more particularly described as follows:

> BEGINNING on a stake in the Northerly right-of-way line of the Southern Railway, being the original corner in the deed to said Brown; thence with the right of way North 68 deg. 21' East 550 feet to a stake; thence with the division line between lots No. 2 and 3 North 31 deg. 21' West 1658 feet to a stake in the center of the highway; thence with the division line between lots Nos. 7 and 8 North 29 deg. 5' West 1436 feet to the line of Lot No. 11; thence South 69 West 141 feet to the public road on the outside line; thence with the main road and old line South 3 deg. 50' West 2102 feet to the highway; thence with said highway North 63 deg. 30 East 330 feet; thence North 42 deg. 35 East 604 feet to a stake, corner to Lots 4 and 6; thence South 24 deg. 35 East 1460 feet to the BEGINNING, being Lots Nos. 3 and 4, 5, 6 and 7 in the Subdivision of the R. F. Brown farm as shown on plat by George Zirkle.

For title to the above described premises see deed of J. T. Hodge and wife, dated November 20, 1935 and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 78, Page 329, to which reference is here made. Mrs. J. B. Davis having died intestate subsequent to the execution of the original contract and her 1/3 undivided interest was thereupon vested in the Owners each taking a 1/9 interest therein by descent caste as her children and sole heirs at law.

Said Contract and Agreement of December 20, 1952 and the short form thereof of even date between the parties as appears of record in the Register's Office for Jefferson County, Tennessee in Misc. Book 6, Page 148 are incorporated by reference, and made a part hereof, as fully as if copied verbatim herein. And;

WHEREAS, by the terms and provisions thereof said Contract and Agreement expires on December 20, 1955. And in the eventthe Zinc Company elects to exercise its right and option to purchase thereunder there is remaining due and unpaid purchase money for the mineral and mining rights fully described in paragraph "two" the sum of SIXTY ONE HUNDRED ($6100.00) DOLLARS. And;

WHEREAS, the Owners and the Zinc Company have mutually agreed to extend said option Contract and Agreement,

NOW, THEREFORE, in consideration of TWO HUNDRED ($200.00) DOLLARS cash in hand paid to the Owners, receipt of which is hereby acknowledged, said Contract and Agreement is hereby extended until December 20, 1957. Otherwise than above specified all the provisions of the aforesaid Contract and Agreement of December 20, 1952 shall be in full force and effect during said extended period. In the event the Zinc Company exercises its right and option to purchase said TWO HUNDRED ($200.00) DOLLARS paid hereunder shall apply upon and go to reduce the purchase price of SIXTY ONE HUNDRED ($6100.00) DOLLARS.

The parties hereto agree that the whole of said Extension Contract and Agreement between them is written herein and in a short form Agreement of even date herewith which is intended to be recorded, and the parties hereto are not bound by any agreements, understandings or conditions otherwise than as set forth herein and said short form agreement.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the parties of the first part have hereunto set their signatures on this the day and date first above written.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 6th day of December, 1955, by and between LEONARD B. DEARING (WIDOWER), of Hamblen County, Tennessee, hereinafter called the Owner, party of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the party of the first part grants unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for further periods not to extend beyond December 6, 1958, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises:

FIRST TRACT : Situated in the Second Civil District of Hamblen County, and in the Ninth Civil District of Jefferson County, Tennessee, described as follows:

> BEGINNING on a walnut tree in the line of J. H. Mills; thence N. 63 deg. E. 51 poles to a black oak near the barn; thence N. 65 deg. E. 9 poles and 17 links to a hickory; thence N. 61 deg. E. 121 poles and 7 links to a rock post; thence S. 88-1/2 E. 15 poles to a rock east side of road, corner with M. Carmichael; thence S. 20 deg. W. 78 poles to a pine stump; thence S. 18 deg. W. 146 poles to a rock, Hunter's corner; thence N. 38-1/2 W. 86 poles and 16 links to a rock, J. H. Mill's corner;

thence N. 31-1/2 deg. W. 81 poles with Mill's line to the BEGINNING, containing 100 acres.

SECOND TRACT: Situated in the Second Civil District of Hamblen County, Tennessee and described as follows:

BEGINNING on a rock, corner to W. A. Bowers and T. H. Newman; thence S. 88 deg. E. 124 poles to a rock on Bower's corner; thence S. 45 E. 18 poles to a stake, McClannahan's line and a corner to Alex Cocke; thence S. 65 W. 100 poles to a rock corner to Aaron Smith and Alex Cocke; thence W. with said Smith's corner 41 poles to a rock in the original Watkin's line; thence N. 19-1/2 E. with said original Watkin's line to the BEGINNING, containing by estimation 40 acres more or less.

THIRD TRACT: Situated in District Number Two of Hamblen County, Tennessee, adjoining lands of Jesse Cline, Cluck and others, and described as follows:

BEGINNING on a rock set in the ground, a corner of the Aaron Smith (now Smith) land; thence with said line N. 65 deg. E. 140 poles to a spanish oak, same being a corner to Cluck; thence with said line S. 13 deg. E. 120 poles to a rock; thence E. 21 poles and 14 links to a stake and pointer Cluck corner; thence with the Cluck line S. 41-1/2 deg. W. 71 poles to a rock, formerly a postoak, containing 90 acres, more or less.

Owner acquired title to the above described property by Deed of Bankers Trust Company, dated January 1, 1934, of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 77, Page 440-7 and by Deed of Hubert Hickey and wife, Lola Hickey dated March 14, 1938, of Record in the Register's Office for Hamblen County, Tennessee in also Deed Book 60, Page 559, to both of which reference is hereby made Deed Book 55, Page 55, Register's Office for Hamblen County, Tennessee.

Together with the right to prospect for, mine, mill and remove the same; water rights, the free and uninterrupted right of ingress and egress, and the right to purchase twenty acres of the surface of the above described premises, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto.

And the party of the first part also grants to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned

agreement. The terms of this option Contract and Agreement are fully set out in the Agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owner and party of the first part has hereunto set his signature the day and date first above written.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 28th day of October, 1955, by and between C. E. GOODMAN and wife, MARTHA GOODMAN of Hamblen County, Tennessee hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the parties of the first part grant unto the party of the second part for a period of one year from the date hereof with the privilege of extension for further periods not to extend beyond October 28, 1958, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises:

SITUATE in the Fifth (formerly Second) Civil District of Hamblen County, Tennessee, consisting of three adjoining parcels of land, containing in all 400 acres, more or less, adjoining the lands of Campbell, Frank Wood, Dickerson, Ray Wood, E. C. Quarles, Honeycutt, Clint Goodman, James and possibly others, and more particularly bounded and described as follows:

PARCEL ONE : Consisting of two tracts, described as follows:

TRACT ONE : BEING tract No. 4 of the sub-division of the Martha Sunderland farm, bounded and described as follows: BEGINNING on an iron pin in Roberson's West line and in the middle of the Talbott Road; thence with his line and the line of William Woods North 45 deg. 30' West 149-1/2 poles to a rock planted, the Northeast corner of Tract No. 3; thence with the line of Tract No. 3 South 44 deg. 30' West 35.4 poles to a rock planted, Northeast corner to Tract No. 5; thence with the line of Tract No. 5 South 45 deg. 30' East 137.20 poles to an iron pin in the middle of the Talbott Road and the Southeast corner of Tract No. 5; thence with said road 6 courses as follows: North 67 deg. East 7.09 poles; thence North 63 deg. 40' East 10 poles; thence North 60 deg. 30' East 10 poles; thence North 57 deg. East 10 poles; thence North 54 deg. 10' East 10 poles; thence North 45 deg. 15' East 10 poles to the BEGINNING, containing 50 acres, more or less.

TRACT TWO: Being Tract No. 1 of the sub-division of the J. W. Wood farm, according to the survey of E. C. Brown, C. E.; BEGINNING at a rock planted, corner to Honeycutt and Whitmarsh; thence with Whitmarsh line North 45 deg. 30' West 44.85 poles to a rock planted, corner to Whitmarsh, Cottrell and Tract No. 2; thence North 47 deg. 15' East 101.10 poles with lines of tracts Nos. 2, 3 and 4 to the middle of a lane or right-of-way; thence with the center of said lane and the line of Mary F. Wood South 30 deg. East 20.25 poles to a rock planted in the center of said right of way or lane and corner to Mary F. Wood and Mrs. George Quarrells; thence South 8 deg. East with the Quarrells line 46.25 poles to a large post, corner to Honeycutt; thence South 31 deg. 45' West 69.84 poles with the Honeycutt line to an iron pin and rock planted, the BEGINNING corner, containing 28.20 acres, more or less.

PARCEL TWO: BEGINNING at a stake in the center of the pike road leading from Talbott to Alpha at the intersection of a private road leading into the property herein described; thence with the center of said private road as it meanders South 32 deg. East 222 feet to a stake (about 17 feet North from the center of the Southern Railway); thence still with said private road South 49-1/2 East 400 feet to an iron pin at the forks of said road; thence leaving the private road South 45 deg. East 786 feet to an iron pin; thence South 34 deg. East 511 feet to a stake; thence South 32 deg. East 1000 feet to a stake; thence North 63 deg. 30' East 1000 feet to a stake; thence North 61 deg. 00' East 2000 feet to a stake; thence North 89 deg. West 249 feet to a stone; thence North 29 deg. 00' East 1700 feet to a stake; thence

North 78 deg. West 3100 feet to a stake; thence South 4 deg. West 645 feet to a stake; thence South 72 deg. 30' West 975 feet to a stake; thence South 36 deg. 30' West 905 feet to a stake; thence North 46 deg. 30' West 455 feet (crossing the Southern Railway) to a stake in said pike road leading from Talbott to Alpha; thence with said road South 40 deg. West 100 feet to a stake; thence South 56 deg. 30' West 525 feet to the BEGINNING, containing 247 acres, more or less.

PARCEL THREE: BEGINNING in the cow gap of the old ETV&CA Ry. Co. now abandoned track of the Southern Railway Co. the same being a corner to the A. A and T. H. Newman land; thence a Southeast course with the Newman line to the Patterson line, now the M. A. Roberts line; thence with this line to a stone erected by the parties hereto, same being about midway between the cow gap named and the corner at the Barney Rice line, now owned by J. P. Hunter; thence in a Southwesterly direction according to a conditional line made between the parties hereto to a stone in the Bettis line; about 210 feet South of a stone corner, Bettis and Hunter; thence West to a stone corner, Bettis and Hunter; thence North to the BEGINNING corner, containing by estimation 50 acres, more or less. And being tract 2 in the deed from C. E. Goodman, et ux to John W. Brooks et ux., dated November 29, 1946 and of Record in the Register's Office of Hamblen County, Tennessee in Deed Book 76, Page 159.

Owners acquired title to the above described premises by the following deeds of conveyance, of Record in the Register's office for Hamblen County, Tennessee: (1) Parcel One by Deed of Mae W. Whitmarsh (widow), dated June 30, 1945, Recorded in Deed Book 71, Page 184; (2) Parcel Two by Deed of John W. Brooks (widower), dated September 16, 1950, Deed Book 85, Page 136; and (3) Parcel Three by Deed of John W. Brooks (widower) dated January 28, 1951, Deed Book 86, Page 465.

Together with the right to prospect for, mine, mill and remove the same; water rights, the right of ingress and egress, and the right to purchase surface acreage to the extent of twenty acres, off the Southeast portion of the farm adjacent to the public road, in accordance with the terms of an agreement of even date herewith entered into between the parties hereto. And the parties of the first part also grant to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing

materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the Agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

In Witness Whereof, the Owners and parties of the first part have hereunto set their signatures the day and date first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 13th day of May, 1955, by and between MITCHELL HOUSLEY (SINGLE), and PEARL HOUSLEY, individually and as legal Guardian of Herman Housley, of Jefferson County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

WHEREAS, the Owners and the Zinc Company entered into a certain Contract and Agreement under date of September 18, 1952 with respect to the following described property:

SITUATE in the Fourth and Ninth Civil Districts of Jefferson County, Tennessee, consisting of two tracts, adjoining and bounded generally as follows:

On the North by Federal Highway 11-E;
On the East by Davis, Courtney and W. B. Watkins;
On the South by Hubert Miller and Jess Cline; and
On the West by Kyle, Mbnaldson, James and possibly others, containing 127 acres more or less.

For title reference see Warranty Deed, Book 70, Page 116, and Warranty Deed, Book 70, Page 98, Register's Office for Jefferson County, Tennessee. Also See Last Will and Testament of Effie Housley, deceased.

Said Contract and Agreement of September 18th, 1952 and the short form thereof of even date between the parties as appears of record in the Register's Office for Jefferson County, Tennessee in Misc. Book 6, Page 6 are incorporated by reference, and made a part hereof, as fully as if copied verbatim herein, And;

WHEREAS, by the terms and provisions thereof said Contract and Agreement expires on September 18, 1955. And in the event the Zinc Company elects to exercise its right and option to purchase thereunder there is remaining due and unpaid purchase money for the mineral and mining rights fully described in paragraph "Two" the sum of FIFTEEN THOUSAND TWO HUNDRED SEVENTY FIVE ($15,275.00) DOLLARS. And;

WHEREAS, the Owners and the Zinc Company have mutually agreed to extend said option Contract and Agreement.

NOW, THEREFORE, in consideration of SIX HUNDRED ($600.00) DOLLARS cash in hand paid to the Owners, receipt of which is hereby acknowledged, said Contract and Agreement is hereby extended until September 18, 1957. Otherwise than above specified all the provisions of the aforesaid Contract and Agreement of September 18, 1952 shall be in full force and effect during said extended period. In the event the Zinc Company exercises its right and option to purchase said SIX HUNDRED ($600.00) DOLLARS paid hereunder shall apply upon and go to reduce the purchase price of FIFTEEN THOUSAND TWO HUNDRED SEVENTY FIVE ($15,275.00) DOLLARS.

The parties hereto agree that the whole of said Extension Contract and Agreement between them is written herein and in a short form Agreement of even date herewith which is intended to be recorded, and the

parties hereto are not bound by any agreements, understandings or conditions otherwise than as set forth herein and said short form agreement.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the parties of the first part have hereunto set their signatures on this the day and date first above written.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 29th day of October, 1955, by and between ELIHU KNIGHT and wife, MAUDE KNIGHT of Jefferson County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the parties of the first part grant unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for a further period not to extend beyond October 29, 1957, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises:

SITUATE IN THE Ninth Civil District of Jefferson County, Tennessee, consisting of two separate tracts of land, containing in all 80 acres more or less and more particularly described as follows:

TRACT ONE : Adjoining the lands of Albert Watkins, R. V. Coile, Hazelwood, Smith and H. H. Oakley, more particularly described as follows:
BEGINNING at a stake in the edge of the public road leading from Talbott to Mrs. Myrtle L. Burnett's home place where the Roy Coile line intersects said road; thence with the Coile line South 4 deg. and 45' West 2011 feet to a stone corner to C. P. Smith; thence South 84 deg. 55' West 1278 feet to a stone, corner of G. P. Smith and Mrs. Myrtle L. Burnett; thence North 5 deg. 30' East 2188 feet with the old A. A. Carter line, now Mrs. Myrtle Burnett to a stone corner of the Mrs. Burnett farm with this tract; thence South 87 East with said old Talbott to Dandridge Road 947 feet to the BEGINNING corner, containing 53.9 acres be the same more or less.

There is excepted from the above tract approximately six acres heretofore conveyed by Hal Brown and wife to Karl Rugle, leaving 47.9 acres, more or less conveyed by this instrument.

Owners acquired title to tract one by deed of L. L. Millis et ux., dated March 20, 1944, and Recorded in the Register's Office for Jefferson County, Tennessee in Deed Book 93, Page 157.

TRACT TWO : Adjoining the lands of Mary Quarles, Hunter and J. P. Knowling, more particularly described as follows:

BEGINNING at a post oak stump, Eugene Hunters line; thence South 71-1/2 West with Quarrels line until it strikes the road; thence with said road to Thomas Knowling line; thence South 32" East with his line to a rock, his corner, in J. P. Knowling's original line; thence with same North 61" East 28-2/5 poles to a cedar and post oak, same course continued to Hunter's line and to the BEGINNING, containing 32 acres, more or less.

Owners acquired title to tract two by Deed of Mrs. H. S. Williams and husband, dated May 21, 1930, and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 74, Page 341.

Together with the right to prospect for, mine, mill and remove the same; water rights, the free and uninterrupted right of ingress and egress, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto. And the parties of the first part also grant to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including

limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned agreement. The terms of this option Contract and Agreement are fully set out in the Agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

In Witness Whereof, the Owners and parties of the first part have hereunto set their signatures the day and date first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 21st day of May, 1955, by and between ANNETTA McELVEEN (Single), of Jefferson County, Tennessee, hereinafter called the Owner, party of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

WHEREAS, Hugh R. McElveen and the Zinc Company entered into a certain Contract and Agreement under date of September 20, 1952, which contract and agreement was ratified, approved and adopted by the Owner under date of September 19, 1953, with respect to the following described premises:

SITUATE in the Ninth Civil District of Jefferson County, Tennessee, consisting of four adjoining tracts of land making up one boundary, containing 135 acres, more or less, adjoining the lands of Oakley, Smith, Walker, Watkins, Courtney and possibly others, as fully described in Deed of William Sunderland, et al dated September 21, 1923 and of Record in Deed Book 63, Page 297 and in that certain Deed of conveyance of Hugh R. McElveen to Annetta McElveen, dated March 24, 1951 of Record in Deed Book 103, Page 350, Register's Office for Jefferson County, Tennessee, to both of which conveyances reference is here made.

Said Contract and Agreement of September 20, 1952 and the short form thereof of even date between Hugh R. McElveen and the Zinc Company as appears of record in the Register's Office for Jefferson County, Tennessee in Misc. Book 6, Page 7 and the adoption agreement of the Owner of September 19, 1953 as appears of Record in Misc. Book 6, Page 255 are both incorporated by reference and made a part hereof as fully as if copied verbatim herein, And;

WHEREAS, by the terms and provisions thereof said Contract and Agreement expires on September 20, 1953. And in the event the Zinc Company elects to exercise its right and option to purchase thereunder there is remaining due and unpaid purchase money for the mineral and mining rights fully described in paragraph "two" the sum of FIFTEEN THOUSAND EIGHT HUNDRED SEVENTY FIVE ($15,875.00) DOLLARS. And;

WHEREAS, the Owner and the Zinc Company have mutually agreed to extend said option Contract and Agreement.

NOW, THEREFORE, in consideration of ONE THOUSAND ($1,000.00) DOLLARS cash in hand paid to the Owner, receipt of which is hereby acknowledged, said Contract and Agreement is hereby extended until September 20, 1957. Otherwise than above specified all the provisions of the aforesaid Contract and Agreement of September 20, 1952 shall be in full force and effect during said extended period. In the event the Zinc Company exercises its right and option to purchase said ONE THOUSAND ($1,000.00) DOLLARS paid hereunder shall apply upon and go to reduce the purchase price of FIFTEEN THOUSAND EIGHT HUNDRED SEVENTY FIVE ($15,875.00) DOLLARS.

The parties hereto agree that the whole of said Extension Contract and Agreement between them is written herein and in a short form Agreement of even date herewith which is intended to be recorded, and the parties hereto are not bound by any agreements, understandings or conditions otherwise than as set forth herein and said short form agreement.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the party of the first part has hereunto set her signature on this the day and date first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 18th day of May, 1955, by and between HATTIE MILLER (WIDOW), of Jefferson County, Tennessee, hereinafter called the Owner, party of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the state of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

WHEREAS, the Owner and the Zinc Company entered into a certain Contract and Agreement under date of September 18, 1952, which agreement was also executed by Hubert Miller, now deceased, with respect to the following described property:

SITUATE in the Ninth Civil District of Jefferson County, Tennessee, known as the A. A. Newman lands, adjoining the lands of Housley, Watkins, Cline and possibly others, and more particularly described as follows:

> BEGINNING on a rock in the road in the line of the old Sawyers tract, a corner to J. B. Huff; thence South 80 West 62 poles to a stake; thence N. 81 W. 61 poles to a post oak, the old Talbott corner, now Huffs; thence with the old Talbott line S. 47-1/2 W. 22-1/2 poles to a stake at a marked ash corner with James Hill; thence with the said Hill line S. 36-3/4 E. 138 poles to a rock; thence N. 62 E. 101 poles to a rock, the old I. G. Watkins corner; thence with the old Watkins line N. 24-1/2 W. 84-1/2 poles to the BEGINNING containing 78-1/4 acres, more or less.

Hubert Miller and wife, Hattie Miller acquired title to the above described premises by Deed of Sam Hubbard and wife, dated March 5, 1941, and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 85, Page 54, to which reference is here made. Hubert Miller being now deceased, leaving Hattie Miller as sole owner as surviving tenant by the entirety.

Said Contract and Agreement of September 18th, 1952 and the short form thereof of even date between the parties as appears of record in the Register's Office for Jefferson County, Tennessee in Misc. Book 6, Page 15 are incorporated by reference, and made a part hereof, as fully as if copied verbatim herein. And;

WHEREAS, by the terms and provisions thereof said Contract and Agreement expires on September 18, 1955. And in the event the Zinc Company elects to exercise its right and option to purchase thereunder there is remaining due and unpaid purchase money for the mineral and mining rights fully described in paragraph "two" the sum of NINE THOUSAND THREE HUNDRED EIGHTY TWO ($9,382.00) DOLLARS. And;

WHEREAS, the Owner and the Zinc Company have mutually agreed to extend said option Contract and Agreement.

NOW, THEREFORE, in consideration of FOUR HUNDRED ($400.00) DOLLARS cash in hand paid to the Owner, receipt of which is hereby acknowledged, said Contract and Agreement is hereby extended until September 18, 1957. Otherwise than above specified all the provisions of the aforesaid Contract and Agreement of September 18, 1952 shall be in full force and effect during said extended period. In the event the Zinc Company exercises its right and option to purchase said FOUR HUNDRED ($400.00) DOLLARS paid hereunder shall apply upon and go to reduce the purchase price of NINE THOUSAND THREE HUNDRED EIGHTY TWO ($9,382.00) DOLLARS.

The parties hereto agree that the whole of said Extension Contract and Agreement between them is written herein and in a short form Agreement of even date herewith which is intended to be recorded, and the parties hereto are not bound by any agreements, understandings or conditions otherwise than as set forth herein and said short form agreement.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the party of the first part has hereunto set her signature on this the day and date first above written.

EXTENSION CONTRACT AND AGREEMENT

THIS EXTENSION CONTRACT AND AGREEMENT made and entered into on this 15th day of June, 1953 by and between H. H. OAKLEY (WIDOWER) of Sevier County, Tennessee, hereinafter called the Owner, party of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation, authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company:

W I T N E S S E T H

WHEREAS, the Owner and the Zinc Company entered into a certain Contract and Agreement under date of October 15, 1952, which agreement was also executed by Sarah Oakley, now deceased, with respect to the following described property:

SITUATE in the Ninth Civil District of Jefferson County, Tennessee, adjoining the lands of Caldwell, John May, Albert Weddns, Knight, McElveen, and Tom Courtney, containing 137 acres, more or less and more particularly described as follows:

> BEGINNING on a stone in the corner of a lane; thence North 71 East 125-2/3 poles to a stone at the end of said lane; thence South 6-1/2 East 18 poles to a stone; thence North 71 East 12 poles to a stone; thenceSouth 6-1/2 East 45-1/2 poles to a stone, passing near and East of the Chas. Jolley house; thence East 55 poles to a stone in A. A. Carter's line near three post oaks; thence South 30 poles; thence East 30 poles to a rock; thence North 139 poles to a rock, old Carter and Talbott's corner; thence West 30 poles to a stake, corner to Elizabeth Jolley lands in John C. Talbott's line; thence North 87-1/2 West 104-5/10 poles to three small black oaks near the railroad; thence South 69 West 90 poles to a stone; thenceSouth 2 West 63-1/2 poles to the BEGINNING.

H. H. Oakley and wife, Sarah Oakley acquired title to the above described premises by Deed of City National Bank, a corporation, dated November 27, 1929 and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 75, Page 87 to which reference is here made. Sarah Oakley being now deceased, leaving H. H. Oakley sole owner as surviving tenant by the entirety.

Said Contract and Agreement of October 15, 1952 and the short form thereof of even date between the parties as appears of Record in the Register's Office for Jefferson County, Tennessee in Misc. Book 6, Page 79 are incorporated by reference, and made a part hereof, as fully as if copied verbatim herein. And;

WHEREAS, by the terms and provisions thereof said Contract and Agreement expires on October 15, 1955. And in the event the Zinc Company elects to exercise its right and option to purchase thereunder there is remaining due and unpaid purchase money for the mineral and mining rights fully described in paragraph "two" the sum of SIXTEEN THOUSAND FOUR HUNDRED TWENTY FIVE ($16,425.00) DOLLARS. And;

WHEREAS, the Owner and the Zinc Company have mutually agreed to extend said option Contract and Agreement.

NOW, THEREFORE, in consideration of SEVEN HUNDRED ($700.00) DOLLARS cash in hand paid to the Owner, receipt of which is hereby acknowledged, said Contract and Agreement is hereby extended until October 15, 1957. Otherwise than above specified all the provisions of the aforesaid Contract and Agreement of October 15, 1952 shall be in full force and effect during said extended period. In the event the Zinc Company exercises its right and option to purchase said SEVEN HUNDRED ($700.00) DOLLARS paid hereunder shall apply upon and go to reduce the purchase price of SIXTEEN THOUSAND FOUR HUNDRED TWENTY FIVE ($16,425.00) DOLLARS.

The parties hereto agree that the whole of said Extension Contract and Agreement between them is written herein and in a short form Agreement of even date herewith which is intended to be recorded, and the parties hereto are not bound by any agreements, understandings or conditions otherwise than as set forth herein and said short form agreement.

This Extension Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

CONTRACT AND AGREEMENT

THIS CONTRACT AND AGREEMENT made and entered into on this 22nd day of December, 1955, by and between HELEN QUARLES JAMES and husband, SAM H. JAMES, of Hamblen County, Tennessee, hereinafter called the Owners, parties of the first part, and THE NEW JERSEY ZINC COMPANY, a New Jersey Corporation authorized to do business in the State of Tennessee, party of the second part, hereinafter called the Zinc Company.

W I T N E S S E T H

That for and in consideration of the sum of ONE ($1.00) DOLLAR and other good and valuable considerations in hand paid, the receipt of which is hereby acknowledged, the parties of the first part grant unto the party of the second part for a period of one year from the date hereof, with the privilege of extension for further periods not to extend beyond December 22, 1958, upon payment of sums of money agreed upon, the exclusive right and option to purchase all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on the following described premises:

The First Tract of land is situated in the Ninth Civil District of Jefferson County, Tennessee and the Second Tract or parcel of land is situated in the Second Civil District of Hamblen County, Tennessee, both of which are more particularly described and bounded as follows:

FIRST TRACT: Situated in Jefferson County. BEGINNING on the North side of the public road at Quarles line at a stake; thence Northwardly to a marked line; thence with said marked line East to the Roberts line; thence with the said Roberts line to the Public Road; thence with the said road to the BEGINNING, being that portion of the lands contained in said Mountcastle deed situated in Jefferson County, Tennessee, the said lands being in both Jefferson and Hamblen Counties, containing by estimation 68 acres, more or less.

SECOND TRACT: Situated in the Second Civil District of Hamblen County, Tennessee, being a portion of the 89 acre tract of land deeded to J. H. Baker by Clay Trent and wife, Bessie Trent on March 4, 1944. The portion herein conveyed being 34 acres, more or less. BEGINNING on a black oak tree on the West side of said tract, a corner on the agreed line between the said J. H. Baker and Rufus Baker, running North with John Quarles line to the Southern Railroad; thence with said Railroad Eastwardly to J. W. Brooks line; thence with said J. W. Brooks line Southwardly to Roberts corner, the agreed corner between J. H. Baker and Rufus Baker; thence with said agreed line between J. H. Baker and Rufus Baker Westwardly to the BEGINNING.

Helen Quarles James acquired title to the above described property by Quit-Claim Deed of Jessie Quarles Burnett, et al., dated May 1, 1950 and of Record in the Register's Office for Jefferson County, Tennessee in Deed Book 102, Page 247 and of Record in the Register's Office for Hamblen County, Tennessee in Deed Book 84, Page 15. Reference is also made to the Last Will and Testament of John W. Quarles, of Record in Will Book 12, Page 204-5, County Court Clerk's Office for Jefferson County, Tennessee.

Together with the right to prospect for, mine, mill and remove the same; water rights, the free and uninterrupted right of ingress and egress, in accordance with the terms of an Agreement of even date herewith entered into between the parties hereto.

And the parties of the first part also grant to the party of the second part during said periods the right to prospect for, explore and examine all minerals, metals, ores, ore-bearing materials, and rocks of any kind, including limestone, in, under or on all of said premises, including the right to enter thereupon, to use available water and to remove samples, in accordance with the terms of the last mentioned

agreement. The terms of this option Contract and Agreement are fully set out in the agreement of even date herewith, which is here referred to and made a part hereof as if fully set out at length.

This Contract and Agreement and each and every provision thereof shall be binding upon and enure to the benefit of the parties hereto, their heirs, executors, administrators, successors and assigns.

IN WITNESS WHEREOF, the Owners and parties of the first part have hereunto set their signatures the day and date first above written.

Helen Quarles James

Attention: Mr. A. E. Turner
Assistant Manager of Purchasing

Gentlemen:

Diamond Drilling - 1-X-52h
Jefferson City District, Tennessee

1. In response to your letter of October 20th, we are pleased to submit below a proposal for your contemplated exploratory drilling program which is to be carried out in the above-mentioned area.

2. We understand that the work as now planned will consist of a series of vertical holes to a maximum depth of 2,000 feet, with a minimum aggregate footage of 10,000 feet; and that the formation to be drilled consists mainly of Mascot dolomite and limestone. We further understand that the distance to water may range up to 8,000 feet at one or more of the drill hole locations; and that the drilling will be confined to the Talbot area.

3. For this work we propose to furnish two complete Longyear diamond core drill units, together with the necessary accessory equipment required to accomplish the work as planned. We further propose to supply all service equipment required for moving the equipment from one location to another, and other services and facilities needed in connection with supplying water for drilling purposes. We also propose to operate the drill on a two shift basis.

4. We will carry public liability insurance covering personal injury and property damage, and Workmen's Compensation insurance, and also, all-risk insurance on the drilling equipment protecting against loss by theft, fire, flood, land-slides and other similar hazards.

We will also assume and pay any and all Old Age Benefit, Unemployment and Social Security taxes and contributions imposed by federal or state authorities.

Certificates showing the coverage referred to will be furnished upon request.

5. Based upon the conditions as outlined above, we are pleased to quote as follows:

a) Overburden Drilling

0 - 100 feet in depth, measured from the collar of the hole ..... $ 2.00 per foot

b) Diamond Core Drilling

0 - 1,000 feet in depth, measured from the collar of the hole -

EX standard tools, recovering core approximately 7/8" in diameter..$ 2.00 per foot

BX wire line and/or AX standard tools, recovering core approximately 1-1/8" in diameter .....$ 2.00 per foot

1,000 - 1,500 feet in depth -

EX standard .....$ 2.50 per foot

AX standard .....$ 2.50 per foot

BX wire line .....$ 2.25 per foot

1,500 - 2,000 feet in depth -

EX standard .....$ 3.00 per foot

AX standard .....$ 3.00 per foot

BX wire line .....$ 2.50 per foot

2000
1250
900
4150
1500
$2.31

2000
500
2500
1200

c) Drill Hole Surveying with Maas compass ...$ 5.00 per hour

d) Delays for your convenience or for which you are responsible .....$ 5.00 per hour

e) Hauling drill core from drill hole locations to core storage shed.....$ 3.25 per hour

f) Casing left in drill holes at your request:

EX-size .....$ 1.47 per foot
AX-size .....$ 1.54 per foot
BX-size .....$ 1.96 per foot

g) Cleaning up of drill hole locations will be carried out at the sole expense of the Longyear Company.

h) Reaming, Casing and Cementing, when required, will be carried out at the sole expense of the Longyear Company

6. In addition to the above footage rates, it is agreed that, for drill hole locations in excess of 2500 feet from source of water supply, the following allowances will be made:

a) Water supply allowance for each drill hole which is in excess of 2500 feet but not more than 5,000 feet from an adequate source of water supply .....$ 0.05 per foot drilled

b) Water supply allowance for drill holes which are in excess of 5,000 feet but not more than 7500 feet from an adequate source of water supply .....$ 0.10 per foot drilled

c) Water supply allowance for drill holes which are in excess of 7500 feet but not more than 10,000 feet from an adequate source of water supply .....$ 0.20 per foot drilled

7. It is further agreed and understood that the sources of water supply to be considered for the purpose of computing the distance allowance are those which are at present available or which are made available at the Company's expense, and do not include wells which may be drilled at the contractor's expense.

8. Drill cores are to be placed in receptacles furnished by you at each drill hole location and transported to point of permanent storage as provided for herein.

9. Invoices covering work performed will be prepared in accordance with your instructions.

10. We very much appreciate being afforded the opportunity to consider this work. Should our proposal be found acceptable, we are prepared to furnish the equipment from our Max Meadows warehouse and commence the drilling operations promptly after receipt of official notice to proceed.

Yours very truly,

E. J. LONGYEAR COMPANY

Dear Mr. Montgomery:

Under the terms of DMEA contract Idm E-936 and the Certification of Possible Production dated March 30, 1956, the period which production was subject to payment of royalty to the Government ended May 30, 1986.

According to present records, the Government retains no claims or liens against the property subject to the contract or any production therefrom. Therefore, we are closing our books and records on this contract.

Sincerely yours,

PROJECT SUMMARY REPORT

By: J. W. Alt

March 18, 1959

1. Docket No. DMEA-4119 (Zinc)
Contract No. Idm-E936
Property: Talbott Area
Jefferson and Hamblen Counties, Tennessee

Operator: The New Jersey Zinc Company
160 Front Street
New York 38, New York

Operator's Property Rights: Optionee - Option Contracts Which permits the New Jersey Zinc Company to purchase all mineral rights and mining rights on tracts as listed in Annex I of the Contract.

2. Contract date March 30, 1956. To complete - September 1, 1957.

Contains a 30 years royalty payment period.

Work Authorized

The purpose of the project is to explore for ores of zinc by diamond drilling (plus necessary overburden drilling).

The intent of the work is to investigate the ore potential of the Kingsport limestone and dolomite which is the ore-bearing formation of the district. It is anticipated that drill holes will range from 800 to 1,700 feet in depth, with probable average depth of 1,250 feet. It is estimated that 60,000 feet of drilling will be required.

Estimated Cost of the Project

Actual Costs

Category (1) Independent Contracts

Overburden drilling and diamond to 1000-foot depth, 48,000 feet @ $2.16/ft.	$103,680.00	
Diamond drilling, 1000-foot to 1500-foot depth, 10,000 feet @ $2.66/ft.	26,600.00	
Diamond drilling over 1,500-foot depth, 2,000 feet @ $3.16/ft.	6,320.00	$136,600.00

Fixed Unit Costs

Incidental allowance for each foot of drilling completed, 6,000 feet @ $0.32/ft.	$ 19,200.00	
300 samples to be assayed @ $1.50/ea	450.00	19,650.00
Estiamted Total Cost of Project		$156,250.00
Government's Participation, 50%		$ 78,125.00

Amendments

No. 1 Agreed May 7, 1956, effective as of date of contract.

Adds 11 parcels of land with Contract and Agreements.

No. 2 Agreed June 1, 1956.

1. In the fourth paragraph of Exhibit "A", the second sentence is revised to read as follows:

   All core containing significant mineralization shall be properly sampled and the samples assayed for zinc.

2. In Exhibit "A", the second item under "Fixed Unit Costs" is revised to read as follows:

   450 samples to be assayed @ $1.00/sample $450.00

Amendments (continued)

No. 3 Agreed November 15, 1956.

Adds 10 parcels of land with Contract and Agreements

Work Completed

Diamond drilling, overburden and to 1000-foot depth, 21,988 feet	$44,590.60
Diamond drilling, 1000-foot to 1500-foot, 5,752 feet	13,217.75
Diamond drilling over 1500-foot, 1,566 feet	4,137.35
Incidental allowance for each of drilling completed, 29,306 feet @ $0.32/ft.	9,377.92
8 Assays @ $1.00/each	8.00
Total cost of the Project	$71,331.62

Work was started on April 19, 1956 and was stopped on February 21, 1957. Termination Agreement dated April 19, 1957, effective date of February 28, 1957.

3. Audit - Report of Review dated May 13, 1957.

Total cost as billed by Contractor	$71,331.62
No Execptions	
Total Accepted Cost of Project	$71,331.62
Government's participation, 50%	$35,665.81

Operator's final report - Received April 29, 1957.
Field Team's final report dated December 18, 1958.

4. Certification of Discovery or Development - None issued.

No certification was made but in the Termination Agreement contained the royalty payment clause in it.

5. Comments:

The contract was operated by the New Jersey Zinc Company personnel at Jefferson City in an efficient manner. Accounts of finance expended and of progress of work were accurate and promptly submitted. Cooperation between the local staff of the Operator and the Field Team personneal was excellent.

The exploration consisted of 23 holes spaced generally on 1/4 - or 1/2 mile intervals. The hole depths ranged from 731 feet to 1,990 feet, averaging 1,274 feet. Sphalerite was found in 12 of the 23 holes, but nothing of minable grade and thickness was encountered. The best core runs were 12, 11, and 9 feet containing 1.68, 2.05, and 1.79 per cent zinc respectively.

The generally unsuccessful results of this widely-spaced drilling has considerably reduced the gross ore potential of the project area. As it appeared unlikely, at the recess of drilling in February 1957, that any large, favorably situated ore bodies of the size, grade, and type normally found in the Mascot - Jefferson City zinc district would be discovered, if the remainder of the authorized drilling were carried to completion, the Operator and the Field Team both recommended of the project as unsuccessful.

Further exploration on this property with Government financial assistance is not warranted.

Tennesse, $71,332; Zinc

Memorandum

To: W. R. Griswold, Office of Mineral Exploration, Commodity Specialist, Branch of Base Metals

From: Commodity Specialist, Branch of Base Metals

Subject: Review of Field Team final report of December 18, 1958 on exploration.

I have reviewed the field team report, prepared by Wedow of the Survey and Shirley of the Bureau of Mines. The report amply states the findings in the 23 hole, 29,306-foot exploration project, appraises the results fairly and gives adequate maps and logs.

The drilling failed to reveal ore-bodies of large-size and of the grade and type found elsewhere in the Tennessee area and no certification of discovery was made. It was recognised that some part of the 3430 acre area might yet be the site of a smaller discovery, therefore a pseudo-certification was recommended and made part of the Termination agreement to protect the Government's interest. This action seems well justified by the facts presented.

FINAL REPORT

DMEA-4119, Idm-E936(zinc) TALBOTT AREA
Jefferson and Hamblen Counties,
Tennessee

Operator: The New Jersey Zinc Company, 160 Front St., New York 38,

SUMMARY AND RECOMMENDATIONS

DMEA-assisted exploration for ore bodies of the types found in the Mascot-Jefferson City (Tennessee) zinc district was conducted in the Talbott area, Jefferson and Hamblen Counties, Tennessee from April 1956 through February 1957. Although the contract called for 60,000 feet of diamond drilling, it was terminated by mutual agreement with the completion of 29,306 feet or 49 percent of the authorized footage. The total cost of the completed program amounted to $71,331.62 of which 50 percent or $35,665.81 was the cost to the Government.

The exploration consisted of 23 holes spaced generally on 1/4 - or 1/2 mile intervals. The hole depths ranged from 731 feet to 1,990 feet, averaging 1,274 feet. Sphalerite was found in 12 of the 23 holes, but nothing of minable grade and thickness was encountered. The best core runs were 12, 11, and 9 feet containing 1.68, 2.05, and 1.79 percent zinc respectively. Most of the mineralization occurs in the lower part of the Kingsport formation ("R" and "S" Beds) although some is found in the Longview dolomite ("U" Bed) and trace amounts in the upper Kingsport and Mascot dolomites.

The generally unsuccessful results of the Talbott drilling, as far as it was carried, have considerably reduced the gross ore potential of the area. As it appeared unlikely that any large favorably situated ore bodies of the Jefferson City type would be found by further drilling, the project was terminated by mutual agreement in advance of completion. However, the wide-spacing of the drilling does not preclude the possibility for the discovery of significant but smaller ore bodies in the future. Consequently, the Field Team recommended that the project be "pseudo-certified" as a provision of the termination. This action was taken to protect the Government's interest in case the Operator subsequently discovers and mines ore within the contract area, particularly as exploration for such ore would use the DMEA drilling data as a point of departure.

INTRODUCTION

The Talbott area (figs. 1 and 2) in Jefferson and Hamblen Counties, Tennessee was explored for zinc deposits by the New Jersey Zinc Company with DMEA assistance under Contract No. Idm-E936 (Docket No. DMEA4119). The primary purpose of the exploration was to test the gross potential of the area for zinc ore bodies of the same habit as those occurring at the New Jersey Zinc's Jefferson City mine, American Zinc's Coy and Jarnigan mines, and U. S. Steel's Davis-Bible mine, lying but several miles to the west and southwest. The exploration consisted entirely of diamond drilling from the surface and was carried out in the period April 1956 through February 1957.

The property controlled (by option agreements) at the close of drilling amounted to 3,429.6 acres. Of this total, 2,244 acres were included in the original contract. The remainder was added in lots of 888.6 acres and 297 acres by Amendments No.1 and No. 3, respectively.

The contract authorized 60,000 feet of diamond drilling in which individual holes were anticipated to range from 800 feet to 1,700 feet in depth and average 1,250 feet. The maximum gross cost of the contract, including assays and an incidental allowance (geological, engineering, cost accounting services, etc.), was not to exceed $156,250.00, of which the Government share (at 50 percent) would be $78,125.00. Geologic guidance of the project for the Operator was maintained by

Messrs. J. W. Phillips and R. E. Tutweiler, geologists, under the supervision of Mr. A. D. Hoagland, Assistant to the Superintendent and Mr. Johnson Crawford, Superintendent, Tennessee Division, The New Jersey Zinc Company. Actual drilling was contracted by the Operator to the E. J. Longyear Company, Minneapolis, Minnesota.

WORK ACCOMPLISHED

Drilling on the Talbott project was initiated on April 19, 1956 and recessed February 21, 1957. The project was terminated by mutual agreement as of February 28, 1957 with the completion of 29,306 feet, or about 49 percent of the authorized drilling. The footage drilled consisted of 23 holes ranging from 731 feet to 1,990 feet, averaging 1,274 feet, in depth (table 1). These holes were spaced, for the most part, at one-fourth to one-half mile intervals in an area about 4-miles long and 1 mile wide. (see figs. 2 and 3.)

The generally unsuccessful results of this widely-spaced drilling has considerably reduced the gross ore potential of the project area. As it appeared unlikely, at the recess of drilling in February 1957, that any large, favorably situated ore bodies of the size, grade, and type normally found in the Mascot-Jefferson City zinc district would be discovered, if the remainder of the authorized drilling were carried to completion, the Operator and the Field Team both recommended termination of the project as unsuccessful. Consequently, the project was

terminated, effective February 28, 1957, and the Operator's property options were allowed to expire. No certificate of discovery was issued, but the project was "pseudo-certified." This "pseudo-certification" provided that (Article 4, Termination Agreement):

> "Should the Operator or any affiliate or subsidiary hold or reacquire any interest in the land.... of the Contract or any production of minerals therefrom, the Operator shall pay royalty to the Government.....on any production made from the date such interest is acquired, to the extent of the interest held, the same as though certification of discovery or development had been made by the Government."

"Pseudo-certification" was recommended by the Field Team because the drilling was not completed, and, although the gross ore potential of the area was tested, the wide-specing of the drill holes does not preclude the possibility for the discovery of significant but smaller ore bodies, particularly if future exploration is based on the results of drilling done under the Talbott DMEA contract.

The location (collar coordinates), collar elevation, and total depth of each of the 23 holes completed are given in Table 1. The average depth of the holes is 1,274 feet. If 260 days were the actual number of days worked with two drills on the project, then the drilling advanced at the average rate of about 56 feet per day per drill or 28 feet per shift per drill. Thus, 23 holes were drilled at the average rate of about 23 working days per hole, including all down-time

(moving, setting-up, and repairs). BX-wireline equipment was used for the bulk (26,664 feet) of the diamond drilling. The remainder consisted of the following: (1) Overburden, 425 feet; (2) NX-size, 95 feet; (3) Standard BX-size, 289 feet; (4) Standard AX-size, 764 feet; and (5) AX-wireline, 1,069 feet. It appears to be the consensus of those concerned with efficiency of drilling operations that BX-wireline equipment, though generally faster for many types of operations, is slowed down in the East Tennessee zinc districts. Apparently the cherty zones encountered in the Mascot and Kingsport formations require frequent bit changes, thus offsetting the speed advantage gained by the cable-hoisting of the wire-line core barrel.

The contract authorized a maximum of 450 assays for zinc (changed from 300 to 450 by Amendment No.2). However, of such runs of mineralized rock recovered, few were of sufficient thickness and estimated grade to warrant assaying. Consequently, only eight assays were made. These were as follows:

Hole No.	Depth	Core length	Percent Zn
T-47	1778-1782	4'	2.22
	1782-1787	5'	1.45
T-48	967-968	1'	6.72
	977-981	4'	3.03
	984-988	4'	2.60
	1013-1017	4'	3.59
	1020-1025	5'	1.19
T-51	863-867	4'	2.44

EXPENDITURES

The Report of Review of the Talbott contract, issued by DMEA on May 13, 1957, shows that a total cost of $71,331.62 as billed by the Operator, was acceptable to the Government with no exceptions. A summary breakdown of costs allowable under the contract follows:

	Total cost	Average cost per foot	Average cost per hole
Drilling	$61,945.70	$2.114	$2,693.29
Assays	8.00	-	0.35
Incidentals	9,377.92	0.320	407.74
	$71,331.62	2.434	$3,010.38

Note: Average cost per foot based on 29,306 feet; average cost per hole based on 23 holes. The cost of assays per foot of drilling is omitted from summary as it is essentially infinitesimal ($0.00027).

The cost of Government participation at 50 percent amounted to $35,665.81. No production was obtained during the life of the contract. Because of termination prior to completion, the project was "pseudo-certified," as discussed above. Thus, royalty payments will be due the Government only if the Operator reacquires interest in mineral production from the contract area, as specified in the termination agreement.

EFFICIENCY OF OPERATIONS

The Talbott contract was operated by the New Jersey Zinc Company personnel at Jefferson City in an efficient manner. Accounts of finances expended and of progress of work were accurate and promptly submitted. Cooperation between the local

staff of the Operator and Field Team personnel was excellent.

GEOLOGY

The Talbott area lies at the northeast end of the well-known, highly productive Mascot-Jefferson City zinc district of East Tennessee. The Ordovician host rocks of the zinc deposits are the Longview dolomite, the Kingsport formation, and the Mascot dolomite. The areal distribution of these formations, as well as the superjacent Moshiem and Lenoir limestones, in the Talbott area are shown on figure 3. Also sketched on figure 3 are the major structural features of the area, namely, the Rocktown and Koppick Knob overthrust faults. The Koppick Knob fault is generally synonymous with the Rocky Valley fault (Bridge, 1956) the prominent overthrust of the West New Market area (DMEA-2546). However, the Rocky Valley (Koppick Knob) fault as shown in the Talbott drilling (fig.3), has proven to be the next major fault northwest of the one labelled the Rocky Valley fault on Bridge's map (1956, plate 1).

Stratigraphic control of the drilling was generally excellent. Most of the strata underlying the thrust faults are essentially flat lying (average dip about 9°SE). Almost all of the marker beds used in the Mascot-Jefferson City district were recognizable. Chief among these markers are the chert-matrix sandstone at the base of the Mascot dolomite, the "108" Bed (minus C oolite at Mascot), and the "28" Bed (base of the upper Kingsport or top of the "R" Bed), and the "T", "U" and "V"

Beds--the top most beds of the Longview dolomite. Depth data on these markers are given by hole in table 1. They are also plotted on figure 4 with a X10 vertical exaggeration, using the "U", "V" contact as a zero datum. Such a plot is made to emphasize the stratigraphic position of the zinc occurrences. Thus, as can be seen in figure 4 and table 1, the major portion of the zinc occurrence occur in the lower Kingsport member ("R" and "S" Beds), some were found in the upper part of the Longview dolomite ("U"-Bed), and a few in the upper Kingsport member and the Mascot dolomite.

A classification of the holes by degree or amount of mineralization is as follows:

Type of hole	No. of holes	Percent of total
Ore (a minable thickness containing 50 ft. x percent units or more.....	0	0
Sub-ore(minable thickness containing less than 50 ft x percent units).....	3	13
"Shine"(strong showing of sphalerite but considerably less than minable thickness..	5	22
Trace (traces or scattered traces of sphalerite).....	4	17
Barren (no zinc minerals visible).....	11	48
Total.....	23	100

In conclusion, though the widely spaced drilling in the Talbott area does not preclude the occurrence of minable

commercial grade zinc ore bodies, it is believed that sufficient drilling has been completed to have essentially eliminated the gross potential for ore bodies of the size of that at the Jefferson City mine of the Operator.

On the other hand, review of the data leads to certain features related to the occurrence of the sections of stronger mineralization encountered. These are:

1) The Kingsport is generally thinner in the sub-ore holes than in the "shine", trace, or barren holes, for example, Holes T-37 and 48 (fig.4).

2) Where little or no mineralization occurs, the interval between the top of the Kingsport and the "U"-"V" contact maintains essentially the same thickness (sec. C. fig.4).

3) The occurrence of mineralization in the upper part of the Longview dolomite appears to be related either to areas where the "T" Bed thins over a relatively thicker "U" Bed (Hole T-37), or where the "U" Bed itself is thinner than normal (Hole T-51).

Contract No. Idm-E939

Dear Mr. Laurence:

We are still lacking the final Field Team Report on the cited terminated project, though we received the Operator's Final Report a year ago.

Will you kindly let us have this report as soon as is convenient.

Sincerely yours,

George C. Selfridge

Chairman, Operating Committee (HB)

NOV 25 1957 Docket No. DMEA-4119

Mr. Stanley S. Miller
Legal Department
The Eve Survey Mine Company
[illegible] Street
New York 38, New York

Re: Docket No. DMEA-4119 (Mine)
The Eve Survey Mine Company
Beaver Creek Area
Boyle County, Virginia
Contract No. [illegible]

Dear Mr. Miller:

In refer to your letter to Mr. Kingsbrick, dated October 24, 1957, in which you mentioned that you had returned all the copies of a proposed termination agreement to Mr. Robert A. Lawrence, and which he has since forwarded to us.

The paragraph 4 used in the termination agreement for Docket No. DMEA-4119, Eaton Area, Jefferson and Madison Counties, Tennessee, was particularly applicable to this case. There we have a considerable area which had been drilled but the drill holes were widely spaced, and, although the results were disappointing, it cannot be said that the discovery of smaller but significant ore bodies is not a possibility.

The project represented by Docket No. DMEA-4119, Beaver Creek Area, Boyle County, Virginia, is very different. In this case the two drill producing areas were drilled and the drill holes were quite close together. The results were disappointing and the probability of finding any bodies is rather remote.

If the paragraph 4 which you prefer were used in this case, it would mean that the mined district would remain in our active file indefinitely as your company might wish to complete the property at some future time.

Since little possibility exists that the project will be certified, we prefer to permanently close the docket at the end of the six-month period mentioned in Article 8 of the contract. We are, therefore, returning the original and four copies of the proposed termination agreement for execution by an authorized representative of your company. Kindly return all the copies, except the Operator's copy to this office.

Regarding the conference which you mentioned in the last paragraph of your letter, we will be pleased to arrange one at your convenience.

Sincerely yours,

C. O. Mittendorf

Administrator

Memorandum for the Files

From: W. P. Klugescheid, Division of Base Metals

Subject: Phone Conversation on Docket Nos. DMEA-4119, DMEA-4174, and DMEA-4178, The New Jersey Zinc Company, Virginia Area, concerning Termination Agreements and Special Agreement Concerning Land, Zinc.

On this date, I called Mr. Lindley G. Miller, of the Legal Deaprtment of The New Jersey Zinc Company.

Mr. Miller made it clear that The New Jersey Zinc Company prefers paragrah 4 of the Termination Agreement for DMEA-4119, to the ones which have been sent out for DMEA-4174 and DMEA-4178. This clause is to the advantage of the Government, and Mr. Miller stated that his company considered the conditions of this paragraph as just and right. Mr. Miller said that they would return the Termination Agreements for DMEA-4178 and also DMEA-4590 (which belongs to the Rare Metals Division).

Mr. Miller was informed that I could not promise the use of paragraph from DMEA-4119 in all cases as this would be at the discretion of the Legal Division and the Administrator.

In the Special Agreement Concerning Land, Mr. Miller considers that part (c) of paragraph 2 is superfluous. He was a little in doubt as to the complete meaning of paragraph 2(d). He does however interprete this as meaning that any land deleted and then taken up again in future years would be subject to any certification which may have been made on <u>any part</u> of the land included in the contract.

The New Jersey Zinc Company knows that land may be deleted from the time that the contract is signed until 60 days after the work is completed or terminated, and then it cannot be dropped until six months after the Operator's final report has been received by the Government. If land is dropped during this period it is at the risk and responsibility of the Operator as it is in default of the contract.

Mr. Griswold is of the opinion that all the contracts where there is a large land area involved should contain the paragraph 4 as in DMEA-4119.

Mr. Miller still hopes that the Legal Division will review the recommendations which he wrote to Mr. Griswold and which he discussed with Mr. Griswold. I informed him that due to press of other work this has not been possible to date.

Memorandum for the Files

From: W. P. Klugescheid, Division of Base Metals

Subject: Phone conversation on Docket Nos. DMEA-4119, 4174, 4178, and 4675, The New Jersey Zinc Company, Lead-Zinc-Copper.

On this date, Mr. Lindley G. Miller, of the legal department called me on the phone from New York City, to inform me that the proposed contract for DMEA-4675, was being returned to us unsigned and with an accompanying letter stating their objections thereto.

Mr. Miller also wished to know why clause 4, in the Mutual Termination Agreement of DMEA-4119 was different from DMEA-4174 and DMEA-4178. I informed him that I would look them up and would advise him. He also wished to know how it is possible to delete land after a termination agreement has been signed. They have already deleted land prior to termination so there should be no great difficulty about this. (4178 is a case in point.)

Re: Docket No. DMEA-4119 (Zinc)
The New Jersey Zinc Company
Jefferson and Hamblen Counties,
Tennessee
Contract No. Idm-E936

Dear Mr. Laurence:

Enclosed are the original and two copies of a Report of Review, in lieu of a final audit, covering the referenced project. If you concur with the facts stated therein, the original and one copy of the report should be forwarded to the Certifying Officer and one copy should be retained in your files. If, for any reason, the report does not have your concurrence please return all copies to this Division.

The regional finance officer's file on this project, which was submitted to this Division by memorandum dated May 6, 1957, is being returned by registered mail with copy of this letter to Mrs. Helen R. Miller, Administrative Assistant, Electrotechnical Experiment Station, Norris, Tennessee.

Sincerely yours,

Re: Docket No. DMEA-4119 (Zinc)
The New Jersey Zinc Co.
Talbot Area - Tennessee
Contract No. Idm-E936

Dear Mr. Laurence:

By memorandum dated May 1, 1957, you have confirmed the work performed under the referenced contract and advised that a Report of Review in lieu of a final audit is in order.

As this contract provides, in part, for Government contribution on the basis of actual costs incurred, the audit review must include an examination of the documents substantiating such costs. Therefore, it will be appreciated if arrangements are made with the regional finance officer to forward to this Division the copies of the independent contractor's invoices, as attached to the originals of forms MF-104 submitted by the Operator. No other documents will be necessary as the copies of forms MF-104 submitted to the Washington office were accompanied by other required supporting data.

The copies of the invoices will be returned promptly after examination.

Sincerely yours,

(Signed) J. L. Chambers

Mr. R. A. Laurence, Executive Officer
DMEA Field Team, Region V
Room 13, Post Office Building
Knoxville 2, Tennessee

Dear Mr. Laurence:

We are enclosing, herewith, four copies of our final report on the work done under DMEA No. 4119 - Idm - E 936. This report, by Mr. J. W. Phillips, is titled, Exploration Morristown Sector - Talbott Area, Jefferson and Hamblen Counties, Tennessee.

The report contains a factual account of the geology with supporting maps and typical sections. The detailed logs of all holes drilled under the project are in the envelope at the back of the report.

The conclusion reached through the work accomplished by the Morristown Sector Project is that the chances are remote that there are significant orebodies of the Jefferson City Mine type in the area tested. Further work in the area appears unwarranted at this time. It is recommended that all property interests in the project area be terminated, and that the project be classified as non-productive.

Very truly yours,

THE NEW JERSEY ZINC COMPANY

MORRISTOWN SECTOR - TALBOTT AREA

JEFFERSON AND HAMBLEN COUNTIES, TENNESSEE

DMEA DOCKET NO. 4119 - CONTRACT NO. E 936 - ZINC

Summary

Exploration in the Talbott Area of the Morristown sector has been conducted during the period from 1952 to 1957. It is now concluded that the chances for an ore occurrence within the area, of the magnitude of the Jefferson City mine, appear to be remote.

The most recent test, conducted with Defense Minerals Exploration Administration assistance, included 23 drill holes covering an area of 2600 acres. Nine of these holes encountered sphalerite mineralization of sub ore grade. Data from this drilling program and a previous program lead to the conclusion that the Company's interests in the Talbott area should be terminated.

Introduction

The Morristown sector of the Jefferson City belt is located in Jefferson and Hamblen Counties, Tennessee, adjacent to and northeast of the Jefferson City mining district. The sector is bounded on the southwest by the properties of the American Zinc Company and The New Jersey Zinc Company, and on the northeast by the city of Morristown. The Talbott area, with which this report is primarily concerned, comprises the southwest half of the sector.

DRAWN USGS	THE NEW JERSEY ZINC COMPANY Jefferson City, Tenn.	SCALE 1" = 4 Miles
DATE 4-57	Jefferson City District — Index Map	AX-Tenn A-1260

The Talbott area has warranted investigation due to its adjacency to the Jefferson City mining district and the presence of outcrops showing mineralization in the Mascot and Kingsport formations.

The current drilling program was designed as a gross test of a 2600 acre area down dip from known mineralization. The drilling pattern was oriented to cover 3-3/4 miles strike distance of the Kingsport formation. Drill hole depths varied from 900 to 2000 feet.

History

No production has been recorded from the Talbott area. Two prospect pits which expose zinc carbonate mineralization are known.

The American Zinc Company and Universal Exploration Company have drilled in the area north of the Southern Railroad. Upon completion of their exploration programs they withdrew from the area.

Exploration by The New Jersey Zinc Company started in the Morristown sector in 1952 with a soil sampling program which covered the Kingsport - Longview contact from the southwest end of the sector to the city of Morristown.

A drilling program in the Talbott area was started in December 1952. Thirty-five holes were drilled. The program was recessed in February 1954 owing to the depressed zinc market.

The current drilling program with Defense Minerals Exploration Administration assistance started in April 1956. The drilling was terminated in February 1957, upon completion of twenty-three holes.

Property

The extent of the property controlled during the current project was 3611 acres, located as shown on accompanying map, AX-TENN-B-247a.

Geology

Topography

The topography of the Morristown sector is characterized by gently rolling hills with a local relief of from 20 to 60 feet. Sink holes are abundant. Drainage over the entire area is subterranean. The only prominent topographic feature in the sector is a ridge of Lenoir limestone which extends from Talbott to Morristown. This ridge marks the southeast border of the project area.

Structural Setting of the Area

The Talbott area is situated at the northeast end of the Koppick Knob (or Bays Mountain) overthrust fault and its associated Rocky Valley anticline. The central and northeast portions of the area are composed of formations striking northeast and folded in a homocline dipping 9 degrees to the southeast.

Structure Within the Area

The formations of the Rocky Valley anticline (or Koppick Knob overthrust slice) are faulted onto the Lenoir and Mascot formations. The displacement on the overthrust fault is diminishing as it enters the Talbott area from the southwest. Results of the current drilling project reveal that the fault terminates in the area as a series of minor high angle reverse faults within the Mascot formation.

A secondary overthrust fault, called the Rocktown fault, is present approximately 200 feet beneath and parallel to the Koppick Knob fault. The slice between the two faults is a zone of structurally disturbed Mascot formation. The Rocktown fault thrusts Mascot on to Mascot. This fault continues to the northeast beyond the area drilled.

The sediments underlying the Rocktown fault are relatively undisturbed except for a bedding plane fault (the Pebble Conglomerate fault) which is present in the Jefferson City district and terminates in the southwest part of the Talbott area. Displacement on this fault is not known.

Of interest is a post Koppick Knob high angle reverse fault in the vicinity of drill holes T-47 and T-50, shown on map AX-TENN-B-1261 and section I-Ia. This fault has approximately 200 feet vertical displacement. It is possible that

more of these reverse faults are present east of the T-47, T-50 locations, accompanying the transition from the Rocky Valley anticline to the homoclinal structure (or gentle synclinal structure) to the northeast.

Stratigraphy

The rocks of the Talbott area are lower middle Ordovician and lower Ordovician limestone and dolomite. Formations exposed are as follows:

Lenoir limestone
Mascot dolomite
Kingsport limestone
Longview dolomite

A detailed description of these formations may be found in the Stratigraphy of the Mascot - Jefferson City Zinc District, Tennessee, by Josiah Bridge; Geological Survey Professional Paper 277.

Marker Beds

The most important of the Mascot, Kingsport and Longview formations' marker beds of the Jefferson City district occur in the Talbott area. Stratigraphic control of the drilling was, therefore, quite good. The more prominent markers are as follows:

Formation	Marker Name	Distance from Chert Matrix	Remarks
Mascot	Wispy bed, pebble conglomerate (Pb Cg)	+ 190'	1 to 3 foot limestone bed with wavy straticulate black or green shale partings. Pebble conglomerate below 1 to 2 foot limestone bed with numerous shell fragments and limestone pebbles.

Formation	Marker Name	Distance from Chert Matrix	Remarks
Kingsport	Chert Matrix (Ce Mtx)	0	Mascot-Kingsport contact. Abundant sandgrains in light gray fine dolomite. Locally, sandgrains in a matrix of white chert. Characteristic black shale parting at top.
Kingsport	108 bed	-133'	Oolitic blue to brownish bedded chert and green shale. Chert may be absent.
Kingsport	28 bed	-219'	Contact between dark Grasselli dolomite and underlying limestone. Rare sandgrains and local greenish shale.
Kingsport	S sandgrains (S Sgs)	-317'	Rare to abundant sandgrains usually with abundant shale partings. 4 feet above the base of the Kingsport fm.
Longview	T bed	-321 to -332	Light to medium gray fine dolomite. Chert at top, rare sandgrains at base, locally limestone.
Longview	U bed	-332 to -352	Light grey, dense limestone or medium to coarse dolomite.
Longview	V bed	-352 to -367	Interbedded light grey fine dolomite and limestone. Abundant chert nodules and sandgrains.

Drilling

The location of drill holes is shown on maps AX-TENN-B-247a (property); B-1261 (surface geology) and B-1259 (structural contour). The spacing of holes was based on the premise that an orebody of the Jefferson City mine type may be present in the Talbott area. A 1/4 mile grid was employed in the south-

west half of the area. This spacing was expanded to a 1/2 mile in the northeast half.

Nine of the twenty-three holes (T-36 through T-58) encountered sphalerite mineralization of sub ore grade in the favorable horizons of the Kingsport and Longview formations. Data from the mineralized holes are tabulated below:

Hole No.	Footage	Thickness	% Zn	Stratigraphic Horizon
T-37	1320-28	8'	Scattered traces	S sandgrain -1 to + 7'
	1328-29	1'	6% Estimated	S " -1 to - 2'
	1338-40	2'	4% "	U Bed
T-42	1188-90	2'	8.83%	S sandgrain + 83 to 85'
	1190-93	3'	1% Estimated	S " + 80 to 83'
T-47	1778-87	9'	1.79%	S " + 69 to 78'
T-48	977-88	11'	2.05%	S " + 59 to 70'
	1013-25	12'	1.68%	S " + 22 to 34'
T-49	1190-91	1'	3% Estimated	U Bed
T-51	863-67	4'	2.44%	U Bed
T-55	666-97	-	Local traces	S sandgrain -21 to + 10'
T-56	714-40	-	" "	S sandgrain + 14 to 40'
T-58	1216-18	2'	2% Estimated	S sandgrain + 84 to 86'

Cross sections (looking NE) I, II and III and longitudinal sections (looking NW) 1, 2 and 3 show the structural and stratigraphic relationships. Drill logs are included in the map pocket.

Conclusions and Recommendations

The current drilling program with wide spaced holes does not provide a conclusive answer to the question of ore occurrences in the Talbott area. However, the evidence is strong in support of the view that the area recently tested is similar to the more thoroughly tested areas of earlier studies. The chances for an ore occurrence within the project area of the

magnitude of the Jefferson City mine appear to be remote. Small orebodies may exist in the area but they are unattractive targets in view of the depth to the ore horizon.

The data collected in the Talbott area in the last five years lead to the recommendation that the Company's interest in the area be terminated.

Contract No. Idm-E936

Dear Mr. Laurence:

It is noted that final payment on the cited project was made prematurely.

Final payments, or reasonable portions thereof, should be retained until receipt of the Operator's Final Report and the release of the Government's Final Audit or Report of Review. This should apply to all contracts.

Sincerely yours,

George C. Selfridge

Chairman, Operating Committee (GCS)

Re: Docket No. DMEA-4119 (Zinc)
The New Jersey Zinc Company
Talbot Area
Jefferson and Hamblen Counties,
Tennessee
Contract No. Idm-E936

Dear Mr. Laurence:

In accord with your memorandum of March 19, we are enclosing the original and five copies of a proposed Termination Agreement for the cited contract, signed by the Administrator.

If the agreement meets with your approval, please present it to the Operator for signature and, when completed, distribute the copies in the usual manner. Otherwise, and if any proposed changes should lie beyond your delegated authority, all copies should be returned to us with your comments.

We are fully in accord with your recommendation for termination of the project. Obviously, the drilling has been disappointing and probably the Operator has reasonable grounds for its contention that an ore body of large magnitude is not present within the area tested.

Nevertheless, a glance at the map shows that the area is far from having been disproven conclusively, certainly substantial areas are still untested. Furthermore, little drilling has been done near "mineralized" holes.

8623

All in all, it is within the realm of possibility that this company might, at some later date, desire to further test the properties in question. We have therefore covered such a contingency by Item "4" of the Termination Agreement. In the event that the Operator should desire to do more drilling in this area at a later date, it is no more than fair that the Government should receive royalty on any production which might result therefrom.

Two extra copies of the agreement are enclosed for use of the Field Team.

Sincerely yours,

George C. Selfridge

Chairman, Operating Committee (GB)

Memorandum for the Files

From: Chief, Base Metals Division

Subject: Termination Agreement for Docket No. DMEA-4119, The New Jersey Zinc Company, Talbot Area, Jefferson and Hamblen Counties, Tennessee, Contract No. Idm-E936, Zinc.

The cited project is about half complete; 23 holes have been drilled with a total footage of 29,306.

Results have been negative, no commercial ore has been found, though a few holes showed indicative mineralization.

The Operator desires to terminate the project due to disappointing results, in which the Field Team concurs. Actually, it appears that the point is well taken and that further work would not have much chance of success; hence, we concur.

W. R. Griswold

W. R. Griswold

WRG/er
Copy to: Docket
Chron.

P.S. Of the ten holes which encountered a little zinc mineralization, six are worth noting, as follows:

#T36 - 1 ft. 6% Zn
2 ft. 4% Zn

#T37 - 1 ft. 6% Zn
2 ft. 4% Zn

#T42 - 2 ft. 10% Zn

#T47 - 9 ft. 1.79% Zn

#T48 - 11 ft. 2.05% Zn

#T51 - 4 ft. 2.44% Zn

We do not know the cut-off used by this company, but it is probably around 35 foot units (10 ft. of 3.5% ore, or equivalent).

The American Zinc Co. of Tennessee, who sink-float prior to grinding and flotation, use a cut-off of 25 foot units. Their crude ore has an average grade of around 3.4%, whereas the other operators are averaging around two per cent higher, or slightly better.

Memorandum

To: Associate Solicitor, Division of Mineral Resources

From: Chief, Base Metals Division

Subject: Preparation of Agreement of Mutual Termination for Docket No. DMEA-4119, New Jersey Zinc Company, Talbot Area, Jefferson and Hamblen Counties, Tennessee, Contract No. Idm-E969 (Zinc)

Will you kindly prepare an agreement for mutual termination of the cited contract.

The project is about half complete and has been so disappointing that it would appear futile to carry the work to conclusion.

We cannot certify nor do we have very good grounds to make a pseudo. The Operator plans to drop all of his options, as permitted under the contract. Nevertheless, in view of the size of the land area and the wide spacing of the drill holes, we cannot truly say that all of the ground was fully disproved. Theoretically, small ore bodies could exist which might someday be mined. It is not completely impossible that the Operator might someday reacquire such lands, or a part thereof, for further exploration.

Therefore, we request that, in the Agreement of Mutual Termination, you include something along the following format, which we have prepared by rephrasing Item (d) of the "Special Agreement Concerning Land" in the contract.

Mr. Rubin:
Please surname if O.K. & give to Mr. Dwyer

end

8623

"It is agreed that if the Operator or any of its subsidiaries should reacquire any interest, title, or equity in the lands under the Contract or any minerals produced therefrom, before the expiration of thirty years from the date of this Contract; any minerals produced therefrom shall be deemed subject to royalty payments from the date that the Operator or its subsidiaries reacquired such interest, title, or equity until the expiration of thirty years from the date of the Contract, or until the total net amount contributed by the Government without interest is fully repaid, whichever occurs first."

March 19, 1957

Memorandum

To: Operating Committee, DMEA - Washington

From: DMEA Field Team, Region V - Knoxville, Tennessee

Subject: DMEA-4119, Idm-E936(zinc) The New Jersey Zinc Co. N. Y. Talbot Area, Jefferson & Hamblen Counties, Tennessee

Enclosed are four copies of the latest interim report, and four copies of a letter from the Operator, requesting termination of the project.

Although it is entirely possible that ore-grade material may be present in the areas between the drill holes, it seems unlikely that mineable orebodies would be found by more closely spaced drilling. Attempts by other companies to extend the Jefferson City district eastward, by drilling updip from the Talbot area, have also failed to locate mineable orebodies. Thus, we are in agreement with the recommendation in the interim report, and we request permission to terminate by mutual agreement, effective February 28, 1957.

As it seems possible that a pseudo-certification may be recommended, this termination should be treated as though it might be certified.

Knoxville, Tenn.

Mr. R. A. Laurence, Executive Officer
DMEA Field Team, Region V
Room 13, Post Office Building
Knoxville, Tennessee

Subject: DMEA 4119; IDM E-936 (ZINC)
THE NEW JERSEY ZINC COMPANY
MORRISTOWN SECTOR - TALBOTT AREA
JEFFERSON-HAMBLEN COUNTIES, TENNESSEE

Dear Mr. Laurence:

Drilling on the Talbot Area, Morristown Sector Project was terminated on February 21, 1957, with the completion of drill hole T-58. Twenty-three holes were drilled on this project during the period from April 1956 to February 1957 for a total of 29,306 feet. Of these holes, 11 were drilled on 1/4 mile spacing and 12 were drilled on a 1/2 mile face centered grid. The drill holes spanned a strike distance of 19,800 feet and a maximum dip distance of 4,600 feet.

Nine drill holes encountered zinc mineralization within the Kingsport-Longview favorable horizon. No particular stratigraphic zone seemed to be persistently mineralized, and no ore grade mineralization was found.

A gross test of the project area has been accomplished. Although spacing of the holes is on too wide a spread to show conclusively that no ore is present, it now appears very unlikely that an ore occurrence of the magnitude of the Jefferson City Mine is present within the area tested. The results of the wide spaced drilling do not appear to warrant more closely spaced drilling at this time.

This is to advise you of our desire to terminate the subject DMEA Contract (No. E-936) with no further exploration drilling. We consider that the results of the project were unsuccessful, no ore having been found. A final report on the project is in preparation.

Yours very truly,

THE NEW JERSEY ZINC COMPANY

From: Chief, Base Metals Division

Subject: Preparation of Amendment No. 2 for The New Jersey Zinc Company, Talbot Area, Jefferson and Hamblen Counties, Tennessee, Contract No. Idm-R936, Docket No. DMRA-4119

Will you kindly prepare an Amendment No. 2 to the cited contract which will make the following changes:

The fourth paragraph of "Exhibit A" of the contract contains the statement:

"All mineralized core will be properly sampled and assayed for zinc and iron."

This should be amended to read:

"All significantly mineralized core will be properly sampled and assayed for zinc."

Also, on page 2 of "Exhibit A", under the heading of fixed unit costs, we have an item:

300 samples to be assayed at $1.50 per sample.

This should be amended to read:

450 samples to be assayed at $1.00 per sample.

DMEA APPLICATIONS
THE NEW JERSEY ZINC COMPANY

Re: Docket DMEA - 4153 Tenn.
" " - 4177 Tenn.
" " - 4178 Virginia
" " - 4173 "
" " - 4174 "

Dear Sir:

In our DMEA contracts, No. 4119, Talbott Area, Tenn., and No. 4126, Strawberry Plains Area, Tenn. paragraph 4 states "All mineralized core will be properly sampled and assayed for zinc and iron".

We do not normally make a practice of assaying for iron, and suggest, therefore, that the requirements for iron assays be deleted from the above listed Docket Applications pending. This matter was discussed with Mr. Robt. A. Laurence, and he indicated that the Government does not care whether iron is determined or not. Also we do not want to be obligated to assay all core, but only that core which is significantly mineralized.

Wednesday, 11 April, we mailed in to Mr. Mittendorf the completed DMEA 4119 and 4126 contracts.

Very truly yours,

John B. Canada

From: Executive Officer, DMEA - Region V - Knoxville, Tenn.

Subject: DMEA-4119 (zinc) The New Jersey Zinc Co., New York, N.Y.
Morristown Sector, Talbot Area, Jefferson Counties, Tenn.

I have just been advised, in a telephone call from Mr. Hoagland, New Jersey Zinc Company geologist at Jefferson City, Tennessee that the Company has signed the subject exploration contract, and that drilling will probably begin next Monday.

One drill is available, and will be moved onto the Miller Tract. Additional drill rigs will be available within the next 30 to 60 days. E. J. Longyear Company will be the drilling contractor.

An amendment will be prepared in the near future to include the Jess Cline tract in the contract. The Company has negotiated a 2-year extension of this option, to June 1, 1958.

Tennessee

Dear Mr. Goodwin:

As requested in your application of January 6, 1956, we are enclosing the original and five copies of a contract, signed by the Government, for the cited exploration project. The complete contract includes the contract form, Annex I, Exhibit "A", and two maps.

If the contract meets with your approval please sign all copies, retain the "Operator's Copy" for your files, and transmit the others to this office. In case it should not meet with your approval, please return all copies to us with your comments.

There are certain points which require clarification, as follows:

1. Annex I lists Roy O. Breeden and his wife, and an option contract by them appears in the file, but the map does not show the area owned by them.

2. The map shows an area owned by one Jess Cline as covered by the contract, but Annex I does not list such land, nor is an option contract by him included in the file.

3. The map and Annex I include the land of one John Carter, but the file does not contain a copy of his option contract.

4. There is present in the file a copy of an option contract by one Helen Quarles James and her husband, but their land is not listed in Annex I nor shown on the map.

These discrepancies need not delay the execution of the contract. Upon receipt of the signed contract copies from you, we shall advise Mr. Robert A. Lawrence, Executive Officer, Region V, to contact your Tennessee office regarding an amendment making the necessary adjustments.

We must point out that much of the preliminary drilling shown for "Area B" on the maps falls within ground which is not included in the contract. Such ground is classified as "area in which R/I option negotiations are in progress". However, the Government cannot participate in the cost of such drilling until option negotiations have been completed and the lands incorporated into the contract by amendment.

Sincerely yours,

C. O. Mittenhof (for)

Administrator

Memorandum

To: Chairman, Operating Committee

From: Chief, Base Metals Division

Subject: Docket No. DMEA-4119, The New Jersey Zinc Company, Talbot Area, Jefferson and Hamblen Counties, Tennessee, Zinc.

and

Docket No. DMEA-4126, The New Jersey Zinc Company, Strawberry Plains Area, Jefferson, Sevier and Knox Counties, Tennessee, Zinc.

The cited contracts have been rewritten, the significant changes being:

Short form to long form contract.

Contiguous lands, if picked up within 10 years, must go into contract, instead of 30 years.

Drilling reimbursements broken into classifications, instead of having a lumped average.

Overall cost changes.

DMEA-4119 - (60,000 feet of drilling, with extra water expense) reduced from $2.67 to $2.60 per foot.

DMEA-4126 - (90,000 feet of drilling, holes a little deeper but no water expense) reduced from $2.58 to $2.53 per foot.

In both contracts, the descriptive features of Exhibit "A" have been made more detailed.

Docket

Memorandum

To: Mr. C. O. Mittendorf, Administrator, DMEA - Washington

From: D.M.E.A. Field Team, Region V - Knoxville, Tennessee

Subject: Time for Repayment on Tennessee and Virginia Zinc Contracts.

As you know, we now have, in various stages of processing, 8 applications, from two different companies for drilling in Tennessee and Virginia for replacement-type zinc sulfide ore bodies. Total cost of these proposals is $1,611,677.00. In addition, we anticipate receipt of two more applications, for areas in Tennessee. A map being mailed under separate cover shows the locations of all these proposals, as well as mines now in operation and mills in operation or under construction, and of the current project, DMEA-2546.

Although we haven't any ore reserve figures to prove it, it is our opinion that none of the ore in any of these exploration areas is likely to be mined within the next ten years. The contract now in force with American Zinc Company of Tennessee (Idm-E676) contains a clause providing 30 years for repayment. It is our understanding that this term was based on the Operator's statement that they have now at least 30 years' reserves at their present milling capacity.

We recommended 30 years for the first two New Jersey Zinc projects because they are in the same general area as the West New Market project of American Zinc and one almost adjoins it. We do not know what New Jersey Zinc's reserves at Jefferson City are, but they are obviously quite substantial. American Zinc's new application is in this same area and should be treated the same as the others.

The second pair of New Jersey Zinc applications (DMEA-4153 and 4177) are in an outlying district. Although that Company is now developing a mine and building a mill at Flat Gap, in Hancock County, Tennessee the distance of these new applications from Flat Gap and the absence of railroads makes it seem quite probable that no ore discovered at Independence

or Edison is likely to be developed until enough is discovered to justify a separate mill in that area.

In Virginia, New Jersey Zinc's Beaver Creek application (DMRA-4172) is in an entirely new area. It is only four miles from a railroad, but is 100 miles by rail from the Company's Austinville mill. The other two Virginia areas (DMRA-4173 and 4174) proposed by this Company are 6 and 10 miles respectively from the railroad, and 18 and 25 miles from Austinville by road and 65 and 80 miles by rail.

It is our opinion that all these Tennessee applications, and probably the Virginia ones (if approved) as well, should be subject to a longer period of repayment than 10 years. We have no way of knowing what a correct period should be, in order to be consistent with contracts in other regions. Sales of crushed and ground limestone as by-products of zinc ore milling should also be subject to royalty repayment.

March 16, 1956

Memorandum

To: Associate Solicitor, Division of Mineral Resources

From: Chief, Base Metals Division

Subject: Docket No. DMEA-4119, The New Jersey Zinc Company, Talbot Area, Jefferson and Hamblen Counties, Tennessee, Zinc

and

Docket No. DMEA-4126, The New Jersey Zinc Company, Strawberry Plains Area, Jefferson, Sevier and Knox Counties, Tennessee, Zinc.

It is believed that certain changes are desirable before the cited contract is submitted to the Applicant for signature.

These changes are:

Rewrite Exhibit "A" as per pencilled changes.

Also, since the Applicant may sell its waste products from the milling of the zinc ores, we desire to secure royalty on any such sales. Therefore, we should use some such phrase as follows:

"Minerals", as that word is used in Article 7(b), includes limestone and dolomite products produced in processing ore."

Likewise, a possibility exists that this company might see fit to give its mine operating with extra-favorable smelter schedules. In this manner they would increase the mine gross income base for depletion purposes with reference to income tax exemptions. Therefore, to protect the Government in such a case, we should add to the typed notation at the bottom of Article 11, something as follows:

"However, if the Gross income from mining operations for percentage depletion purposes is income for determination, should show a higher rate of return on ore and concentrate mine, such return would be used as basis for calculating royalty payable to the Government."

March 13, 1956

Memorandum

To: Mr. George C. Selfridge, Chairman
Operating Committee

From: Jay L. Chambers, Chief
Contract Administration and Audit Division

Subject: Docket Nos. DMEA-4119 and DMEA-4126, The New Jersey Zinc Co.

I have surnamed project DMEA-4119, New Jersey Zinc Company contract in the amount of $160,950.00, however, I would like to call your attention to the following facts.

This project is largely in Jefferson County, Tennessee. It calls for 60,000 feet of diamond drilling at $2.67 a foot and 500 samples at $1.50 a sample. There is no differentiation between core and noncore drilling.

I have also surnamed project DMEA-4126, New Jersey Zinc Company contract in the amount of $232,950.00. The contract calls for 90,000 feet of diamond drilling at $2.58 a foot and 500 samples at $1.50 a sample. A good part of this work is also in Jefferson County, Tennessee. There is no differentiation made between core and noncore drilling.

These two contracts are on a repay period of 30 years, but there is no justification for the files.

In connection, your attention is called to Docket No. DMEA-2546 with the American Zinc Company of Tennessee who also is drilling in Jefferson County, Tennessee. This contract calls for 450,000 feet of core and noncore drilling at unit costs of $2.26 a foot for core and $1.26 for noncore. It appears to me, in the first place, that there should be a possible differentiation between core and noncore drilling in the first two contracts because the company may use noncore drilling for a large amount of the footage. Also, there were no bids required on the first two contracts to establish a footage cost.

It might be worthwhile to compare the stipulations in the contract with American Zinc Company of Tennessee, Docket No. DMEA-2546, with the stipulations in the two contracts with the New Jersey Zinc Company, Docket Nos. DMEA-4119 and DMEA-4126.

3/12/56

Memorandum for the Files

From: Chief, Base Metals Division

Subject: Docket No. DMEA-4119, The New Jersey Zinc Company, Talbot Area, Jefferson and Hamblen Counties, Tennessee, Zinc.

It will be noted that the allotted cost of diamond drilling under the contract for this project is $2.67 per foot. This price was arrived at without the submittal of competitive bids and represents some reduction of the Applicant's proposed cost figures.

The figure of $2.67 for all costs except assaying is closely in line with those presently being obtained by American Zinc Company of Tennessee under Docket No. DMEA-2546. In the latter case we have nine drills working (three shift basis) and we may assume that figures on this high-footage, highly efficient operation are just about bedrock.

We are advised by Mr. Laurence that the American Zinc Company of Tennessee costs are presently running about $2.51 per foot.

GEOLOGICAL SURVEY
WASHINGTON 25, D. C.

February 16, 1956

Memorandum

To: W. R. Griswold, Defense Minerals Exploration Administration

From: W. P. Williams, U. S. Geological Survey

Subject: Review of Field Team Report, DMEA 4119 (zinc), The New Jersey Zinc Company, Morristown Sector, Talbot Area, Jefferson and Hamblen Counties, Tennessee.

After conference with field personnel of the applicant company, the Field Team recommends approval of a short form DMEA contract which would provide for 60,000 feet of drilling to be completed in 15 months, at a unit cost of $2.783 per foot.

Neither the applicant nor the Field Team have submitted maps showing the location of the proposed holes. The Field Team states that "precise sites . . . of initial drilling will depend largely on access." Such procedure would give the Operator a free hand in choosing hole locations. Such is probably permissible in this case, however, as the applicant is a large, successful, responsible mining company.

Inasmuch as the New Jersey Zinc Company is now entering into the DMEA program for the first time on a large scale, I recommend that the Field Team deliver personally to the Operator any forthcoming DMEA contracts so that complete mutual understanding is achieved at the outset concerning contract provisions, monthly reports, interim inspections, and other considerations.

The subject property has many favorable features with regard to possible new ore deposits. I agree with the Field Team that DMEA participation in exploration on the property is warranted.

Memorandum

To: W. R. Griswold, Defense Minerals Exploration Administration

From: J. W. Pennington, Branch of Base Metals

Subject: Review of Field Team Examination Report, Docket No. DMEA 4119 (zinc) New Jersey Zinc Co., New York, Morristown Sector, Talbot Area, Jefferson and Hamblen Counties, Tennessee

The Field Examination Report of this property by Robert A. Laurence, Geological Survey, and Victor J. Lynch, Bureau of Mines, has been reviewed.

The exploration proposed for this property consists of 60,000 feet of drilling, approximately 50 holes, to be done in 15 months. The cost of drilling is estimated at $2.783 per foot. The holes will be at 1,320 foot intervals, 1,320 feet apart and approximately perpendicular to the strike of the ore zone. The results of the drilling will be plotted on a 1" = 660 foot scale map.

This area offers an excellent target for exploration work and is favorably situated for supply of labor, materials, and other necessary items.

The details of the DMEA contracts are not familiar enough to me to permit any comments. However, I do agree with the recommendations of the Field Team that the application should be approved.

February 10, 1956

Memorandum

To: Operating Committee, DMEA, Washington, D. C.

From: Field Team, DMEA, Regiom V, Knoxville, Tennessee

Subject: DMEA-4119 and DMEA-4126 (Zinc) Tennessee
The New Jersey Zinc Company

In our field examination report on this contract, we neglected to discuss the item of non-coring drilling.

No non-coring drilling (except in overburden) is planned in connection with this project. Experience in the district has shown that in most areas, non-coring drilling is about as expensive as coring, and it is standard practice in this district to core from the top of rock. Drilling on this contract will be with Longyear's wire-line core drill.

However, in the new application which American Zinc Company is preparing, for the area adjacent to the Strawberry Plains area on the north, where there is a considerable thickness of shale above the Knox dolomite, it is possible that there will be a considerable footage of non-coring drilling. Discussion with American Zinc Company geologists, based on their talks with Joy Manufacturing Company, suggests that the non-coring drilling will be much nearer the cost of core-drilling than the $1.26 figure used in DMEA-2546, which was apparently based on southeast Missouri data.

We recommend that no specific cost should be set in the New Jersey Zinc contracts for non-coring drilling, as there are no data on which to base such a cost. The New Jersey Zinc Company geologists stated specifically that no non-coring drilling is planned, and that they have considered this item thoroughly, in connection with earlier drilling projects in East Tennessee, and rejected it as unsuitable.

Subject: Docket No. DMEA-4119, New Jersey Zinc Company, Talbot Area, Jefferson and Hamblen Counties, Tennessee

Docket No. DMEA-4126, New Jersey Zinc Company, Strawberry Plains Area, Jefferson, Sevier and Knox Counties, Tennessee

On February 7, a phone conversation was had with Mr. Laurence, Region V, relative to details of the cited applications. We advised him that we would require maps that indicated at least the initial drilling outlines. We also advised him that, if unit cost short form contracts were desired, we would have to eliminate the "Contingency" items from the cost estimates.

Mr. Laurence requested that we check this matter with the New York Office of the Applicant. This was done and after consultation with Mr. J. B. Canada, engineer for the company, it was decided that the contracts would be set up on a unit cost base, eliminating the "Contingency" items.

Morristown Sector, Talbot Area, Jefferson and Hamblen Counties, Tennessee

DMEA-4126 (Zinc), New Jersey Zinc Company, New York, N.Y.
Mascot Sector, Strawberry Plains Area, Jefferson, Sevier and Knox Counties, Tennessee

Enclosed are four copies of a Field Team Report which includes both the subject applications. We think both these areas are well worth exploring and we strongly recommend approval of both contracts, as outlined in the report.

The recommendations outlined in our report are acceptable to the applicant. In order to save time in preparing a contract, we suggest that any changes should be discussed directly with Mr. S. S. Goodwin, Vice-President of New Jersey Zinc Company, instead of re-referring them back to us to discuss with the Applicant's field staff., before the contract is actually drafted and submitted for our review. Items which should be presented for Mr. Goodwin's consideration are:

1. The royalty repayment period, if it is to be more than ten years.

2. Any provision for contingencies other than the 4% figure provided in the report.

3. Short-form vs long-form contract. Because of the saving in paper work, the Company (and the Field Team) would prefer the short form contract.

4. Any other items which would make appreciable changes in the unit costs as presented in our report.

FIELD EXAMINATION REPORT

RECEIVED
FEB - 3 1956

DMEA-4119 (Zinc) and DMEA-4126 (Zinc)

The New Jersey Zinc Company, New York, N. Y.

Morristown Sector, Talbot Area,
Jefferson and Hamblen Counties, Tenn.
and
Mascot Sector, Strawberry Plains Area,
Jefferson, Sevier and Knox Counties, Tenn.

The writers spent one-half day in conference with Mr. Johnson Crawford, Superintendent of Tennessee operations and Mr. Al Hoagland, Geologist, New Jersey Zinc Company, on January 30, 1956.

Approval of both applications is recommended. They should be separate contracts.

The areas discussed in this report are adequately described in the applications. Geologic data are based on published maps of the Federal and State Geological Surveys, with modifications by Company Geologists. We did not visit the project sites during this review, as we are quite familiar with both areas and have long considered them as logical areas for probable extensions of the Mascot-Jefferson City zinc district.

Few mining districts are better situated as to accessibility, availability of supplies, labor, etc. The substantial discoveries of ore in this district by New Jersey Zinc Company, American Zinc Company, and U. S. Steel Corporation since 1946, are eloquent testimony as to the probability of additional discoveries.

The applicant originally planned each of these as 2-year projects. However, they now propose to begin with 3 drills, 12 shifts each per week at the Morristown area, and complete the 60,000 feet of

drilling (approximately 50 holes) in 15 months. They would simultaneously begin at Strawberry Plains with 4 drills, 12 shifts each per week and complete 90,000 feet of drilling there (also approximately 50 holes) in 20 months.

We do not consider permanent storage of core to be a proper function of DMEA, and therefore suggest elimination of that item from both contracts. The Company men say they will assume this cost, as it is their policy to preserve all cores. All core which is to be assayed is split longitudinally, one half being retained in the core box, and no sample exceeds 5 feet of core length. Ore is considered to be "50 units of zinc," i. e. 10 feet of 5%, 12 1/2 feet of 4%, etc. In general, 4% is the lower limit, but this is not a firm cut-off.

The Company has included an item of approximately 4% of all costs for contingencies. This is chiefly to provide for a possible increase in the contracter's charge for drilling in the event of a general increase in labor rates or other costs, as provided in the Company's contracts with E. J. Longyear and Company.

Following our conference, we have agreed to submit the following recommended costs, and the Company geologists are submitting the same figures to their New York office:

Item	DMEA-4119 (Talbot)	DMEA-4126 (Strawberry Plains)
Time of project	15 Mos.	20 Mos.
Total Footage	60,000 ft.	90,000 ft.
Contract drilling	$141,000	$207,000
Geologist- full time	7,500	10,000
Geologist, half time	3,750	5,000
Surveying, drafting, etc.	4,375	6,000
Core boxes, supplies, etc.	1,500	1,675
Transportation	560	720
Assays (500 @ $1.50)	750	750
Accounting, Secretarial	450	600
Workmens Compensation (1%)	156	210
Insurance, Payroll tax (5%)	780	1,050
Contingencies (4%)	6,179	8,995
TOTAL	$167,000	$242,000
Unit Cost, per ft.	$2.783	$2.689

The difference of 0.094 per foot can be ascribed to:

(1) 10¢ per foot water cost at Talbot, where surface water is practically non-existent. This is partly offset by an average of 4¢ per foot at Strawberry Plains due to greater average depth of holes there.

(2) Use of one more drill at Strawberry Plains is justified by the greater average depth of the holes. Also, area "A" at Talbot will be in a more advanced stage of exploration than the Strawberry Plains area, and selection of hole locations at Talbot will be dependent upon completion of current holes to a greater extent than at Strawberry Plains.

The difference between these unit costs and those in effect on Idm-E676, DMEA-2546 (American Zinc Co.) may be explained thus:

1. Idm-E676 was based on costs estimated nearly four years ago.

2. American Zinc Company is absorbing an increase in the drilling contract rate which recently became effective.

3. Different operating practice, salary rates, etc., of the two companies.

4. American Zinc underestimated the time required; the recent 6-month extension will result in their paying 100% of the geologists' and engineers' salaries for that period. It is probable that American Zinc, at completion of the West New Market contract, will have paid 55% or more of the total cost.

We consider New Jersey Zinc Company's proposed costs to be entirely reasonable.

Records of holes already drilled in the area by New Jersey Zinc Company will be provided. These holes are shown on maps accompanying the application, with standard symbols for ore, shine, and blank holes. Records of holes drilled by other companies are not available, although locations of these holes are shown on the maps, where known.

It is our understanding, from conversation with geologists of the other companies at the time (1940 to 1943), that shallow drilling in the Talbot Area located considerable mineralized ground but mostly of sub-ore grade. It is now thought that this area lies to the west of the extension of a not-too-well-defined structural trend suggested by results of post - 1946 drilling at Jefferson City and New Market, and that the area

outlined in this application is, therefore, more favorable. This is a reasonable inference.

The matter of a large-scale map was discussed. It is this Company's policy to plot results on a 1" = 660 ft. scale map such as Figure 3 in the DMEA-4119 application. They showed us such maps from their successful drilling project at Jefferson City and at Flat Gap, Hancock County, Tennessee. They prefer this scale for use in projects where hole spacing will be 1320 or 2640 feet. As this is standard practice with their Company, we do not think we should insist on a larger scale. A 1" = 660 ft map of the Strawberry Plains area will be prepared.

As to precise sites of initial drilling, these will depend largely on access. "Area A" of Figure 3, DMEA-4119 will be the site of beginning in the Talbot Area; holes will be at 1320-foot intervals on section lines 1320 feet apart and approximately perpendicular to the strike of the ore zone. In the Strawberry Plains area, initial drilling will be at 2640-foot intervals on section lines 2640 feet apart, with a fifth hole at the center of each square, beginning probably in the vicinity of section J-J', fig. 1, DMEA-4126 application.

We consider the usual 10-year period for royalty repayment to be too short for these projects, and recommend a 30-year period, as is provided in Idm-E676.

Based on experience with Idm-E676, we strongly recommend that these projects, if approved, be unit-cost, short-form contracts. However, if the long-form is used, then provisions for payment for contract drilling should not be on the average as figured in the application , but

on the specific costs for various depths, and other items, as quoted by the subcontractor in exhibit "B" to the DMEA-4119 application. Incidentally, it may be pointed out that this Company has had all its drilling in Tennessee done by E. J. Longyear Company, as a result of competitive bidding, and therefore has submitted only the figures of this contractor, in their application. Longyear's bid is reasonable, and their performance in the district has been comparable to that of other contractors operating in the area.

To sum up, we recommend:

1. Approval of both applications.

2. A short-form, unit-cost contract for DMEA-4119, for 60,000 feet of drilling in 15 months, at a unit cost of $2.783 per foot.

3. A short-form, unit-cost contract for DMEA-4126, for 90,000 feet of drilling in 20 months at a unit cost of $2.689 per foot.

4. A repayment period of 30 years, instead of the usual ten.

Memorandum

To: Operating Committee, DMEA - Washington

From: DMEA Field Team, Region V - Knoxville, Tennessee

Subject: DMEA-4119 and DMEA-4126 (Zinc) The New Jersey Zinc Co.

The applicant did not designate any names for the two areas involved in these applications. To avoid confusion, we suggest that they be referenced as follows:

DMEA-4119, Talbot Area, Jefferson and Hamblen Counties, Tenn.

DMEA-4126, Strawberry Plains Area, Jefferson, Sevier and Knox Counties, Tennessee.

It is our understanding that American Zinc Company of Tennessee plans to submit an application for an area north of Strawberry Plains, Tennessee in the near future.

Dear Mr. Lawrence:

Referring to the cited application, we are enclosing copies of memorandums dated January 13 and 16, 1956, by O. M. Bishop, BOM, and W. P. Williams, USGS, respectively. The application is being referred to you for review and for such field examination and consultation as you consider necessary.

The Applicant has stated that it is ready to proceed with the project, subject to our approval, and requests an early consideration on our part. Hence, will you kindly let us have your recommendations as soon as possible.

Sincerely yours,

George C. Selfridge
Chairman, Operating Committee (GCS)

Dear Mr. Goodwin:

Your application for Government assistance to explore the cited group of properties has been reviewed by the Base Metals Division of the Defense Minerals Exploration Administration and has been referred for a field examination to:

Mr. Robert A. Lawrence
Executive Officer
DMEA Field Team, Region V
Room 13, Post Office Building
Knoxville 2, Tennessee

The Regional Office will contact your Tennessee office at an early date. Any assistance that your company may give the members of the Field Team during the examination will be greatly appreciated.

Sincerely yours,

C. O. Mittenhoff

Administrator

GEOLOGICAL SURVEY
WASHINGTON 25, D. C.

RECEIVED
JAN 18 1956

January 16, 1956

Memorandum

To: W. R. Griswold, Defense Minerals Exploration Administration

From: W. P. Williams, U. S. Geological Survey

Subject: Review of application, DMEA 4119 (zinc), The New Jersey Zinc Company, Northeast Jefferson City District, Jefferson and Hamblen Counties, Tennessee.

The applicant proposes to diamond drill for sphalerite ore bodies in the Kingsport formation of Ordovician age. The project is described by the applicant, and rightly so, as an effort to discover a northeast extension of the well-known Jefferson City zinc district.

The proposed project would consist of an initial stage of drilling on 1/4 mile and 1/2 mile spacing. The initial stage would be followed by a second stage, on closer centers, with the holes located near previously-drilled mineralized holes or holes that encountered favorable geologic conditions. Depths of the holes would range from 800 feet to as much as 1,700 feet. The estimated total cost of the project is $170,000.00. The property is on strike with producing mines which are about 2 miles southwest.

Past exploration on the property consists of some old churn drill holes by American Zinc Company and 20 diamond drill holes by the applicant. The applicant states the drilling showed mineralization, and one hole penetrated ore.

The land under consideration appears to warrant further exploration with DMEA participation. The applicant has not, however, submitted maps or data that show the previous drilling and the results. Neither are the locations of proposed holes shown on a map.

I recommend that the application be referred to the Field Team. An examining team could obtain the necessary information and could discuss with the applicant such details as hole locations and spacing. If a DMEA contract appears appropriate to the Field Team also it would be advisable for the applicant to prepare large-scale maps of the exploration area. Such maps could show completed and proposed hole locations and could be brought up-to-date each month during the ensuing exploration project.

Re: DMEA-4119 (Zinc; $170,000)
The New Jersey Zinc Company
2244 acre property, 3 miles
northeast of Jefferson City
Jefferson and Hamblen
Counties, Tennessee

Memorandum

To: W. R. Griswold, DMEA

From: O. M. Bishop, Branch of Base Metals

Subject: Referenced Application by The New Jersey Zinc Company, Received by DMEA January 9, 1956

I have reviewed the application covering 60,000 feet of diamond drill exploration on some 2,244 acres of optioned property three miles northeast of Jefferson City in Jefferson and Hamblen Counties, Tennessee.

Although the property has produced no ore, limited exploration in the extreme northwest part of the mine indicated mineralization and one hole showed 26 feet of 4.4 percent zinc. The present proposal provides for exploration of the Kingsport formation to the immediate northeast of the T.C.I., Athletic, Coy, Jarnagin and New Jersey Zinc mines. The presence of the favorable Northport formation in apparent allignment with known orebodies in an area of fracturing and faulting together with mineralization indicated in drilling to date and by geochemical prospecting point to the reasonableness of the program outlined.

I recommend that the application be referred to the field team for their consideration and recommendations. The estimated costs are reasonable although I should think an allowance for 150 assays might be on the low side.

Re: Exploration Assistance

Gentlemen:

The receipt of your application dated (Undated) for exploration assistance under the Defense Production Act of 1950, as amended, is hereby acknowledged.

Your application has been assigned Docket Number DMEA 4119 and referred to the Base Metals Division.

Kindly identify all future correspondence relating to your application by this docket number.

Sincerely yours,

Robert E. Adams, Chief
